I also return original petition which accompanied said communication.

I beg to state that the Chief Engineer of Sewers, Borough of Brooklyn, reports to me as follows:

I beg to report that the estimated cost for above mentioned improvement is \$2,200, and the assessed valuation of the real estate within the probable area of assessment is \$76,490.

The items of work necessary are:

40 feet of 15-inch pipe sewer.

432 feet of 12-inch pipe sewer.

6 manholes and appurtenances.

In regard to outlet sewers, information of which is requested, I beg to state that such are built.

In regard to the legal opening of this street, information of which is requested, I beg to state that the legal opening of West Ninth street (formerly Church street), between Columbia street and Hamilton avenue, was confirmed May 25, 1850.

Following report from the Superintendent of Sewers:

City of New York, Borough of Brooklyn, Bureau of Sewers, Office of the Superintendent,

July 28, 1903.

OTTO KEMPNER, Esq., Acting Commissioner of Public Works:

Dear Sir—I herewith return a communication which was referred to me by your secretary on the 21st inst., the same being addressed to Commissioner Redfield by Mr. A. N. Daniels on July 7, 1903, complaining of the ponding of water after rain-falls at the southeast corner of Third avenue and Sackett street. I also return a report made by the Chief Engineer of the Bureau of Highways, relating to the matter addressed to you under date of July 20, 1903.

The Chief Engineer of Sewers reports to me as follows:

Due to the slight fall which now exists in the newly paved Third avenue, from Sackett street to Union street, a basin could be placed at the southeast corner of Sackett street and Third avenue, which would be beneficial. I have, therefore, considered the communications, which are herewith returned, as a petition for the improvement, and respectfully report that the estimated cost for same is \$160, and the assessed valuation of the real estate within the probable area of assessment is \$67,500.

Mr. Daniels should be informed that this being an improvement which is assessed upon the property benefited, some time must elapse in its authorization by the local board of the vicinity and the Board of Estimate and Apportionment, and will probably not be constructed until after the pipes he speaks of have been laid.

Respectfully yours,

(Signed) JOHN THATCHER, Superintendent of Sewers.

Following report from the Chief Engineer of the Bureau of Highways:

(Copy.)

July 20, 1903.

OTTO KEMPNER, Esq., Acting Commissioner of Public Works, Borough of Brooklyn:

Dear Sir—I return you herewith letter of A. N. Daniels regarding the condition of Third avenue and Sackett street.

Mr. Pollock reports that at the southeast corner of Third avenue and Sackett street there is a low point which probably would be benefited by a catch basin. He says, however, that he has never been able to find any standing water there, even after showers, so that it does not seem to me the condition is anything that requires attention.

Respectfully,

(Signed) GEO. W. TILLSON, Chief Engineer.

The following resolution was offered:

848 linear feet of curb at 85 cents.

1,130 square yards of asphalt at \$2.25.

4,240 square feet of cement sidewalk at 18 cents.

Total estimated cost, \$4,600. Assessed valuation, \$23,720.

The street is legally open: Water mains have been laid, but gas mains have not been laid.

I beg to report that the estimated cost for a sewer within the above limits is \$2,130, and the assessed valuation of the real estate within the probable area of assessment is \$23,700.

The items of work necessary are:

80 feet 15-inch pipe sewer.

404 feet 12-inch pipe sewer and appurtenances.

In regard to outlet sewers, I beg to state that such are built.

BOROUGH OF BROOKLYN.

Report for Quarter Ending September 30, 1903.

October 1, 1903.

Hon. J. EDWARD SWANSTROM, President, Borough of Brooklyn:

Dear Sir—I beg to submit my report for the quarter ending to-day, with copies of the reports to me from the following officers, which form a portion of this communication:

1. Assistant Commissioner of Public Works.
2. Chief Engineer of Highways.
3. Superintendent of Sewers.
4. Superintendent of Public Buildings and Offices.
5. Acting Superintendent of Incumbrances and Permits.
6. General Bookkeeper.

During the nine and one-half months of 1903, to the date of present writing, 367 distinct contracts have been advertised, involving an expenditure of \$7,012,925.26. This exceeds the total for the entire year 1902 by 125 contracts, and by an expenditure of \$3,027,543.35. Out of the contracts above mentioned three are signed, but not yet registered by the Comptroller. Thirty are for bids opened between September 2 and October 14. There have therefore been made and put in force 333 contracts, and 34 remain in various stages of progress. The details of these contracts are given in the report of the Assistant Commissioner of Public Works attached. They constitute an extraordinary amount of work to be brought into legal effect within nine months.

In the Bureau of Highways work has been done during the quarter upon 154 different streets, and has been completed upon 72.

The amount of pavement laid in this single quarter exceeds that laid in any one year in the previous history of Brooklyn, and the total thus far laid during the year 1903, makes, I believe, a world's record for this work. I quote the following figures from the report of the Chief Engineer of Highways:

The amount of pavement laid during the quarter is 28.27 miles, divided as follows:

Asphalt, miles.....	21.43	Medina, miles.....	1.27
Granite, miles.....	4.23	Wood, miles.....	.47
Macadam, miles.....	.81		
Trap, miles.....	.06	Total miles.....	28.27

This is a larger amount than has ever been laid in one year before in the history of the borough.

