An Ordinance Regulating the Construction, Operation and Maintenance of Elevators in The City of New York.

Be it Ordained by the Board of Aldermen of The City of New York as follows: Section 1. Article 27 of Chapter 5 of the Code of Ordinances of The City of New York is hereby amended to read as follows:

ARTICLE 27. Elevators.

Section 560. Definitions.

561. Rules.

562. Permits.

563. Certificate.

564. Record of passenger elevators

565. Inspection.

566. Riding on elevators restricted.

567. Operators.

568. Accidents.

§ 560. Definitions. For the purposes of this article.

a—the term elevator shall mean any device within or in connection with a building or structure used for carrying persons or things upward or downward;

b—the term passenger elevator shall mean and include any elevator designed and used for carrying persons other than those necessary for its safe operation or for the handling of things carried by it;

c—the term freight elevator shall mean and include any elevator designed and used for the carrying of things and of such persons only as are necessary for its safe operation or the handling of things carried by it;

d—the term amusement device shall mean and include all mechanically operated devices which are used to convey persons in any direction as a form of amusement.

§ 561. Rules. The superintendent of buildings shall make rules consistent with the provisions of this article, regulating, with a view to safety, the construction, maintenance and operation of all elevators and amusement devices, now existing or hereafter installed.

§ 562. Permits. No passenger or freight elevator shall hereafter be installed or altered in any building nor shall any amusement device be hereafter constructed or altered, until the owner or lessee, or the agent, architect or contractor of either, shall have submitted to the superintendent of buildings, in such form as the superintendent may prescribe, an application accompanied by plans and drawings showing the proposed construction and mode of operation, and such application has been approved by the superintendent and a permit has been issued by him. Repairs to elevators and amusement devices may be made without filing such application, except when such repairs include a change in the type of elevator or of its motive power, or when any change in safety devices or operating mechanism is made.

§ 563. Certificate. Whenever a passenger or freight elevator or an amusement device is hereafter installed or constructed, it shall be unlawful for the owner or lessee to operate or permit the operation or use of the same until a certificate shall have been obtained from the superintendent of buildings that such elevator or amusement device has been inspected and has been found to be safe. The superintendent of

buildings shall within a reasonable time after being requested to do so inspect or cause to be inspected any elevator or amusement device hereafter installed or constructed, and if the same is found to be safe and in conformity with the provisions of this article and the rules adopted thereunder, shall issue a certificate to that effect. Nothing herein contained shall prevent the temporary use under a certificate issued by the superintendent of buildings of any elevator during construction, provided a notice is conspicuously posted on or in connection with such elevator to the effect that such elevator has not been officially approved.

§ 564. Record of passenger elevators. Every passenger elevator shall be given a serial number for purposes of identification. In the case of elevators hereafter installed such serial number shall be assigned when the first certificate is issued, and in the case of existing elevators, as soon as inspection can be made for that purpose. A docket of all passenger elevators shall be kept in each borough, giving under the corresponding serial number a description of its location sufficient for identification, together with such other information as type of construction, motive power, rise, rated speed, inspection, etc., as the superintendent of buildings may deem desirable. The owner or lessee, or agent of either, shall cause such number, together with the most recent certificate of inspection, to be attached or posted in the elevator car in the manner prescribed by the rules.

§ 565. Inspection. The superintendent of buildings shall cause an inspection of all passenger elevators to be made at least once in every three months and of freight elevators and amusement devices at least twice in each year. Upon notice from the superintendent of buildings, or his duly authorized representative, any repairs found necessary to such elevators or amusement devices shall be made without delay by the owner or lessee, and in case defects are found to exist in the continued use of such elevator or amusement device are dangerous to life or limb, then the use of such elevator or amusement device shall cease, and it shall not again be used until a certificate shall be first obtained from said superintendent of buildings that such elevator or amusement device has been made safe. After every inspection which shows any elevator or amusement device to be safe and in conformity with the requirements of this article and the rules adopted thereunder, the superintendent of buildings shall issue a certificate to that effect.

