DEPARTMENT OF HEALTH.

REPORT FOR THE WEEK ENDED OCTOBER 24, 1914.

HAVE YOU CHANGED YOUR ADDRESS?

We have a long waiting list of persons anxious to receive regularly our Weekly Bulletin and as the edition is limited to 10,000 it is impossible now to comply with all the requests. We have repeatedly noticed that persons now on the mailing list change their address without notifying us of such change. Hereafter we shall discontinue sending the bulletin, under these circumstances, unless the recipient sends us due notification of his new address. If you do not want the bulletin, give others a chance.

WHY NEGLECT CHILDREN BETWEEN INFANCY AND SCHOOL AGE?

As at present organized and administered, practically no administrative supervision whatever is exercised over the health of children between the ages of two and six years. Yet this is known to be one of the most important periods of life and the one, therefore, which should be most closely supervised. Despite the fact that this deficiency has long been recognized, the Department of Health has found it impossible to secure funds to organize and carry on preventive health work for this large group of children.

In this respect, we might well copy the example of Dunfermline,* Scotland, which maintains a clinic or mothers' school where children between infancy and five years of age are examined. When any defect is found the mother is advised to consult her physician and place the child under treatment. In this way many physical defects are remedied before the child enters school. In addition, the mother receives instruction in the care and hygiene of children, supplemented by advice and instruction given by the district nurse. It is clear that this tends to keep the mother in close touch with the health authorities, a point of no little importance in the general education of the public in health matters.

New York should follow this admirable example.

NOTIFICATION OF VENEREAL DISEASES—CONTEMPLATED MODIFICATION OF THE DEPARTMENT'S REGULATIONS.

In order to better control the spread of venereal diseases, the Department of Health is considering a modification of the regulation relating to the notification of cases of syphilis and gonorrhea. The following draft of the proposed alterations in this section of the Sanitary Code is submitted to the medical profession for criticism and comment. The Department fully realizes that its work, in order to be effective, must have the cordial support of the medical profession. All suggestions made will, therefore, have very careful consideration:

"It shall be the duty of the managers and superintendent or person in charge of every hospital, dispensary, clinic, asylum and charitable and correctional institution, including all institutions which are supported in whole or in part by voluntary contributions, to report promptly the name, sex, age, marital state and address of every person suffering from syphilis in every stage, chancroid and gonorrhoeal infection (including gonorrhoeal arthritis)."

"It shall be the duty of every physician to report promptly the name, sex, age, marital state and address of every person suffering from syphilis, chancroid and gonorrhoeal infection, who, being an infective agent, and a menace to the health of other persons, fails to obtain medical relief or to take such precautions as to avoid danger and detriment to the health of any other person."

DEAD ANIMALS IN THE STREET.

The removal of dead animals from the streets of this city is under the jurisdiction of the Department of Health, which enters into a yearly contract with a scavenger to remove such animals to the offal dock. Patrolmen of the Police Department are required under a rule of the Police Manual to report at precinct headquarters the body of any dead animals noticed by them on the public highway. From there report is made to the offal dock, all animals reported for removal by twelve o'clock noon, being removed the same day. Persons observing a dead animal on the street should notify the nearest police officer or telephone either to police headquarters or to the Department of Health, 6280 Franklin. All such requests will be given prompt attention and the Department of Health will be glad to have citizens call attention to any delay in the removal of dead animals.

OUR LITTLE MOTHERS' LEAGUE.

Thanks to the receipt of a special fund The Bureau of Child Hygiene was enabled in 1913 to purchase a banner to be awarded to the Little Mothers' League which made the best record in the borough during the summer, the banner to be held by the league for one year. For 1914 the banners have been awarded as follows:

Borough of Manhattan.....	P. S. No. 42
Borough of The Bronx.....	P. S. No. 4
Borough of Queens.....	P. S. No. 87
Borough of Brooklyn.....	P. S. No. 148

The summer just passed has been a particularly satisfactory one with regard to the Little Mothers' League. The attendance and interest have been far above the average and, altogether, 137 leagues were formed, with a total membership of 13,301.

This work among the younger girls continues to be one of the Health Department's most valuable aids in its campaign to reduce infant mortality.

ADMINISTRATIVE CONTROL OF WHOOPING COUGH.

For the past two months all cases of whooping cough reported by dispensaries, as well as all other cases that are ascertained to be without the care of a private physician have been kept under supervision by the district nurses of the Bureau of Infectious Diseases.