During the year 1897 there were laid 26.30 miles.

During the year 1902 there were laid 28.15 miles.

During the year 1903, there have been 38.45 miles, as follows:

Asphalt, miles.....	29.37	Medina, miles.....	1.27
Granite, miles.....	6.04	Wood, miles.....	.47
Macadam, miles.....	1.14		
Trap, miles.....	.16	Total miles.....	38.45

The result of this work upon the pavement mileage of the borough appears in the following table in which the mileage as found January 1, 1901, is stated for contrast:

January 1, 1901.		October 1, 1903.	
Asphalt, miles.....	95.87	Asphalt, miles.....	146.08
Granite, miles.....	119.87	Granite, miles.....	129.78
Cobble, miles.....	216.80	Cobble, miles.....	171.67
Belgian, miles.....	46.61	Belgian, miles.....	44.52
Macadam, miles.....	82.15	Macadam, miles.....	88.20
Brick, miles.....	5.31	Brick, miles.....	4.93
Trap block, miles.....	.78	Trap block, miles.....	1.24
		Medina, miles.....	1.45
		Wood, miles.....	.51
Total miles.....	566.66	Total miles.....	588.42

The difference in the totals represents the new pavement laid on streets theretofore unpaved. The changes in the items of the table itself show the effect of the repaving work. For example, it will be noted that the asphalt has risen from third place to second by an increase of over 50 miles, or 55 per cent. On January 1, 1902, the amount of cobble exceeded the total asphalt and granite, but to-day there is a mileage of these two improved pavements of 275.86, or over 100 miles in excess of the cobble, which has sunk to 171.67. The cobble maintains, however, for the present an apparent predominance. I say "apparent" because when the present contracts are carried out the cobble will have sunk to 136 miles, and the asphalt pavement will be predominant with over 175 miles. With two years more of such work as in 1903 the cobbles of Brooklyn would be only a memory.

Fourth avenue has been completed from Fortieth street to Tenth street, and is in use below the latter point. The advance guard of the contractor's men are at Atlantic avenue, and it is expected that with good weather the contract will be completed before the 15th of November. One of the new relief sewers runs along the west side of Fourth avenue, between Butler and Degraw streets; another crosses Fulton avenue at Dean street. It has been arranged that the contractor for these relief sewers shall immediately commence work at these two places, while the paving contractor will hold back his work at these particular points until the sewer shall be completed. It is expected to finish the sewer at these two places so that the pavement may be laid over it before the winter sets in.

During the quarter the work of repaving Forty-first street from Second to Fourth avenue, with our own force with second-hand granite—taken from Fourth avenue—on a concrete base, has been completed and also the repaving with new granite on a concrete foundation of Atlantic avenue, from Henry street to the river. The repaving gangs are now at work upon Central avenue, between Palmetto street and Myrtle avenue, using second-hand granite taken from Bushwick avenue.

The paving of Bushwick avenue has progressed so far that the street will be completed during October.

The work of repaving Prospect avenue, from Seventh to Eleventh avenues, is nearly completed and the construction of the new portion of this street between Vanderbilt street and Eleventh avenue has steadily progressed. In this latter portion the bridge is building to carry Seeley street over Prospect avenue. All the flase work for this bridge is in place and the building of the concrete and steel abutments nearly done. The contractor and the Department expect that, given ordinary good weather, the bridge will be completed before the winter and Prospect avenue running under it will also be finished, thus, for the first time, providing a direct extension of the Ocean parkway through Windsor Terrace and the Park Slope to a direct connection with Hamilton Ferry.

Every effort has been made throughout the quarter to push work forward with the result that during one week of September there were laid fifty thousand square yards of completed asphalt pavement, and of course a great deal more in the way of preliminary work. The result of these efforts appears in the mileage thus far laid this year, which exceeds more than one-third the total mileage of any previous year, with two months yet to come. The details of the work done in repairs to stone and macadam roadways are fully given in the report of the Chief Engineer of Highways. Asphalt repairs have been kept sharply up to time and it is the fact that these pavements are in better repair to-day than they have ever been before. Undoubtedly much remains to be done to put the stone pavements, chiefly laid upon sand, in permanently satisfactory condition, but it is in my judgment unwise to expend money for repairs upon cobble pavements further than so much as will keep them in reasonably safe condition.

The way to repair cobble pavements is to replace them.

Illuminated signs have been erected in most parts of the borough; 324 have been put up for gas, and 240 for electricity; 110 more of the electric signs are being added, making a total of over 650 of these new illuminated signs. In addition three thousand glass signs for the regular street street lamps have been purchased and put in place. The work of inspecting and replacing or removing the old wooden signs on capped lamp-posts and elevated railroad columns is now proceeding. It will be possible, with care, by the end of another year to put the borough, so far as street signs are concerned, in substantially perfect condition. The breakage of the new illuminated signs has been a serious loss; measures have been taken by the Commissioner of Police to stop the bad practice.

