Letter from the Director

Dear New Yorkers,

I am proud that New York City creates more opportunities each year for healthy eating in every stage of life, from nutrition education in preschools, to farm fresh food in senior centers, and everything in between. Within the wide variety of food system initiatives, our focus remains the same: ensuring that all New Yorkers have equitable access to nutritious, affordable, and sustainable food. The work of the many City agencies that play a role in improving our food system is highlighted in the pages that follow. This year's Food Metrics Report is a brief update on our progress to continue to build a just and healthy food system for New York City's residents.

We appreciate the support of Mayor Bill de Blasio, Deputy Mayor Herminia Palacio, Deputy Mayor Alicia Glen, and the many Commissioners and agency staff who create and support policies and programs that move our food system towards its goals of equity.

A handwritten signature in black ink that reads "Barbara Turk".

Sincerely,
Barbara J. Turk
Director, Food Policy

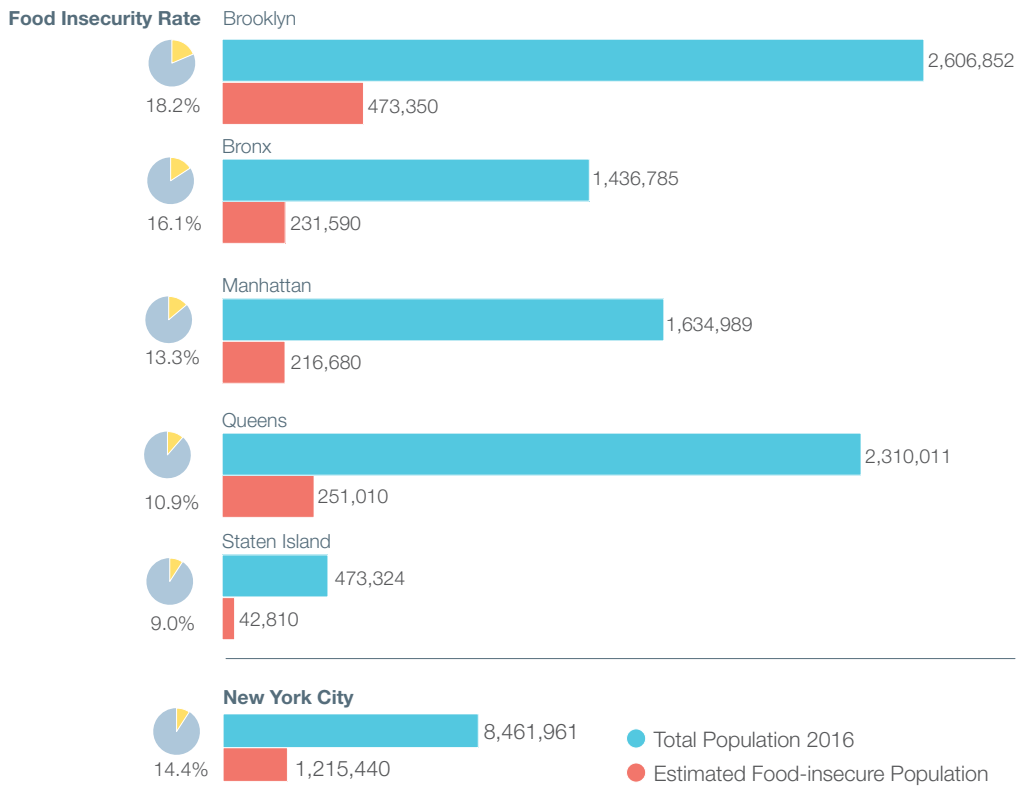

Addressing Food Insecurity in New York City

Food insecurity is the lack of access, at times, to enough nutritionally adequate food for an active, healthy life for all members of a household. Food insecure families may worry that food will run out before they have enough money to buy more, eat less than they should, or be unable to afford to eat balanced meals. New York City is working towards becoming a city where everyone has enough nutritious food to eat, through a range of initiatives in partnership with community-based and nonprofit organizations. Understanding that poverty is the root cause of food insecurity, New York City has taken action to increase New Yorkers' earning potential and reduce the cost of living. Each year, the City designates tax-levied dollars for the City's own emergency food program, making New York City a leader in prioritizing food access for those most in need. The City has worked to make it easier to access benefits programs by investing in SNAP outreach, language access services, and mobile platforms that streamline processes.

Food Insecurity

The United States Department of Agriculture (USDA) monitors the extent and severity of food insecurity in U.S. households through an annual, nationally representative survey. In New York City, the meal gap also helps to provide an estimation of the extent of food insecurity. There were 1.2 million New Yorkers who were food insecure during 2016.

Each year, the City designates City Tax-Levied (CTL) dollars for the City’s own emergency food program, making New York City a leader in prioritizing food access for those most in need. The City has made it easier to access benefits program by investing in SNAP outreach, language access services, and mobile platforms that streamline processes.

Meal Gap

Feeding America has done analyses to project national food insecurity data to the county level and identify where there is a meal gap, the meals missing from the homes of families and individuals struggling with food insecurity. In 2016 (the latest available data), New York City was missing 207.7 million meals.

Meal Gap By Borough & Citywide

Borough	Meal Gap, 2018
Bronx	39.6M
Brooklyn	80.9M
Manhattan	37.0M
Queens	42.9M
Staten Island	7.3M
Citywide	207.7M

Emergency Food Assistance Program

The Human Resources Administration's (HRA) Emergency Food Assistance Program (EFAP) seeks to improve the nutrition of New Yorkers who are experiencing food insecurity. Food items meet the NYC food standards and are selected based on the nutritional, cultural and dietary needs of the diverse communities of NYC.

The City of New York has made it a priority to invest City Tax-Levied dollars into an emergency food program, thereby enhancing the capacity to supply more food and funding for providers. We continue to expand our support of the city's emergency food providers with additional purchases of nutritious food, and are working to connect food insecure New Yorkers with food assistance benefits. As of July 1, 2018, EFAP provides food and funding to 538 individual emergency food programs (food pantries and community kitchens).

In Fiscal Year (FY) 2018, EFAP distributed 17.5 million pounds of shelf stable and frozen foods. In the same period, EFAP programs reported serving more than 14.7 million people (this is a self-reported, duplicated statistic).

SNAP

The Supplemental Nutrition Assistance Program (SNAP) program serves 1.6 million New Yorkers each month, or 20 percent of the population on average each month.

Measure and distribution of SNAP recipients

SNAP Recipients, September 2017

Borough	Total
Bronx	466,294
Brooklyn	589,673
Manhattan	236,194
Queens	301,373
Staten Island	62,116
Citywide	1,655,650

SNAP Benefits for Seniors

Through a partnership started in September 2014, HRA, the Robin Hood Foundation, Benefits Data Trust (BDT), and DFTA committed to reaching and enrolling eligible seniors in the SNAP program. The average monthly number of SNAP recipients age 65 and older for FY 2018 is 331,337. The 2016 SNAP participation rate (the percent receiving benefits among those who were eligible) for seniors was 70.9%.

