The New York City Department of City Planning (DCP) proposes a zoning text amendment to require a CPC special permit for new and enlarged transient hotels (Use Group 5) and motels, tourist cabins, and boatels (Use Group 7). The new CPC special permit would replace existing special permits for hotels in Special Purpose Districts. It would also require a CPC special permit citywide for new hotels and enlargements in C1 (except for C1-1, C1-2, C1-3 or C1-4 Districts), C2, C4, C5, C6, C8, Mixed Use (MX), and paired M1/R districts. The proposed text amendment would retain existing findings and regulations for hotels in M1 districts where a special permit was adopted in December 2018. The Proposed Action would also retain provisions adopted for a public purpose. The proposed zoning text amendment would affect every community districts that currently permit as-of-right hotel development, either in the form of commercial (C) districts on mixed-use (MX) districts.

Since the Proposed Action is a citywide action and has broad applicability, it is analyzed as a "generic action." In addition, as the citywide zoning text amendment would establish a new special permit under the jurisdiction of the CPC for new hotels, there is no new development increment associated with the Proposed Action and, therefore, no projected or potential development sites. The environmental review therefore consists of an assessment of the potential effects of making hotel use subject to special permit requirements. In addition, as part of the EIS, a conceptual analysis considers whether there could be environmental impacts from a future application for hotel use that seeks the special permit.

It is anticipated that the New York City hotel market will recover to 2019 levels by the year 2025. An analysis year 10 years in the future is generally considered reasonable for generic projects, as it captures a typical cycle of market conditions and generally represents the outer timeframe within which predictions of future development may usually be made without speculation. Therefore, an analysis year 10 years after the projected recovery year—or 2035—was chosen in order to account for a typical market cycle plus the unique market effects of the COVID-19 pandemic.

The identification of existing conditions is critical to establish a baseline, not against which the Proposed Action's effects are measured but from which future conditions can be projected. To inform the understanding of existing conditions, DCP engaged a socioeconomics consultant team to produce a market analysis of the City's hotel conditions in the past, current, and future context. In January 2020, there were over 127,800 hotel rooms in New York City before the COVID-19 pandemic. In addition, there are currently approximately 31,800 hotel rooms in active projects in the hotel pipeline as of March 2021. There are also a number of projects that are not in the DOB pipeline but are working towards approval with the City According to the Consultant Report, in 2019 New York City saw a record number of tourism and hotel inventory growth. However, in March 2020 the COVID-19 pandemic struck New York City and has had a substantial, ongoing effect on its hotel market. Between January 2020 and March 2021, a net total of 131 (out of 705) hotels and 38,100 (out of 127,810) rooms closed in New York City, representing a decline of 19 and 30 percent, respectively, resulting in 90,470 rooms as of March 2021. With approximately 98 percent of these room closures occurring in Manhattan, citywide trends are driven almost entirely by the pandemic's specific impact on the Manhattan hotel market, which experienced a 36 percent loss in total rooms.

To project hotel room demand and supply growth across the City in the No-Action condition, the Consultant Report relied on visitation and employment projection data, as well as national tourism demand trends and NYC hotel pipeline information. The analysis hypothesized that in 2025, the NYC hotel market will have fully recovered, reaching 2019 demand levels, and then grow by 3.7% each year to reach a demand of approximately 174,730 rooms by 2035. While future citywide demand will continue to be driven by Manhattan, new hotel room supply is expected to be more evenly distributed throughout the city. Assuming future supply will deliver geographically based on the distribution of hotel rooms currently in the pipeline, hotel room demand was reallocated among the boroughs to reflect the pipeline distribution.

It is expected that without the Proposed Action, the market would respond to demand increases by increasing supply until the market reaches equilibrium. Therefore, the No-Action condition assumes that, with an expected recovery in 2025, by the 2035 build year the hotel supply in the City will grow to reach an equilibrium with market demand. Overall, it is estimated that by 2035, the City will be in demand of approximately 174,730 rooms across the five boroughs, regardless of existing and future supply. Demand was distributed among the boroughs with a weighted adjustment to account for historic distribution and the distribution of active pipeline hotels. However, given the unique circumstances under COVID-19 with temporary and permanent hotel closures throughout the city, assumptions were made to establish an estimated hotel supply in 2025 so that a number of hotel rooms that would need to be developed in order to reach market equilibrium by 2035 could be determined. Industry based estimates show that 25 percent of the hotel supply as of January 2020 will not return to market. The January 2020 hotel room inventory, as established in the Consultant Report, was approximately 127,810 rooms. Therefore, it is estimated in 2025 that hotel room supply would be approximately 95,860 rooms, about 5,390 more rooms than were open as of March 2021. Therefore, from 2025 to 2035, 78,880 hotel rooms would be expected to come to market to meet estimated 2035 demand. Some of this demand would be satisfied by the current pipeline of 31,800 hotel rooms as well as known projects.