The work of repaving between tracks and rails on the part of the street railway companies has gone on steadily throughout the quarter. There has been completed by the railroads since this work commenced last year, a total of 133,218 square yards of improved stone pavements, which at the moderate price of \$3.25 per square yard would cost \$432,958. There has been arranged and is being executed a further amount of this work to the total of 111,466 square yards, which at the same price would cost \$362,254, or a total square yardage during your administration of 244,684, costing \$795,222. This may be compared with the work of the same kind done in the four years from 1898 to 1901, which was 40,014 square yards, costing \$133,380, showing an excess during the present two years of 204,670 square yards, costing \$661,842, or substantially six times as much work of this kind in the two years as in the previous four years. It is but just to say that the work of the street railway companies has been well done; the pavements speak for themselves. It is also true that during this entire time the railroad companies have not been asked by the officers of this Department to give employment to anyone.

I am pleased to state that the important work of the Topographical Bureau has been brought more closely to date than ever before, the results stated in the final words of the report of the Chief Engineer of Highways being noteworthy.

At my request the Chief Engineer of Highways submitted on April 11, a report upon the advisability of installing in the Borough of Brooklyn, a municipal asphalt plant for repaving asphalt pavements upon which the original guarantees have expired. This report having been placed before you, it is only necessary for me now to state that the report was favorable to the construction and operation of such a plant. In making up the Bond Budget for the year 1904, I propose to include therein the sum of \$25,000 for the cost of construction of the said plant in one of the yards now owned by the City. The use of this plant will not only permit the borough to control its own asphalt repairs, but would set free throughout the year at least one asphalt gang belonging to contractors, which could be occupied in the important and much needed work of repaving which might therefore progress just so much faster.

The report of Mr. John Thatcher, Superintendent of Sewers, shows that the value of the work now in the care of the Bureau of Sewers amounts to the great sum of \$5,176,680.88. This amount of construction work of the kind is unprecedented.

The great Bay Ridge sewer tunnel and its eastward connections through Sixtieth street, Nineteenth avenue, Foster avenue and Bedford avenue is progressing at twenty places simultaneously with three different contractors at work. The tunnel portion which has long progressed day and night, Sundays and holidays, is so near completion that it can be used in December, and if open weather permits can be completed by the close of winter.

As an important section of this same great system, the trunk branch thereof, which will drain Windsor Terrace, is advertised for contract and will be pushed steadily to completion, for no more important work of providing house drainage exists in Brooklyn than that of giving relief to the Windsor Terrace District.

Construction has begun on three new relief sewers, viz.:

1. In Fifth avenue, Dean street, Third avenue, Baltic street, etc. This will take a surface drainage of 422 acres on the Park Slope away from the Greene avenue relief sewer.

2. In Fourth avenue, from Butler to Degraw street, and in Degraw street to the Gowanus Canal. This will provide an adequate outlet for the Greene avenue relief sewer itself, now choked because it is contracted at its mouth to 124 inches in diameter although it is 180 inches in size above its outlet.

3. In Evergreen avenue, between Halsey and Schaeffer streets, the enlargement of an existing sewer now insufficient.

It is a satisfaction to report that this needed work has at last overcome the technical difficulties in the way and is actually under construction.

A further measure of relief, however, is provided by the authorized sewer running from Morgan avenue, near Meadow street, into the Newtown creek canal to relieve the Morgan avenue sewer, and the sewer authorized in Porter and Flushing avenues to provide for the overflow discharge from the Knickerbocker avenue sewer into the Newtown creek canal. Condemnation proceedings for the land required for the construction of the former have already begun, and the Board of Estimate and Apportionment will be asked to take title to the land as soon as the Commissioners shall have

filed their oaths, in order that the sewer may be promptly constructed. Negotiations are still pending in the office of the Comptroller for the easement for the use of the old Vandervoort avenue sewer, which, if granted, would make the construction of the Porter avenue sewer unnecessary. It is recommended that these negotiations be pushed to a conclusion as promptly as possible.

I recommend also that the existing sewer in Knickerbocker avenue, from George street to Johnson avenue, and in Johnson avenue, from Knickerbocker avenue to Humboldt street, now insufficient in size and of too small grade to be self-cleaning, be altered, repaired and reconstructed by raising the top of same, building a new concrete invert on top of the present invert of the sewer to such a grade and of such a shape as to be self-cleaning. At present the continual deposits in the flat or, indeed, the concave bottom of this sewer are such as to reduce its efficient capacity, aiding to produce floods. The estimated cost of this work is \$150,000. It is strongly recommended by the Superintendent of Sewers and the Chief Engineer of Sewers and cannot be done too soon.

The above changes and new construction will, in the opinion of the Engineers who have studied the problem carefully for years, provide an ample escape for all surface drainage in our heaviest storms, but in order that there may be no question of stopping the loss and damage from floods in every part of the borough, I purpose to arrange, as soon as practicable, for a thorough examination of the so-called flooded districts, to determine whether further special outlets should not be constructed to do away with the annoyance and damage that severe storms now cause. Certainly nothing but good can come from a careful study of the situation in the light of the new construction now being undertaken.

