PROCUREMENT

“Compete To Win” More Contracts!

Thanks to a new City initiative - “Compete To Win” - the NYC Department of Small Business Services offers a new set of FREE services to help create more opportunities for minority and women-owned businesses to compete, connect and grow their business with the City. With NYC Construction Loan, Technical Assistance, NYC Construction Mentorship, Bond Readiness, and NYC Teaming services, the City will be able to help even more small businesses than before.

- Win More Contracts at nyc.gov/competetowin

“The City of New York is committed to achieving excellence in the design and construction of its capital program, and building on the tradition of innovation in architecture and engineering that has contributed to the City’s prestige as a global destination. The contracting opportunities for construction/construction services and construction-related services that appear in the individual agency listings below reflect that commitment to excellence.”

HHS ACCELERATOR

To respond to human services Requests for Proposals (RFPs), in accordance with Section 3-16 of the Procurement Policy Board Rules of the City of New York (“PPB Rules”), vendors must first complete and submit an electronic prequalification application using the City’s Health and Human Services (HHS) Accelerator System. The HHS Accelerator System is a web-based system maintained by the City of New York for use by its human services Agencies to manage procurement. The process removes redundancy by capturing information about boards, filings, policies, and general service experience centrally. As a result, specific proposals for funding are more focused on program design, scope, and budget.

Important information about the new method

- Prequalification applications are required every three years.
- Documents related to annual corporate filings must be submitted on an annual basis to remain eligible to compete.
- Prequalification applications will be reviewed to validate compliance with corporate filings, organizational capacity, and relevant service experience.
- Approved organizations will be eligible to compete and would submit electronic proposals through the system.

The Client and Community Service Catalog, which lists all Prequalification service categories and the NYC Procurement Roadmap, which lists all RFPs to be managed by HHS Accelerator may be viewed at <http://www.nyc.gov/html/hhsaccelerator/html/roadmap/roadmap.shtml>. All current and prospective vendors should frequently review information listed on roadmap to take full advantage of upcoming opportunities for funding.

Participating NYC Agencies

HHS Accelerator, led by the Office of the Mayor, is governed by an Executive Steering Committee of Agency Heads who represent the following NYC Agencies:

- Administration for Children’s Services (ACS)
- Department for the Aging (DFTA)
- Department of Consumer Affairs (DCA)
- Department of Corrections (DOC)
- Department of Health and Mental Hygiene (DOHMH)
- Department of Homeless Services (DHS)

- Department of Small Business Services (SBS)
- Department of Youth and Community Development (DYCD)
- Housing and Preservation Department (HPD)
- Human Resources Administration (HRA)

According to Fire Code Section FC113.7.3, the Fire Department may require a certificate holder to complete a Department-approved continuing education program as a condition of renewal of the certificate.

The proposed rules would require refrigerating system operating engineer certificate holders to have completed a continuing education course in building operation, maintenance and recordkeeping from a Department-approved continuing education program by the time of their next certificate renewal. This will ensure that operating engineers, who typically have other important responsibilities relating to building operation and maintenance, are familiar with applicable Fire Code requirements, which have undergone a comprehensive revision in 2008 and were revised again effective March 2014.

Refrigerating system operating engineer certificate holders who also hold a Fire Safety Director Certificate of Fitness will not be required to re-take the course because the proposed continuing education requirement in building operation, maintenance and recordkeeping for refrigerating system operating engineer certificate holders is substantially similar to the continuing education that Fire Safety Director Certificate of Fitness holders are already required to complete, as set forth in 3 RCNY §113-02.

The proposed rule would also require that building operation, maintenance and recordkeeping be included as a topic in the curriculum for refrigerating system operating engineer certificate training courses. This amendment is substantially similar to 3 RCNY §113-05, which makes building operation, maintenance and recordkeeping a required topic in the training course curriculum for fire safety directors.

The proposed rule would also add company certificates and stationary battery storage systems as additional topics in the curriculum for building operation, maintenance and recordkeeping training courses. These topics are relevant to the duties and responsibilities of many refrigerating system operating engineers.

The Fire Department’s authority for this rule is found in Sections 489 and 1043 of the New York City Charter and Section 102.6.3 of the New York City Fire Code, Title 29 of New York City Administrative Code.

Terms used in the proposed rule that are defined in the Fire Code or elsewhere in the Fire Department’s rules are indicated by *italics*.

New material is underlined. Material to be deleted is in [brackets].

“Shall” and “must” denote mandatory requirements and may be used interchangeably in the rules of this department, unless otherwise specified or unless the context clearly indicates otherwise.