In the With-Action condition, the proposed text amendment would have provisions to allow for the hotel industry to recover from COVID-19 pandemic impacts, including provisions that address discontinuance, vesting, and exclusions. As in the No-Action condition, it is estimated that 25 percent of the hotel supply as of January 2020 will not return to market due to economic impacts from the pandemic. This means that of the 89,570 rooms on the market in March 2021 and the 33,170 temporarily closed hotel rooms as of September 2020, approximately 95,860 total existing rooms are expected to be opened between 2021 and 2025 when the market is recovering, same as above under the No-Action condition. Some of these temporarily closed hotels looking to reeopen will be able to through the discontinuance provisions in the text discussed above. It is also estimated that the text provisions would

allow for an additional 25,290 hotel rooms in the pipeline to vest before the effective date, and 2,300 hotel rooms currently in applications for existing special permits with city agencies to be excluded. This would result in a hotel room inventory of approximately 123,450 in 2035, comprised of existing hotel rooms and hotels in the pipeline or in applications with the city that are able to vest or be excluded from the special permit provision.

Therefore, under the With-Action condition, for supply to meet market demand, it is estimated that approximately 51,280 future hotel rooms could be affected by the special permit, slowing or hindering their development. However, it is expected that an additional 4,210 rooms will come to market between the effective date and 2035 through seeking the proposed special permit, based on those that have sought special permits for hotels in the past decade. Therefore, it is estimated in the With-Action Condition, that there would be a supply of approximately 127,660 hotel rooms, and there would be an estimated unmet demand of approximately 47,070 hotel rooms in 2035.

The DEIS identifies potential significant adverse impacts related to socioeconomic conditions (hotel and tourism industries). While the Proposed Action has been crafted to minimize adverse impacts on existing hotels in the five boroughs, it would uniquely impede this industry from serving future projected demand. As the majority of overnight visitors to New York City stay in hotels, the Proposed Action also has the potential to diminish future visitor spending in the broader tourism sector in the city. It was found that the Proposed Action would result in a scale of lost rooms— as much as 25 percent of the projected 2035 inventory—and the resulting loss in visitation may substantially affect the ability of the hotel and tourism industries to grow and meet future anticipated demand. Therefore, there would be potential for significant adverse impacts to the hotel and tourism industries due to socioeconomic conditions in the future with the Proposed Action.

Between publication of this Draft Environmental Impact Statement (DEIS) and the Final EIS, DCP will continue to explore measures that could reduce the unmet hotel demand under the With-Action condition, thereby mitigating (or partially mitigating) the significant adverse impact on socioeconomic conditions identified in this DEIS. Should measures to fully mitigate impacts be determined to be impracticable, significant adverse impacts would then be unmitigated and considered unavoidable significant adverse impacts in the Final EIS.

The DEIS considers two alternatives - a No-Action Alternative and a Non-Recovery Alternative. The No-Action Alternative examines future conditions but assumes the Proposed Action is not adopted. The Non-Recovery Alternative examines future conditions with the Proposed Action but assumes that the Proposed Action does not include Recovery Provisions"; without these Recovery Provisions, this alternative would result in more hotel development being subject to the Special Permit.

PROCUREMENT

"Compete To Win" More Contracts!

Thanks to a new City initiative - "Compete To Win" - the NYC Department of Small Business Services offers a new set of FREE services to help create more opportunities for minority and Women-Owned Businesses to compete, connect and grow their business with the City. With NYC Construction Loan, Technical Assistance, NYC Construction Mentorship, Bond Readiness, and NYC Teaming services, the City will be able to help even more small businesses than before.

• Win More Contracts, at nyc.gov/competetowin

"The City of New York is committed to achieving excellence in the design and construction of its capital program, and building on the tradition of innovation in architecture and engineering that has contributed, to the City's prestige as a global destination. The contracting opportunities for construction/construction services and construction-related services that appear in the individual agency listings below reflect that commitment to excellence."

HHS ACCELERATOR

To respond to human services Requests for Proposals (RFPs), in accordance with Section 3-16 of the Procurement Policy Board Rules of the City of New York ("PPB Rules"), vendors must first complete and submit an electronic prequalification application using the City's Health and Human Services (HHS) Accelerator System. The HHS Accelerator System is a web-based system maintained by the City of New York for use by its human services Agencies to manage procurement. The process removes redundancy by capturing information about boards, filings, policies, and general service experience centrally. As a result, specific proposals for funding are more focused on program design, scope, and budget.

Important information about the new method

- Prequalification applications are required every three years.
- Documents related to annual corporate filings must be submitted on an annual basis to remain eligible to compete.
- Prequalification applications will be reviewed to validate compliance with corporate filings, organizational capacity, and relevant service experience.
- Approved organizations will be eligible to compete and would submit electronic proposals through the system.

The Client and Community Service Catalog, which lists all Prequalification service categories and the NYC Procurement Roadmap, which lists all RFPs to be managed by HHS Accelerator may be viewed, at http://www.nyc.gov/html/hhsaccelerator/html/ roadmap/roadmap.shtml. All current and prospective vendors should frequently review information listed on roadmap to take full advantage of upcoming opportunities for funding.

Participating NYC Agencies

HHS Accelerator, led by the Office of the Mayor, is governed by an Executive Steering Committee of Agency Heads who represent the following NYC Agencies:

Administration for Children's Services (ACS) Department for the Aging (DFTA) Department of Consumer Affairs (DCA) Department of Corrections (DOC) Department of Health and Mental Hygiene (DOHMH) Department of Homeless Services (DHS) Department of Probation (DOP) Department of Small Business Services (SBS) To sign up for training on the new system, and for additional information about HHS Accelerator, including background materials, user guides and video tutorials, please visit www.nyc.gov/hhsaccelerator