The Bureau of Sewers should be provided with means for the prompt relief of flooded buildings, as emergencies are always likely to arise from the bursting of a main or a sewer in heavy floods. The fire engine bought last year for this purpose has saved many times its cost, but is inadequate to meet any large part of the demands which have, at times, been made on it. The Fire Department have not sufficient reserve engines to give much assistance, and the engines they use are not fitted for the work. After a few hours of pumping cellars, a fire engine becomes clogged or breaks down and goes out of commission. This is the experience with our own engine and those the Fire Department have loaned us. I shall, therefore, ask for funds with which to purchase several portable plants, using pumps through which solid matter may, in small amounts, pass without injury, these plants to be under the exclusive control of the Bureau of Sewers, and for the sole purpose named above. Experience shows that it is quite as important to be provided with apparatus to get water out of buildings as it is to have engines in case of fire to pump water into them.

Work has begun upon the great main sewer to drain the northern portion of Flatlands, extending in Flatlands avenue, East Fortieth street, etc.; the main sewer in Bedford avenue is substantially completed; the so-called Paerdegat inlet sewer has progressed steadily, and the Chief Engineer informs me that it will be ready for use in May next. Permanent repairs are being made to the Hegeman avenue sewer in the portion that burst during the heavy storm of June 29, and which was thereafter immediately temporarily repaired. The plans of the Bushwick creek sewer are nearly completed, and same will be advertised promptly; this will relieve greatly the North Twelfth street sewer, now overcharged, near Union avenue, in heavy rainfalls.

During the quarter seven miles of sewers and one hundred and seven sewer basins have been constructed. The work of maintenance and care for the system already existing, which is now 698 miles in length, and has connected with it 8,357 sewer basins, has been continuously carried on. I add, for illustration, such items as the examination during the quarter of 10,449 sewer basins and the cleaning of 3,814 at a cost of \$1.68 per basin. You will recall that this is the work that cost in 1898 \$4.75 per basin, and never reached under the previous administration a cost of less than \$4.30 per basin. The present figure, I repeat, is \$1.68.

During the quarter, also, 532,652 linear feet of sewers—over 100 miles—have been examined, and 175,900 linear feet—over thirty miles—have been cleaned.

One further item of interest in this branch of your Department has to do with the providing for the first time of surface drainage for Surf avenue, Coney Island, where 62 sewer basins have recently been constructed. This work was held until the fall at the request of the business men on Coney Island, and is now substantially completed. The construction of these basins has been made possible through the skill of Superintendent of Sewers John Thatcher, whose management has saved the cost to the City at large or to the residents of Coney Island, of an entire system of relief sewers.

The pumps in Caisson No. 2, through which the sewers of this section discharge, are insufficient to carry surface water, which could not therefore be discharged into the regular sewers until a proper outlet were made. The simple device arranged by Mr. Thatcher of a by-pass around the caisson, so that in floods the surface water can, by turning a large valve, be discharged without going through the caisson itself, has permitted the immediate construction of the sewer basins and the handling of the surface water without building any new sewers. The relief will be appreciated by the thousands that will visit Coney Island next year.

The report of Superintendent Thatcher, which is attached hereto, gives in full detail the operations of this important bureau.

The work of the quarter has been fruitful also in the Bureau of Public Buildings and Offices. Contracts have been made for the following matters of importance:

Repairs and alterations to the Borough Hall, to provide accommodations for the Appellate Division of the Supreme Court and for the President of the Borough, amount.....	\$52,365 00
Erection of an interior public bath building on Montrose avenue, to cost.....	87,426 00
For improving and adding to the heating and ventilating system of the Kings County Court House.....	45,885 00
For repairs and alterations to the plumbing and drainage system of the Kings County Court House.....	23,890 00

All of the above are well under way, and the new quarters for the Appellate Division were put in use the last week in September. With the completion of this work the Borough Hall is in better condition than it has been for many years, having been quite largely reconstructed in several places.

The work upon the Kings County Court House has been seriously delayed by strikes in the various building trades. The work is now proceeding well, so that it is expected to complete same before the winter. The Court House will then for the first time in years be in a sanitary condition.

The work of reconstructing the Hall of Records has progressed so far that the building can be closed in before the winter begins.

A special expert examination is being made for reconstructing the plumbing and ventilating system of the Kings County Jail, and, following the report of the Sanitary Engineers doing this work, application will be made for funds sufficient to do away with the foul conditions now existing.

The plans for the Gates Avenue Court House, for which an appropriation of \$50,000 has been made, have been approved by the Municipal Art Commission save in one small detail, and it is expected to advertise for the construction of this building in a short time.

The first interior public bath building in Brooklyn, that on Hicks street, near Degraw street, was completed and put into service at the very close of the quarter. This building, which cost \$61,000, is a model of its kind, thoroughly fireproof, with the best and most durable sanitary work and the most modern systems of heating and ventilating. The air in the building is changed, when the ventilating fans are running twelve times hourly. There is in it a total capacity of fifty-five showers and eight baths, with the other necessary toilet facilities. During the preparation of this report the public approval of this bath has been shown by a daily average attendance of 1,082 people, of which one-third were women.

The second public bath, that on Pitkin avenue, near Watkins street, will be opened on the 24th of October, with appropriate exercises. It, as well as all of our other building work, has been delayed by the serious labor troubles throughout the year.

The work upon the Montrose avenue bath progresses well. The foundation and basement walls are largely completed. It is expected to close the building in for the winter.

The work upon the foundation for the Huron street bath has begun.

Plans are ready for the bath authorized in the Navy Yard District, and it is expected to advertise a contract within a week after a proper site has been found.

