Agency Waste Prevention, Reuse, and Recycling Annual Report

How has your agency implemented your waste prevention, reuse, and recycling plan in the past fiscal year?

DSNY continues to comply with LL36 in that recycling bins are in lobbies and entranceways, common areas, kitchens, and office areas, wherever practical. Signage is posted in common areas highlighting the types of materials to be recycled and where recycling bins are located within the facility.

What actions will your agency take in the future to further implement the plan or to improve current waste prevention, reuse, and recycling efforts?

DSNY will continue it's commitment to properly labeled bins and staff education to improved recycling efforts at all locations.

Are there any updates to your agency's original plan since your last annual report?

No

If yes, please describe the updates.

In the past fiscal year, did your agency send out any memos regarding recycling or waste prevention?

No

Agency Waste Prevention, Reuse, and Recycling Annual Report

In the past fiscal year, what has been the biggest challenge to improving recycling?

The biggest challenge to improving the recycling is ensuring that staff are actually recycling. With the help of random inspections and audits, the recycling efforts have improved. Bulk containers continue to be a black hole of mystery materials that are often improperly sorted.

Do all your agency sites have recycling stations and proper

signage? (Signage can be ordered for free by visiting <http://nyc.gov/recyclingmaterials>) Yes

Please explain any challenges in setting up recycling stations.

Do you want DSNY outreach staff to contact you to schedule staff trainings? Yes

Do you have any questions/concerns for DSNY?
