GAS COMMISSION.

DEPARTMENT OF PUBLIC WORKS,
COMMISSIONER'S OFFICE, ROOM 19, CITY HALL,
NEW YORK, March 24, 1879.

PROPOSALS FOR LIGHTING THE
PUBLIC LAMPS.

PROPOSALS FOR FURNISHING THE GAS OR
other illuminating material for, and Lighting,
Extinguishing, Cleaning, Repairing, and Maintaining the
Public Lamps (and supplying Gas, etc., for New Lamps
when required) on the Streets, Avenues, Piers, and Places
in the City of New York, under the care and charge of the
Department of Public Works, excepting the Twenty-third
Ward, and that portion of the Twenty-fourth Ward for-
merly known as the town of West Farms, for the period of
one year, commencing May 1, 1879, and ending April 30,
1880, both days inclusive.

Proposals for the above, made in accordance with sec-
tion 73, chapter 335, Laws of 1873, and chapter 125 of
Laws of 1878, and Revised Ordinances of 1859, chapter 8,
article 2, and inclosed in a sealed envelope indorsed
"Proposals for furnishing the Illuminating Material for,
and Lighting and Extinguishing, Cleaning, Repairing and
Maintaining the Public Lamps," with the name of the
party making the same written thereon, will be received
at the office of the Commissioner of Public Works until
12 o'clock M. of Monday, April 7, 1879, at which place and
hour they will be publicly opened by said Commissioner
and read.

Bidders are required to state in their proposals their
names and places of residence; the names of all persons
interested with them; and if no other person be so in-
terested, they shall distinctly state the fact; also that
it is made without any connection with any other
person making any estimate for the same supplies
and work, and that it is in all respects fair, and without
collusion or fraud; and also that no member of the
Common Council, head of a Department, Chief of a
Bureau, Deputy thereof, or Clerk therein, or other
officer of the Corporation, is directly or indirectly in-
terested therein, or in the supplies or work to which it
relates, or in any portion of the profits thereof; which
proposals must be verified by the oath, in writing, of the
party making the estimate, that the several matters stated
therein are in all respects true. Where more than one
person is interested, it is requisite that the verification be
made and subscribed by all the parties interested.

Each proposal shall be accompanied by the consent, in
writing, of two householders or freeholders of the City of
New York, with their respective places of business or resi-
dence, to the effect that if the contract be awarded to the
person or persons making the bid or proposal, they will,
on its being so awarded, become bound as his or their
sureties for its faithful performance; and that if he or they
shall omit or refuse to execute the same, they will pay to
the Corporation any difference between the sum to which
he or they would be entitled upon its completion, and
that which the Corporation may be obliged to pay to
the person to whom the contract may be awarded at
any subsequent letting; the amount in each case to be
calculated upon the estimated amount of the work by which
the bids are tested; the consent above mentioned shall
be accompanied by the oath or affirmation, in writing,
of each of the persons signing the same, that he is a
householder or freeholder in the City of New York, and is
worth the amount of security required for the completion
of the contract, and stated in the proposals, over and
above all his debts of every nature, and over and above
his liabilities as bail, surety, and otherwise; that he has
offered himself as a surety in good faith, and with an
intention to execute the bond required by section 27,
article 2, chapter 8, of Revised Ordinances of 1859, or-
ganizing the Municipal Government of the City of New
York, if the contract shall be awarded to the person
or persons for whom he consents to become surety. The
adequacy and sufficiency of the sureties offered to be de-
termined by the Comptroller.

Bidders are required to state in their proposals the
several streets or parts of streets in which they propose to
perform the requirements herein contained, and also the
illuminating or candle power of the gas they propose to
furnish, when tested at a distance of not less than one mile
from the place of manufacture; and bidders proposing to
furnish any illuminating material other than illuminating
or coal gas, must state distinctly what kind of material they
propose to furnish, and the illuminating power of the
burner they propose to use for the same.