§ 566. Riding on elevators restricted. It shall be unlawful for any person, other than the operator or those necessary to handle freight to ride on, or for the owner or lessee of any elevator knowingly to permit any person to ride on any elevator other than a passenger elevator. Every freight elevator shall have a notice posted conspicuously thereon as follows: THIS IS NOT A PASSENGER ELEVATOR. IT IS UNLAWFUL FOR ANY PERSON OTHER THAN THE OPERATOR OR THOSE NECESSARY TO HANDLE FREIGHT, TO RIDE ON THIS ELEVATOR.

§ 567. Operators. Except as may be specifically provided in any other law or ordinance, every passenger elevator, except full automatic push button elevators and escalators, must be in charge of a competent operator of reliable and industrious habits, not less than eighteen years of age, with sufficient previous experience in running an elevator under the instruction of a competent person. No operators of amusement devices known as electrically operated scenic railroads shall be employed who have not attained the age of twenty-one years and who have not secured a certificate of competency from the superintendent of buildings. In case the superintendent of buildings shall find that the person engaged in running an elevator is incompetent or not qualified, the owner or lessee of such elevator shall, upon notice from the superintendent of buildings, at once discontinue the operation of such elevator by such operator. No person shall employ or permit any person to operate any passenger elevator who does not possess the qualifications prescribed therefore by this or any other law or ordinance.

§ 568. Accidents. The owner or lessee, or person in charge of any passenger or freight elevator or amusement device shall immediately notify the superintendent of buildings of each and every accident to a person or damage to apparatus on about or in connection with such elevator or amusement device, and shall afford the superintendent of buildings or his representative every facility for investigating such accident or damage. The superintendent of buildings shall without delay, after being notified, make an investigation, and shall place on file in the bureau of buildings a full and complete report of such investigation. Such report shall give in detail all material facts and information available and the cause or causes so far as they can be determined, and shall be open to public inspection at all reasonable hours. When an accident involves the failure or destruction of any part of the construction or operating mechanism of a passenger elevator or amusement device, said passenger elevator or amusement device, shall not be used until it has been made safe, and the superintendent of buildings may, if deemed necessary, order the discontinuance of the same until a certificate has been issued by him for its use, but no part of the damaged construction or operating mechanism shall be removed from the premises until permission to do so has been granted by the superintendent of buildings or his representative.

Be it Ordained by the Board of Aldermen of The City of New York, as follows:

Section 1. Chapter 5 of the Code of Ordinances of The City of New York is hereby amended by inserting a new article, as follows:

ARTICLE 9.

Projections beyond building line.

Section 170. Restrictions.

171. Permits revocable.

172. Alterations.

173. Existing encroachments.

174. Action of Board of Estimate and Apportionment.

§ 170. Restrictions. 1. General. Except as hereinafter otherwise provided in this article no part of any building hereafter erected, or of any enlargement of an existing building shall project beyond the building line so as to encroach upon a public street or public space.

2. Projections removable. Any part of a building permitted to project beyond the building line under the provisions of this article shall be so constructed that its removal may be made at any time without causing the building or any part thereof to become structurally unsafe.

3. Structural support. No part of any building hereafter erected or of any enlargement of an existing building that is necessary for the structural safety of the

building or an enlargement thereof shall project beyond the building line so as to encroach upon a public street or public space, but this shall not be deemed to prohibit the projection beyond the building line to the extent of not more than twelve inches of the footings of street walls provided such projecting parts of footings are not less than eight feet below the sidewalk level.

4. Permissible projections. a. Areas, meaning thereby open spaces below the ground level immediately outside the building and enclosed by substantial walls, may project beyond the building line not more than one-fifteenth of the width of the street, but not more than five feet, except where entirely prohibited by § 160 of chapter 23 of the Code of Ordinances, provided, however, that every such area shall be covered over at the street level by an approved grating of metal or other incombustible material of sufficient strength to carry safely the pedestrian street traffic.

b. Steps, leading up or down at entrances and included between ornamental columns, pilasters or check pieces at least three feet high on the sides of such entrances, may project beyond the building line not more than two and one-half per cent. of the width of the street, but not more than eighteen inches in any case, except where prohibited entirely by § 160 of chapter 23 of the Code of Ordinances, provided that the aggregate width of such steps shall not exceed twenty per cent. of the actual street frontage of any one building, when such frontage is twenty-five feet or more nor more than five feet when such frontage is less than twenty-five feet.

