## 1. Introduction

This bi-annual report covering April 1, 2014 through September 30, 2014, details proposed and on-going development projects within New York City's Catskill/Delaware watershed which are subject to review under the Watershed Regulations. The New York City Department of Environmental Protection (DEP) reviews all such projects for compliance with regulatory standards.

This report contains the following summary tables and corresponding maps: New Projects received by DEP, including variances; Ongoing Projects with SEQRA status of Type I and Unlisted actions; approved projects currently under construction by basin; and a summary status of the Individual SSTSs applications received, approved and under construction. The April reports will also include a description of the wastewater treatment plants (WWTP) replacement work required under the Public Health Law §1104 and the MOA.

This report's summary tables pertain to those activities within the Catskill/Delaware watershed, and are divided into two sections: **West of Hudson** (WOH) comprised of the following basins: Ashokan and Schoharie in the Catskill District, and Rondout, Neversink, Pepacton and Cannonsville in the Delaware District. Also included are those portions **East of Hudson** (EOH) comprised of the following basins: West Branch, Boyd Corners, Croton Falls, Cross River and Kensico.<sup>1</sup>

Projects new in this reporting period are contained in the New Projects Table and Maps. This report does not contain information on wastewater treatment facility inspections, which are covered in other Filtration Avoidance Determination (FAD) Deliverables.

## 2. DEP Organization and Responsibilities

The review of development activities within the New York City (NYC) watersheds and the ongoing inspection of projects under construction or currently operating is the responsibility of the Regulatory and Engineering Programs (REP) section within the Bureau of Water Supply (BWS). REP has several field offices located in each of three watershed regions.

REP is divided into two units: Wastewater Treatment and Stormwater. Both of these units consist of Regulatory Compliance and Inspection groups. The activities of the Wastewater Treatment Plant Regulatory Compliance and Inspection unit, which focus primarily on monitoring the performance of all WWTP and other point source discharges within the watershed, are reported separately, in reports submitted pursuant to Section 6.2 of the Filtration Avoidance Determination.

The Wastewater Treatment and the Stormwater units review subsurface sewage treatment systems (SSTS), WWTPs, sewer systems, stormwater runoff, impervious surfaces, non-point

---

<sup>1</sup> As used in this report, the term East of Hudson (EOH) refers only to projects, permits or approvals for activities located in the West Branch, Boyd Corners, Croton Falls, Cross River or Kensico basins.

source discharges, wetland protection, and applications pending before the State and federal agencies with the potential to affect water quality within the NYC watershed. These include activities such as stream crossings, wetland permits, mining operations and timber harvests. Comments are provided to other governmental agencies regarding potential water quality impacts and mitigation strategies. In addition to the review of individual and intermediate septic systems and all stormwater pollution prevention plans, REP is also responsible for the review of construction or alteration of all WWTPs having either surface or subsurface discharges. Engineering reports and facility plans for WWTPs are reviewed and technical standards are applied to all new and/or reconstructed facilities prior to approval.

In addition, all projects in the watershed are subject to the provisions of Section 8-0101 et seq. of the New York State Environmental Conservation Law and the corresponding regulations, 6 NYCRR Part 617, the State Environmental Quality Review Act (SEQRA). As an agency with the authority to issue discretionary approvals of actions, DEP is subject to the provisions of SEQRA. SEQRA requires that an approving or funding agency must consider the environmental impacts of the entire action before approving any specific element of that action. To comply with the requirements of SEQRA, DEP can either participate in a Coordinated Review conducted by the Lead Agency or conduct its own Uncoordinated Review. These reviews are handled by the SEQRA Coordination Section (SCS) within REP. Based on its review and approval authority over the disposal and treatment of wastewater and the control of stormwater and impervious surfaces, DEP is an "Involved Agency" during the SEQRA review process of such actions. This Involved Agency status requires that the SEQRA Lead Agency involve DEP in a coordinated review of the environmental impacts associated with any development proposal. The Wastewater Treatment and the Stormwater units participate in the SEQRA reviews of projects in the watershed through the SCS. Comments raised during the SEQRA review process provide a framework for assessing activity impacts and the potential for future enforcement issues. SEQRA reviews may also be conducted in conjunction with New York State Department of Environmental Conservation (DEC), local health departments, town planning boards, town engineers and building inspectors. This regulatory framework fosters DEP participation in all major activities proposed within the watershed.

