Branch Workhouse, Hart's Island, June 30, 1904.

Hon. FRANCIS J. LANTRY, Commissioner of Correction:

Sir—I herewith most respectfully submit the quarterly report of this institution for the months of April, May and June, and would summarize briefly the principal work performed, as follows:

The interior of the Roman Catholic Church has undergone extensive renovation, including plastering, painting and stenciling throughout, and at the present time the building has a very neat and becoming appearance.

The two new roads branching from Central avenue to the Charity dock have been completed in a thorough and workmanlike manner and represent one of the most important improvements ever made on the island.

About 200 feet of the subway for the conveyance of steam to the different buildings has been dug out, with a view to ascertaining the condition of the pipes and repairing same where required. A vault, 10 feet 6 inches by 7 feet 9 inches has been repaired, and a concrete floor put in for a tank and steam pump, to receive the return water from the steam pipes in the different buildings. Most of the pipes in these buildings have been repaired or replaced with new where necessary. The hot water tank in Pavilion No. 1 has also been repaired.

To facilitate approach of the boats to the south dock a bell tower has been erected, provided with a large bell, which will be rung in foggy weather.

Repairs and renovations have been in progress at the officers' cottages on the hill, and considerable necessary work has been done in and about the Branch Workhouse and City Cemetery office. A portion of the flooring has been renewed, an adjoining yard has been relined with cement, and the toilet room has been furnished with a complete set of toilet apparatus.

A brick building has been put up in the vicinity of the stone shed, intended to be used for fumigating the clothing of inmates upon their arrival.

The naphtha launch "Vim" has been repaired, reupholstered and newly painted.

The routine duties of the prisoners, such as burying the dead, work on the farm, road mending, keeping grounds in order, unloading coal and ice, etc., have been performed as heretofore. Such of the female prisoners as are capable of work have been employed in the laundry or in cleansing the different buildings, while the Reformatory boys, in the intervals between school hours, have been kept busy principally in hauling stone and freight.

Attached are tables relating to labor, the census, interments and work in the laundry.

Very respectfully,

THOMAS F. KANE, Head Keeper.

FOR THE RIGHT TO DUMP AND FILL-IN BEHIND THE BULKHEAD WALL RECENTLY BUILT AT THE NORTHERLY END OF THE CHLSEA SECTION ON THE NORTH RIVER, BOROUGH OF MANHATTAN.

TERMS AND CONDITIONS OF SALE.

The work to be done is to fill in with suitable material, as hereinafter described, the area behind the new bulkhead wall extending from a point 100 feet south of the southerly side of West Twenty-third street extended, southerly, a distance of about 1,035 feet, measured along the bulkhead wall, to a point on the northerly line of West Twenty-third street extended.

The northerly limiting line of this contract will run parallel with West Twenty-third street, while the southerly limiting line will run at right angles to the bulkhead wall.

The filling will extend from the rear of the bulkhead wall or coping westerly a distance of about 70 to 120 feet to the face of bank, which has been excavated in the recent dredging. For the length of wall extending along the southerly side of West Twenty-second street, and for a distance of about 400 feet, the filling will extend from the rear of the bulkhead wall northerly to the face of bank excavated in the recent dredging thereat.

The filling will be brought to a grade level with the top of the coping of the bulkhead wall and will extend inshore on a regular grade to the top of the ground at the adjacent or inshore bank.

It is estimated that the area outlining the above-described limits will create a basin to be filled in, under this agreement, whose cubical contents in net void space is equal to 50,000 cubic yards.

Bidders will state in writing a lump sum price, which they agree to pay for the privilege of filling in the area between about West Twentieth and West Twenty-third streets, as above more fully described, and being the basin calling for the filling of a void space estimated at about 50,000 cubic yards.

Should the Commissioner of Docks deem it to the best interest of the City, he may extend the southerly limit of this fill southerly a distance of about 400 feet to a point about 105 north of the northerly side of West Eighteenth street, the southerly line or limit to be at right angles to the bulkhead wall. Should the limits of the fill be extended southerly to this new line, a basin will be created in addition to the above-described basin, whose cubical contents in net void space will be equal to about 27,000 cubic yards. In the event of this extra filling being ordered by the Commissioner of Docks, it will be estimated at the same proportional rate as is received for the void space in the first section, whose southerly limit is about the northerly line of West Twentieth street, the prices on this first or northerly section being the prices on which the bids are to be tested.