While higher than the national average, the City's participation rate could be even higher among seniors, were it not for several barriers, including limited mobility, lack of knowledge, and perceived stigma associated with accepting government assistance. Employing BDT's proven model of targeted outreach and application assistance, using enrollment data for the five boroughs and working with HRA to complement our outreach, the New York Benefits Center implemented a phone and direct mail campaign for seniors who are not receiving SNAP. When seniors respond to this targeted outreach, highly-trained staff guide them through the process from beginning to end, offering application assistance, document support, and follow-up services. Since its inception, this program has successfully conducted outreach to nearly 386,000 likely eligible seniors, and submitted over 32,000 SNAP applications through ACCESS HRA.

SNAP Outreach Programs

HRA's Supplemental Nutrition Assistance Program (SNAP) Support Services educates the public about SNAP benefits in order to maximize the City's use of available federal programs to increase purchasing power of low-income New Yorkers. SNAP Support Services provides SNAP trainings and presentations, prescreens potentially eligible applicants, and assists with the SNAP application process. In FY 2017, SNAP Support Services conducted outreach at 373 unduplicated sites and three facilitated enrollment (POS) sites. This program also conducted presentations at various community-based, human services, and government organizations, and monitored SNAP outreach activity at 156 community based organizations. The budget for this program for FY 2017 was \$2,089,917.

HRA has worked to make applying for benefits programs easy and accessible to all New Yorkers through their initiative ACCESS HRA. Clients and members of the public interacting with HRA and the Department of Social Services (DSS) can access information and services in multiple languages online, in person, or telephonically. The Access HRA mobile app is also available in seven languages, and provides access to clients' HRA cases.

The Department of Social Services (DSS) Office of Advocacy and Outreach (OAO) conducts targeted outreach campaigns to organizations serving specific populations – including senior citizens, LGBTQI, persons with disabilities and immigrant communities – to expand benefits access to SNAP benefits through ACCESS HRA (AHRA). OAO conducts presentations, and attends resource fairs, farmers' markets, and other events to promote SNAP awareness and increase engagement.

In FY 2018, OAO facilitated AHRA trainings for Community-Based Organization (CBO) staff that provide SNAP enrollment services to their clients. The training provides an overview of AHRA, including on-line SNAP application and recertification, mobile document uploads, and the Provider Portal that allows CBOs to help applicants and recipients with their cases outside of HRA centers. In FY2018, AHRA trainings and presentations were conducted for over 2,760 participants.

OAO collaborates with selected partner CBOs and City agencies, including NYCHA and the DOE, to provide on-site DSS's outreach liaisons at each partner site to provide additional information about benefits and to provide enrollment assistance via AHRA at these locations.

Food Assistance Collaborative

In 2014, the Director of Food Policy began convening the New York City Food Assistance Collaborative with support from the Helmsley Charitable Trust. This ongoing initiative brings together the major suppliers to the city's food pantries and soup kitchens to increase equity and efficiency in food distribution by better coordinating their efforts.

This past year, the Collaborative identified six significantly underserved neighborhoods and built the capacity of local pantries to distribute more food there. It made grants to expand over 20 pantries (e.g., new refrigerators, renovated storage rooms) and will provide an additional 5 million pounds of food annually to bring these areas up to the citywide average distribution levels. This work extended the group's prior success building capacity in an initial set of 12 underserved neighborhoods.

The Collaborative also launched Pantry Forward, an intensive effort to build organizational resilience at key pantries across the city. It provides large pantries – which are often volunteer-run and quite fragile – with strategic support to ensure they remain active for years to come (e.g., placing new board members, securing new space). This work will also serve as a model for providing broader organizational support to pantries across the city.

The Collaborative continued the rollout of Plentiful, the free, app-based reservation system for pantry clients. The Collaborative built Plentiful to help families find nearby pantries and make an appointment to get food without waiting in line. It is now used at over 200 pantries across the city, and has served over 220,952 unique households. Over the past year, Plentiful became available in nine languages, and added new features such as mapping and automatic SMS responses.

Finally, in response to pantry directors who were struggling to serve ever-growing immigrant populations, the Collaborative developed pantry materials in nine languages to help serve these clients. These materials have already helped dozens of pantries better communicate with their clients and ensure they feel welcome and respected.

Improving City Food Procurement and Service

Agency Meals and Food Standards

New York City uses the scale of its food procurement and food service programs to purchase and provide food that meets high nutrition standards, and where possible, is sourced regionally.

The Agency Standards for Meals/Snacks Purchased and Served (Standards) were established by Mayoral Executive Order 122 of 2008 and set nutrition requirements for the foods purchased and meals and snacks served by City agencies. The Standards are an integral part of the City's effort to increase access to healthy foods by improving the nutritional quality of food served in City programs, and are reviewed and revised every three years.

The Standards apply to more than 238 million meals and snacks served per year in 11 City agencies, and across a variety of settings, including senior centers, homeless shelters, public hospitals and care facilities, child care centers, schools, after school programs, and correctional facilities. In FY 2018, New York City served more than 171 million meals and snacks in schools. Agencies have an average compliance rate of 93% with the standards. See Appendix H for full data on Agency Food Standards.

of school buildings

The New York City Department of Education (DOE) has the largest school food service program in the United States, with about \$200 million in annual food purchases and around 950,000 daily meals served. The DOE's Office of SchoolFood (SchoolFood) continues to prioritize the procurement of local and fresh food, as well as the sourcing of sustainable and healthy products. SchoolFood only serves antibiotic-free chicken products and 100% beef burgers in schools. SchoolFood strives to offer a completely locally-sourced menu every Thursday, known as New York Thursdays. In FY 2018, DOE spent \$26.7 million on produce, milk, and yogurt that was locally or regionally grown or produced (not including distribution costs). Of that, \$8.4 million was spent on produce and \$18.3 million on milk and yogurt.

In 2015, SchoolFood began offering Breakfast in the Classroom (BIC) to students. By the end of the 2017-2018 school year, 412 school buildings offered Breakfast in the Classroom.

SchoolFood is devoted to achieving the City's mission that no child in our city goes hungry, even when school is not in session. In FY 2019, the summer meals program served over 7.3 million meals at 1,300 locations. SchoolFood partnered with other City agencies, including the Mayor's Office of Public Engagement and the NYPD, to offer free meals to any child under the age of 18 at local libraries, play streets, parks, pools, select neighborhood schools, Police Athletic League, NYCHA sites, Harmony Days, and within some communities through the use of our summer food trucks.

Investments have been made in infrastructure and technology to drive student engagement and improve the student dining experience. SchoolFood has committed to enhancing the cafeteria experience of each child, and

began an enhancement program to renovate some of the school lunch rooms. In FY 2018, 26 buildings received cafeteria enhancements, including renovations, new furniture, and updated serving lines. The SchoolFood app, one of the most recent technological innovations, provides the most up-to-date menus at any given time. This summer, the app was available in 9 languages to assist families in finding the closest summer meals site. To date, SchoolFood has opened 1,503 salad bars in 1,121 of the City's 1,500 school buildings and offers salad bar-based recipes as part of its efforts to provide healthy vegetables to students. SchoolFood began a scratch cooking pilot in fall 2018 at a school in the Bronx.