c. Columns, pilasters and ornamental projections, including their mouldings and bases, erected purely for the enhancement of the beauty of the building from an artistic standpoint, may project beyond the building line not more than two and one-half per cent. of the width of the street, but not more than eighteen inches in any case.

d. Balustrades of an ornamental character, including the sills and brackets on which they rest, may project beyond the building line not more than five per cent. of the width of the street nor more than twenty-two inches in any case, provided that every part of such balustrade is not less than ten feet above the sidewalk.

e. Mouldings, belt courses, cornices, lintels, sills, pediments and similar projections of a decorative character may project beyond the building line not more than one and one-fourth per cent. of the width of the street nor more than ten inches in any case.

f. The main cornice, meaning thereby a moulded projection at or near the top of the street wall, may project beyond the building line not more than five per cent. of the width of the street nor more than five feet in any case, provided such main cornice is not less than twelve feet above the sidewalk at any point.

g. Base courses may project beyond the building line not more than one and one-fourth per cent. of the width of the street nor more than ten inches in any case, provided they do not extend more than five feet above the highest point of the sidewalk.

h. Rustications and quoins may project beyond the building line not more than four inches.

i. Awnings and marquees, extending wholly or in part across the sidewalk, in connection with entrances to buildings, shall be not less than ten feet above the sidewalk at all points, except where prohibited by § 160 of chapter 23 of the Code of Ordinances, provided they are constructed of iron and glass or other incombustible materials, and securely supported from the building, and are properly drained, and provided further that, except on streets that may by ordinance be designated as market streets, no awning or marquee shall extend along the street wall of a building for more than seventy-five per cent. of the length of such wall, nor, in any case, more than fifty feet, and there shall be a clear distance of not less than four feet between any two awnings on the same building.

j. Fire escapes and balconies to fire towers or other required exists, constructed of steel or other incombustible material, when required on the fronts of buildings, may project beyond the building line not more than four and one-half feet, but no part of such fire escapes or balconies shall be less than ten feet above the sidewalk, provided that nothing in this section shall prevent the use of movable ladders or stairs to the sidewalk, so arranged that they are within ten feet of the sidewalk only when in actual use.

k. Vaults, entirely below the sidewalk level and conforming to the requirements of article 17, chapter 23 of the Code of Ordinances, shall not extend beyond the curb line. Opening in the roofs of vaults, between the building line and curb, shall be provided with substantial covers, flush in all parts with the sidewalk, of incombustible material, and so constructed and maintained as to be normally kept closed and when open thoroughly safeguarded, and to prevent persons from slipping thereon.

l. Hose connections for interior fire extinguishment equipments and fresh air inlets for plumbing systems may project through a street wall not more than twelve inches beyond the building line, except that where there is an angle formed by the street wall and a cheek piece or the base of a column, pilaster or ornamental projection, provided as in this section specified, they may be so located that no part extends more than fifteen inches from either side of such angle.

5. Rules governing projections. Nothing in this article shall be deemed to abridge the powers and duties of the borough presidents or the commissioners of parks within their respective jurisdictions, to adopt additional rules as may be necessary with respect to the construction or disposition of parts of buildings projecting beyond the building line. The borough presidents or commissioners of parks may, when deemed necessary or desirable, fix further restrictions as to the extent of projections beyond the building line, but no projection greater than in this article specified shall be permitted.

§ 171. Permits revocable. Any permission, express or implied, to construct part of a building so as to project beyond the building line, under the provisions of this article, is revocable by the Board of Aldermen or the Board of Estimate and Apportionment at will.

§ 172. Alterations. No alterations or enlargement shall be made to any existing part of a building now projecting beyond the building line, except in conformity with the provisions of this article so far as it affects new construction.

§ 173. Existing encroachments. Such parts of buildings which already project beyond the building line may be maintained as constructed until their removal is directed by the Board of Aldermen or the Board of Estimate and Apportionment, provided, however, that nothing contained in this article shall be deemed to abridge the right of The City of New York, or any of its officers, to continue any action for the removal of any unauthorized projection beyond the building line or for the collection of any penalty heretofore incurred in connection therewith.