The nurses are now required to visit and revisit pertussis cases in common with measles, scarlet fever, and diphtheria. They have been instructed to leave cards of instruction with the family. If there is a private physician in attendance she does nothing further in the case, but instructs the family to keep the child in quarantine and isolated for one week after the first day on which the "whoop" appears. No placards are posted. In families where, in addition to the sick child or children, there are infants or very young children, special care is taken to explain the danger to the latter. Failure to secure observation of isolation is followed by a warning from one of the Health Squad patrolmen. In special cases it may be deemed advisable to recommend the removal of a child sick with pertussis, or of an infant suffering from a complicating broncho-pneumonia and not receiving proper care.

One week after the first appearance of the "whoop," permission may be given for the sick child to leave the premises, providing it is accompanied by an adult who will see that the child does not play with other children, enter other homes, attend places of amusement or ride on street cars, etc. Children can play in the yard or on the roof, providing no other children are there. The material thrown out when a child whoops, coughs or vomits, should be caught up in cloths and promptly destroyed.

*Seventh Annual Report on the Medical Inspection of School Children in Dunfermline, by Alister Mackenzie, M. A., M. D., D. P. H., F. R. S. E., Chief Medical Officer, Carnegie Dunfermline Trust.—1912-1913.

by burning or disinfection. Cases not under a private physician's care, in which there is a possibility of mistaken diagnosis, are referred to the District Diagnostician.

No fumigation of premises or disinfection of bedding is performed by the Department, but the nurse recommends renovation of the premises by washing walls and floors with soda solution and exposing bedding and clothing to light and air.

Cases without private physicians residing in the Borough of Manhattan, between Houston Street on the south, East 26th Street on the north, and Broadway on the west, are referred to the Whooping Cough Clinic at the Research Laboratory at the foot of East 16th Street. Hours: Daily, 1.30 to 3.00 P. M.

PROGRESS IN THE DEPARTMENT'S TUBERCULOSIS WORK SINCE 1912.
During the latter part of the year 1911 and early in 1912, the tuberculosis work of the Division of Communicable Diseases was investigated for the Committee of Health, Hospitals and Charities of the Board of Estimate and Apportionment, a co-operative inquiry being made by Dr. L. I. Dublin, representatives of the Bureau of Municipal Research and officials of the Department of Health. The results of this investigation are embodied in a pamphlet entitled "A Report on the Division of Communicable Diseases, Department of Health, with Constructive Suggestions," published in May, 1912. The investigation was most helpful to the Department of Health, and to the Division of Communicable Diseases. Many suggestions made at the time by the investigators were adopted. The spirit of the investigation was most friendly and fair, a majority of the criticisms were based on errors of omission rather than commission, as is shown by the following statement: "After careful examination of the routine at the Borough Office, it is the opinion of the investigator that the general method of registration is to be highly commended. It is both economical and, by a system of checks, fairly accurate."

Since the date of the investigation, the Division of Communicable Diseases has been combined with the former Division of Contagious Diseases, the combined divisions forming the Bureau of Infectious Diseases. The registration, supervision and care of pulmonary tuberculosis is now under the Division of Tuberculosis of the Bureau of Infectious Diseases. The methods of procedure have been steadily improved as far as facilities have permitted. Indeed, progress has been made even where the necessary facilities were not at hand, as witnessed by the opening of tuberculosis clinics in buildings nearly, if not quite, unfit for the purpose, and without any corresponding increase in the general staff of employees.

The most important step forward in the supervision of tuberculosis, has been the division of the entire city into nineteen clinic districts, each with its Clinic and its Branch Registration Office where all records of active cases are kept, its Physician and Nurse in Charge, and its staff of Clinic Physicians and District Nurses. This has reduced the clerical labors and duplication of work of the District Nurses to a minimum.

As a result of the above mentioned investigation, eighteen recommendations regarding the tuberculosis work of the Division of Communicable Diseases were submitted to the Board of Estimate and Apportionment. All of these met with the approval of the authorities of the Department of Health, and all have been adopted with the exception of those calling for a larger staff of employees than has been available. The recommendations, together with action taken in relation thereto by the Department of Health, follow:

Recommendation 1—"Require [the clinic] Physician to visit cases prevented by illness from attending the clinic, and give special instructions to the Nurses respecting them."

For almost two years the Attending, Assistant Attending, and even the Volunteer Attending Physicians to the Clinics have been required to make a certain number of home visits each week in addition to their class work. They visit and prescribe for patients too ill to attend the Clinics, make diagnoses in doubtful cases refusing to attend the Clinic, and examine the members of families (especially children) in which there are cases of pulmonary tuberculosis. These visits are made in the Districts of Non-Department of Health Clinics as well as in those of the Department. The Physician in Charge of the Clinic endeavors to obtain co-operation between Clinic Physicians and the District Nurses.

Recommendation 2—"Making the nursing of bed cases a duty of the Nurse until institutional care is provided."