Bidders are also required to state the price for which
they will furnish the gas (of not less than sixteen candle
power by photometrical test, at a distance of not less than
one mile from the place of manufacture) or other illuminat-
ing material for each lamp, including the lighting, extin-
guishing, cleaning, repairing, reglazing, and painting lamp-
posts and lanterns, and replacing the cocks, tubes, burners,
crossheads, lamp-irons, and lanterns thereto, for the period
from May 1, 1879, to April 30, 1880, both days inclusive;
stating the price for the above named period of one year
for each lamp.

Bidders are also required to state a price for which they
will repair lamp-posts, including straightening and releas-
ing, and for each new lamp fitted up, as follows:

For each lamp-post straightened, stating the price per
post.

For each column relined, stating the price per post.

For each lamp-post removed, stating the price per post.

For each lamp-post reset, stating the price per post.

For each new lamp fitted up, stating the price per post.

The bidders are required to write out the amount of
their bids in their estimates, in addition to inserting the
same in figures.

The number of lamps to be contracted for is about
nineteen thousand.

The burners for illuminating gas are to be of a capacity
to burn three cubic feet of gas per hour under a pressure
of one inch, and in case the illuminating material shall be
other than illuminating gas, then the burners to be used for
such illuminating material shall give a light (by photo-
metrical test) equal to the light given by the gas-burners
in use in the public lamps in the City of New York.

Should any alteration or any attachment be required to
any portion of the lamps for which proposals are made,
in consequence of the use of illuminating material other
than gas, then such alterations shall be done, and such
attachment placed on the lamps without expense to
the city.

The number of hours the lamps are to be kept burning
during the contract is four thousand hours.

The amount of security required is \$60,000 on all con-
tracts, which will amount to \$100,000, or more, and on
smaller contracts the security shall be sixty per cent. of
the total amount of the bid.

The award of the contract will be made as soon as prac-
ticable after the opening of the bids.

Should the person or persons to whom the contract is so
awarded neglect or refuse to accept to contract within
forty-eight hours after written notice that the same has
been awarded to his bid or proposal, or if he accept but
does not execute the contract and give the proper security,
it may be readvertised and relet as provided by law and
ordinance.

Bidders are informed that no deviation from the speci-
fications will be allowed, unless a written permission shall
have been previously obtained from the Mayor, Compt-
roller, and Commissioner of Public Works.

The right is reserved to assign and designate to any
bidder, whose bid shall be accepted, the number and
location of the lamps to be lighted by such bidder, in any
portion of the city for which proposals are received, and to
increase or diminish such number.

The right is reserved to determine and designate, after
the proposals are opened, what illuminating material shall
be used in the public lamps, or any number of them, during
the period before mentioned; also to decline any or all
proposals if deemed for the interests of the Corporation;
and no proposal will be accepted from, or contract awarded
to, any person who is in arrears to the Corporation, upon
debt or contract, or who is a defaulter, as security or other-
wise, upon any obligation to the Corporation.

If the proposal of any bidder proposing to furnish
illuminating gas shall include any lamps with which the
pipes or mains of such bidder are not connected at the
time of the making of the bid, and a contract for furnishing
the gas for and lighting, extinguishing, cleaning, repairing,
and maintaining any such lamps, shall be awarded to such
bidder, in that case, thirty days from the date of the
execution of such contract, and such further time, not
exceeding thirty days, as may be deemed reasonable by
the Commissioner of Public Works, shall be allowed to
such bidder in which to connect such pipes or mains with
such lamps.

But no payment to such bidder, on account of any such
lamps, will be made for the time so allowed, nor until the
same shall have been connected with the mains of such
bidder, nor except for the time during which all the re-
quirements herein mentioned shall have been fully per-
formed.

Blank forms of proposals can be obtained on application
at the office of the Commissioner of Public Works.

EDWARD COOPER,
Mayor.

JOHN KELLY, Comptroller.

ALLAN CAMPBELL,
Commissioner of Public Works.

No bid will be accepted from any person who is in arrears to the Corporation upon debt or contract, or who is a defaulter, as security or otherwise, upon any obligation to the Corporation. (Sec. 99 of Charter of 1873.)

