F. J. H. KRACKE, Commissioner.

DEPARTMENT OF HEALTH.

REPORT FOR THE WEEK ENDING APRIL 25, 1914.

VETO OF THE McCLELLAND BILL.

We are glad to record the fact that the Government has vetoed the McClelland Bill which, as was pointed out by Commissioner Goldwater, would have rendered this community "powerless adequately to protect itself against a host of preventable diseases." The bill in question was so drawn up as to provide for a lowering of the standards established for all who practice the art of healing in this state and as the Governor put it, the bill threatened "to open the gates to all kinds of medical pretenders, who, as a matter of fact, administered to or treated the sick or suffering without the use of any drugs or material remedy and who, if this bill was approved, would swarm across our borders and pretend to practice medicine upon our citizens."

SPRING "CLEAN-UP."

At the request of a large number of civic and other associations interested in public health, and with their active co-operation, the Department of Health is about to inaugurate a "clean-up" campaign similar to the very successful one conducted a year ago. Notices will be distributed to all house-holders calling their attention to the need of removing accumulated dirt and rubbish and a date will be set on which collectors from the Department of Street Cleaning will call for the accumulated material. In view of the intimate relation existing between filth and dirt, the Department hopes that physicians will lend this plan their hearty support.

THE TRUTH ABOUT THE FRIEDMANN TUBERCULOSIS TREATMENT.

Requests for information concerning the effect of the so-called Friedmann tuberculosis treatment, prompted the Department of Health to ascertain the recent status of seventy-seven cases, treated in hospitals in this City at the time of Dr. Friedmann's dramatic and widely advertised visit.

Of the total of seventy-seven patients, nineteen could not be found, while eleven were reported to have moved out of town permanently, so that nothing could be learned of thir present condition. The Department was therefore able to obtain reports on but forty-seven of the seventy-seven cases in question. The reports are summarized as follows:

At home	5
In hospitals and sanatoria (indicating failure to cure).....	22
Attending clinics (showing need of further treatment).....	7
Attended by private physician.....	1
Died	12
Total.....	47

Comment is unnecessary; the figures tell their own story.

RIVER BATHING.

In a previous number of the *Weekly Bulletin* reference was made to the necessity of either abolishing the floating baths or so reconstructing them that all danger of infection through sewage pollution was removed.

The Board of Health, at a meeting held April 21st, 1914, adopted rules and regulations for the operation of floating baths, stationary pools, and bathing beaches. Floating baths must be constructed with water-tight bathing pools and, where river or harbor water is used, this must be purified so as to render it clean and sanitary. The Department has sought and has obtained the intelligent co-operation of private owners and of the Borough President of Manhattan in the application of the new rules.

Bathing beaches are not permitted within five hundred feet from a sewer outlet, and water closet accommodations, in connection with such beaches, must be so constructed and maintained as not to contaminate the waters used by the bather.

The entire subject of river bathing in the city and its relation to public health, will be discussed in an early number of the *Monthly Bulletin* and this will also contain the rules and regulations in full The Department is satisfied that the people of this city will never again seek the doubtful privilege of bathing in sewage-polluted river water, but will demand that bathing facilities be provided which are consistent with health and decency.

THE DEPARTMENT'S ATTITUDE TOWARDS FREE VACCINATION.

Following the recent agitation by the Department of Health to secure adequate protection for this community against smallpox, a letter was addressed to the Commissioner by the President of the Brooklyn Medico-Economic League, protesting against free vaccination by the Department of Health.

To all who have carefully observed the events of the past six or eight weeks, it must be clear that the Department of Health has used all of its influence to encourage general vaccination throughout the city in a proper way. While it is undoubtedly preferable that vaccination should be done, wherever social conditions warrant, by the individual initiative of the citizens, and at their own expense, it is clear that the first and last duty of this Department is to prevent epidemics. Under conditions like the present, vaccination is imperative and rather than permit it to go undone, the Department prefers to do the vaccinations even if some individuals wrongtully take advantage of the situation. Surely every practitioner who places the welfare of the community first and the interest of the individual second, must agree as to the wisdom of this policy.

USE OF THE WEEKLY BULLETIN BY OTHER CITY DEPARTMENTS.

The *Weekly Bulletin* of this Department is sent to every practicing physician of the City of New York and thus constitutes an invaluable medium of communication between the Department of Health and the medical profession.