§ 174. Action of Board of Estimate and Apportionment. Nothing in this article shall be deemed to authorize any projection beyond the building line on those streets on which the removal or projections has been heretofore or may be hereafter directed by the Board of Estimate and Apportionment, except in conformity to resolutions by such Board.

Section 2. § 148, article 13, chapter 23 of the Code of Ordinances of The City of New York is hereby amended to read as follows:

§ 148. Hoistways. Hoistways may be placed within 5 feet of the building line, and shall be provided with approved trap doors and when not in actual use guarded by iron railings or rods to prevent accidents to passersby.

Section 5. § 162, article 14, chapter 23, of the Code of Ordinances of The City of New York is hereby amended to read as follows:

No goods, wares, merchandise or manufactures of any description shall be placed or exposed to show or for sale upon any balustrade that is now or hereafter may be erected upon any street.

Section 6. § 164, article 14, chapter 23 of the Code of Ordinances of The City of New York is hereby amended to read as follows:

Every entrance or flight of steps, now existing and projecting beyond the line of the street and descending into any cellar or basement story of any house or other building, where such entrance or flight of steps shall not be covered, shall be inclosed with a railing on each side, permanently put up, from 3 to 3½ feet high, with a gate to open inwardly, or with 2 iron chains across the front of the entrance-way, 1 near the top and 1 in the centre of the railing, to be closed during the night, unless there be a burning light over the steps, to prevent accidents.

No building already erected, or hereafter to be built in said city, shall be altered in any manner that would be in violation of any of the provisions of this chapter, or any rule or approval of the superintendent of buildings made and issued thereunder; but nothing in this chapter shall prohibit the raising or lowering of any building to meet a change of grade in the street on which it is located, provided that the building is not otherwise altered.

5. Undeveloped localities. In such parts of the city outside the fire limits and suburban limits, in which a system of streets has not been established only so much of the requirements of this chapter shall apply as in the judgment of the superintendent of buildings may be necessary for safety of life and health; but this shall not be construed to permit the erection of any building to exceed in height or area the limits fixed by this chapter for such buildings.

6. Buildings affected. All provisions of this chapter shall apply with equal force to municipal buildings as they do to private buildings, except as may be specifically provided for by law.

§ 2. Definitions. Unless otherwise expressly stated, the following terms shall, for the purposes of this chapter, have the meaning herein indicated:

statement in triplicate of the specifications, on appropriate blanks to be furnished to applicants by the bureau of buildings, and such plans and structural detail drawings or the proposed work as the superintendent of buildings may require. Such statement, constituting an application for a permit to construct or alter, shall be accompanied by a further statement in writing, sworn to before a notary public or commissioner of deeds, giving the full name and residence of each of the owners of said building, or proposed building, structure or proposed structure, premises, wall, platform, staging or flooring, and by a diagram of the lot or plot on which such construction or alteration is to be made, showing the exact location of any proposed new construction and all existing buildings or structures that are to remain.

2. Authorization of owner. If the construction, alteration or plumbing or drainage or the alteration thereof, is to be made or executed by any other person than the owner of the land in fee, the person intending to make such construction or alteration, or to construct such plumbing or drainage, shall, either as owner, lessee, or in any representative capacity, accompany the application to build or alter with a statement in writing, sworn to as aforesaid, giving the full name and residence of each of the owners of the land, building, or proposed building, structure or proposed structure, premises, wall, platform, staging or flooring, and reciting that he is duly authorized to perform said work. Such statement may be made by the agent or architect of the person hereinbefore required to make the same.

3. Notice to demolish. Before any existing building or part of an existing building is demolished, a statement in writing on appropriate blanks to be furnished by the bureau of buildings, constituting a notice to demolish, shall be submitted to the superintendent of buildings by the owner or any person authorized by the owner, giving the full name and residence of each of the owners of the building to be demolished, the name and business address of the person who is to do the work and such other information respecting the building as the superintendent of buildings may require. Such notice shall be submitted not less than forty-eight hours before the work of demolition is commenced.

4. Place of filing. All applications, notices and sworn statements required by this section, and copies of the approved plans shall be kept on file in the office of the superintendent of buildings. Applications shall be promptly docketed as received. For purposes of identification and reference all such papers shall be marked with the block and lot number of the property to which they apply, and with the street and house number when possible.