For the most recent contract year, there were 2,216 beverage vending machines and 1,008 snack machines. Their gross sales during that period were \$3.2 million and \$5.0 million, respectively. In 2018, students used the 1,073 water jets in 836 NYC school buildings.

Salad Bars in Hospitals

NYC Health + Hospitals offers prepackaged and prepared salads to order at on-site food vendors in nine facilities: in Manhattan at Metropolitan Hospital Center, Bellevue, and Coler Goldwater Hospital; in the Bronx at North Central Bronx Hospital; in Queens at Queens and Elmhurst Hospitals; in Brooklyn at Kings County, Coney Island, and Woodhull Hospitals; and in Staten Island at Seaview Hospital. There are also salad bars at Kings County Hospital and Woodhull Hospital in Brooklyn.

Bottled Water Expenditures

DCAS purchases bottled water primarily for routine service to agency offices in multiple City-owned or leased facilities throughout the city. DCAS expenditures on water for FY 2018 were \$344,662 for bottled water in 5 gallon demijohns (including cooler rental) and \$298,803 for single-serve bottles.

Increasing Healthy Food Access and Awareness

Fruit and Vegetable Consumption

New York City's work to improve healthy food access is focused on addressing the disparities between neighborhoods. This includes initiatives to increase access to healthy options at retail stores, increase New Yorkers' purchasing power for fruits and vegetables, and provide education and resources for preparing balanced meals at home. Increased intake of fruits and vegetables is associated with decreased risk of hypertension, heart disease, and stroke. The City's goal, established in OneNYC in April 2015, is to increase the average number of daily servings of fruits and vegetables that adult New Yorkers eat by 25 percent over the next twenty years. In 2017, mean fruit and vegetable consumption* was 2.5 servings/day, an increase from 2016, when it was 2.3 servings/day.

Photo Credit: Anna Bessendorf

* In 2017, mean fruit and vegetable consumption was assessed by DOHMH using two questions (fruit and vegetables asked separately), while in previous years, it was asked in one collective question

Sugary Drink Consumption

Sugary drink consumption is associated with weight gain, cavities and increased risk of chronic diseases, such as type 2 diabetes and heart disease. The New York City Department of Health and Mental Hygiene (DOHMH) has implemented many strategies aimed at reducing sugary drink consumption among New Yorkers, including media campaigns, nutrition education, programs to make healthy beverages more accessible and unhealthy beverages less ubiquitous, and policies to ensure sugary drinks aren't served to children in schools and child care centers.

As part of Take Care New York 2020, DOHMH set a goal to reduce the percent of adult New Yorkers who consume one or more sugary drinks per day to 19% by 2020. Among New York City adults, there was a steady decline in sugary drink consumption between 2007 and 2013; however, between 2013 and 2017, the prevalence stagnated (23% in 2017). Sugary drink consumption was higher among Black and Latino adult New Yorkers than among White and Asian/Pacific Islander residents every year from 2007-2017 (in 2017, Black: 35%, Latino: 28%, White: 14%, Asian/Pacific Islander: 15%).

Among public high school students, the prevalence of sugary drink consumption decreased between 2013 and 2017 (42% in 2013 and 35% in 2017 consumed one or more per day). Despite an overall decline among this age group, sugary drink consumption remains higher among Black and Latino students than among White and Asian students (In 2017, Black: 42%, Latino: 38%, White: 26%, Asian: 21%). Among children ages 6-12, the prevalence dropped between 2009- 2015 (44% vs. 36%). Despite an overall decline among NYC children ages 6 to 12, sugary drink consumption remains higher among Black and Latino children than White children (In 2015, Black: 48%, Latino: 41%, White: 20%). Among the youngest New Yorkers (ages 0 to 5 years), Black and Latino children had three to four times higher rates of sugary drink consumption than White children (In 2015, Black: 28%, Latino: 31%, White: 8%).

City-Sponsored Nutrition Education Programs

The New York City Department of Health and Mental Hygiene (DOHMH) aims to promote and make easier healthy dietary behaviors, particularly in communities at risk for poorer health outcomes. DOHMH's programs combine direct education to build on low-income New Yorkers' nutrition and culinary knowledge and skills with environmental supports to make choosing healthy foods easier.

Farmers' Market Based Nutrition Education

DOHMH's Stellar Farmers' Market program provides free, bilingual nutrition workshops and cooking demonstrations for adults at select farmers' markets that serve low-income communities across the city. These workshops promote the benefits of a diet rich in fruits and vegetables and empower New Yorkers to prepare healthy meals using fresh produce. Over 13,560 workshops and cooking demonstrations have been held, reaching over 331,900 participants since the program's inception in 2009.

Funding for FY 2017 was \$562,991 and was provided in part by the United States Department of Agriculture's (USDA) SNAP Nutrition Education and Obesity Prevention program (SNAP-Ed), through a contract with the New York State Department of Health. The program also distributed Health Bucks to more than 33,000 workshop participants in FY 2018.

To build capacity for conducting nutrition education programming, DOHMH provided support and technical assistance to community-based organizations to conduct nutrition education at farmers' markets. Seven community organizations conducted over 565 workshops at nine farmers' markets serving low-income communities, reaching over 3,150 participants. \$140,600 in funding for this capacity building program in FY 2018 was obtained through the Centers for Disease Control 1422 grant.

Child Care-Based Nutrition Education

Eat Well Play Hard in Child Care Settings (EWPHCCS) employs registered dietitians from DOHMH to support child care centers with creating and enhancing environments that support healthy eating and physical activity practices. Dietitians, in addition to providing technical assistance on menu improvements and nutrition policy development, provide nutrition training and workshops to child care staff, parents, and children in centers serving low-income families. EWPHCCS has worked with 659 child care centers and has reached over 87,720 children, parents, and staff since its inception in 2008. Funding for FY 2018 was \$1,288,800 and was provided by the United States Department of Agriculture's (USDA) SNAP Nutrition Education and Obesity Prevention program (SNAP-Ed), through a contract with the New York State Department of Health.

EWPHCCS also implements the Farm to Preschool Program, which connects child care centers to venues selling fresh, locally grown fruits and vegetables so that families can more easily purchase local produce and centers have the opportunity to purchase local produce wholesale for incorporation into meals and snacks served to children. The program also helps young children develop healthy eating habits early on, by supporting gardening at the preschools and providing on-site nutrition education and cooking demonstrations for parents, staff, and community members.

In FY 2018, DOHMH provided over 550 workshops to over 2,060 participants. Twelve preschools participated from across the city in FY 2018.

Neighborhood-Based Nutrition Education

In 2018, DOHMH continued promoting and welcoming residents to the recently launched Neighborhood Health Action Centers (formerly known as the District Public Health Offices) in Harlem, the South Bronx and Brooklyn. Action Centers are part of NYC's plan to promote health equity and reduce health disparities at the neighborhood level. Neighborhood Health Action Centers provide space for community-based organizations and Health Department staff to work together to advance neighborhood health. Neighborhood Health Action Centers have played a critical role in promoting healthy eating by providing nutrition education to their surrounding communities. Activities have included working with schools to promote healthy and equitable school environments, supporting Community Health Workers to provide nutrition education and training community cooks to lead cooking classes in community kitchens, tours and demonstrations at farmers' markets in the community; and promoting healthy eating in neighborhoods through community summits, festivals, and events. Funding for these activities comes from a combination of City Tax-Levied (CTL) dollars and grant dollars. Funding for the Bronx Neighborhood Action Centers in FY 2018 was \$490,000. Funding for the Brooklyn Neighborhood Action Centers in FY 2018 was \$184,000 (CTL) and \$208,000 (Grants). Funding for the Harlem Neighborhood Health Action Centers in FY 2018 was \$437,000 (CTL) and \$394,000 (Grants). In addition to the Neighborhood Health Action Centers, \$593,000 (CTL) and \$45,000 (Grants) in funding was allocated for citywide programs, such as Shop Healthy, in the new Bureau of Systems Partnerships under the Center for Health Equity.