Inasmuch as the *Bulletin* is a municipal publication, there is no sound reason why it should be used exclusively by the Department of Health. It is believed that other departments of the City government, such as the Department of Public Charities, the Board of Trustees of Bellevue and Allied Hospitals, and the Board of Ambulance Service, may desire from time to time to inform the medical profession of new rules, changes in official procedure, the opening of new wards or clinics, the establishment of additional ambulance facilities, or other matters of interest to the medical profession, in connection with which the intelligent co-operation of physicians is indispensable to effective administration.

An invitation has accordingly been extended to the Board of Trustees of Bellevue and Allied Hospitals, the Department of Public Charities, and the Board of Ambulance Service, to use the *Bulletin* for the purpose and in the manner indicated.

A PLEA FOR MORE EXTENDED PUBLIC HEALTH EDUCATION.

The Committee on Public Health, Hospitals and Budget of the New York Academy of Medicine, recently adopted a report dealing with the control of disease arising from social, vocational and industrial conditions. This so well expresses the duties of public health authorities with respect to these conditions, and so clearly reflects the attitude of the Department of Health, that we reproduce it here in full:

"The Committee on Public Health, Hospitals and Budget of the New York Academy of Medicine views with a great deal of pleasure and satisfaction the fact that the Commissioner of Health of New York City is giving thought to the control of diseases arising from social, vocational and industrial conditions. These embrace mainly Cancer, Pneumonia, Renal, Cardiac and Vascular Diseases. Much investigation is being given to the problems of cancer and pneumonia infections, which it is hoped will in the near future permit of the formulation of some remedial form of attack against these scourges, though at present our lack of definite knowledge in reference to them is inadequate for that purpose.

"The underlying causes of the cardio-renal and vascular diseases are mainly various poisons. These toxic agents may be introduced from without or arise within the body. The former are contained in articles of food, drugs, in certain metals, such as mercury, lead, arsenic, chromium, and the like, and in various protozoal and bacterial parasites; the latter may be the results of defective or perverted metabolism, or defects in the function of certain viscera, such as the intestines.

"Cold and chilling of the body owing to insufficient or inadequate protection by suitable clothing, especially in individuals whose occupations are attended by sudden transitions in the surrounding temperature (firemen, furnacemen, iron-puddlers and the like) are important contributing factors.

"Any attempt to control the prevalence of these diseases must be directed to the correction of the evils arising from these main etiological factors. Thus, there must be instituted a supervision of all the industries and occupations which deal with the manufacturing and use of dyes, poisonous metals, drugs, etc., and the proper instruction of the people in the laws of personal hygiene.

"The State has already instituted measures directed towards the correction of the evils arising from the manufacture and use of poisonous substances employed in the various industries and has organized an attack against their careless and ignorant use. Nevertheless there should be both State and Municipal supervision over all those industries and occupations which expose the individual to the inhalation of the fumes and dust arising from such toxic substances. In addition to this, administrative control should make compulsory the employment of suitable preventive measures such as the use of respirators by those exposed to dust and the introduction of adequate ventilation systems in all factories where the workmen are exposed to noxious fumes.

"Other corrective measures must be educational. Those handling paints, dyes, oils, varnishes, pigments, toxic metals, etc., must be taught the necessity of personal cleanliness, of the need of washing of hands and bodies, especially of the parts stained and exposed to these substances, and of washing them with bland materials rather than with turpentine and grease-removers, which facilitate absorption. They should be instructed in the best methods for such removal, *i.e.*, those which entail the least amount of absorption.

"The public should be taught the dangers of inadequate protection of the body and the need of providing suitable clothing against sudden temperature changes. Especially should the public be taught the injurious effects of overeating, particularly the dangers of excessive nitrogenous foods; it should be taught the evils arising from immoderate use of all forms of stimulants, including alcohol, teas, and coffee. Adequate attention should be given to instruction as to the injurious effects of chronic constipation and the dangers due to absorption of intestinal toxic products in that condition.

"Emphasis should be laid on the importance of correct habits of life, the need of avoiding unnecessary strain either nervous or physical, and the necessity for a proper proportion of rest and exercise.

"Lastly, the injury to the kidneys consequent to infectious diseases in general, and to the infections of the tonsils and to syphilis in particular, should be made known, and instructions guarding against these dangers be promulgated.