During the regulatory review process, services or requirements of other Divisions within BWS are often necessary. For example, permit applications for particular entry or use of water supply lands, such as utility rights of way, scientific studies, or access to privately owned land are also reviewed by the Stormwater unit.

### **3. Specific Watershed Activities**

#### **3.1 WWTP Capital Replacement Program**

DEP successfully negotiated an agreement with the New York State Environmental Facility Corporation (EFC) to assist DEP manage a non-NYC owned WWTP Capital Replacement Program and a WWTP Future Regulatory Program.

The WWTP Capital Replacement Program is the program for which EFC will act as a consultant to provide program assistance to DEP in addressing New York City's obligations to provide funding for Capital Replacements pursuant to: (i) Watershed MOA ¶141, WWTP Regulatory Upgrade Program; (ii) Watershed MOA ¶122, New Sewage Infrastructure Program; (iii) Watershed MOA ¶122, Community Wastewater Management Program; (iv) Watershed MOA

¶143, Future Regulatory Upgrades Program; and (v) as otherwise agreed to by the City pursuant to the Agreement for the Reconstruction of the Brewster WWTP; or (vi) any other projects as may be identified by DEP as eligible for Capital Replacement.

The WWTP Future Regulatory Program shall mean, as required by ¶143 of the Watershed MOA, the incremental costs incurred by new or expanded public wastewater treatment plants (as that term is interpreted under the Public Health Law) constructed in either West of Hudson or East of Hudson watersheds after the effective date of the Watershed Regulations to comply with the requirements imposed solely by the Watershed Regulations and not otherwise required by federal, State or local law, regulation or enforceable standard.

The Agreement is funded for \$5,340,000 and additional funding will be provided as needed. The term of the Agreement is ten years and may be extended for two additional ten year terms.

Currently the Agreement is with EFC for signature.