Nutrition Program for the Elderly, DFTA

There are over 280 senior centers in NYC that are funded by the NYC Department for the Aging (DFTA). They are required to conduct nutrition education lectures throughout the year, and held nearly 2,000 lectures in 2018. DFTA Nutritionists work with the centers to identify qualified presenters and relevant topics. Nutritionists also provide one session a year to each center. In 2015, DFTA established a nutrition education internship program, allowing for graduate nutrition students and dietetic interns to provide nutrition education lectures at centers throughout the five boroughs.

Farmers' Markets

Farmers' markets play an important role in addressing disparities in access to healthy foods by providing an additional healthy retail outlet in the neighborhoods they serve. They connect consumers to local and regional farmers and producers that provide farm fresh produce, dairy, meats, and other goods. In New York City, we strive to make farmers' markets more accessible to every New Yorker. There are a number of programs that help consumers increase their purchasing power at farmers' markets, such as SNAP, WIC, the

Senior Farmers' Market Nutrition Program at the federal level, and Health Bucks at the local level.

There were 141 farmers' markets across the five boroughs in FY 2018. 120 of these markets accepted EBT. The number of farmers' markets in New York City has increased from 79 in FY 2007 to 141 in FY 2018.

Greenmarket, a program of GrowNYC, is the largest farmers' market operator in the city. It operates 51 market locations throughout the five boroughs. In 2018, customers spent over \$1 million in SNAP benefits at GrowNYC Greenmarkets.

GrowNYC also operates Youthmarket farm stands to employ neighborhood youth, providing them with jobs and business skills. In 2017, 70 young people were employed at a Youthmarket. There are currently 18 Youthmarkets throughout all five boroughs.

For a list of the number of Greenmarkets in NYC, as well as the average number of producers at each market sorted by borough, see Appendix K.

*The total number of open markets fluctuates throughout the season.

Health Bucks

Health Bucks are two-dollar coupons that are redeemable for fresh fruits and vegetables at all NYC farmers' markets year-round. They provide low-income New Yorkers with additional purchasing power to buy fresh, locally-grown produce at all 141 farmers' markets across NYC. Health Bucks are distributed as a SNAP incentive – for every \$5 spent in SNAP benefits (food stamps) at the market, beneficiaries receive a \$2 Health Bucks coupon – and through community-based organizations as part of nutrition and health programming.

In 2017, over 265,000 Health Bucks were distributed at 111 farmers' markets as a SNAP incentive, over 80,000 Health Bucks were distributed by more than 460 community-based organizations, and nearly 5,000 Health Bucks were distributed through a pharmacy-based fruit and vegetable prescription pilot program. Over 160,000 Health Bucks were distributed by more than 20 organizations and elected officials that purchased them. In total, over 515,000 Health Bucks worth more than \$1,030,000 in fruits and vegetables were distributed, putting fresh, locally-grown produce into the hands of thousands of low-income New Yorkers.

Over
515,000
Health Bucks
worth more than
\$1,030,000
in fruits and vegetables
were distributed

Green Carts

Green Carts are mobile vending carts that sell fresh fruits and vegetables in low-income neighborhoods with low rates of fruit and vegetable consumption. As of September 2018, there were 286 Green Carts with currently active permits, of which 19 may be using EBT machines. For a full list of information on Green Cart permits, and EBT machines, see Appendix I. For a list of information on Green Cart violations by location, see Appendix J.

Grocery Stores in NYC

Grocery stores and supermarkets provide fundamental resources to City neighborhoods—both providing access to healthy foods as well as bringing jobs and economic activity. The New York City Department of City Planning (DCP) analyzes supermarket data from the New York State Department of Agriculture and Markets Division of Food Safety & Inspection’s Retail Food Stores dataset in order to assess the presence of supermarkets in New York City neighborhoods and identify trends over time. Since 2011, New York City has seen significant growth in grocery stores and supermarkets, totaling approximately 309 more stores and 1,275,000 additional square feet.

A standard of 30,000 square feet of grocery stores and supermarkets for every 10,000 residents is used to determine the number of stores necessary to meet the needs of an area. This standard was created by DCP and is based upon national standards identified by the Urban Land Institute, adapted for New York City. This indication exclusively measures neighborhood capacity to support additional supermarkets without consideration of additional factors, such as income, health, or car ownership. Based on this standard, almost all Community Districts remain underserved by full-service grocery stores.

The analysis determined that, in 2011, the needs of most Community Districts were not being met by the existing grocery stores and supermarkets. Using the same calculation in 2018, this story is largely the same. Almost all Community Districts remain underserved by the grocery stores and supermarkets within them. That being said, however, many Community Districts have seen growth in fresh food retail, and have gotten closer to meeting the needs of the residents within them. Overall, the city has seen significant growth in grocery stores and supermarkets since 2011, totaling approximately 309 more stores and 1,275,000 additional square feet. In order to meet the entire city’s need of 30,000 square feet per 10,000 people, there would have to be almost 380 more 30,000 square foot stores constructed in 2018. That number is down from the 393 30,000 square foot stores needed in 2011. Even as population grew, the number of grocery stores grew more quickly, and 30 Community Districts are doing better than they were in 2011. This analysis needs to be used carefully, however, since the methodology for counting stores may have varied considerably between the two analysis years. It is possible that differences in definition led to some stores being considered fresh food retail in one year but not the other.

FRESH

The Food Retail Expansion to Support Health program (FRESH) was established in 2009, and is administered by the New York City Economic Development Corporation (NYCEDC) and the Department of City Planning, in partnership with the Mayor's Office and the Department of Health and Mental Hygiene.

Access to affordable, healthy food is an essential component of neighborhood development, yet many low-income areas continue to be underserved by full-scale grocery stores, due to high acquisition, development, and operating costs. The FRESH program mitigates costs by providing zoning and financial incentives to eligible grocery store operators and developers in areas with limited availability of fresh food.

Since 2009, 36 FRESH projects have been approved for zoning and/or financial incentives. Two more FRESH supermarkets projects were completed this year. A total of sixteen of these projects have been completed and are now open to the public. These projects provide approximately 844,000 square feet of new or renovated grocery store space, are estimated to retain more than 600 jobs and create over 1800 new jobs, and represent an investment of approximately \$140 million across the City.

For a full list of stores receiving FRESH benefits, see Appendix F.