In each of the estimated amounts given the amount in cubic yards is arrived at without placing any allowance for shrinkage, settlement, swelling of the material or penetration into the mud.

The Department is not bound in any way by such estimate, and bidders must satisfy themselves of the actual quantity required to fill in the above-described area by examination of the premises or such other means as they may prefer, the intention of the Department being to fill in the whole of the said premises behind the bulkhead wall within the above-described limits, and no allowance will be made to the purchaser from the purchase price on account of any discrepancy which may be found between the above-estimated quantity and the actual amount of filling required. The purchaser will be required to place the filling in accordance with the following specifications:

All the filling shall, unless otherwise directed, be placed directly in the rear of the bulkhead wall and carried from the bulkhead wall toward the shore until the bank of same has been carried out at the finished grade for a distance of about 40 feet from the face of the bulkhead wall, at which time, if so directed by the Engineer, the filling may be commenced from the shore toward the crib.

All material must be dumped and filled in only in such manner, at such points and in such order of procedure and at such times and seasons as may, from time to time, be directed, and the work of filling in may be entirely suspended for such periods of time as may be directed. The purchaser shall have no claim for damage or for any allowance from the purchase money on account of such suspension of the work.

All directions shall be given by the Engineer, and wherever the word "Engineer" is used in these specifications it refers to and designates the Engineer-in-Chief of the Department of Docks and Ferries, or such officer or employee as may be designated by him.

Rip-rap stone coming directly on or against the bulkhead wall must be deposited carefully in such manner as will not injure the same.

All the filling, except as otherwise specified herein, shall be of ashes, cellar dirt, broken stone, etc., entirely free from garbage or any organic matter objectionable in the opinion of the Engineer.

At any section of the bulkhead wall the filling shall be brought up level with the under side of the backing log of the bulkhead wall at such section, and no higher, unless otherwise directed.

The filling shall be commenced within five days after the date of the receipt of a notification from the Engineer that the work, or any part of it, is ready to be begun, after which not less than 300 cubic yards per day shall be placed, and the whole amount of the filling called for to bring the above-described basin up to grade shall be completed within one hundred and seventy days from the date of the receipt of said notification. At the expiration of this time this agreement shall be considered closed unless a further extension of time shall be given by the Commissioner of Docks. If at any time during the progress of the work it shall be deemed necessary to order the suspension of the whole or any part of the filling the time for completing said filling shall be extended so much as may have been delayed by such suspension.

In case the purchaser at any time does not proceed with the work of filling in to the satisfaction of the Commissioner of Docks, the said Commissioner will at once terminate the privilege of filling in and proceed to have the remainder of the filling in done by other parties in such way and manner as he deems proper, and any loss which may result therefrom shall be charged against the principal and his surety.

The purchaser shall, during the work of filling in and at all times until the completion thereof, take all necessary precautions and place proper guards for the prevention of accidents, and put up and maintain at night sufficient lights, and he shall indemnify and save harmless The City of New York from all damages and costs to which it may be put by reason of injury to the person or property of another resulting from negligence or carelessness in the performance of the work or guarding the same, to which the surety is also bound.

No bid or estimate will be considered unless accompanied by a certified check drawn to the order of the Commissioner of Docks, or money to the amount of twenty-five per centum of the amount of the bid, which amount shall be applied in the case of the successful bidder to the first one-quarter of the amount of the filling to be deposited; twenty-five per centum to be paid when the first one-quarter of filling has been completed; twenty-five per centum additional when one-half the filling has been completed, and the balance, twenty-five per centum, when three-quarters of said filling has been completed.

A surety or guarantee company duly authorized by law to act as surety, to be approved by the Commissioner of Docks, will be required to enter into a bond or obligation jointly and severally with the purchaser in the sum of double the amount of the purchase price as security for the satisfactory performance of the said work, in accordance with the terms and conditions hereof.

MAURICE FEATHERSON, Commissioner of Docks.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately.

The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