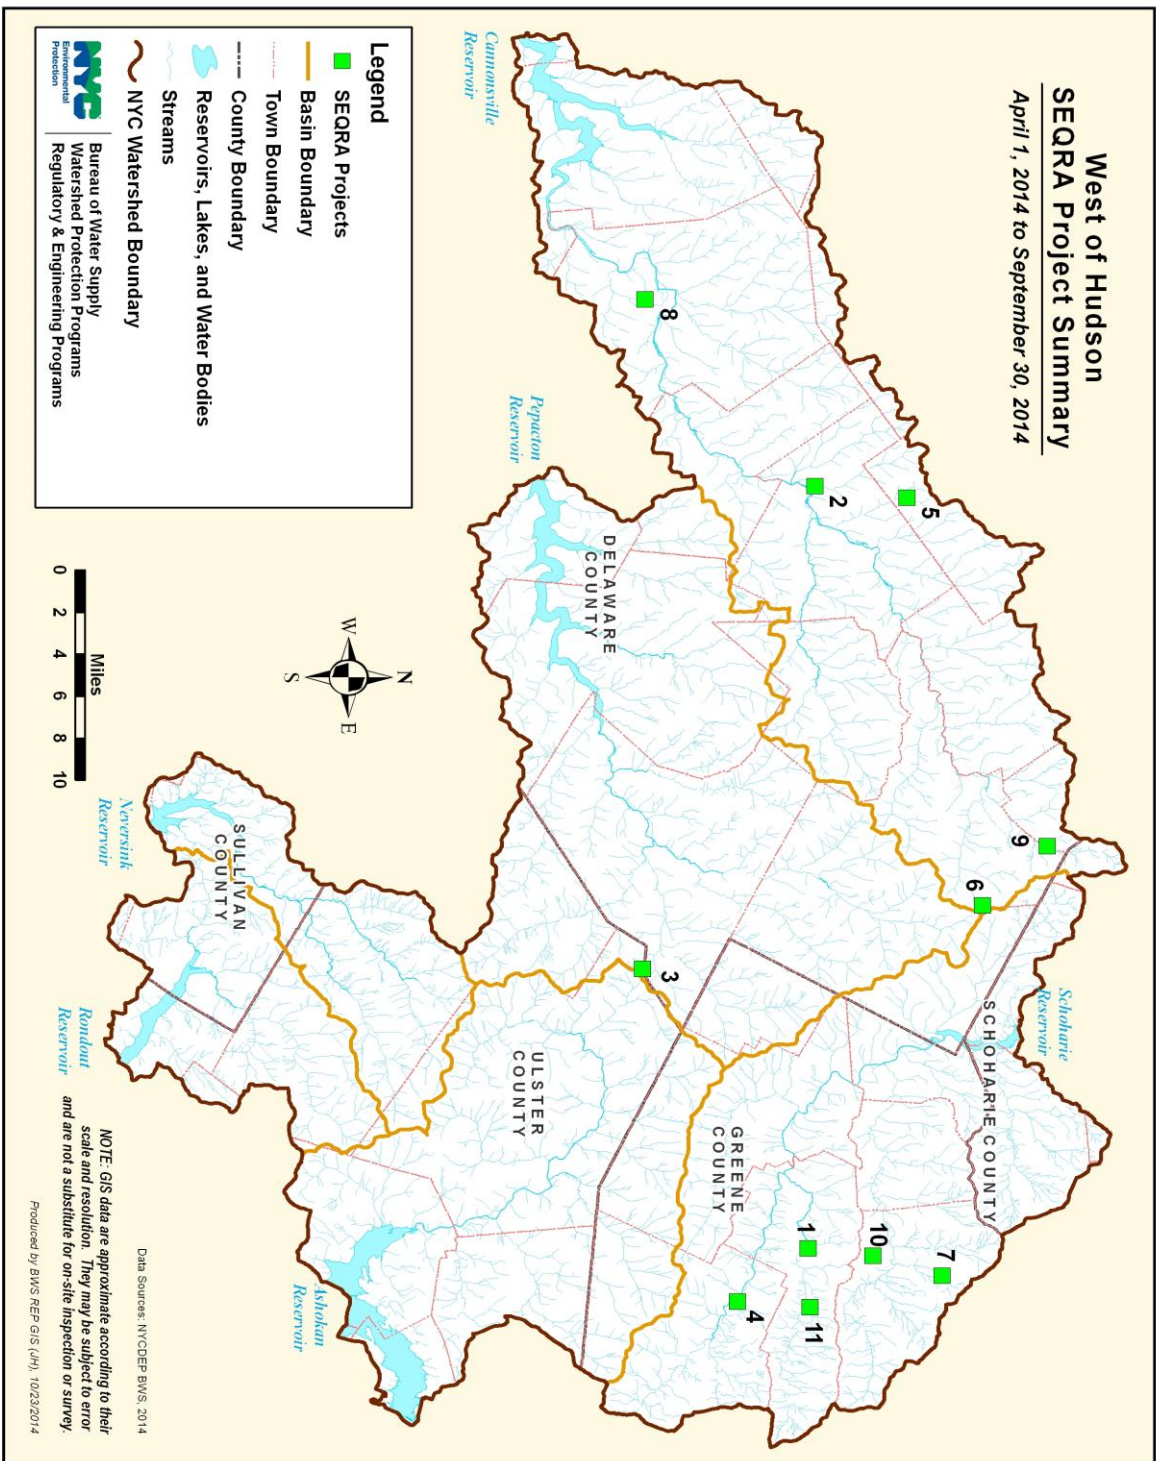

### 3.2 SEQRA Project Summary

DEP is an Involved Agency on many major projects during the SEQRA process. DEP reviews a Draft Environmental Impact Statement (DEIS) and Final Environmental Impact Statement (FEIS) and issues comments to the Lead Agency. Before DEP approves an application for construction of an intermediate SSTS, stormwater pollution prevention plans (SWPPP) and/or WWTP, SEQRA is completed by the Lead Agency and DEP issues its findings. Tables 3.2.1 and 3.2.2 list the major SEQRA projects DEP is currently reviewing, and Figures 3.2.1 and 3.2.2 map these major SEQRA projects.

**Table 3.2.1 - SEQRA Project Summary West of Hudson**

### 3.3 Projects under Construction

After DEP issues an approval for a project, it continues to inspect the project to ensure compliance with the Approval Determination. Tables 3.3.1 and 3.3.2 list the current projects under construction and figures 3.3.1 and 3.3.2 map the locations.

**Table 3.3.1 Projects under Construction Summary West of Hudson**

Map#	Log #		Basin	Proposed Completion Date
1	1993-PE-0133	Ackerly Farm Proposed Subdivision, Andes, NY	Pepacton	Individual lots

### 3.4 New Projects

Table 3.4.1 and Table 3.4.2 are the New Projects DEP received during the past six months for this reporting period. Table 3.4.1 and Figure 3.4.1, identify the new project locations in the Ashokan, Schoharie, Rondout, Neversink, Pepacton and Cannonsville Basins. Tables 3.4.2 and Figure 3.4.2, identify the new project locations in the West Branch, Boyd Corners, Croton Falls, Cross River and Kensico Basins. These maps only include new projects that were reviewed within this reporting period.