5. Amendments. Nothing in this chapter shall prohibit the filing of amendments to any application at any time before the completion of the work for which permit was sought, and such amendments, after approval, shall be made part of the application and filed as such.

6. Ordinary repairs excepted. Ordinary repairs to buildings or structures, or to the plumbing and drainage thereof, may be made without notice to the superintendent of buildings, but such repairs shall not be construed to include the cutting away of any wall or any portion thereof, the removal or cutting of any beams or supports, or the removal, change or closing of any stairway or required means of exit, or the alteration of any house sewer, private sewer or drainage system, or the construction of any waste pipe.

§ 4. Permits. 1. Approval of applications. It shall be unlawful to construct or alter any building, structure, wall, platform, staging or flooring, or any part thereof, or any plumbing and drainage, until the application and plans required by § 3 of this article shall have been approved by the superintendent of buildings, and a written permit issued by him. The superintendent of buildings shall approve or reject any application or plan, or amendment thereto, filed with him pursuant to the provisions of this article within a reasonable time and, if approved, shall promptly issue a permit therefor.

2. Approval in part. Nothing in this section shall be construed to prevent the superintendent of buildings from approving and issuing a permit for the construction of part of a building or structure, when plans and detailed statements have been presented for the same, before the entire plans and detailed statements of said building or structure have been submitted or approved.

3. Signature to permit. Every permit issued by the superintendent of buildings under the provisions of this chapter shall have his signature affixed thereto, but this shall not prevent the superintendent from authorizing any subordinate to affix such signature.

4. Limitations. Any permit issued by the superintendent of buildings under the provisions of this article, but under which no work is commenced within one year from the time of issuance, shall expire by limitation.

5. Compliance with plans. The construction or alteration of any building, structure, platform, staging or flooring, or of any plumbing or drainage, shall be in accordance with the approved detailed statement of specifications and plans, for which the permit was issued, or any approved amendment thereof. The superintendent may require a certified copy of the approved plans to be kept at all times on the premises from the commencement of the work to the completion thereof.

6. Adherence to diagram. The location of any new building or structure, or of any extension to an existing building or structure, shown on the diagram filed as required by § 3 of this article, or on any approved amendment thereof, shall be strictly adhered to. It shall be unlawful to reduce or diminish the area of any lot or plot, a diagram of which has been filed with an application to construct or alter and has been used as the basis for a permit, unless the building or structure for which the permit was issued complies in all respects with the requirements of this chapter for buildings or structures located on plots of such diminished area, provided, however, that this shall not apply to any case in which the lot area is reduced by reason or any street opening or widening or other public improvement.

7. Revocation. The superintendent of buildings may revoke any permit or approval issued under the provisions of this article, in the case of any false statement, or any misrepresentation as to a material fact in the application on which the permit or approval was based.

§ 5. Certificate of occupancy. 1. New buildings. No building hereafter erected shall be occupied or used, in whole or in part, for any purpose whatever until a certificate of occupancy shall have been issued by the superintendent of buildings certifying that such building conforms substantially to the approved plans and specifications and the requirements of this chapter applying to buildings of its class and kind.

2. Buildings hereafter altered. No building hereafter altered, which was vacant during the progress of the work of alteration, shall be occupied or used, in whole or in part, for any purpose whatever, until a certificate of occupancy shall have been issued by the superintendent of buildings certifying that the work for which the permit was issued has been completed substantially in accordance with the approved plans and specifications and the provisions of this chapter applying to such an alteration; and when the occupancy or use of a building has continued during the work of alteration, the occupancy or use of the building shall not continue for more than thirty days after completion of the alteration unless such certificate shall have been issued.

3. Existing buildings. Nothing in this section shall prevent the continuance of the present occupancy and use of any now existing building, except as may be specifically prescribed by this chapter or as may be necessary for the safety of life or property. Upon written request from the owner, the superintendent of buildings shall issue a certificate of occupancy for any now existing building, certifying, after verification by inspection, the occupancy or use of such building, provided that at the time of issuing such certificate there are no notices of violation, or other notices or orders pending in the bureau of buildings.

provisions of this chapter referring to the rules or requiring approvals of materials or

4. Change of occupancy. No change of occupancy or use shall be made in any building or part thereof, hereafter erected or altered, that is not consistent with the last issued certificate of occupancy for such building. In case of any now existing building, no change of occupancy that would bring it under some special provision of this chapter, shall be made, unless a certificate is issued by the superintendent of buildings certifying that such building conforms to the provisions of this chapter with respect to buildings hereafter altered for the proposed new occupancy and use.