The leases will contain the usual covenants and conditions, reserving to the Corporation the right to cancel the lease whenever the premises may be required by them for public purposes.

All repairs will be made at the expense of the lessees and no deduction whatever will be allowed for damage by reason of any sickness or epidemic that may prevail in the city during the continuance of the lease.

The lessees will be required to give a bond for double the amount of the annual rent, with two sureties, to be approved by the Comptroller, conditioned for the payment of the rent quarter-yearly, and the fulfillment on their part of the covenants of the lease.

SALE OF FERRY FRANCHISE.

THE FRANCHISE TO RUN THE FERRY FROM the foot of Grand street, East river, north side, in the City of New York to Broadway, in the City of Brooklyn, E. D., will be sold at public auction, to the highest bidder, at the office of the Comptroller of the City of New York, on Thursday, April 10, 1879, at 12 o'clock, noon, for the period of ten years from May 1, 1879.

The form of the lease required to be executed by the highest bidder can be seen at the office of the Comptroller on and after April 7, 1879.

All bids will be regarded as made with reference to said form of lease, and in case the highest bidder shall neglect to execute a lease according to said form, for ten days after said sale, his bid will, at the option of the Comptroller be rejected.

The leases will contain a covenant requiring the lessees to pay rent quarter-yearly to the Comptroller.

The successful bidder will be required to pay to the Collector of City Revenue the sum of fifteen hundred dollars immediately after the franchise shall have been struck down to him, as security for the execution and performance of the lease, such amount to be credited on the rent when the same becomes due.

Security, satisfactory to the Comptroller, will be required for the punctual performance by the lessees of the covenants of the lease of this franchise.

The right to reject any bid, if deemed to be to the interest of the City of New York, is reserved by the Commissioners of the Sinking Fund.

By order of the Commissioners of the Sinking Fund,
DATED NEW YORK,
COMPTROLLER'S OFFICE, March 29, 1879.

JOHN KELLY,
Comptroller.

INTEREST ON CITY STOCKS.

THE INTEREST ON THE BONDS AND STOCKS of the City and County of New York, due May 1, 1879, will be paid on that day by the Comptroller, at his office in the New Court-house.

The transfer books will be closed from March 28 to May 1, 1879.

SUPREME COURT.

In the matter of the application of the Department of Public Works, for and on behalf of the Mayor, Aldermen and Commonality of the City of New York, relative to the opening of Eighty-second street, from First avenue to the East river, in the City of New York.

WE, THE UNDERSIGNED COMMISSIONERS of Estimate and Assessment in the above-entitled matter, hereby give notice to the owner or owners, occupant or occupants, of all houses and lots, and improved and unimproved lands, affected thereby, and to all others whom it may concern, to wit:

First.—That we have completed our estimate and assessment, and that all persons interested in these proceedings, or in any of the lands affected thereby, and who may be opposed to the same, do present their objections in writing, duly verified, to Menzo Diefendorf, Esq., our Chairman, at the office of the Commissioners, No. 206 Broadway, Room 72, in the said city, on or before the second day of May, 1879; and that we, the said Commissioners, will hear parties so objecting within ten week days next after the said second day of May, 1879, and for that purpose will be in attendance at our office on each of said ten days, at three o'clock in the afternoon.

Second.—That the abstract of the said estimate and assessment, together with our maps, and also all the affidavits, estimates, and other documents which were used by us in making our report, have been deposited in the office of the Department of Public Works, in the City of New York, there to remain until the nineteenth day of May, 1879.

Third.—That the limits embraced by the assessment aforesaid, are as follows, to wit: All those lots, pieces or parcels of land situate, lying and being in the City of New York, and bounded and described as follows: Beginning at a point on the easterly side of First avenue, distant one hundred and two feet two inches northerly from the northerly side of Eighty-second street; thence easterly and parallel with Eighty-second street to the East river; thence southerly along the said East river to a point distant one hundred and four feet two inches southerly from the southerly side of Eighty-second street; thence westerly and parallel with Eighty-second street to the easterly side of First avenue; thence northerly along the easterly side of First avenue to the point or place of beginning.