**Table 3.4.1 New Projects List West of Hudson Catskill/Delaware District**

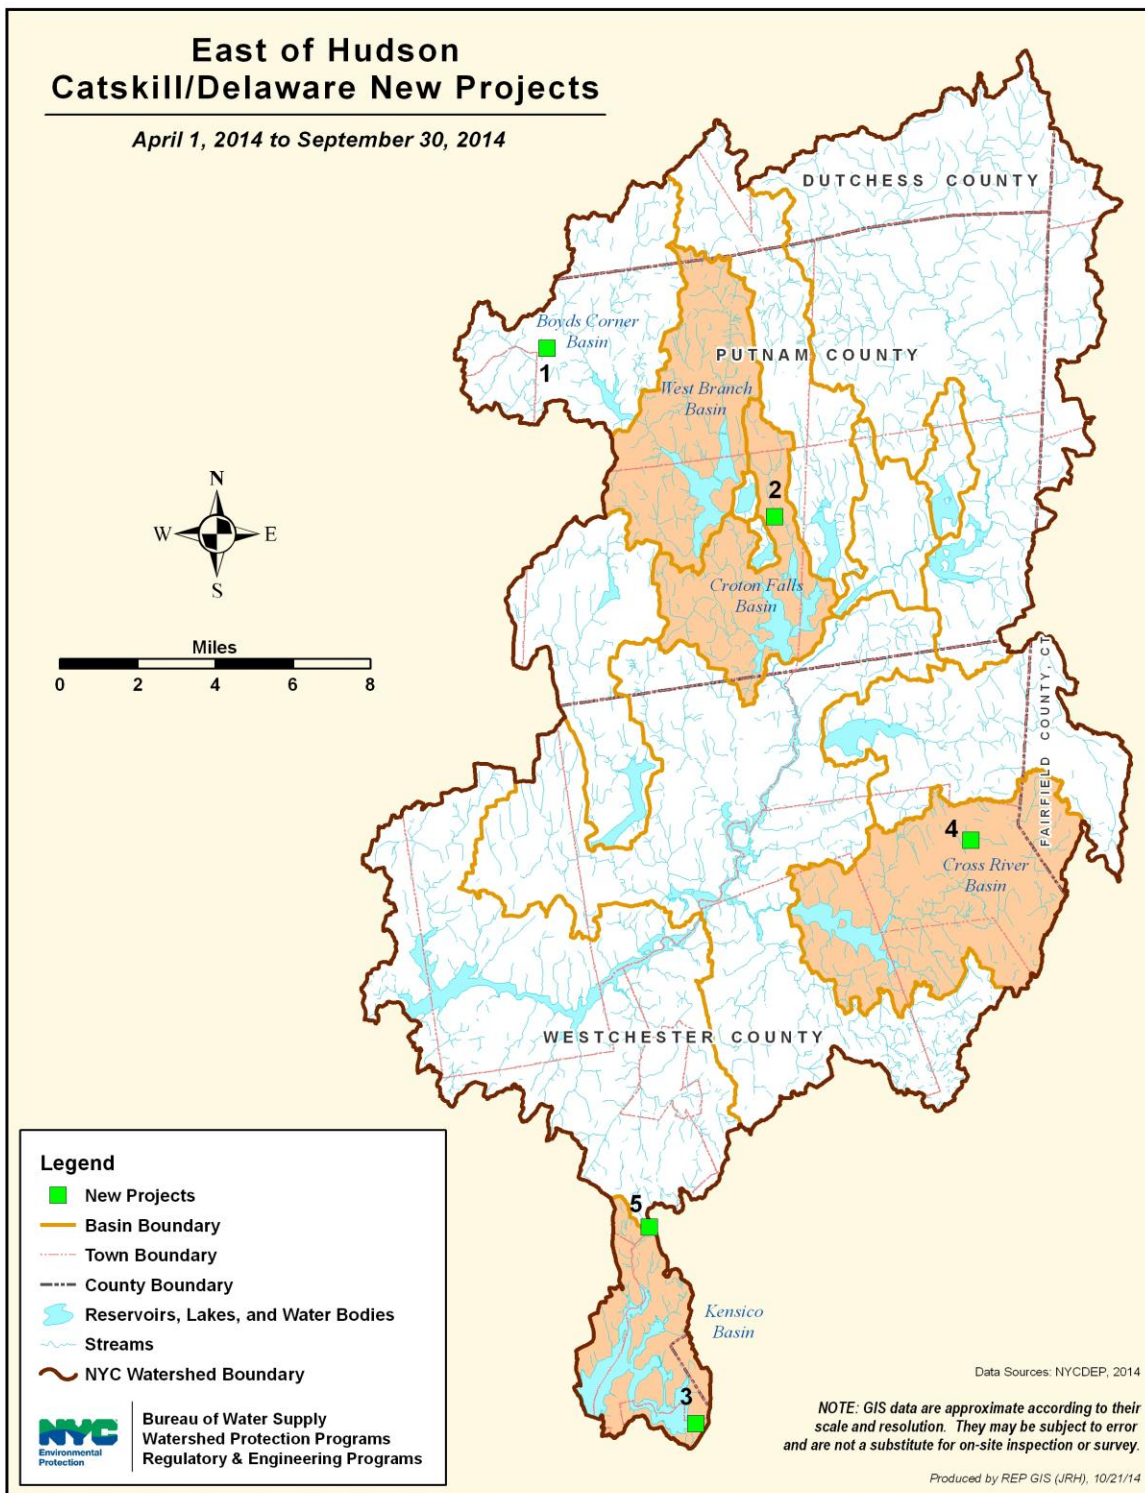

Map#	Project Name	
1	Batavia Kill Restoration @ Brandywine & Ashland Connector	Stormwater
2	Beers Brook Sites A & D	Stream Disturbance
3	Brainard Ridge Associates (Adaptive Sports Foundation ASF)	Stormwater/Sewer Connection