Shop Healthy NYC

Shop Healthy NYC is a DOHMH initiative to support neighborhood-based sustainable changes in access to healthy food. To ensure a long-term impact on food access, Shop Healthy NYC aims to influence supply and demand by reaching out to food retailers, including bodegas and grocery stores, to increase stock and promotion of healthy foods. It also engages community residents to support participating retailers in their efforts to increase neighborhood access to healthy foods.

As of August 2018, 1,380 stores have agreed to promote healthier items as part of Shop Healthy. Approximately 771 of those stores have also agreed to increase access to healthier foods. All Shop Healthy establishments are located in 15 zip codes throughout the City, with new neighborhoods added, Central Harlem in Manhattan and Ocean Hill in Brooklyn.

Supporting a Just and Sustainable Food System

In 2015, New York City committed in One New York: The Plan for a Strong and Just City (OneNYC) to build a more sustainable, resilient, and just food system, in which more of our food comes from regional and local growers, producers, and manufacturers. To achieve those goals, we are investing in infrastructure to strengthen our regional food system, supporting community-based gardening and greening efforts, healthy eating, community development, and encouraging the growth of local food producers and manufacturers to create good job opportunities in the food sector.

NYC Watershed Agricultural Program

Much of New York City's drinking water comes from reservoirs in upstate watersheds adjacent to productive farmland. To preserve the quality of its source water, the City's Department of Environmental Protection (DEP), in partnership with the Watershed Agricultural Council (WAC), promotes agricultural best management practices (BMPs). The goal of the Watershed Agricultural Program (WAP) is to support and maintain well-managed family farms as beneficial land uses, to advance water quality protection and rural economic viability.

Since 1992, the program has developed over 445 Whole Farm Plans on watershed farms and implemented over 7,500 BMPs that reduce agricultural pollution and protect water quality. These management practices are funded by the City in the form of technical and financial assistance to watershed farmers. In FY 2018, farmers received \$2,494,612 in City financial support, which was used to fund the installation of BMPs on 79 farms with 25,343 acres of watershed farmland. For a list of participating farms by county and type, see Appendix B.

Hunts Point Food Distribution Center

NYCEDC, in partnership with the Mayor's Office of Recovery and Resiliency (ORR), is investing \$45 million to protect residents and food supply in Hunts Point. This effort emerged from the U.S. Department of Housing and Urban Development's (HUD) Rebuild by Design competition to build resiliency through new ideas and collaborations in the Sandy-affected communities. A proposal for Hunts Point was selected as one of six finalists of the Rebuild by Design competition and awarded \$45 million to advance a resilient energy pilot project.

The Hunts Point Resiliency Project seeks to protect the peninsula, including the Hunts Point Food Distribution Center (FDC), from power outages due to flooding and other emergency events. The FDC distributes over 4.5 billion pounds of food each year to the New York metropolitan region and supports 8,500 direct jobs. A food supply study completed by NYCEDC and ORR in 2016 found that the FDC is the largest single geographic cluster of food distribution in NYC by volume. A quarter of New York City's produce, 35% of the City's meat, and 45% of the City's fish pass through the HPFDC annually and end up in independent restaurants, supermarkets, bodegas, and food markets across the five boroughs.

Community and School Gardens

GreenThumb

GreenThumb, a program of the New York City Department of Parks & Recreation (NYC Parks), is the largest community gardening program in the country. GreenThumb administers, educates, and supports NYC's community gardens and urban farms, while preserving open space through programming, material support, and technical assistance. Located in all five NYC boroughs, GreenThumb gardens are hubs of neighborhood activity and pride. These green spaces offer a myriad of environmental, economic and social benefits, such as improving air quality, bio-diversity, and the well-being of residents and neighborhoods. In 2018, there were 530 GreenThumb registered gardens in New York City.

For a list of community gardens located on NYC Parks land and/or registered and licensed by GreenThumb, see Appendix C. Information about the size of each garden and whether or not it engages in food production is included to the extent it is available.

Grow to Learn NYC

Grow to Learn NYC is an initiative of GrowNYC, in partnership with NYC Parks' GreenThumb and the Department of Education, with the mission to inspire, facilitate, and promote the creation of a garden in every public school in New York City. Schools work directly with Grow to Learn NYC to ensure that their garden programs are sustainable, responsive to their communities, and transformative for student learning in the cafeteria, the classroom and beyond. The citywide school garden initiative provides the material and financial support to get schools growing, provides technical and professional development support to school gardeners, and makes the scale of New York City manageable by bringing together partnerships and resources into one convenient central location.

As of 2018, 735 schools have registered garden projects with Grow to Learn NYC. For a list of registered Grow to Learn NYC School gardens, see Appendix D.

Garden to Café

With the support of the NYC DOE's Office of SchoolFood, the Garden to Café Program (GTC) helps develop a student's curiosity about food, nutrition, and the various ways food can be grown, through school gardens, lunchtime tastings, and classroom lessons. The program has continued to expand and has over 140 schools registered. At present, from elementary to high school, including students with special needs (D75) and those who are at-risk (D79), the Garden to Café Program serves 70,790 students in NYC's public and charter schools in all five boroughs.

The program received two Farm to School grants for the 2018-2019 school year from the USDA and the NYS Department of Agriculture, which will expand the program's reach to an additional nearly 70 schools. The state grant will also enable the program to connect NYS farmers with SchoolFood food distributors.

Farms at NYCHA

Farms at NYCHA is part of Building Healthy Communities (BHC), a citywide partnership designed to improve health outcomes in 12 neighborhoods in New York City. The farms expand healthy food access, provide youth workforce and leadership development, and promote sustainable and connected public housing communities. Farms are constructed and operated by 18-to 24-year-old NYCHA residents who are Green City Force (GCF) AmeriCorps Members. In the past three years, 95 young public housing residents have been trained in farm management and community programming, further connecting public housing communities to the expanding field of urban agriculture. The weekly farm stands and other community programming events feature healthy cooking demonstrations led by Corps Members, who receive culinary training from the Sylvia Center. Corps Members also participate in an annual Iron Chef cooking competition.

In 2017, with four farms in full operation, Farms at NYCHA distributed 19,920 pounds of fresh produce grown by and for residents at four farm sites, and collected 5,502 pounds of food scraps for composting. Two new farms were constructed in the past year; the six farms are located at Red Hook West Houses, Howard Houses in Brownsville, Bay View Houses in Canarsie, Wagner Houses in East Harlem, Forest Houses in the South Bronx, and Mariner's Harbor in Staten Island. During the first five months of the 2018 farm season, the farms yielded 25,019 pounds of fresh produce, a 25 percent increase over the same period during the previous year.

Food Manufacturing

NYCEDC recognizes and supports the role of food entrepreneurship in growing our economy and creating job opportunities for New Yorkers. NYCEDC's footprint in this space features several culinary incubators, including Hot Bread Kitchen (HBK) Incubates, Brooklyn FoodWorks, Jamaica FEASTS, and the NYCHA Food Business Pathways Program. The incubators provide spaces for aspiring chefs, bakers, and business owners to prototype their products, perfect their craft, and learn essential food business skills. With access to shared commercial kitchen equipment and complimentary programming, these spaces have helped catapult hundreds of NYC-based food entrepreneurs into business .

