Neighborhood tabulation area. The term "neighborhood tabulation area" means a geographic area that is no larger than a community district and comprised of two or more census tracts.

Priority area. The term "priority area" means a geographic area, no larger than a precinct sector, designated by the department, in which the previous fiscal year's major felony crime data indicates that the area has experienced a high occurrence of crime relative to the occurrence of crime experienced by the city as a whole.

Support service agency. The term "support service agency" includes but need not be limited to the following city agencies: (i) the human resources administration, (ii) the administration for children services, (iii) the department of homeless services, (iv) the office to combat domestic violence, (v) the department of youth and community development, (vi) the department of education, (vii) the department of buildings, (viii) the department of housing preservation and development, (ix) the fire department, (x) the New York city housing authority, and (xi) the department of health and mental hygiene.

The report shall include a map of each priority area and the total number of major felonies reported within each such priority area, disaggregated by the type of crime committed. Such report shall include a comparison of the number of major felonies reported in any priority area identified in the previous year's report prepared pursuant to this subdivision.

c. By November 1 of each year, support service agencies shall report, to the council and a deputy mayor or head of an office or agency designated by the mayor, the current services offered in any neighborhood tabulation area in which 20 percent or greater of the population is below the poverty line as defined by the American Community Survey and that overlaps with or is contiguous to a priority area.

d. By December 1 of each year, such deputy mayor or head of an office or agency shall coordinate with appropriate support service agencies to develop a coordinated, multi-agency plan to provide necessary social services in the priority areas identified in the report prepared pursuant to subdivision b of this section. The plan, which shall be provided to the council, shall include an overview of the current services offered by support service agencies and reported pursuant to subdivision c of this section, and an analysis to determine the specific services needed along with a plan for coordination and collaboration between the support service agencies to provide such services in each priority area.

Notes on Z-score

A Z-score is a numerical measurement of a value's relationship to the average of a group of values. It is a useful metric for making comparisons between distributions or variables.

Z-scores reveal the number of standard deviations the score is either above or below the average.

Z-scores may be positive or negative, with a positive value indicating the score is above the average and a negative score indicating it is below the average. If a Z-score is zero, the value is identical to the average.

The Z-score is obtained by subtracting the sample average from an individual value and then dividing the difference by the sample standard deviation.

For the purpose of this report, Z-scores were calculated for crime type and then averaged for each Precinct. This Z-score average was then sorted for ranking purposes and the highest thirty-five (35) were selected for additional analysis and mapping.
