¹⁰ monthly ; the lessor to furnish the Croton Water." The premises consist of the first floor of a two-stary frame house which has hereicifore been used for a stable. The area of this floor is 640 quare feet; the sate of read will therefore be at 5480 per annum, 75 cents per square foot per annum. This appears to be a high reut to pay for a room in so inferior a building as this, but the ground an which it rest, trouting on the Bouleward, is very valuable, amounting to say \$8 per square foot, or \$5,020 for the 540 square feet. The full value of the building and ground I would estimate at \$50,020. At this valuation of the property the reut proposed would be at the rate of 8 per rent., which I consider full but not excessive.