5. Temporary occupancy. Upon request of the owner or his authorized representative, the superintendent of buildings shall issue a temporary certificate of occupancy for part of a building, provided that such temporary occupancy or use would not in any way jeopardize life or property.

6. Contents of certificate. In addition to the certification when required by this section, as to compliance with approved plans and specifications, and provisions of this chapter, all certificates of occupancy shall state the purposes for which the building may be used in its several parts, the maximum permissible live loads on the several floors, the number of persons that may be accommodated in the several stories, in case

such number is limited by any provision of this chapter or the approved specifications, and all special stipulations of the permit, if any.

7. Issuance and filing. Certificates of occupancy shall be issued within ten days after written application therefor, if said building at the date of such application shall be entitled thereto. A record of all certificates shall be kept in the bureau of buildings and copies shall be furnished, on request, to any person having a proprietary interest in the building affected.

§ 6. Modifications. In exercising his powers to vary the provisions of this chapter, or any rule authorized thereunder, the superintendent of buildings shall proceed in accordance with the provisions of the Greater New York Charter establishing that power. A record of all modifications shall be kept in the bureau of buildings, properly indexed and open to public inspection during business hours. All modifications, including the applicant's petition for same and the superintendent's reasons for granting, shall be published in full in the CITY RECORD within two weeks after the superintendent's action, and may be cited as precedents.

§ 7. Rules. 1. Authority to adopt rules. The superintendent of buildings shall have power to adopt such rules with respect to the materials and mode of construction, consistent with the provisions of this chapter, as may be necessary to secure the intent and purposes of this chapter and a proper enforcement of its provisions. For any provisions of this chapter referring to the rules of requiring approvals of materials or modes of construction, such superintendent shall adopt, when this section becomes effective or as the necessity may arise, such rules as are required or will establish the conditions of approval. So far as practicable such rules shall be uniform in all the boroughs.

2. Procedure. No rule adopted by the superintendent of buildings shall become effective until it shall have been published in the CITY RECORD on eight successive Mondays, and until a public hearing on the same shall have been held, provided, however, that said public hearing shall not be necessary for the purposes of this chapter unless a request shall have been made for such hearing during the said period of publication. HENRY BRUERE, Chamberlain.

BELLEVUE AND ALLIED HOSPITALS.

REPORT FOR THE QUARTER ENDED SEPTEMBER 30, 1915.

The Department as a Whole.

Only a part of the money required to meet certain deficits in the appropriations for the department having been allowed by the Board of Aldermen the Trustees have been obliged to ask for the issue of special revenue bonds in the sum of \$71,195.18, of which the separate items are: Supplies, \$35,400.00; Equipment, \$5,500.00; Salaries and Wages, \$14,095.18; Contract and Open Order Service, \$16,200.00.

The General Medical Superintendent has been directed to keep a register at each hospital wherein members of the house staff are to record their response to fire drills when they are held, and it has further been decided to instruct the superintending officers to report to the General Medical Superintendent every employee, physician or other person under the jurisdiction of the Board who refuses to comply with the rules governing their duties during such drills. These rules are to be printed conspicuously in red and posted in prominent places.

It has been decided to install incinerators at an estimated cost of \$350 each at all of the allied hospitals. Provision will be made for these items in the budget for the coming year.

The new motor ambulances have been placed in service and the horse equipment is no longer needed except for the trucking and transferring work at Bellevue.

Bellevue Hospital.

The new surgical pavilions I, K, L and M are in a state of structural completion, but are still unused awaiting the installation of lighting fixtures, telephone equipment and the award of a contract for painting. Bids for the painting of I and K were received on August 24th, but on the recommendation of the architects, Messrs. McKim, Mead and White, and in view of the best interests of the city these bids were rejected and the contract advertised anew. A new set of bids was received on September 16th and the contract awarded to the lowest bidder, David Davis, in the sum of \$6,675.