Fourth.—That our report herein will be presented to the Supreme Court of the State of New York, at a Special Term thereof, to be held in the New Court-house, in the City of New York, on the tenth day of June, 1879, at the opening of the Court on that day, and that then and there, or as soon thereafter as counsel can be heard thereon, a motion will be made that the said report be confirmed.

Dated New York, March 26, 1879.

PROPOSALS FOR ELEVATOR.

SEALED PROPOSALS FOR ERECTING AN ELEVATOR in the New County Court-house, will be received by the Commissioners for the Completion of the New County Court-house, at the above address, until Monday, April 14, 1879, at 12 o'clock, noon, when the same will be publicly opened and read.

Bidders will write out the amount of their estimate, in addition to stating the same in figures.

Each proposal must be accompanied by the consent, in writing, of two householders or freeholders of the city of New York, with their respective places of business or residence, to the effect that, if the contract be awarded to the person or persons making the bid, they will, on its being so awarded, become bound as sureties, in the sum of twenty-five hundred dollars, for its faithful performance; and that if said person or persons shall omit or refuse to execute the contract, they will pay to the Corporation any difference between the sum to which said person or persons would be entitled on its completion, and that which the Corporation may be obliged to pay to any higher bidder, to whom the contract may be awarded at any subsequent letting.

The Commissioners reserve the right to reject any or all proposals if, in their judgment, the same may be for the interest of the city.

The sealed envelope, containing the estimate or proposal, will be indorsed with the name or names of the person or persons presenting the same, the date of its presentation, and also the words "Proposal for Elevator."

Forms of proposals may be obtained, and the plans, specifications, and terms of contract, as approved by the Counsel to the Corporation, may be seen at the office of the Architect, Mr. Leopold Eidlitz, 128 Broadway.

Alterations, Amendments, and Additions to the Rules and Regulations.

DETAIL OF MEMBERS OF THE UNIFORMED FORCE FOR MECHANICAL WORK.—The working hours, exemptions from other service, privileges, etc., of members of the uniformed force detailed to work as mechanics in the repairs and alterations of the houses of the Department, were so fixed as not to deprive the Department of their services at fires.

KEYS TO FIRE ALARM BOXES.—Officers releasing keys used in sending out alarms were required to note the same upon the reports of operations, and also to report the circumstances, stating in cases of unnecessary alarms the probable cause therefor, to the officer whose duty it is to report the particulars of the fire or alarm.

The rule fixing the responsibility for alarm box keys was amended so as to make the several company commandants responsible for the keys designated for all boxes located in their respective company districts, whether the location fixed for the key be in or outside of the company districts. The issue of keys to responsible citizens, who may desire to apply for the same, was directed under proper restrictions and regulations, and two hundred were thus issued to the close of the year.

CODE OF SIGNALS AND SIGNAL STATIONS.—Special call signals for the purpose of calling the President or either of the Commissioners to any desired locality, were devised and promulgated. Two new signal stations and alarm boxes were added, as follows :

No. 53, at the southeast corner of Dey and West streets.

No. 123, at the northwest corner of Broome and Mercer streets.

The signal station No. 688, located at the intersection of Ninety-eighth street and Second avenue, was removed to Ninety-seventh street and Second avenue, and an alarm box was located at that point.

RULES AND REGULATIONS FOR THE GOVERNMENT OF HEADS OF BUREAUS, SUPERINTENDENTS, REGULAR CLERKS, AND OTHER EMPLOYEES.—In these rules the duties and responsibilities of the Secretary and all other employees at the Headquarters of the Department, the Chief of Department and Assistant Chief of Department, the Inspector of Combustibles and his clerks and employees, the Fire Marshal and his clerk and assistants, the Superintendent of Telegraph, his operators and employees, the Medical officer and Vice-Medical officer, the Supply Clerk, the Superintendent of the Repair Shops and his assistants and employees, and the Superintendent of Horses and his employees, were accurately defined and fixed ; the method of communicating on the business of the Department, the office hours and penalties for violations of the rules, or other unbecoming or improper conduct, were prescribed.