NYCEDC has invested over \$15 million to renovate the BAT Annex Building in order to foster growth-stage food manufacturing tenants. The 55,000 square foot building can accommodate customizable spaces for up to 10 food manufacturing tenants. Further, by designating the entire Annex to food manufacturing, NYCEDC created a network of similar businesses at similar stages of growth that are able to share ideas and resources. There are currently four food manufacturers producing in the Annex, making everything from Japanese salad dressing to ice cream cones. NYCEDC is engaged in advanced leasing conversations with more than five other small manufacturers. For a full list of manufacturing projects, see Appendix E.

NYCHA Food Business Pathways

The New York City Housing Authority's (NYCHA) Food Business Pathways program (FBP) is a free business training program that helps NYCHA and NYCHA Section 8 residents start and grow food businesses in New York City. FBP is a collaboration between NYC Small Business Services (SBS), NYC Economic Development Corporation (NYCEDC), Citi Community Development, Hot Bread Kitchen, Start Small Think Big, and NYCHA's Office of Resident Economic Empowerment & Sustainability (REES).

Residents who are accepted into the program receive a free, intensive 10-week business course tailored specifically to meet the needs of NYCHA entrepreneurs, with free licenses and permits, group and one-on-one business coaching designed to move their businesses forward, and assistance securing commercial kitchen space to operate their food businesses. Food Business Pathways has awarded free commercial kitchen incubator space grants to 38 businesses.

Since the program's launch in January 2015, 271 NYCHA public housing residents and Section 8 voucher holders graduated from the program across nine cohorts and have created 172 registered businesses.

Food Sector Job Training Programs

The NYC Department of Small Business Services (SBS) provides training grants to New York City small business owners with the goal of helping businesses and their employees succeed. Agricultural and food-related businesses can take advantage of these programs, such as the Customized Training Program, which affords businesses with professional training services that can reduce employee turnover and increase productivity. By saving businesses money and increasing economic opportunities for employees, the training program eliminates the financial constraints that keep businesses from investing in staff development, by co-investing to cover 60-70% of eligible training costs. In 2018, SBS provided a food sector business with a Customized Training grant, which served 39 trainees. For detailed information on SBS food-related job trainings, see Appendix G.

Zero Waste

In 2015, Mayor Bill de Blasio released One New York: The Plan for a Strong and Just City (OneNYC), a groundbreaking effort to address New York City's long-term challenges. In this plan, the City made an ambitious commitment to become a worldwide leader in solid waste management by achieving the goal of sending zero waste to landfills by 2030.

NYC has the largest curbside organics collection program in the country. Over 3.5 million New Yorkers receive curbside organics collection service, and the NYC Department of Sanitation (DSNY) has collected more than 90,000 tons of organic waste. Most of the organic waste collected in NYC is used to create compost, but NYC has begun sending organics to the digester eggs at Newtown Creek Wastewater Resource Recovery Facility, where by 2019 the anaerobic digestion process will turn scraps into clean renewable natural biogas to heat and power buildings in New York City.

For those not yet receiving curbside organics pickup, DSNY offers drop-off sites for organic waste. There are now more than 100 food scrap drop-off sites in addition to at least 225 community composting sites across the five boroughs. Food scrap drop-off sites divert over 2,532 tons of organic waste per year and community compost sites provide an additional opportunity for organics recycling in all five boroughs.

Photo Credit: Vitaliy Piltser

The NYC Department of Sanitation partners with the NYC Department of Education to help children become zero-waste ambassadors—and vastly reduce the garbage their schools generate. Launched in 2016, Zero Waste Schools is a collaborative pilot program dedicated to creating a culture of recycling and sustainability throughout the school system and identifying best practices that can be expanded citywide. More than 50,000 students and 8,000 teachers, administrators, kitchen and custodial staff have been educated through the Zero Waste Schools program.

As of August 2018, certain New York City businesses are required by law to separate their organic waste for beneficial use (composting, anaerobic digestion or other). This includes food service establishments in hotels with 150 or more rooms; food vendors in arenas and stadiums with seating for at least 15,000 people; food manufacturers with a floor area of at least 25,000 square feet (SF), and food wholesalers with a floor area of at least 20,000 SF, food service establishments with a floor area of at least 15,000 SF, food service establishments that are part of a chain of 100 or more locations in the city of New York, and retail food stores with a floor area of at least 25,000 SF.

In 2018, DSNY's Foundation for New York's Strongest launched its Microgrant Program for city businesses looking to address food waste in their operations. The grants, worth up to \$15,000, aim to help New York City businesses prevent, recycle or recover their food waste. Proposals were accepted from businesses that are working towards food waste prevention, recovery and recycling solutions already, or wish to get started. The Foundation awarded grants of up to \$2,000, plus technical advisory and other goods and services valued at up to \$15,000 per grantee, to four small NYC businesses that demonstrated a need for support and a viable implementation plan.

Acknowledgements

We would like to thank the staff that collected and analyzed data for the 2017 food metrics, as well as report writing, coordination, layout, and design.

About NYC Food Policy

The Office of the Director of Food Policy works to advance the City's efforts to increase food security, promote access to and awareness of healthy food, and support economic opportunity and environmental sustainability in the food system. To do this, the office coordinates multiple City agencies and offices that work on food programs or policies, as well as partners with the many advocates and nonprofit organizations working in food. For more information about NYC Food Policy, visit nyc.gov/nycfood.