On account of a fire in their factory the International Gas and Electric Fixture Company requested an extension of time on their contract for the installation of the lighting fixtures in these pavilions, and they were granted an extension of thirty days, and later were given a further extension of twenty-one days. This would bring the time for the completion of the work to October 29th.

Specifications have been approved and the advertisement authorized for the installation of the radiographic department in the new pavilions at an estimated cost of \$15,350. It is very necessary that this department should be promptly equipped as it will be difficult to bring patients the long distance from the new surgical pavilions to the quarters at present occupied by the X-ray department.

Plans and specifications for the installation of the interior telephone system, in all four of the new pavilions, were approved and bids received at Bellevue on September 16th. These bids are at present undergoing a close examination and scrutiny at the hands of the Building Committee, which will investigate the best systems in use elsewhere before making a final report.

A charge of two and one-half per cent. for the fees of a consulting engineer in connection with the elevator service of the new pavilions was disallowed by the Trustees on the ground that the architect made no charge for such service when installing the elevators in Pavilions A and B, the pathological building and the laundry building. The architects have not acquiesced in this decision and the matter has been referred to the Corporation Counsel for his opinion.

The Commission of Public Charities has been requested to vacate the building now used as a general drug department on the grounds of Bellevue Hospital, with a view of its possible use as an admitting office for the new pavilions.

Bids for the construction of a receiving room on the pier at the foot of East 29th Street were received on June 28th and the contract awarded to the lowest bidder, Benjamin J. Loewy, in the sum of \$1,916.

Plans and specifications for the roadways, curbing, grading, seeding of grass plots and drainage work around pavilions L and M were presented by the architects in June and referred to the Building Committee for their inspection and recommendation.

The Trustees have asked the Park Department for the services of an expert to look at the trees on the grounds of Bellevue and Gouverneur Hospitals.

The roof wards on pavilions A and B have been completed and are now in use.

THE MEDICAL SERVICE.

At the suggestion of Dr. Abraham Flexner, the Board's adviser in the matter of medical reorganization, the several medical colleges connected with Bellevue have been asked for a detailed account of their expenditures in connection with their hospital work.

An additional Resident Alienist to assist the Director of the Alcoholic and Psychopathic Services during the period from July 1st to December 31st, 1915, has been engaged.

The class of crippled children has been turned over to the Association for Crippled Children, which provides for such cases in other sections of the city.

Upon the suggestion of the Commissioner of Public Charities the operation of the Clearing House for Mental Defectives has been transferred from that department to Bellevue Hospital. This was adopted as a temporary measure for the current year, the medical agents to remain under the jurisdiction of the Commissioner of Public Charities, with the understanding, however, that the work will be done hereafter under the jurisdiction of the Trustees, in the same manner now operative for the examination and commitment of the insane, and change in title of the clinic was made to "Clinic for Atypical Children."

Dr. Gregory has asked that provision be made for the appointment of specialists in eye, ear, nose, throat and skin, preferably young men who would be willing to attend at least three afternoons in the week.

SOCIAL SERVICE DEPARTMENT.

The request of the Social Service Bureau for the appointment of a solicitor of funds has been allowed, subject to the condition that all correspondence and appeals addressed to the public for the purpose of obtaining funds to supply the needs of the bureau must first be presented to the Trustees for their approval.

An issue of special revenue bonds has been asked for the appointment of two social service nurses to be assigned to the drug cases.

It has been decided to open the Social Service Department on Sunday with at least one employee in charge. The inauguration of this change will be postponed until the return of Miss Wadley from her vacation.

An additional Social Service nurse for the care of Jewish patients has been asked in the department estimate for 1916.

Gouverneur Hospital.

Bids were received on July 19th for the construction of the new building to house the out-patient department at Gouverneur Hospital and contracts were then awarded as follows: General Construction, John H. Parker Co., \$141,947.50. Plumbing, James McCullough, \$11,320.00. Heating and ventilating, E. Rutzler Co., \$18,890.00. The final contract with the architects, Messrs. McKim, Mead and White, for the construction of this building has been presented to the Board of Estimate and Apportionment for their approval.

Excavation for the new building was started on Monday, September 13th, and excellent progress has been made.