LEAVES OF ABSENCE.—An amendment to the rules on this subject was made, requiring such leaves to be so regulated that neither both officers or engineers of the same company, or commandants of neighboring companies, shall be absent at the same time. Authority was also given to the Chief of Department to grant leaves of absence during the period intervening the 6th day of July and the 15th day of October, in each year ; and to facilitate compliance with the rule by making all necessary and proper dispositions during that period, subject to the proviso that a due proportion of the officers and men shall be available for fire duty in each company at all times.

SCHOOLS OF INSTRUCTION were organized for the instruction of the various grades named, as follows :

For the Foremen of the companies (divided into two classes), on Mondays and Thursdays of each week, at which the Chief of Department (or such other officer as he may designate) gives instruction in all matters pertaining to their duties as officers.

For the Assistant Foremen of the companies (being the Corps of Sappers and Miners, divided into two classes), on Wednesday of each week, at which the Assistant Chief of Department, acting as Chief of the Corps, or the Instructor, gives instruction in the use of explosives, mining, etc.

For the Engineers and Assistant Engineers of steamer of the companies (divided into four classes), on Tuesday and Friday of each week, at which the Chief of Battalion in Charge of Repair Shops, gives instruction in all matters pertaining to their duties as Engineers, and general fire duty.

TRANSFERS.—To prevent the intercession of persons not members of the Department on behalf of members of the uniformed force for transfers from one company to another, a rule was adopted prescribing that applications for transfer must be made in the handwriting and over the signature of the officer or member desiring to be transferred, stating the reasons therefor. Violations of this rule were made punishable by fine or dismissal.

Losses by Fire.

From the foregoing tables it will be seen that while the number of fires occurring during the year was 1,655, being 205 more than during the year 1877, the total loss was but \$1,883,052 for 1878, as against \$3,210,695 for 1877, and that the average loss per fire for the two years was as follows: 1877, \$2,214.27; 1878, \$1,137.78.

The only fires which resulted in a loss of more than \$50,000 were the following:
February 17th, Nos. 216 to 226 West 23d street..... \$279,878 00
March 26th, Nos. 261 to 267 Canal street..... 267,600 00
January 28th, Nos. 115 and 117 Worth street..... 91,050 00
May 29th, Nos. 13 and 15 White street..... 81,450 00
December 17th, Nos. 214 to 232 West 26th street..... 52,790 00

Fires in Places of Amusement, etc.

A number of fires occurring in places of amusement were reported during the year, all of them being extinguished with very little damage, in great part by the detailed firemen on duty during the performances. Panics in the audiences, produced by very slight causes, were also reported, which were in all cases quieted by the timely appearance of the firemen and assurances of safety. This duty is regarded as of great importance, and as being in fact indispensable, though it consumes much of the time of the men detailed for the purpose. During the year the services of twenty officers and seventy-one men were required during performances at theatres, fairs, etc.

Annual Inspections.

The annual inspection took place between December 3d and 17th, and was conducted in quarters, comprehending a verification of the rolls of the various companies (which showed a total of 716 officers and men present, 11 absent, aggregate, 727); a minute inspection of uniforms, apparatus, hose, horses, harness, implements and the several quarters and their contents, including books of record, and exhibitions of the efficiency of each company in hitching up, showing a general average of 10 to 26-100 seconds for all the apparatus of the Department. The report of the inspecting officer shows, as the result of the inspections, that but few defects were found, and that generally the uniformed force of the Department, its appearance and discipline, together with their apparatus, etc., was in a condition highly creditable.

Record of Meritorious Services.

The following is the record of meritorious services, involving personal risk, performed by members of the uniformed force during the year, as taken from the "Roll of Merit," upon which are also entered four other cases, not, however, involving personal unusual risk.