"The correction of these evils, therefore, resolves itself, for the great part, in a campaign of instruction in the subject of personal hygiene.

"It is the opinion of the Committee of Public Health, Hospitals and Budget of the New York Academy of Medicine, that an active campaign on the part of the Department of Health directed especially toward the instruction of the public in matters of *personal* hygiene by the means of tracts, pamphlets, lectures and the like, would have a definite influence in securing a diminution of the morbidity and therefore eventually of the mortality of the cardio-renal and the vascular diseases."

HOW TO WRITE PROPER DEATH CERTIFICATES.

(Article No. 1.)

During the year 1913, there were 73,902 certificates of death filed in the office of the Bureau of Records of the Department of Health. Each certificate was signed by a qualified medical practitioner, or by a physician attached to the Coroner's office. On the whole the certificates were fairly well written and very little exception could be taken to the certification of the causes of death, on the ground that the cause given was indefinite, but it has been found necessary to write about twenty-five hundred letters to physicians in order to obtain, for statistical purposes, additional information as to the cause of death. The information was required as a rule, to enable the Assistant Registrar to correctly determine what disease actually caused death and thus to classify the death correctly. In nearly all cases these requirements have met with a courteous response giving further details in the medical history of the case.

Vital statistics are of inestimable value to physicians generally, and it is important that they be made as accurate as possible. This can only be done through the earnest co-operation of physicians. The Registrar, and his assistants, are ready at any time to advise physicians who may be in doubt as to just how to certify to the proper cause of death.

(To Be Continued.)

APPOINTMENT OF CLINIC PHYSICIANS.

The following procedure was approved by the Board of Health, March 3rd, 1914:

Applicants for appointment as clinic physicians are interviewed, personally, by the Director of the Bureau of Infectious Diseases, or the Chief of the Division of Tuberculosis, in which interview the nature of the work and its requirements, and the standard of service expected by the Department are fully explained.

The applicant is further required to submit, in writing, on his office stationery, a formal application for official record, in which application must be stated the date of his graduation in medicine with the name of the school, and a short description of previous experience.

The applicant, if accepted, is then detailed by the Chief, Division of Tuberculosis, to some one of the various Tuberculosis Clinics, for a probationary period of three months, probationary reports and efficiency ratings being required monthly of the Physician-in-Charge of the Clinic.

If, at the end of three months, the services of the applicant are satisfactory to the Physician-in-Charge, and if his efficiency rating is 70 per cent. or over, he will be recommended, through official channels, to the Board of Health, for appointment as a Volunteer Assistant Attending Physician.

A list of such Volunteer Assistant Attending Physicians, giving the date of their appointment as such, will be maintained in the office of the Chief, Division of Tuberculosis.

When a vacancy occurs in the salaried staff of the clinic service, such vacancy will be announced in the *Weekly Bulletin*, with full information as to the duties, requirements and salary of the position. Selections will be made from those who then make application and from the list of Volunteers. Other things being equal, preference will be given to the latter because of their unsalaried service, in the order of seniority, unless the service and efficiency record of the Volunteer warrant his being passed.

All Volunteer Assistant Attending Physicians will be required to perform the same amount of work and to conform with all the regulations of the Department of Health and Tuberculosis Clinic service, as apply to the salaried staff.

A list of Assistant Attending Physicians, giving the date of their appointment as such, will be maintained in the office of the Chief, Division of Tuberculosis, and from this list, selections will be made to fill vacancies, as they occur, in the staff of Attending Physicians. These selections will be made in order of seniority, unless service and efficiency record of the Assistant Attending Physicians warrant their being passed.

CANCER DEATH RATE IN AMERICAN CITIES.

That there is need of the national movement to check the death rate from cancer which has been inaugurated under the direction of the American Society for the Control of Cancer is indicated by the figures of mortality from this disease in 1913. The statistics of our seven largest cities, recently tabulated, show that in that year the cancer death rate in each case was the highest on record. For New York City the rate was 82 per 100,000 of the population, against an average of 79 for the last five years; for Boston 118, against an average of 110; for Pittsburgh, 79, against an average of 70; for Baltimore, 105, against an average of 94; for Chicago, 86, against an average of 81; for Philadelphia, 95, against an average of 88; for St. Louis, 95, against an average of 85. The combined cancer death rate for the seven cities was 89 per 100,000 of population for 1913, against a combined average of 83 for the last five years.