Although we fully approve of such work, the staff of Nurses has never been sufficiently large to make it possible. The Nurses give, however, special attention to cases too ill to attend the Clinic and awaiting admission to a hospital, instructing family as to bedmaking, nursing, etc. Since the organization of the Bureau of Infectious Diseases in 1913, the duties of the field nurses have greatly increased, without a corresponding increase in their number. As a result, the tuberculosis work has suffered somewhat.

Recommendation 3—"Provide educational courses for Nurses to include lectures and conferences with experts in social work, physicians, etc."

A course of lectures for the nurses of the Department of Health was organized in 1912, and continued during 1913 and 1914. During the last two years these lectures have been under the direction of the School of Philanthropy, assisted by the Teachers' College and other agencies. In 1915 these lectures will be supervised by the newly established Bureau of Public Health Education of the Department of Health. In addition to these lectures, the Supervising Nurses hold weekly conferences with the field Nurses.

Recommendation 4—"Open new clinics in Brooklyn, especially in the Brownsville section, where the Bradford Street Clinic is overcrowded."

Three new clinics have been opened in Brooklyn since the date of the report, viz.: the Eastern District Clinic, 306 South 5th Street, Williamsburg; the Parkville Clinic, 974 West Street, and the new Brownsville Clinic, 64 Pennsylvania Avenue. This latter clinic replaces the former Bradford Street Clinic. The district was not so large as to require additional clinics; what was needed was a much larger building, which has been obtained.

Recommendation 5—"Require full time service of Borough Chiefs."

This recommendation is heartily endorsed by the Department of Health. The 1913, 1914 and 1915 Budgets of the Bureau of Infectious Diseases contain requests for the establishment of such positions at adequate salaries, but so far the Board of Estimate has not been able to comply with these requests.

Recommendation 6—"Require Nurses to report fuller details as to home conditions of patients under special supervision."

This is now being done most satisfactorily, thanks to the new system of Branch Registration Offices and direct assignment of records to field workers. Formerly the Nurses reported facts regarding a number of cases on one and the same card, which facts were later copied on separate history cards. Now full details are entered by the Nurse directly on the history form itself.

Recommendation 7—"Assign two Nurses to 'trace' lost cases and use the success of this tracing as a gauge of the efforts of the regular Nurse to find cases."

The value of this procedure is well appreciated. Several times during the past three years a small staff of Nurses to follow "not found" cases has been established, and has done excellent work. These Nurses were eventually required for regular field work. Should the staff of Nurses be increased, such a corps of "tracers" will be established.

Recommendation 8—"Reduce to a minimum the number of 'inspection' visits."

This has been accomplished voluntarily, by increasing the interval between visits to three months, and involuntarily, by reason of the investigation of cases of contagious diseases by Nurses, and the consequent unavoidable neglect of the cases of tuberculosis.

Recommendation 9—"Urge upon the Board of Education the necessity of increasing the number of open-air classes, and submit to it lists of children showing symptoms of tuberculosis and of anaemic children from tuberculosis families, etc."

The Department of Health has done and is doing its part in this matter, by submitting to the Charity Organization Society (charged with the establishment of such open-air classes) lists of such children as are mentioned above.

Recommendation 10—"Co-operate with the Division of Child Hygiene in the supervision of children suspected of tuberculosis, but not showing tubercle bacilli in the sputum; keep a record of instruction given parents in respect of the care of tuberculous children and supervise their health history."

Every Tuberculosis Clinic of the Department of Health has a special class for children once a week. All "open" cases are at once sent to a suitable institution; all "suspected" cases and all children from tuberculous families, are kept under observation. In some of the Clinics the Auxiliaries are doing splendid work for the children in the way of classes for manual training, gymnastics, Swedish movements, etc.

Recommendation 11—"Have the Hospital Admission Bureau classify hospitals and sanatoria according to their equipment for treatment."

This was done shortly after the establishment of the Hospital Admission Bureau.

Recommendation 12—"Admit to hospitals only such patients as belong to the class which the particular hospital where a vacancy exists is prepared to treat, even if patients on other lists have waited longer."

This is the ideal procedure and has been followed in the case of Department of Health institutions, and in all others when permitted by the regulations of the Department of Charities.

Recommendation 13—"Equip Riverside Hospital as a detention hospital for forcible removals."

This has been done with the exception of the provision of means for forcible detention. The Police Department has several times been requested to assist the Department of Health in detaining cases of tuberculosis on North Brother Island, but so far has not been able to furnish such assistance. There should be a ward corresponding to the Police Ward at Bellevue Hospital.

Recommendation 14—"Bend all efforts to remove to Riverside all homeless cases that are unfit to be at large and are not of a character to be sent to other hospitals. Pursue with energy the policy of segregating the 'rounders,' both from the community and other hospitals."