The public comfort station at the Borough Hall was opened for use on September 28. During the first week it was used by over 43,000 people, and shows a regular average daily use by 8,000 persons.

The public comfort station at Manhattan and Greenpoint avenues was all but complete on the closing day of the quarter. It is proper to say that during the preparation of this report it has been opened (October 8), and shows an average daily attendance of 3,000 persons.

The public comfort station at Hamilton avenue and Richards street will be open to the public for inspection on October 21 and for use upon the following day.

It is expected that on or before the 26th instant the public comfort station at East New York and Liberty avenues will be ready for use.

The remaining two public comfort stations, viz., those at Lorimer street and Broadway, and at Reid avenue, Pulaski street, and Broadway, are in such condition that it is expected to have them ready for use by December 1.

If the attendance at the baths now under construction and authorized shall be such as is shown at the Hicks street bath, the result would be that 50,000 persons daily would be using the bathing facilities provided.

If the use of the public comfort stations should average, at them all, as it does at those now in use, the result when the six now authorized are completed by the close of the year, will be an average daily use of these by 25,000 people, or to state it more briefly, the baths each will be used each week by 35,000 and the public comfort stations each week by 175,000. Nothing further need be said to show the value of these improvements.

The work of the Bureau of Encumbrances and Permits has continued throughout the winter upon the same steady and moderate lines that have characterized its past. A total of 1,022 obstructions have been removed of which the leading items are:

Dangerous street washers projecting above sidewalks.....	288
Trees and limbs.....	305
Posts and stumps of posts.....	94
Boulders.....	77

A statement of the work of each of the four out-door Inspectors employed in this Bureau, and of the permits issued and funds received therefor, is hereto attached.

It is only just to the gentlemen who are associated with me in the work of your Department to say that the results tabulated above could never have been reached save with their enthusiastic co-operation and their skill in the execution of the work.

Doubtless there are those who, reading the above statements, will minimize them, and there are probably those who will not grasp the full meaning of the work done in its effect upon the health, comfort and convenience of the people of the borough. It remains none the less true that the work of the quarter, as outlined above, is the high water mark for operations of its kind in municipal history in this country, and he who in after years shall study the constructive work of building the great City, will find here both in quantity and quality, an unequalled record.

The gentlemen who have done this work feel a justifiable pride and interest in it, and it is with great pleasure that I am able to lay the results of their efforts before you.

Respectfully submitted,

WILLIAM C. REDFIELD, Commissioner of Public Works.

Report of Assistant Commissioner of Public Works for Quarter Ending September 30, 1903.

October 5, 1903.

Hon. WILLIAM C. REDFIELD, Commissioner of Public Works:

Dear Sir—I have the honor to transmit herewith my quarterly report for the third quarter of 1903, which relates entirely to the subject of contracts. The number of contracts thus far entered into by the President of the Borough of Brooklyn for the year 1903 foot up a total of 333, and represent an estimated cost for public works of \$6,226,264.70. During the year 1902 the total number of consummated contracts was 242, involving an expenditure of \$3,966,171.97. It will be seen that we are thus far ahead of last year's record by ninety-one contracts and an expenditure of \$2,260,092.73 in excess of the total expenditure for 1902.

The quarterly report herewith transmitted does not, however, include pending or unregistered contracts for which bids were received prior to September 1, 1903. Of these there are but three, viz.:

1. Paving with asphalt block Forty-fifth street, from Second to Sixth avenue; estimated cost.....	\$62,417 90
2. Repaving with granite Wyckoff avenue, from Hart street to Queens County line; estimated cost.....	49,449 50
3. Paving with asphalt block Taylor street, from Washington avenue to Wythe avenue; estimated cost.....	14,811 10

Total estimated cost..... \$126,678 50

Neither does the quarterly report include contracts for which bids were opened between September 2 and October 16, 1903. These represent thirty contracts, aggregating a total estimated cost of \$659,083.06. When these are completed we shall have executed for the past nine months 367 contracts, involving an expenditure of \$7,012,925.26, exceeding the number for the entire year 1902 by 125 and in amount of expenditures by \$3,027,543.35.

Respectfully,

OTTO KEMPNER, Assistant Commissioner of Public Works.

"The contract for properly equipping both chemical and physical laboratories with the necessary conveniences required by the special nature of the work was entered into during the early part of the year and completed about July 1. The increase in the amount of work accomplished, therefore, during the last quarter has been especially gratifying. In the physical laboratory alone 9,356 briquettes, or separate test pieces, have been made and tested. This compares with approximately 10,000 briquettes made during the year 1902. In addition, many special tests have been carried on which have furnished valuable information. The work accomplished in the chemical laboratory on asphalt testing and miscellaneous tests, such as tests of lubricating oils, disinfectants, etc., has been equally gratifying, as reference to the above table will show, the most important work being the testing of asphalt pavements and asphalt paving materials. If the result of a test shows the asphalt composition to be of incorrect formula, the contractor is notified immediately to make the necessary change. The plants of the several asphalt contractors doing work in this borough have been inspected during the quarter, and improper methods and improper manipulation, wherever found, have been corrected. This method of procedure, together with the laboratory tests, has secured asphalt pavements uniform in composition and of the highest excellence.