It is held by many that the recorded cancer death rate does not mean an actual increase of the disease to the extent indicated. According to this view improvements in the diagnosis of hitherto obscure diseases has caused cancer to be much more frequently recognized and recorded. Yet these figures of 1913 as compared with the average for the last five years, when we have presumably been enjoying the results of this greatly improved medical technique must be considered most significant, and it is hard to believe that the increase is due solely to greater accuracy of diagnosis.

APPOINTMENT OF DR. WILLIAM H. PARK.

Dr. William H. Park, Director of the Laboratories of the Department of Health, and for the past fifteen years Professor of Bacteriology and Hygiene at the University and Bellevue Hospital Medical College, has just been elected Dean of the College to succeed the late Dr. Egbert Le Fevre. Dr. Park's qualifications are such that, despite the very high standard set by his predecessor, there will be no doubt concerning the success of his administration. The *Bulletin* extends its sincere good wishes to Dr. Park in his undertaking.

CIVIL PROSECUTIONS BY THE DEPARTMENT OF HEALTH.

A new procedure has recently been inaugurated in connection with the work of the Bureau of Food Inspection. Heretofore, cases of violation of the Sanitary Code or of the rules and regulations of the Department have been prosecuted for criminal action, but, in view of the fact that it is frequently difficult to establish criminal intent in such violations, the Department has determined to prosecute such cases as civil actions. Five such cases have already been successfully terminated and, in each instance, a judgment for $50 and costs have been obtained. It is encouraging to note that compliance with the law is becoming more general, the dealers undoubtedly recognizing the wisdom and necessity of the regulations established by the Department.

A statement is herewith submitted of all vouchers filed in the Department of Finance on this date, in which is shown the Department of Finance voucher number, the date of the invoices or the registered number of the contract, the name of the payee and the amount of the claim. Where two or more bills are embraced in one voucher the date of the earliest is given, excepting that when such vouchers are submitted under a contract the registered number of the contract is shown instead.

If the vouchers are found to be correct and properly payable to the respective claimants it will be my endeavor to have the warrants therefor made ready for payment within the next seven days.

If any claimant within the time stated does not receive his warrant or a written notice in relation thereto then written or verbal inquiry may be made at this office, using the Department of Finance voucher number as a ready means of reference.

INVITATION TO CONTRACTORS.

Part of the Seventh Avenue-Lexington Avenue Rapid Transit Railroad.

The Public Service Commission for the First District (hereinafter called the "Commission") invites proposals to construct Section No. 6-A

of Routes 4 and 38, a part of the Seventh Avenue-Lexington Avenue Rapid Transit Railroad.

The points within the City of New York between which the said part is to run and the route or routes to be followed are briefly as follows:

Section No. 6-A. Beginning at a point under 7th avenue, in the Borough of Manhattan, about one hundred (100) feet south of the southerly building line of West 43d street, and extending thence northerly under 7th avenue to a connection with the present Manhattan-Bronx Rapid Transit Railroad.

The general plan of construction calls for a subsurface railroad having four tracks.

The contractor will not be required to provide or lay tracks, ties or ballast, except for the temporary operating track in the Manhattan-Bronx Rapid Transit Railroad, as provided in the form of contract.

The work under the contract will include the care and support of buildings, vaults, sewers, pipes, railroads and other surface, subsurface and overhead structures, the maintenance of traffic, the restoration of pavements and other surfaces and the removal and reconstruction of portions of the Manhattan-Bronx Rapid Transit Railroad, in order to provide a connection with the railroad.

The removal and reconstruction of portions of said Manhattan-Bronx Rapid Transit Railroad must be so conducted as not to interfere with or interrupt the safe and continuous operation of trains in said railroad and the contractor shall be responsible for the support, maintenance, safety and protection of said railroad, including its equipment and rolling stock, and for the safety and protection of passengers and other persons therein. Before removing any part of said railroad the contractor must obtain a permit from the Interborough Rapid Transit Company. The contractor will be required to furnish security to said Interborough Rapid Transit Company in connection with said permit by depositing a bond, cash or securities in the sum of five hundred thousand dollars ($500,000).

The method of construction will be by trench excavation under cover, unless otherwise permitted by the Commission.

Bidders must examine the form of contract and the specifications, maps and plans; must visit the location of the work and inform themselves of the present conditions along the line thereof and make their own estimates of the facilities and difficulties attending the execution of the proposed work.