An investigation of the old ferryboat "Westfield" in use as a day camp for tuberculous patients discloses the fact that an expenditure of nearly one thousand dollars would be necessary to place the boat in condition for further use as a camp. Before authorizing this expenditure the Trustees decided to request the Commissioner of Docks and Ferries to make an inspection to determine if the boat is safe for the purpose for which it is now used and also if it would be safe after making repairs for which the above mentioned estimate has been received.

Harlem Hospital.

Corporate stock in the amount of \$25,000, for the purpose of furnishing and equipping the new ward wing was voted by the Board of Estimate at their first meeting in July. Specifications for these furnishings were sent to the Board of Estimate and Apportionment on April 12th, but had not been acted upon up to August 18th, when the President wrote a letter to that Board urging prompt action.

It has been decided to restore the Medical Board room to its original size and to set aside for the use of students the room on the third floor corresponding to the sitting room of the house staff on the fourth floor.

Nearly all the contractors at work on the new wing and on the alterations in the main building have requested extensions of time on their contract on account of changes in the design to provide uniform style throughout the hospital and on account of the delays incident to permitting them access to their work. The failure of the Tower Construction Company to carry out the general contract is responsible for much of this condition and the extensions have accordingly been granted on the recommendation of the architect and the Building Committee.

Two places of Adjunct Assistant Visiting Obstetricians have been created in connection with the out-patient department.

Under-graduate masseurs in the orthopaedic clinic of the out-patient department have been appointed on condition that they be employed under the immediate direction of the Visiting Surgeons.

It has been decided to permit certain operations under general anesthesia by qualified operators in the ear, nose and throat clinics of the out-patient department, such patients to be allowed to remain when necessary in the accident ward until fully recovered from the effects of anaesthesia.

A suggestion made by the New York City Visiting Committee for the creation of a separate gynaecological service at Harlem Hospital was submitted to the Medical Board of the hospital for their consideration. The suggestion did not receive the approval of the Medical Board and it has been decided to make no change for the present.

Fordham Hospital.

The Trustees regret to report the death on September 20th, 1915, of Miss Lulu Jones, Supervising Nurse and Acting Superintendent of Fordham Hospital. Miss Jones has been in charge of the hospital for the past two years, and for many years before that had rendered faithful service to the City in connection with Bellevue and its dependencies. Miss Malmgren has been transferred from Harlem to take her place as Supervising Nurse at Fordham.

The report of the State Board of Charities, dated July 16, has placed Fordham Hospital in Class I both as to plant and administration.

The General Medical Superintendent has been instructed to make special efforts to get additional practitioners for the out-patient department of this hospital, particularly in the medical clinics.

Neponsit Beach Hospital for Children.

An eligible list for the position of Hospital Superintendent was promulgated on August 21 by the Municipal Civil Service Commission and Miss Josephine P. W. Brass, the present superintendent of the hospital and first on the list, was appointed to this position.

The Trustees were informed by the Board of Health under date of June 12 that the companies operating at Barren Island have been committed to the recommendations made by the Engineer in his report on "The Elimination of Odors." It is believed that the installation of the equipment recommended will permanently abate the nuisance now coming from Barren Island.

Plans and specifications for the additions and alterations on the fourth floor of

this hospital were communicated to the Trustees on July 20 and transmitted to the Board of Estimate for their approval, while the specifications for the balconies and fire-escapes, for which an appropriation of \$20,000 has been made by the Board of Estimate, were received and similarly disposed of on August 3.

The transfer of \$3,000 corporate stock from Bellevue to this hospital for additional partitions has been approved.

Much annoyance has been caused by the overflowing of the cesspool at Neponsit Beach, as the overflow has failed to drain away. The Neponsit Realty Company has offered to connect the hospital with their sewerage system for the sum of \$600 per annum. The Comptroller has been communicated with to determine whether the department has authority to enter into such a contract.

In reply to an inquiry by the Park Commissioner of Queens as to the attitude of the Trustees concerning the granting of camp sites within three hundred feet of the hospital, reply was made that the Trustees were opposed to the erection of permanent camps on the hospital property.

The Board of Estimate has been requested to transfer \$2,500 from the Bellevue corporate stock account for the purpose of establishing such an account at Neponsit Beach Hospital to permit minor construction work at that hospital.

JAMES K. PAULDING, Secretary, Board of Trustees.