"I may add that the large volume of work above indicated is due in large measure to the conscientious work of the men under my direction."

TOPOGRAPHICAL BUREAU.

Street opening maps have been progressed as heretofore. Rather more time than usual had to be devoted to maps for determination and changes in street lines, and to maps for filing. The usual summer vacations have been taken during these three (3) months; arrangements were made to let them interfere with the work as little as possible.

Besides the work here reported as completed, there are many other items under way on which work is well advanced.

Work Accomplished.

In the course of the three (3) months ending September 30, 1903, work was accomplished as follows:

Reports.

1. Reports on condition of streets in relation to opening proceedings or improvements	50
2. Reports accompanying street opening maps	54
3. Reports on change of lines, laying out, closing, etc., and change of grades	19
4. Miscellaneous reports	97

Total 220

The work of the Topographical Bureau includes the following general divisions:

I. The retaining, determining and fixing on the ground the lines of the existing street system, and to fix the new street lines as they are adopted.

II. Changes in the established street system of the City, and miscellaneous maps.

III. Surveys, searches, technical descriptions and maps for the Commissioners, in the matter of acquiring title to the streets.

Amendments and Additions to Street Opening Maps.

As circumstances require it, amendments and additions were made to street opening maps that have been previously forwarded; the work usually consisted in adding new subdivisions to draft maps and to final maps, or in adding large sketches or other new information to the maps. This work was given the preference over all other work in the office.

The work covered the following streets:

I respectfully call to your attention the progress now attained in street opening work. During these three months more maps have been furnished than were requested. Work is pending on but few street opening maps at the present time. The total requests that have not yet been complied with comprise 6 rule maps, 8 draft damage maps, 5 draft benefit maps and 7 final damage and benefit maps. A showing of results as good as these is unusual, and I believe unprecedented up to the present time.

Respectfully submitted,
GEO. W. TILLSON, Chief Engineer.

BUREAU OF SEWERS.

City of New York, Borough of Brooklyn, Office of Superintendent, Municipal Building, Room 46.

October 21, 1903.

Hon. WILLIAM C. REDFIELD, Commissioner of Public Works:

Dear Sir—I have the honor to submit a report of the transaction of affairs in that part of the Department of Public Works known as the Bureau of Sewers for the third quarter of the year 1903.

As is usual in all of my quarterly reports to include a statement from the Chief Engineer of Sewers in regard to the construction of new sewers and 'those advocated, as well as a report from the Superintendent of Maintenance setting forth the amount of work performed and the materials used in the care of the existing sewerage system in the borough, you will find their reports for the period of the third quarter are again subjoined to this writing for your information.

Both reports go into details, containing tabulated statements and brief summaries of the work performed.

In that which follows you will find a tabulated statement of the financial transactions of the Bureau, giving the amount of money expended both for payments made from the appropriations set aside for the Bureau and against the various bonded accounts, which the new construction work is paid from.

In the financial statements you will also find the amount of moneys received by the Bureau and deposited with the Comptroller for permits for connecting with sewers, etc., etc.

Forty-three (43) contracts have been entered into during the period covered by this report, ranging in amount from \$338,500 for the largest sewer work, to that of \$140 for the construction of several sewer basins.

The largest work among those entered into, for which the amount of money above mentioned is the bid price, was for the construction of a portion of the main sewer in Flatlands, which will extend in Brooklyn avenue, from Avenue H to Avenue J; in Avenue J, from Brooklyn avenue to East Fortieth street; in East Fortieth street, from Avenue J to Flatlands avenue, and in Flatlands avenue, from East Fortieth street to the Paerdegat basin.

The next contract in value, viz., that section of the so-called Foster avenue sewer extending in Foster avenue, from East Ninth street to Flatbush avenue; in Flatbush avenue, from Foster avenue to Bedford avenue, and in East Fifteenth street, from Foster avenue to Caton avenue, etc., for which the lowest bid was \$285,200. Work was begun by the contractor during the last quarter, prior to the full consummation of the contract, at the request of yourself, in order that not a single day should be lost towards the completion of this most important main sewer.

Among the other contracts entered into is for that sewer in Fourteenth avenue, from Thirty-ninth to Forty-first street, and in Thirty-ninth and Fortieth streets from Fourteenth avenue to New Utrecht avenue, etc., which will cost, according to the contractor's bid, \$73,100.

I could go on mentioning others, but brevity forbids, and as the status of various contracts entered into, in progress, and those completed during the quarter are mentioned by the Chief Engineer of Sewers, I will refrain from calling further contracts to your attention.

You will note that the value of the work entered into during the quarter, however, is \$710,510.

Attention is especially drawn to the tabulated financial summary given in the Chief Engineer's report, which gives the value of the work cared for in all stages from authorization to completion.

By adding the amounts set aside for the contracts completed during the quarter, and their accounts closed, the total estimated cost of the contracts in progress, those contracts in course of consummation, and the total amount of the contracts authorized, for which plans and specifications are being drawn, in order to enter into contract, you will find the grand total equal to \$5,176,680.88, representing the value of the work now in the care of the engineering forces of this Bureau.

The estimated amount of work actually performed on these contracts is \$1,253,397.75.