A fuller description of the work to be done and other requirements, provisions, details and specifications are stated in the form of contract and in the contract drawings therein referred to, which are to be deemed a part of this invitation. Copies of the form of contract, contract drawings, bond and contractor's proposal may be inspected and purchased at the office of the Commission, No. 154 Nassau street, Borough of Manhattan, New York City.

The City of New York (hereinafter called the "City") and the Interborough Rapid Transit Company will both be parties to the contract; the Interborough Rapid Transit Company being a party for the purpose of disbursing part of its contribution toward the cost of construction as provided in the contract dated March 19, 1913 between the City, acting by the Commission, and Interborough Rapid Transit Company for the equipment, maintenance and operation of additional rapid transit railroads. The liability of Interborough Rapid Transit Company under the contract will be limited to an amount equal to ninety-five (95) per centum of the total estimated amount to be paid to the contractor under the contract.

Partial payments to the contractor will be made monthly, as the work proceeds.

The contractor must complete the work within thirty-three (33) months from the delivery of the contract.

Sealed bids or proposals will be received at the office of the Commission at No. 154 Nassau street, Borough of Manhattan, City of New York, until the 13th day of May, 1914, at twelve fifteen (12.15) o'clock p. m., at which time, or at a later date to be fixed by the Commission, the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission.

A statement based upon estimate of the Engineer, of the quantities of the various classes of the work and of the nature and extent as near as practicable of the work required is to be found in the schedule forming a part of the form of contractor's proposal. The quantities given in such schedule are approximate only, being given as a basis for the uniform comparison of bids, and no claim is to be made against the City on account of any excess or deficiency, absolute or relative, in the same, except as provided in the specifications and form of contract.

Every proposal must, when submitted, be enclosed in a sealed envelope endorsed *"Proposal for Constructing Part of Rapid Transit Railroad—Routes Nos. 4 and 38, Section No. 6-A,"* and must be delivered to the Commission or its Secretary; and in the presence of the person submitting the proposal it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a separate certified check for the sum of fifteen thousand dollars ($15,000), payable to the order of the Comptroller of the City and drawn upon a national or State bank or trust company satisfactory to the Commission, having its principal office in the City of New York. Such check must not be enclosed in the envelope containing the proposal.

The Unit Prices must not be improperly balanced, and any bid which the Commission considers detrimental to the City's interests may be rejected.

No proposal, after it shall have been deposited with the Commission, will be allowed to be withdrawn for any reason whatever.

The award of the contract will be made by the Commission as soon as practicable after the opening of the proposals.

At the time of the delivery of the contract the contractor shall furnish security to the City by depositing a bond in the form annexed to the form of contract, or cash or approved securities in the sum of four hundred thousand dollars ($400,000). Before removing any part of the Manhattan-Bronx Rapid Transit Railroad the contractor will also be required to give a bond, cash or securities in the sum of five hundred thousand dollars ($500,000) to Interborough Rapid Transit Company in connection with the permit to be obtained from said Company, as aforesaid.

As further security fifteen (15) per centum of the amounts certified from time to time to be due to the contractor will be deducted until the amounts so deducted and retained shall equal ten (10) per centum of the total estimated amount to be paid to the contractor under the contract. Thereafter there shall be so deducted and retained for such purpose ten (10) per centum of the amounts certified from time to time to be due to the contractor.

Deposits made by bidders whose proposals are not accepted will be returned within five (5) days after the contract is executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions in respect to the bond or deposit are complied with.

The right to reject any and all bids is reserved.

The points within The City of New York between which the said part is to run and the route or routes to be followed are briefly as follows:

The general plan of construction calls for a subsurface railroad having two tracks.

The Contractor will not be required to provide or lay tracks, ties or ballast, nor to do station finish work.

The work under the contract will include the care and support of buildings, vaults, sewers, pipes, railroads and other surface, subsurface and overhead structures, the maintenance of traffic and the restoration of pavements and other surfaces.

Two alternative designs for the Failroad have been prepared, which are known as Alternative S and Alternative T, respectively. The design for Alternative S calls for a steel beam and concrete structure, and the design for Alternative T calls for a structure partly of steel beam and concrete construction and partly of cast iron tunnel construction. The method of construction for Alternative S is by trench excavation under cover, unless otherwise permitted by the Commission, and the method of construction for Alternative T is partly by trench excavation under cover and partly by tunneling, unless otherwise permitted by the Commission, as set forth in the forms of contract. Proposals may be submitted for either or both of such Alternatives.