May 2, 1878—In response to an alarm from station 339, at 11.50 P. M., Hook and Ladder Company No. 3 proceeded to the premises No. 28 East Fourteenth street, and found a woman (Miss Sarah Freeman) hanging out of the fourth story window, all other means of escape having been cut off by the fire in the building. The longest ladder was raised with all possible celerity from the sidewalk, and being found too short was shifted to the top of the stoop and held by hooks in a perpendicular and dangerous position against the front of the building. In this position it was ascended by Foreman Daniel J. Meagher, commanding the company named, followed by Fireman John P. Flood, who, notwithstanding that the ladder was found to be still three feet short, succeeded in rescuing the woman from her perilous position and at great personal risk. Foreman Meagher will be recommended to the Trustees of the Bennett Medal Fund as the proper recipient for the medal for 1878.

The Bennett Medal for 1877 was awarded to Fireman Thomas Dougherty, of Hook and Ladder Company No. 1, for rescuing two adults from the sub-basement of No. 29 North William street, on March 31 of that year, under circumstances attended with great personal risk, and by heroic exertions on his part, and the medal was presented to him, under the direction of the Trustees of the Fund, on December 19, at the headquarters of the Department, in the presence of his comrades of the Second Battalion. In addition to the above record of individual meritorious services, several communications recognizing the efficiency and commending the conduct of certain companies at fires were received.

Casualties at Fires.

The number and nature of the casualties at fires, or in connection with the operations of the Department in responding to alarms, was as follows:

Corps of Sappers and Miners.

The instruction of this Corps continued during the year, the two classes alternating in attending weekly lectures where the rules for computing the size of cubical and cylindrical dynamite charges were given, and their application for stone, wooden, and iron structures explained; the economy in the use of tamped cylindrical charges proven, and the advantages of firing blasts by means of electricity illustrated. Incidental to the Barclay street fire of December 20, 1877, a number of lectures were given by the Instructor of the Corps on the cause and origin of fires. The conditions under which flames will spread with lightning-like rapidity, as in the case of combustible-dust explosions, were inquired into, fully explained, and finally illustrated by a number of telling experiments. The circumstances causing back-draft explosions and spontaneous combustion were also commented upon. The most important part of the conclusions arrived at were briefly:

That dry combustibles, if finely pulverized, will burn with explosive velocity when in sudden contact with an open flame or a temperature which causes ignition. 1st, when each particle of the

inflammable material is surrounded by sufficient air to support its combustion. 2d. When the distance between the adjacent grains diffused through the air allows the direct transmission of the flame from particle to particle.

The sudden ignition or flashing of such extremely inflammable dust suspended in the air produces a very high temperature in the gaseous products of the combustion, and this is necessarily accompanied by a great and sudden increase in bulk and pressure, constituting, in fact, an explosion. The late Professor Rankine and Dr. Macadam were the first to calculate that when the theoretical proportions best suited to produce an explosion—about one-fourth ounce of flour to one cubic foot of air—are exactly realized, the pressure of the resulting gaseous products, if confined in a limited space, suddenly becomes equal to about eight times that of the atmosphere.

It is probable that, in general, these theoretical conditions may not have been exactly reached, but still it is certain that a very great destructive pressure is produced where confined clouds of finely-powdered starch or dust from furniture and wood-turners' factories, etc., are suddenly ignited.

Among the lesser precautions which should be taken to guard against accidents resulting from the conditions specified, in future, should be the following:

Open lights should not be used in a dusty atmosphere, and all gas jets, etc., should be protected with gauze.

The Instructor of the Corps, in addition to services rendered the Department as an expert in giving opinions on matters pertaining to explosives and combustibles, also served as a member of a Board of Survey to examine and report on the safety and adaptability of the aerial ladders.

Parade.

A brigade of the Department was ordered to parade on May 30, to take part, on the invitation of the Grand Marshal of the day, in the ceremonies of Decoration Day.

New Organization.

The preliminary steps were taken to organize an additional engine company, to be located in that part of the city lying within Sixty-seventh and Eighty-fifth streets, the East river and Central Park.

Changes in Battalion Organizations.

The following companies were transferred as specified, with a view to the better equalization of the Battalions:

Engine Co. No. 24, from the Fifth to the Third Battalion.
Engine Co. No. 1, from the Seventh to the Fifth Battalion.
Engine Co. No. 19, from the Seventh to Fifth Battalion.
Hook and Ladder Co. No. 16, from the Seventh to the Ninth Battalion.