Guidance with respect to the interpretation of the Fire Code and Fire Department rules may be obtained using the Public Inquiry Form on the Fire Department’s website, www.nyc.gov/html/fdny/html/firecode/index.shtml#p6.

Section 1. Paragraph (2) of Subdivision (f) of Section 113-01 of Chapter 1 of Title 3 of the Rules of the City of New York is proposed to be renumbered to be paragraph (3) and a new paragraph (2) is proposed to be added to read as follows:

On or after [SIX MONTHS AFTER EFFECTIVE DATE OF SECTION], the holder of a certificate of qualification who has not successfully completed a course that addressed issues of building operation, maintenance and recordkeeping, as set forth in R113-07(c)(2)(V), shall, at the time of the next renewal of such certificate, present evidence of the successful completion of such a course. Such course shall be conducted by an institution or program accredited by the Department pursuant to R113-04 and 113-12. Applicants that can demonstrate that they have successfully completed a continuing education course in building operations, maintenance and recordkeeping in connection with the renewal of their certificate of fitness for fire safety director, as set forth in R113-02(c)(7), shall be deemed to have satisfied this requirement.

- (D) *Certificate of qualification* applicants or holders seeking to register more than one (1) work location shall present a letter from the employer for each work location. In addition to the information and documentation set forth above, such letter shall indicate the days and specific hours worked, and specify whether or not the certificate holder would be providing *personal or general supervision* of the equipment in accordance with the requirements of FC606.1.1. A *certificate of qualification* shall not be registered for more than one (1) work location for the same day and time if *personal supervision* is required at more than one (1) such location.
- (E) *Certificate of qualification* holders seeking to change a registered work location shall register such work location in accordance with the procedures set forth in this section.

What authorizes the Fire Department to make this rule?

Sections 489 and 1043 of the New York City Charter and Sections FC 102.6.3, 307.1(5) and 307.6 of the New York City Fire Code, Title 29 of Administrative Code of the City of New York, authorize the Fire Department to propose this rule. This proposed rule was not included in the Fire Department's regulatory agenda for this Fiscal Year because the need for it arose upon enactment of Local Law No. 148 for the year 2013 on December 30, 2013.

Where can I find the Fire Department rules? The Fire Department rules are codified in Title 3 of the Rules of the City of New York.

What rules govern the rulemaking process? The Fire Department must meet the requirements of Section 1043 of the New York City Charter when creating or changing rules. This notice is made according to the requirements of Section 1043(b) of the New York City Charter.

Statement of Basis and Purpose of Proposed Rule

As enacted in 2008, the New York City Fire Code prohibited the use of coke-fueled salamanders. Coke is a type of charcoal burned in open metal containers called salamanders, in order to generate heat to dry and cure the concrete and plaster used at construction sites. In response to construction industry requests and pursuant to its authority under Section FC104.8 of the Fire Code, the New York City Fire Department allowed the use of coke-fueled salamanders at construction sites on a case-by-case basis. The Fire Department granted modifications where applicants obtained a permit for this use, a person holding a Fire Department certificate of fitness supervised the use, and other safety precautions were observed.

Local Law No. 148 for the year 2013 amended the Fire Code to allow coke-fueled salamanders for construction-related drying and curing. In accordance with the new Fire Code sections (FC 307.1 and 307.6), the proposed rule provides storage, handling and use requirements for coke-fueled salamanders at construction sites. The proposed provisions govern the design of the salamanders; restrict the purposes for which, and locations at which, they may be used; mandate the monitoring of their use; and address their proper use, cleaning and replacement.

The proposed rule incorporates existing permit, certificate of fitness and other requirements for the storage, handling and use of coke salamanders. This rule does not provide the one-year compliance period afforded new permit and certificate requirements.

The Fire Department's authority for this rule is found in Sections 489 and 1043 of the New York City Charter and Sections FC 102.6.3, 307.1(5) and 307.6 of the New York City Fire Code (Title 29 of the Administrative Code of the City of New York).

The proposed rule is underlined, indicating that it is an entirely new rule.

"Shall" and "must" denote mandatory requirements and may be used interchangeably in the rules of this department, unless otherwise specified or unless the context clearly indicates otherwise.

Guidance with respect to the interpretation of the Fire Code and Fire Department rules may be obtained using the Public Inquiry Form on the Fire Department's website, www.nyc.gov/html/fdny/html/firecode/index.shtml#p6.