This is being done. Each year we find that forcible measures are less and less necessary, the majority of the cases entering tuberculosis institutions of their own accord. This work cannot be satisfactorily done, however, unless the Department of Health is given control of the admission and retention of cases of tuberculosis in all public institutions.

Recommendation 15—"Restore Otisville to its original use as a sanatorium for incipient cases. Instruct the Admission Bureau to exclude in the future all advanced cases."

The great majority of cases of tuberculosis admitted to Otisville are in the first or incipient stage. Occasionally an advanced case, having money enough to live at home, yet a danger to those about it, and unwilling to enter a tuberculosis hospital, will consent to go to Otisville. But such cases are few and far between.

Recommendation 16—"Diminish the proportion of short term stayers at Otisville by using ferryboats as observation camps for candidates."

Both the Tuberculosis Day Camps of the Department of Health are used as observation camps for Otisville candidates. This is especially true of the Manhattan camp, "The Middletown." In Brooklyn, owing to the lack of hospital accommodation for consumptives, and to the unwillingness of residents of that Borough to go to institutions outside of the borough, many patients attend the camp who should properly be in institutions.

Recommendation 17—"Extend the follow-up of discharged cases to include supervision of apparently cured cases returning to work. Assist such cases to find suitable employment."

This has been done from time to time, as far as the facilities have permitted. The Department of Health, in co-operation with the State authorities, is now making such investigation of cases discharged from the New York State Hospital for the treatment of incipient tuberculosis at Ray Brook, New York.

Recommendation 18—"Make a thorough investigation and include the results in periodical reports of the histories of cured or improved cases leaving Otisville to ascertain:

- (a) The permanency of cure or improvement.
- (b) Relapses, readmission to hospitals or deaths.
- (c) The apparent causes of such relapses and deaths."

During 1910 and 1911, while enough nurses were available, all cases discharged from Otisville were investigated in order to obtain the information mentioned above. There is no question that this work should be done regularly, but here, again, the Department has been hampered by the numerical inadequacy of its staff of district nurses.

NOTICE TO BIDDERS AT SALES OF OLD BUILDINGS, ETC.

TERMS AND CONDITIONS UNDER WHICH BUILDINGS, ETC., WILL BE SOLD FOR REMOVAL FROM CITY PROPERTY.

THE BUILDINGS AND APPURTENANCES thereto will be sold to the highest bidder, who must pay cash or certified check, drawn to the order of the Comptroller of The City of New York, and must also give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of \$50, the sum of \$50 shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but unfinished at the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the building or buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal, nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or any of these conditions shall forthwith void the sale and cause immediate forfeiture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing therein or permitting the occupancy of any such building by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

The sale will be as of the condition of the property on date of delivery thereof to the purchaser. The City of New York will not be responsible for any change or loss which may occur in the condition of the buildings, or their appurtenances between the time of the sale thereof and the time of delivering possession to the purchaser, after being properly vacated of all tenants. The sale and delivery to purchaser will be made as nearly together as the circumstances of vacating the structures of their tenants will permit.

All the material of the buildings, sheds, walks, structures and cellars of whatsoever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the exterior walls of the buildings and their foundations and the sidewalks and curb in front of said buildings, extending within the described area shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point. The exterior walls and their foundations shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building. Where there is no curb the elevation of the surrounding ground shall be considered curb level. All wells, cesspools, sinks, etc., existing on the property must be filled to the level of the surrounding ground with clean earth.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed.

The purchaser at the sale shall also remove all

house sewer connections to the main sewer in the street and the openings of the main sewer in street shall be properly closed in compliance with the directions of the Bureau of Sewers in the Borough in which the buildings are situated, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed.

The permit for all opening in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances, or any part thereof, within thirty days from the day of possession will work forfeiture of ownership of such buildings, appurtenances, or portion as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and The City of New York will, without notice to the purchaser, cause the same to be removed, and the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and must be completed within thirty days from the day of possession, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Where party walls are found to exist between buildings purchased by different bidders, the materials of said party walls shall be understood to be equally divided between the separate purchasers.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furrings, plaster, chimneys, projecting brick, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beam-holes, etc., bricked up, and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs and adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the Contractor.

The Comptroller of The City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids; and it is further:

Resolved, That, while the said sale is held under the supervision of the Commissioners of the Sinking Fund, the Comptroller is authorized to cause the sale to be advertised and to direct the sale thereof as financial officer of the City.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money or corporate stock or certificates of indebtedness of any nature issued by The City of New York, which the Comptroller shall approve as of equal value with the security required in the advertisement to the amount of not less than three nor more than five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The amount shall be as specified in the proposals or instructions to bidders and shall not be in excess of 5 per cent.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application thereto at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