Partial payments to the Contractor will be made as the work proceeds, as provided in the forms of contract.

The Contractor must complete the work within thirty-two (32) months from the delivery of the contract.

At the time of the delivery of the contract the Contractor must furnish security to the City by depositing a bond, cash or securities in the sum of three hundred thousand dollars ($300,000). As further security fifteen (15) per centum of the amounts certified from time to time to be due to the Contractor will be deducted until the amounts so deducted and retained shall equal ten (10) per centum of the total estimated amount to be paid to the Contractor under the contract. Thereafter there shall be so deducted and retained for such purpose ten (10) per centum of the amounts certified from time to time to be due to the Contractor.

A fuller description of the work to be done in the case of each Alternative and other requirements, provisions, details and specifications are given in the form of contract for each Alternative and in the contract drawings therein referred to. A separate form of contract has been prepared for each Alternative. Copies of the forms of contract, contract drawings, and forms of bond and contractor's proposal may be inspected and purchased at the office of the Commission, No. 154 Nassau street, Borough of Manhattan, New York City. The forms of contract and the contract drawings and the forms of bond and contractor's proposal are to be deemed a part of this Invitation.

Bidders must examine the forms of contract and the specifications and contract drawings, must visit the location of the work and inform themselves of the conditions along the line of the work and make their own estimates of the facilities and difficulties attending the execution of the work.

Sealed bids or proposals will be received at the office of the Commission at No. 154 Nassau street, Borough of Manhattan, City of New York, until the 12th day of May, 1914, at twelve fifteen (12.15) o'clock p. m., at which time, or at a later date to be fixed by the Commission, the proposals will be publicly opened.

One such certified check for thirty thousand dollars ($30,000) will be sufficient to enable a bidder to bid upon both alternatives. Such check must not be enclosed in the envelope or envelopes containing the proposal or proposals.

NOTICE TO BIDDERS AT SALES OF OLD BUILDINGS, ETC.

TERMS AND CONDITIONS UNDER WHICH BUILDINGS, ETC., WILL BE SOLD FOR REMOVAL FROM CITY PROPERTY.

THE BUILDINGS AND APPURTENANCES thereto will be sold to the highest bidder, who must pay cash or certified check, drawn to the order of the Comptroller of The City of New York, and must also give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of $50, the sum of $50 shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but unfinished at the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the building or buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal, nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or any of these conditions shall forthwith void the sale and cause immediate forfeture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing therein or permitting the occupancy of any such building by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

The sale will be as of the condition of the property on date of delivery thereof to the purchaser. The City of New York will not be responsible for any change or loss which may occur in the condition of the buildings, or their appurtenances between the time of the sale thereof and the time of delivering possession to the purchaser, after being properly vacated of all tenants. The sale and delivery to purchaser will be made as nearly together as the circumstances of vacating the structures of their tenants will permit.

All the material of the buildings, sheds, walks, structures and cellars of whatsoever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the exterior walls of the buildings and their foundations and the sidewalks and curb in front of said buildings, extending within the described area shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point. The exterior walls and their foundations shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building. Where there is no curb the elevation of the surrounding ground shall be considered curb level. All wells, cesspools, sinks, etc., existing on the property must be filled to the level of the surrounding ground with clean earth.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street, and the opening of the main sewer in street shall be properly closed in compliance with the directions of the Bureau of Sewers in the Borough in which the buildings are situated, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed.

The permit for all opening in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances, or any part thereof, within thirty days from the day of possession will work forfeiture of ownership of such buildings, appurtenances, or portion as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and The City of New York will, without notice to the purchaser, cause the same to be removed, and the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and must be completed within thirty days from the day of possession, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Where party walls are found to exist between buildings purchased by different bidders, the materials of said party walls shall be understood to be equally divided between the separate purchasers.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furrings, plaster, chimneys, projecting brick, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beamholes, etc., bricked up, and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs and adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the Contractor.

The Comptroller of The City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids; and it is further

Resolved, That, while the said sale is held under the supervision of the Commissioners of the Sinking Fund, the Comptroller is authorized to cause the sale to be advertised and to direct the sale thereof as financial officer of the City.