Section 1. Chapter 3 of Title 3 of the Rules of the City of New York is amended by adding a new Section 307-01, to read as follows:

§ 307-01 Coke-Fueled Salamanders

- (a) Scope. This section sets forth requirements for the storage, handling and use of coke and coke-fueled salamanders at construction sites.
- (b) General Provisions. Coke and coke-fueled salamanders shall be stored, handled and used in compliance with the requirements of FC307.6 and this section.
- (1) Permits. Pursuant to FC105.6, a permit shall be obtained from the Department prior to the storage, handling or use of coke-fueled salamanders at a construction site.
- (2) Supervision. Pursuant to FC307.6, the handling or use of coke and coke-fueled salamanders at a construction site shall be under the personal supervision of a certificate of fitness holder. The storage of coke and coke-fueled salamanders at a construction site shall be under the general supervision of a certificate of fitness holder. The certificate of fitness holder shall ensure that the coke and coke-fueled salamanders are safely stored, handled and used in compliance with the requirements of this section.
- (c) Prohibitions. It shall be unlawful to:
- (1) use a coke-fueled salamander at any location other than a construction site at which construction work is being performed pursuant to a work permit issued by the Department of Buildings;
- (2) use a coke-fueled salamander at a construction site where the sprinkler system and/or standpipe system required by the Building Code is out of service, or any part of such system is out of service, in the area in which coke or coke-fueled salamanders are being handled or used;
- (3) use a coke-fueled salamander for purposes of human comfort, or any other purpose other than construction-related drying or curing;
- (4) store, handle or use a coke-fueled salamander at a construction site without a permit;
- (5) store, handle or use coke or a coke-fueled salamander at a construction site without the requisite supervision;
- (6) use a flammable liquid, combustible liquid or any other type of accelerant to ignite or reignite the coke;
- (7) use a coke-fueled salamander at a construction site in any of the following locations:
- (A) on a scaffold;
- (B) in any occupied building;
- (C) on any floor where hazardous materials are stored or are in use;
- (D) on any floor that is of combustible construction;
- (E) within ten (10) feet of any wall opening of an adjoining occupied building; or
- (F) within 50 feet of any building occupied for educational, health care or religious purposes, place of assembly or other place of public gathering.
- (d) Design and Installation Requirements. Coke-fueled salamanders shall consist of a metal vessel, inner grate and ash pan, which shall be fabricated in compliance with the following requirements:
- (1) The vessel and inner grate shall be designed and fabricated with sufficient strength to support the weight of the coke, and with sufficient durability to withstand repeated exposure to the heat generated by the burning coke.
- (2) The vessel shall be designed and fabricated:
- (A) of metal not less than 18 gauge in thickness, with welded joints;
- (B) with a diameter that does not exceed 17 inches, a height that does not exceed 20 inches and a height to diameter ratio that does not exceed 1.18;
- (C) to be supported by sturdy metal legs, welded to the vessel, that are designed to maximize stability and reduce the potential for tipping, and that do not extend more than 12 inches from the bottom of the vessel.

- (3) The inner grate shall be fabricated of metal of substantial gauge, and installed or securely rest at the base of the vessel so as to securely hold the coke to be burned.
- (4) The ash pan shall be fabricated of sheet metal, with not less than a two (2) inch lip on all sides to contain the ash. The ash pan shall extend at least two (2) feet beyond the salamander in all directions.
- (e) Operational Requirements. Coke-fueled salamanders shall be operated and maintained in compliance with the following requirements:
 - (1) Coke-fueled salamanders in use shall be placed at least ten (10) feet from combustible material, except that such salamanders may be placed not less than 24 inches from wooden column form work or such further distance as will ensure that the form work does not attain temperatures equal to or greater than 194 degrees Fahrenheit and is not charred.
 - (2) The ash pan shall be placed and positioned under the salamander. A layer of moistened sand shall be placed in the ash pan prior to use of the coke-fueled salamander. The ash pan shall be regularly emptied, so as to prevent ash from spilling over the lip of the ash pan.
 - (3) Coke-fueled salamanders shall be loaded with coke to not more than two-thirds (2/3) of the vessel's capacity, and ignited by the certificate of fitness holder using an approved LPG-fueled torch having an LPG container capacity of not more than 20 pounds.
 - (4) Coke-fueled salamanders that become damaged or unsafe to use shall be immediately extinguished and removed from the premises or, if repairable, shall be restored to a safe condition before being returned to use.
 - (5) Coke-fueled salamanders shall only be used in areas with sufficient quantities of fresh air so as to maintain carbon monoxide below levels required by Federal, State and City laws, rules and regulations. The certificate of fitness holder shall inspect and conduct the required monitoring in such areas not fewer than once an hour when coke salamanders are in use, to ensure that carbon monoxide levels are being maintained below such levels.
 - (6) Coke shall be stored in an approved metal bin when not being burned in a salamander. The storage bin shall be located at least ten (10) feet from any coke-fueled salamanders that are in use.
 - (7) Tarpaulins used to retain heat in areas in which coke-fueled salamanders are in use shall be:
 - (A) made of materials that are inherently flame-resistant or treated to be flame-resistant;
 - (B) securely fastened to prevent movement caused by the wind; and
 - (C) placed not less than ten (10) feet from any coke-fueled salamander.
 - (8) Any areas in which coke-fueled salamanders are in use shall be adequately lighted to allow safe operation of the coke-fueled salamanders and to minimize the risk of accidental contact from construction activity on the construction site. Any electrical wiring or devices shall be installed in accordance with the Electrical Code.
 - (9) Coke-fueled salamanders in use shall be inspected on a periodic basis by the certificate of fitness holder. Inspections shall be conducted as frequently as necessary to ensure the safe operation of the coke-fueled salamanders but in no circumstance less than once an hour.
- (f) Portable Fire Extinguisher Requirements. Areas in which coke-