Appendix A - Metrics Summary Chart

Metric #	Metric	Progress as of 2016	Progress as of 2017	Progress as of 2018
1	Number of Farms Participating in the DEP Watershed Agricultural Program; Annual Dollar Amount of City Financial Support Received by Participating Farms	79 farms on 26,734 acres; \$3,807,622	55 farms on 19,799 acres; \$1,096,768	79 farms with 25,343 acres; \$2,494,612
2	Total DOE expenditure on local milk, yogurt, and produce	\$20.1 million was spent on milk and yogurt, and \$7.8 million on produce (not including distribution costs)	\$19.1 million was spent on milk and yogurt, and \$6.9 million on produce (not including distribution costs)	\$26.7M on produce, milk and yogurt total: \$8.4M on produce and \$18.3 on milk and yogurt
3	Registered community gardens on city-owned property	535 community gardens not including DOE Grow to Learn gardens	545 community gardens not including DOE Grow to Learn gardens	530 community gardens not including DOE Grow to Learn gardens
4	Food manufacturers receiving monetary benefits from EDC or IDA	24 food manufacturers receiving a total of \$2,184,808	23 food manufacturers receiving a total of \$2,123,184	21 food manufacturers receiving a total of \$1,981,716
5	Truck and rail trips to or through Hunts Point Market	Fish Market: 144 daily straight trucks and tractor trailers (average) Meat Market: 121 daily straight trucks and tractor trailers (average) Produce Market: 197 straight trucks & 4 and 5 axel trucks (average) Produce Market: 3 - 4 railcars/day (average) Baldor Specialty Foods: 2 - 3 railcars/week (average)	Fish Market: 141 daily straight trucks and tractor trailers (average) Meat Market: 129 daily straight trucks and tractor trailers (average) Produce Market: 271 straight trucks & 4 and 5 axel trucks (average) Produce Market: 3 - 4 railcars/day (average) Baldor Specialty Foods: 2 - 3 railcars/week (average)	Fish Market: 137 daily straight trucks and tractor trailers (avg) Meat Market: 140 daily straight trucks and tractor trailers (avg) Produce Market: 270 straight trucks & 4 and 5 axel trucks (avg) Produce Market: 3 - 4 railcars/day (avg) Baldor Specialty Foods: 3-5 railcars/week (average)
6	Grocery store SF per capita and the number of grocery stores open during the past five calendar years	Not reported	Not reported	Not reported
7	Grocery stores receiving FRESH benefits	24 FRESH projects approved - 12 of which have been completed; providing approximately 660,000 square feet of new or renovated grocery store space; estimated to retain over 600 jobs and create over 1600 new jobs; and represents an investment of more than \$90 million across the City.	27 FRESH projects approved - 14 of which have been completed; providing approximately 737,000 square feet of new or renovated grocery store space; estimated to retain over 600 jobs and create over 1600 new jobs; and represents an investment of more than \$100 million across the City.	36 FRESH projects approved - 16 of which have been completed; providing approximately 844,000 square feet of new or renovated grocery store space; estimated to retain over 600 jobs, create over 1800 new jobs; and represents an investment of more than \$140 million across the City.
8	Number of stores participating in Shop Healthy	817 stores have agreed to promote their healthier items, with ~400 of them agreeing to work more intensively to increase access to healthier foods	1,117 stores have agreed to promote their healthier items, with ~608 of them agreeing to work more intensively to increase access to healthier foods	1,380 stores promoting healthier items; 771 stores agreeing to increase access; 15 zip codes have been served (new neighborhoods added - Central Harlem in Manhattan and Oceanhill in Brooklyn)
9	Number of food-related job training programs administered by SBS	428 trainees served by customized training grants	342 trainees served by customized training grants	39 trainees served by customized training grants
10	Number of meals served	245,546,270	241,660,204	244,768,012
11	Compliance with food standards	Compliance rate = ~91%	Compliance rate= ~92.42%	Compliance rate= ~93%
12	Number of DOE vending machines and revenue generated	2,407 Beverage vending machines (\$3.8 million) and 875 snack machines (\$5.8 million) for the most recent contract year	2,240 beverage vending machines (\$3.5 million) and 923 snack machines (\$5.7 million) for the most recent contract year	2,216 Beverage Machines (\$3.2 million) 1,008 Snack Machines (\$5.0 million)
13	Number of seniors receiving SNAP benefits	308,890	321,214	331,337
14	Funds spent on SNAP enrollment by HRA	2015: 282 unduplicated sites; 3 facilitated enrollment sites. 62 presentations, total budget of \$2.4 million	2016: 308 unduplicated sites; 3 facilitated enrollment sites, total budget of \$2.7 million	FY 17: 373 unduplicated sites and 3 facilitated enrollment sites. The budget for FY 17 was \$2.0 million.

Metric #	Metric	Progress as of 2016	Progress as of 2017	Progress as of 2018
15	Funds spent on Nutrition Education by HRA	HRA no longer administers the SNAP-Ed program. New York State has assumed responsibility for this program by contracting directly with SNAP-Ed service providers.	HRA no longer administers the SNAP-Ed program. New York State has assumed responsibility for this program by contracting directly with SNAP-Ed service providers.	HRA no longer administers the SNAP-Ed program. New York State has assumed responsibility for this program by contracting directly with SNAP-Ed service providers.
15	Funds DOHMH Spends on Nutrition Education: Stellar Farmers' Market Initiative	\$562,991 for FY2016; 284,215 participants reached through 10,217 workshops/demos cumulatively since 2009	\$562,991 for FY2017; 293,855 participants reached through 11,886 workshops/demos cumulatively since 2009	\$562,991 for FY2017; 331,900 participants reached through 13,560 workshops/demos cumulatively since 2009
15	Funds DOHMH Spends on Nutrition Education: Eat Well Play Hard Program	\$1,134,64 for FY 2016 (includes funding for Farm to Preschool); 77,000 children/parents/staff at 533 child care centers cumulatively since 2008	\$1,134,64 for FY 2017 (includes funding for Farm to Preschool); 83,500 children/parents/staff at 577 child care centers cumulatively since 2008	\$1,288,800 for FY 2018 (includes funding for Farm to Preschool); 87,720 children/parents/staff at 659 child care centers
15	Funds DOHMH Spends on Nutrition Education: District Public Health Offices	Funding for Center for Health Equity for FY 2016: \$330,000 (Grants), and \$575,200 (City Tax Levy); Funding for Brooklyn DPHO for FY 2016: \$178,176 (Grants), and \$215,000 (City Tax Levy); Funding for Bronx DPHO for FY 2016: \$421,000 (CTL); Funding for East Harlem DPHO for FY 2016: \$392,213 (Grants), and \$404,000 (CTL).	Funding for Systems Partnership for FY 2017: \$125,000 (Grants), and \$600,165 (City Tax Levy); Funding for Brooklyn Neighborhood Health Action Center for FY 2017: \$262,000 (Grants), and \$177,000 (City Tax Levy); Funding for Bronx Neighborhood Health Action Center: \$485,000 (City Tax Levy); Funding for East Harlem Neighborhood Health Action Center for FY 2017: \$417,000 (Grants) and \$437,000 (City Tax Levy)	Funding for the Bronx Neighborhood Action Centers in FY 2018 was \$490,000. Funding for the Brooklyn Neighborhood Action Centers in FY 2018 was \$184,000 (CTL) and \$208,000 (Grants). Funding for the Harlem Neighborhood Health Action Centers in FY 2018 was \$437,000 (CTL) and \$394,000 (Grants)
16	Salad bars in schools	1,430 salad bars	1,476 salad bars	1,503 salad bars in 1,121 buildings.
16	Salad bars in NYC Health + Hospitals	Salads offered either prepackaged or prepared to order by on-site food vendors in nine facilities: in Manhattan at Metropolitan Hospital Center; in the Bronx at North Central Bronx Hospital; in Queens at Queens Hospital; in Brooklyn at Kings County, Coney Island, and Woodhull Hospitals; and in Staten Island at Seaview Hospital. There are also salad bars at Kings County Hospital and Woodhull Hospital in Brooklyn.	Salads offered either prepackaged or prepared to order by on-site food vendors in nine facilities: in Manhattan at Metropolitan Hospital Center and Coler Goldwater Hospital; in the Bronx at North Central Bronx Hospital; in Queens and Elmhurst Hospitals; in Brooklyn at Kings County, Coney Island, and Woodhull Hospitals; and in Staten Island at Seaview Hospital. There are also salad bars at Kings County Hospital and Woodhull Hospital in Brooklyn. * While the Department of Citywide Administrative Services (DCAS) participates in the implementation of the Standards as purchaser of food for numerous agencies, it does not submit a compliance report as information on items procured by DCAS is captured in the reports of other agencies

** Information is based on a review of food and beverages purchased and a one month sample of menus and nutrition analysis from any month in the year prior to the report's publication. Agencies were asked to submit a copy of menus and nutrition analysis to the Health Department for verification.