Water Facilities and Fire Hydrants.

Early in the year it was found that from many of the newly placed hydrants, gravel and stones in considerable quantities were drawn by the engines of the Department while using such hydrants, resulting in temporary damage to the pumps of the engines. The evil was so serious that the Department of Public Works was corresponded with on the subject, and its correction in the future was promised. As a further measure of precaution, the suction branch of the engines was provided with a strainer to prevent the passage of any solid material.

In order to protect by all practicable means the headquarters building of this Department, in which the entire fire alarm telegraph system of the city, with all its valuable instruments and machinery centres, against damage by fire, the pumping engine in the building (having the capacity of an ordinary steam fire-engine) was, at the request of the Board, connected, by the Department of Public Works, directly with the 12-inch main in Mercer street, thus insuring a full supply of water in case of emergency in the neighborhood.

A number of recommendations were made to the Department of Public Works to place additional fire-hydrants in various parts of the city, which have been mainly complied with, and it is promised that the remainder will be placed as soon as practicable.

Storage, Handling and Transportation of Explosives, etc.

The use of the vessel lying off the foot of Ninetieth street, in the East river, for storage of powder, was discontinued.

The following table was furnished to his Honor the Mayor, on January 18th, at his request, showing the number of fires from 1871 to 1877, inclusive, resulting from the use, sale, and handling of fireworks.

	NUMBER OF FIRES.	AMOUNT OF LOSS.	
1871.....	19	\$1,443 00

Repair Shops.

The system of keeping the accounts of the Repair Shops was changed, so that the cost of the labor and material expended upon any job of work could be readily ascertained.

A license to make and use a patent harness, which hangs suspended over the pole of the apparatus, and thus obviates the necessity of keeping horses harnessed in their stalls, besides facilitating the hitching up, was acquired on very favorable terms to the Department, and is in use in a number of the companies.

The force of mechanics at the Repair Shops has been kept fully employed during the year in the manufacture of new apparatus (including a wrecking truck, designed for throwing walls and demolishing dangerous ruins), and in the rebuilding and repairing of apparatus, hose, harness, etc.

Calcium Lights.

A few of the hook and ladder companies have been furnished with calcium light apparatus, for use at fires in the night time, and they have been very useful in a number of instances.

Horses.

Twenty-nine (29) horses were condemned and sold, thirteen (13) died, and forty-eight (48) were bought, the aggregate number in the Department being two hundred and twenty-one (221).

By an error of the property record for the year 1877, the number of horses reported on hand on December 31 was two hundred and eight (208); the number should have been two hundred and fifteen (215).

Hose.

Fifteen thousand feet of cotton rubber-lined 2½ inch three-ply hose, and twelve hundred feet of cotton rubber-lined 2½ inch one-ply hose, were added to the amount on hand at the close of the year 1877. The latter was purchased mainly for the purpose of testing its adaptability for use at the end of lines of the heavier hose in buildings, and with a view to lessening and facilitating the labor required in handling and carrying lines into the upper stories of buildings. For this service it has proved its entire adaptability and usefulness.

Three arrests for driving over lines of hose at fires (prohibited by law) were reported during the year.

CENTRAL OFFICE.—The new Telegraph Office, located in the front of the third story of Headquarters buildings, was occupied on March 25th. The numerous wires leading to and from it are now very easy of access, and it contains, very conveniently placed, all the instruments formerly used (which have been thoroughly repaired), as well as a new receiving instrument, a new transmitting instrument, an automatic testing instrument, and others of less importance, so that in the event of one of either of the two most important kinds of instruments (the receiving and transmitting) getting at any time out of order, the duplicate is always ready for use. The present office is as commodious and well-arranged as the former was crowded and inconvenient.

COMBINATION ALARM AND TALKING INSTRUMENTS.—Six of these instruments, intended to combine the reception of alarms from the street boxes direct, their registration and an automatic method of transmitting "still alarm" and "return to quarters" signals, in addition to their use for conversational purposes by means of a Morse key and sounder, have been placed in company quarters for trial.