- fueled salamanders are in use shall be provided with portable fire extinguishers with at least a 4-A rating for each 1000 square feet, with a maximum travel distance to an extinguisher of not more than 75 feet.
- (g) Recordkeeping. Periodic inspections of coke-fueled salamanders required to be conducted by the certificate of fitness holder, and any corrective action taken, shall be recorded in a bound log book maintained at the construction site. The log book shall be made available for inspection by any Department representative.

The National Oilheat Research Alliance (NORA) will resume full operations in 2015 with the fee expanding to #4 heating oil. This fee will apply to heating oil invoices only. The fee collections began January 1, 2015. All other terms and conditions of these awards remain the same. Please contact this office if you have any questions.

The Bio-Diesel Blender Tax Credit was reinstated for 2014. As of January 1, 2015, the Bio- Diesel Blender Tax Credit has been rescinded for \$1.00 per gallon on B100. The additional fee for items will range from \$0.05 for B5 to \$0.20 for B20 per gallon, varying on the percentage of biodiesel to be used. Should the tax credit be extended, this additional fee will be discontinued and removed from the invoice.

REMINDER FOR ALL AGENCIES:

Please send inspection copy of receiving report for all gasoline (E70, UL & PREM) delivered by tank wagon to OCP/Bureau of Quality Assurance (BQA), 1 Centre Street, 18th Floor, New York, NY 10007.

MAYOR'S OFFICE OF CRIMINAL JUSTICE

■ NOTICE

The Mayor's Office of Criminal Justice (MOCJ) is issuing this Concept Paper in advance of a forthcoming Request for Proposals (RFP) soliciting qualified vendors to provide pre-trial release services in New York City. Supervised release provides an alternative to bail and detention for defendants charged with misdemeanor and felony offenses at criminal court arraignment. This practice will reduce the number of people incarcerated by identifying those who can be safely supervised in the community pending the resolution of their case while providing services, supervision, and referrals to engage individuals with necessary services within their community, enabling better engagement with stabilizing programs and services while avoiding the costs and burdens of pre-trial detention. MOCJ will be seeking proposals for a provider in each borough.

BBP is in the process of constructing an eighty-five (85) acre waterfront park in Brooklyn, NY, which involves the construction of the Pier 5 Uplands landscape. The Pier 5 Upland site includes the creation of new lawns, planting beds, a grove and a sound attenuating berm to be constructed along the length of Furman Street. The Pier 5 Upland landscape scope will also include the widening of Montague Street to create a drop-off area to the park and new sidewalks along Montague Street and Furman Street.

The Pier 5 Uplands is currently a largely paved area which is also home to 334 Furman Street, the offices of the Brooklyn Bridge Park Corporation and Brooklyn Bridge Park Conservancy, and Building #56, a former Port Authority building currently in use by BBP as a Maintenance and Operations (M and O) Facility. 334 Furman Street, at the corner of Furman Street and Joralemon, will remain occupied during the duration of the Pier 5 Uplands landscape construction. Building #56 is scheduled for demolition prior to commencement of construction for the Pier 5 Uplands landscape. Additionally, two new buildings, an M and O Facility and a Boathouse (BH), will be constructed during construction of the Pier 5 Uplands landscape and will be bid out in a separate RFP.