- 1 Compliance data largely based on information submitted by agency program sites and/or program caterer from a self-report survey tool and is not verified; agencies continue to work to enhance processes to assess accuracy of program site and/or caterer self-report and to improve data quality going forward
- 2 Compliance data based on field visits conducted by agency staff
- 3 Compliance data based on a combination of self-report survey and field visits or data collection coordinated by agency staff
- 4 Agency utilizes centralized menu and food ordering process; information for all locations based on agency assessment of products purchased and menu analysis conducted by agency nutritionists
- 5 Agency purchases food only
- 6 Agency serves snacks only

Permits issued in FY2018	60	18	8	55	0	141
Persons on the Waiting List*	0	0	0	0	0	0
Currently Active Permits**	107	39	21	119	0	286
Green Carts using EBT terminals (approximate)***	14	2	0	3	0	19

* The development and launch of Accela delayed the offer of permits to people on the wait list for Green Carts. The technical issues for that have been resolved and the Department has been calling names off of the various waiting lists for the past year, exhausting several lists in the process. Waitlists are restricted by borough. Once a waitlist is exhausted, a new borough-specific waitlist is created. Vendors can be on multiple lists at the same time, so the number does not necessarily represent unique individuals. The programming to create new waiting lists in Accela has to be tested. Following successful testing, new waiting lists for those boroughs with no names on them will be created.

** Currently active permits as of 09/07/2018

*** Number fluctuates due to vendor usage

LOCAL LAW 2013

Int. No. 1194-A

By Council Members Palma, Cabrera, Chin, James, Koppell, Brewer, Eugene, Vacca, Van Bramer, Levin, Rodriguez, Gentile and Gennaro

A Local Law to amend the New York city charter and the administrative code of the city of New York, in relation to assessing food security.

Be it enacted by the Council as follows:

Section 1. Section 20 of the New York city charter is amended by adding a new subdivision j to read as follows:

j. The director or the director's designee, in consultation with the commissioner of the department of health and mental hygiene, the commissioner of the department of social services/human resources administration, or their respective designees, and community based organizations and service providers with relevant expertise and such other individuals as the director shall designate, shall establish a set of indicators to measure food security. Such indicators shall include but need not be limited to an analysis of existing federal data on food security and the use and impact of governmental nutrition assistance programs. The director, or the director's designee, shall prepare and present a report on such indicators to be included in the annual city foodsystem metrics report required pursuant to section 3-120 of the code.

§ 2. Subdivision a of section 3-120 of the administrative code of the city of New York, as added by local law 52 for the year 2011, is amended to read as follows:

§ 3-120 Annual city food system metrics report. a. No later than September first, two thousand twelve, and no later than every September first thereafter, the office of long-term planning and sustainability shall prepare and submit to the mayor and the speaker of the city council a report regarding the production, processing, distribution and consumption of food in and for the city of New York during the previous fiscal year. Such report shall include:

1. the number, size in acres, county and type of production of, and annual dollar amount of city financial support received by, farms participating in the watershed agricultural program;

2. the total dollar amount of expenditures by the department of education on milk and other food products that are subject to the United States department of agriculture country of origin labeling requirements, disaggregated and sorted by the product and country of origin in which the essential components of such food products were grown, agriculturally produced and harvested, to the extent such information is reported to the department of education. For any such product where there are multiple countries of origin, the total dollar amount of expenditures, disaggregated by product, shall be separately listed, to the extent such information is reported to the department of education. If the country of origin of milk or fresh whole produce is the United States, for the report due no later than September first, two thousand thirteen, and in every report thereafter, and to the extent such information is reported to the department of education, such report shall include the total dollar amount of expenditures on such milk or fresh whole produce that is local or regional. For purposes of this paragraph, milk or fresh whole produce shall be considered "local" if grown, agriculturally produced and harvested within New York state, and shall be considered "regional" if such food products were grown, agriculturally produced and harvested within the states of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia or West Virginia;

3. the location, sorted by community board and size in square feet, of each community garden located on city-owned property that is registered with and licensed by the department of parks and recreation, and whether each such garden engages in food production;

4. the number of food manufacturers receiving monetary benefits from the economic development corporation or industrial development agency and the annual dollar amount of such benefits per food manufacturer. For purposes of this paragraph, "food manufacturer" shall mean any natural person, partnership, corporation or other association that processes or fabricates food products from raw materials for commercial purposes, provided that it shall not include any establishment engaged solely in the warehousing, distribution or retail sale of products;

5. the daily number of truck and rail trips to or through Hunts Point Market for the purpose of delivering food to Hunts Point Market, to the extent such information is available. For purposes of this paragraph, "Hunts Point Market" shall mean the food distribution center located in Hunts Point in the borough of the Bronx, and shall include the meat, fish and produce markets operating at such location;

6. for the report due no later than September first, two thousand thirteen, and in every fifth report thereafter, the amount of grocery store space per capita, sorted by community board, and the number of grocery stores that opened during the past five calendar years, sorted by community board, to the extent such information is available. The office of long-term planning and sustainability shall request such information, as necessary, from the New York state department of agriculture and markets;
7. the number, community board, and number of employees, of grocery stores receiving financial benefits under the food retail expansion to support health program;
8. the number of establishments participating in the healthy bodega initiative administered by the department of health and mental hygiene, sorted by borough;
9. the number of job training programs administered by the department of small businesses services or the workforce investment board to aid individuals seeking work in food manufacturing, food supply, food service or related industries, sorted by borough;
10. the total number of meals served by city agencies or their contractors, including but not limited to meals served in public schools, hospitals, senior centers, correctional facilities, and homeless shelters, and not including food sold in vending machines or by a concessionaire, sorted by agency;
11. for each required city agency food standard developed pursuant to executive order number one hundred twenty-two, dated September nineteenth, two thousand eight, the total number of programs or other relevant entities that purchase, prepare or serve meals, not including food sold in vending machines or by a concessionaire, that are in full compliance with each such standard and the total number that are not in full compliance with each such standard, sorted by agency;
12. the number of and amount of annual revenue earned from vending machines located in facilities operated by the department of education;
13. the number of persons sixty-five years or older receiving benefits through the supplemental nutritional assistance program ("SNAP") administered by the United States department of agriculture;
14. the number and description of, and dollar amount spent by, the human resources administration on SNAP outreach programs;

15. the number and description of, and dollar amount spent on, nutrition education programs administered by the human resources administration and department of health and mental hygiene;

16. the number of salad bars in public schools and in hospitals operated by the health and hospitals corporation, respectively, sorted by borough;

17. the total amount expended by the department of citywide administrative services to purchase water other than tap water;

18. information concerning the green cart initiative administered by the department of health and mental hygiene, including the number of applications for permits, the number of permits issued, the number of persons on the waiting list, the number of violations issued to green carts, the location of such carts when such violations were issued and, to the extent such information is available, the number of permit holders who accept electronic benefit transfer, sorted by borough; [and]

19. the number of vendors at greenmarkets, farmers' markets and similar markets operated by the council on the environment of New York city or any successor entity, and the average number of vendors at such markets, sorted by borough[.]; and

20. for the report due no later than September first, two thousand fourteen, and in every report thereafter, contents of the report on food security as required by subdivision j of section 20 of the charter.

§ 3. This local law shall take effect immediately.