It gives me great pleasure, as I know it will you, to be able to state in this writing that active work has been begun upon three of the subdivisions of the relief sewers authorized in the beginning of this quarter, the contractors having shown

every indication to push this work to a rapid completion. They are now excavating, although their contracts have not been registered by the Comptroller. Especial attention will be given to the completion of that length of one of the contracts extending in Fourth avenue, from Degraw street to Butler street, and it is believed that without doubt this portion of the sewer will be completed before the cold weather sets in which will permit the completion of the asphalt pavement now being progressed in Fourth avenue this year, and will result in the much-desired advantage of not having to rip up a new asphalt pavement recently laid.

You are aware of the status of the remaining portions of the relief sewer system, which have been authorized, but which we cannot contract for as yet, owing to condemnation of property by the City through which some of the sewers will extend.

It is also a pleasure to state that advertisement appears in the corporation papers and the "City Record" for the receipt of bids for that important sewer to be constructed in East Fifth street, to extend from Foster avenue to the Windsor Terrace section of the City. Its completion will afford the relief desired by the residents of said Windsor Terrace from an imperfect sewerage system which has caused much trouble.

I refrain from mentioning other matters of importance, as such will be more fully dealt with in the annual report for the year 1903.

Respectfully yours,

JOHN THATCHER, Superintendent of Sewers.

BUREAU OF SEWERS.

City of New York, Borough of Brooklyn, Office of Chief Engineer, Room 44, Municipal Building.

October 21, 1903.

Mr. JOHN THATCHER, Superintendent of Sewers:

Dear Sir—I have the honor to submit a report of the conduct of business in the Engineering Division of the Bureau of Sewers for the third quarter of the year 1903. In so doing I first desire to call to your attention that on the 1st day of July, 1903, the beginning of this quarter, the sewerage system of the City embodied 690.792 miles, and had connected therewith 8,250 receiving basins. There has been constructed during the quarter 6.998 miles of sewers, and 107 receiving basins. Thus it is found that the total mileage of sewers in the streets of the borough at the beginning of the fourth quarter of the year is 697.790 miles, and that the number of receiving basins connected with our sewerage system is 8,357.

I have divided the mileage of sewers constructed during the quarter into feet and miles in various classes, as set forth in the following tabular statement:

	Feet.	Miles.
Vitrified stoneware pipe sewers	22,442.2	4.250
Cast-iron pipe sewers	36.0	.007
Brick sewers	14,469.4	2.741
Total	36,947.6	6.998

I append to this writing other tabular statements which show in detail the status of contracts in force, cared for by this division of the Bureau, the first table containing those contracts entered into during the quarter; the second, those contracts which have been completed and accounts of same closed; third, the estimated amounts of work performed on all contracts in progress; fourth, all contracts advanced to the stage of the receipt of bids, those in course of execution or in the Corporation Counsel's hands for certification; fifth, those contracts authorized by the Board of Estimate and Apportionment for which plans and specifications are being prepared; sixth, a statement showing the linear feet of sewers constructed in all contracts in progress during the quarter; seventh, a summary of the value of all contracts which have been under the care of your Engineering Corps during said quarter.

It has been found that the value of the various contracts in force amounts to the sum of \$5,176,680.88, and that the estimated amount of work performed on all contracts is \$1,253,397.75. As the tabulated statements above mentioned will show all contracts in detail to those who desire information in such manner, especially so as to their particular status, whether in course of construction, having plans and specifications prepared for same, or in course of consummation, and as the year's time is near at hand for the submission of the annual report, wherein care will be given in descriptions of that which has been performed at greater length, I will write now briefly and generally upon our most important contracts, not specially referring to their status.

If we begin in the Greenpoint section of the City, we find that the most important construction under way is that sewer in Eagle street, and extending in Provost street, from Eagle street to Huron street, upon which work is now in active progress. There are several minor constructions in this location, such as receiving basins and smaller sewers which I will not mention.

A most important sewer for that section of the borough that has been authorized is in Quay street and North Fifteenth street, extending through the new park in that vicinity to Driggs avenue, thence in Engert avenue, etc.

This, the so-called Bushwick creek sewer, has been advocated by the Bureau of Sewers for at least sixteen years. The plans for same are rapidly approaching completion, after which bids for same can be received. This sewer is of material importance to the vicinity, as it will provide for a considerable area of drainage now being cared for by the North Twelfth street sewer, which is surcharged during exceedingly heavy rainfalls, especially so at Union avenue.

Now going toward the Eighteenth Ward, it is my pleasure to state that one of

the relief sewers recently authorized in Evergreen avenue, from Halsey street to Schaeffer street, begins to-morrow. There are other important relief sewers which are imperative in this location of the borough, to relieve the flooded district in the vicinity of Central avenue and Eldert street, but will be spoken of later on in this report under the head of "Relief Sewers."

In the Twenty-sixth Ward, or East New York, we find several constructions in progress, or which have been completed during the quarter, while other contracts for this location are in course of having plans prepared for work authorized.

A length of sewer has been constructed in Ridgewood avenue, from Norwood avenue to Euclid street. Several basins have been constructed in this Ward, while a short length of sewer has been built in Blake avenue, from Logan street to Fountain avenue.

