The contracting opportunities for construction/construction services and construction-related services that appear in the individual agency listings below reflect that commitment to excellence."

HHS ACCELERATOR

To respond to human services Requests for Proposals (RFPs), in accordance with Section 3-16 of the Procurement Policy Board Rules of the City of New York ("PPB Rules"), vendors must first complete and submit an electronic prequalification application using the City's Health and Human Services (HHS) Accelerator System. The HHS Accelerator System is a web-based system maintained by the City of New York for use by its human services Agencies to manage procurement. The process removes redundancy by capturing information about boards, filings, policies, and general service experience centrally. As a result, specific proposals for funding are more focused on program design, scope, and budget.

Important information about the new method

- Prequalification applications are required every three years.
- Documents related to annual corporate filings must be submitted on an annual basis to remain eligible to compete.
- Prequalification applications will be reviewed to validate compliance with corporate filings, organizational capacity, and relevant service experience.
- Approved organizations will be eligible to compete and would submit electronic proposals through the system.

The Client and Community Service Catalog, which lists all Prequalification service categories and the NYC Procurement Roadmap, which lists all RFPs to be managed by HHS Accelerator may be viewed at http://www.nyc.gov/html/hhsaccelerator/html/ roadmap/roadmap.shtml. All current and prospective vendors should frequently review information listed on roadmap to take full advantage of upcoming opportunities for funding.

Participating NYC Agencies

HHS Accelerator, led by the Office of the Mayor, is governed by an Executive Steering Committee of Agency Heads who represent the following NYC Agencies:

Administration for Children's Services (ACS) Department for the Aging (DFTA) Department of Consumer Affairs (DCA) Department of Corrections (DOC) Department of Health and Mental Hygiene (DOHMH) Department of Homeless Services (DHS) Department of Probation (DOP) Department of Small Business Services (SBS) Department of Youth and Community Development (DYCD) Housing and Preservation Department (HPD) Human Resources Administration (HRA) Office of the Criminal Justice Coordinator (CJC)

To sign up for training on the new system, and for additional information about HHS Accelerator, including background materials, user guides and video tutorials, please visit www.nyc.gov/hhsaccelerator

Statement of Basis and Purpose of Proposed Rule

The air cargo industry at John F. Kennedy International Airport (JFK) is an important source of jobs and economic activity in New York City. Air cargo employment at JFK depends on safe, convenient truck access to the airport.

For safety reasons, existing New York City Department of Transportation (NYC DOT) regulations have prohibited trucks with trailers longer than 55 feet in total combined length from using portions of certain highways that provide access to JFK. However, a 2008 engineering study conducted by NYC DOT and the New York State Department of Transportation demonstrated that trucks with trailers up to 73 ½ feet in total combined length - including trucks with 53-foot trailers, the standard tractor trailer combination used in the air cargo industry - can be operated safely between the George Washington Bridge and JFK using the route described in this proposed rule. Thus, the current regulations put JFK, and New York City as a whole, at a disadvantage when competing against other airports in the area for airport-based jobs and economic activity, at a time when the New York City Economic Development Corporation and the Port Authority of New York and New Jersey are planning to invest in modern, on-airport cargo facilities.

The proposed rule will expand the transportation network upon which trucks with 53-foot trailers can operate in New York City. It will:

- Provide a clearly defined, safe route for drivers to haul 53-foot trailers from the George Washington Bridge to JFK Airport, exclusively using designated highways instead of local streets;
- · Support the growth of air cargo jobs at JFK; and
- Continue to prohibit trucks with 53-foot trailers from being operated on any non-designated highway or street in New York City, such as destinations off the airport property in southern Queens.

The New York City Department of Transportation's authority for these rules is found in sections 385 and 1642 of the New York State Vehicle and Traffic Law and section 2903(a)(1) of the New York City Charter.

<u>New material is underlined.</u> [Deleted material is in brackets.]

"Shall" and "must" denote mandatory requirements and may be used interchangeably in the rules of this department, unless otherwise specified or unless the context clearly indicates otherwise.

Section 1. Paragraph 4 of subdivision (b) of Section 4-15 of Title 34 of the Rules of the City of New York is amended to read as follows:

(4) Length of combinations of vehicles. The total length of a combination of vehicles, inclusive of load and bumpers, shall not be more than 55 feet, except that the combination of vehicle, load and bumper of vehicles hauling poles, girders, columns or other similar objects of great length which are indivisible, shall not be more than 60 feet. The provisions of this paragraph (4) shall not apply to any fire vehicle or to a vehicle or combination of vehicles that is disabled and unable to proceed under its own power and is being towed for a distance of not more than ten miles for the purpose of repair or removal from the highway. The provisions of this paragraph (4) shall not apply to a combination of vehicles that are operating pursuant to subdivision (j) of this section.

§2. Section 4-15 of Title 34 of the Rules of the City of New York is amended by adding a new subdivision (j) to read as follows:

- (j) Routes for Trailers in Excess of Forty-eight Feet
 - (1) Any semitrailer with a length in excess of forty-eight feet, but not exceeding fifty-three feet, if the distance between the kingpin of the semitrailer and the centerline of the rear axle does not exceed forty-three feet and if the semitrailer is equipped with a rear-end protective device of substantial construction consisting of a continuous lateral beam extending to within four inches of the lateral extremities of the semitrailer and located not more than twenty-two inches from the surface as measured with the vehicle empty and on a level surface, may be operated on:
 - i. that portion of interstate 95 between the Bronx-Westchester county line and interstate 295;
 - ii. that portion of interstate 295 which connects interstate 95 with interstate 495;
 - iii. that portion of interstate 495 between interstate 295 and the Nassau-Queens county line;
 - iv. that portion of interstate 678 between interstate 95 and John F. Kennedy International Airport;
 - v. that portion of interstate 95 between interstate 695 and the New Jersey State Line on the upper level of the George Washington Bridge; and
 - vi. that portion of interstate 695 between interstate 95 and interstate 295.
 - (2) The total length of a combination of vehicles operating pursuant to this subdivision, inclusive of load and bumpers, shall not be more than seventy three and one half feet.
