FINDINGS

The City Planning Commission hereby makes the following findings pursuant to Section 74-52 of the Zoning Resolution:

- (a) that such use will not be incompatible with, or adversely affect the growth and development of, uses comprising vital and essential functions in the general area within which such use is to be located;
- (b) that such use will not create or contribute to serious traffic congestion and will not unduly inhibit surface traffic and pedestrian flow;
- (c) that such use is so located as to draw a minimum of vehicular traffic to and through local streets in nearby residential areas;

- (d) that such use has adequate reservoir space at the vehicular entrances to accommodate automobiles equivalent in number to 20 percent of the total number of spaces up to 50 and five percent of any spaces in excess of 200, but in no event shall such reservoir space be required for more than 50 automobiles;
- (e) that the streets providing access to such use will be adequate to handle the traffic generated thereby;
- (f) that, where roof parking is permitted, such roof parking is so located as not to impair the essential character or future use or development of adjacent areas; and
- (g) that, where any floor space is exempted from the definition of floor area, such additional floor space is needed in order to prevent excessive on-street parking demand and relieve traffic congestion.