DETAILS OF THE FIRE ALARM TELEGRAPH SYSTEM.—Early in the year a report was required from the Superintendent of Telegraph, showing in detail where wires not belonging to the Department had been permitted on its poles; where the wires of the Department were upon other than its own poles; all connections made with the wires of the Department from buildings other than those under its control; all batteries, instruments, etc., not belonging to the Department, located in any of its offices or buildings, and all batteries, instruments, etc., connected with the wires of the Department located elsewhere than in any of its offices or buildings, together with the authority for the same in each instance.

TAMPERING WITH ALARM BOXES.—The Department had been frequently annoyed by alarms sent by malicious or mischievous persons from certain localities, and after much effort, the arrest of one Samuel H. Clarke was finally effected by an officer of the Police Department, who was found to be responsible for many of these violations of the law, and who was tried, convicted and imprisoned for the offense. The example thus made has had a salutary effect of putting an end to such annoyances. Of the counterfeit keys made for this purpose, and heretofore frequently used, fourteen have been obtained by means of the new lock attachment.

UNNECESSARY FIRE ALARMS.—Reference was made in the report for the year 1877 to the lock attachment upon the fire alarm boxes, designed to prevent the sending of needless alarms by evil disposed or mischievous persons, which had been in partial use during that year. All of the locks to the remaining boxes were so altered early in the year, the result being a most gratifying decrease in the ratio of unnecessary telegraphic fire alarms, as will be seen by the following comparative statement:

	FIRES.	ALARMS UNNECESSARY.	TOTAL.	PERCENTAGE OF UNNECESSARY ALARMS.
1877.....	855	177	1,032	.17
1878.....	928	93	1,021	.09

SPECIAL SIGNAL 3-3-3.—Attention having been called to the frequent and unnecessary use of the signal of inquiry as to the station from which the last previous alarm proceeded, which had become a serious annoyance in the central office, directions were given restricting its use to cases of absolute necessity.

In this work is comprehended the removal of the line formerly on the Bowery to Chrystie and Elizabeth streets, necessitated by the construction of the New York Elevated Railroad, as well as the other numerous changes required to accommodate this and the other elevated railroad lines. Five days were consumed by the telegraph force in clearing the wires of kite-tails, mainly in that section of the city lying between Canal and Fourteenth streets and the Bowery and East river.

“ 17, One Hundred and Forty-third street, near Third avenue.*

Hook and Ladder Company No. 18, One Hundred and Sixty-sixth street, between Washington and Third avenues.

Store-house, 20 Eldridge street.

“ 173 Elm street.

“ 180 Clinton street.

“ Lawrence street, west of Tenth avenue.

The locations marked thus (*) are leased by the Department, all others are city property. The locations marked thus (†) are only in part occupied by the Department.

New Leases, etc.

To give better accommodation to Engine Company No. 41, located on Third avenue, near One Hundred and Forty-seventh street, the rear part of an adjoining lot, 18.6 x 25 feet was leased from May 1, 1878, at twenty-five dollars (\$25) per annum.

The premises formerly occupied by Engine Company No. 22, at Eighty-fifth street and Third avenue, were, upon the removal of that company to its new location, No. 159 East Eighty-fifth street, turned over to the Commissioners of the Sinking Fund, the same being no longer required for the uses and purposes of the Department.

The Commissioners of the Sinking Fund were also notified that the upper floors of No. 5 Duane street, were not needed for the uses of this Department, the lower stories being in use for a Fuel Depot.

Alterations and Repairs to Buildings.

The offices on the second floor at headquarters were entirely rearranged, and are now commodious, convenient, well heated, lighted, and ventilated.

The new quarters for Engine Company No. 22, No. 159 East Eighty-fifth street, were completed early in the year and occupied.

In the following company quarters, extensive repairs were undertaken, and in most instances completed before the close of the year:

Engine Companies Nos. 3, 7, 8, 14, 18, 24, 25, 29 and 33.

Hook and Ladder Companies Nos. 1, 3, 5, 10 and 12.
