

2022 - Con Edison Equipment Stray Voltage Check

For the year of 2022, the Department of Transportations Energy Services Unit along with the Department of Transportations Electrical Inspectors Unit randomly surveyed locations for stray voltage pursuant to NYC Administrative Code Section 19-153 (Local Law 44 of 2004). These locations were at or around Con Edison equipment. Each location was tested using two methods:

- 1) Using HD electric LU-5 low voltage contact detector.
- 2) Using a Fluke 373 clamp meter with a verified good ground 50 ft. outside tested location.

All five boroughs were surveyed. No locations were found to have stray voltage and no such reports were made to Con Edison.

Date of Inspection, Borough, Location, type of Con Edison equipment, and whether stray voltage was found at the location are indicated below.

No.	Date	Boro	Location	Type	Voltage Found
1	11/01/21	Manhattan	South St and Clinton St	MH	None
