Individuals housed in confirmed and symptomatic housing may include new admissions who have refused testing, and those who are housed in the Communicable Disease Units (CDU) for non-COVID reasons.

III. Housing: People in Likely Exposed but Asymptomatic Housing

**Number of People In Likely Exposed but Asymptomatic Housing,
March 16th – September 11th, 2020**

* DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients.

SOURCES: BOC analysis of daily DOC updates to BOC & DOC Inmates in Custody File, automated daily pull from the DOC Inmate Information System (IIS) at 11:00am and the housing units for exposed but asymptomatic patients identified by the Department as of the previous day (time of DOC reports ranging from 7:30pm to 9:00pm).

III. Housing: Percentage of People in Custody in Housing Areas with a COVID-19 Housing Designation

Percentage of People in Custody in Housing Areas with a COVID-19 Designation
March 16 – September 11, 2020

¹ DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients. **Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDU) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS’s COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).**

III. Housing: Housing Density

**Number and Percent of Open Cell and Dorm Units Above and Below 50% Capacity
September 10, 2020**

NOTES:

- 1) On Thursday December 17th, DOC provided the Board with data on the designed capacity of jail housing areas. Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.
- 2) Dorm count includes modular dorm units in AMKC, RMSC, and RNDC.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

SOURCE: BOC analysis of DOC 5am census reports and DOC designed capacity data.

III. Housing: Housing Density

Number and Percent of Open Units Above and Below 50% Capacity by Housing Category
September 10, 2020

NOTES:

- 1) On Thursday December 17th, DOC provided the Board with data on the designed capacity of jail housing areas. Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.
- 2) General Population units have fewer staffing needs than more specialized housing units such as PACE or MO units and present an opportunity to lower housing density to facilitate social distancing.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).