Repairs to the Hegeman avenue sewer, which were necessitated by its disruption during the heavy storm of June 29, are progressing, work having been begun on Monday last. This sewer was temporarily repaired, to carry drainage, immediately after June 29. The permanent repairs at this location could not be begun until contract was entered into and duly registered by the Comptroller, as such permanent repairs will cost more than \$1,000, the limit of work that can be performed by Commissioner's order under the Charter. The temporary repairs were carried away during the recent exceedingly heavy storm of October 9.

As we come into the central portion of the City it can be noted that the two contracts for the alterations to sewers to provide for the construction of the Atlantic avenue subway have been completed, caring for all crossings from Manhattan Crossing of the Long Island Railroad as far west as Grand avenue. Another contract is now in the hands of the Comptroller for registration to provide for all crossings between Grand avenue and the Flatbush Depot. Work for same will be ordered on as soon as said contract is registered and returned to this office.

Now mentioning that territory nearer the City Hall, it is my pleasure to write that the two sections of the relief sewers recently authorized, to afford sufficient sectional area for the outlet of the Greene avenue sewer, are in progress of construction, the first section extending in Fourth avenue, from Butler street to Degraw street, to Gowanus canal, the other in Fifth avenue, from Atlantic avenue to Dean street, to Third avenue, to Baltic street, to Nevins street, to Butler street, to the Gowanus canal.

These constructions will give an ample outlet, while about 400 acres of drainage will be diverted from the Greene avenue sewer thereby directly into Gowanus canal. Although these contracts have not as yet been registered, the contractor has assumed the responsibility of performing his work. Every attention is being given to the completion of that length in Fourth avenue between Butler street and Degraw street, before the cold weather sets in, in order that the new asphalt pavement on Fourth avenue can be laid this year. I anticipate that such result will obtain.

In the Windsor terrace section of the City that sewer to provide for its efficient drainage, to care for surface water as well as the daily sewage, to extend from said Windsor terrace southerly through East Fifth street to Foster avenue, I am pleased to say that bids for same are advertised in the corporation papers and the "City Record" to be received to-day.

The large main sewer in Flatbush avenue, to provide for a considerable territory of its drainage, extending in Avenue G, Avenue F and Paerdegat avenue, is progressing very nicely, and to such extent that I am of the opinion it will be ready for use next May.

Work has been begun upon the main sewer authorized for the drainage of a portion of Flatlands, extending in Flatlands avenue from Paerdegat basin to East Fortieth street, and in East Fortieth street northerly, etc.

The Bedford avenue main sewer has been completed from Montgomery street to Flatbush avenue, excepting very minor details, such as the adjustment of pavement around sewer basins, etc., thus virtually completing the first section of the so-called Foster avenue sewer, extending from Flatbush avenue to Foster avenue, to Nineteenth avenue, to Sixtieth street, and so on to the foot of Sixty-fourth street. In fact, work has been and is being progressed along this line, as I stated in my last quarterly report, at at least twenty different places, three contractors being engaged thereupon.

The Sixty-fourth street tunnel sewer, whereupon work has been continually progressing day and night for two and a half years, is so near completion that it can, no doubt, be used in December, and if an open winter prevails will be entirely completed by next February. If the winter weather should be severe a small portion of the outlet extending into the Bay may not be completed until March.

The tunnel sewer in Ninety-second street, extending from the shore line to Eleventh avenue, is progressing as rapidly as could be expected. An extension for this tunnel sewer has been authorized, and for which surveys and plans from same are being made, which will care for the entire Dyker Heights section of the City in one contract, and in another the main will be continued in Bath avenue, through Bath Beach and Bensonhurst as far east as Twenty-first avenue.

We now proceed to Coney Island, where it will be found that the basins authorized on Surf avenue, from West Twenty-third street to West Eighth street, have about been completed. The result of this construction will be duly appreciated during the next summer season by the many thousands of people who visit this seaside resort.

You will note from what I have written that work under the care of this Bureau extends throughout its entire area, from Greenpoint to Coney Island and from New York bay and the East river to East New York.

It is unnecessary for me to say that the work of my corps has been arduous and that great responsibility has been placed upon my shoulders and theirs, but, notwithstanding this, every man of said corps has cheerfully worked for the best interests of the citizens of the Borough of Brooklyn. I appreciate what they have done more than I can at this time express.

I have in all of my former quarterly reports advocated the extension of this sewer and that sewer, and it is a great pleasure to me to be able to state that most of my recommendations have been acted upon favorably and pushed to the stage of authorization by yourself, the Commissioner of Public Works and the President of the Borough. There are many other constructions which are very desirable, but I will not mention same in this report, but will enumerate same in the annual report of this year and in the preparation of the annual bond budget to be prepared within a short time. I must, however, readvocate some of the improvements I have formerly mentioned in the line of

Relief Sewers.

In the late fall of 1901 I recommended the construction of certain relief sewers in this borough, in order that the sewerage system would care for a two-inch rainfall per hour.

In January, 1902, these recommendations were presented to you, and I am happy to state that all of such have been favorably considered by the authorities, and that all but one of the constructions advocated have been authorized; that three of these relief sewers are now in course of construction, as before noted in this report; that two others are authorized, but we are unable to contract for same until necessary land now owned by citizens is condemned for the City's use. These two cases you will remember are those relief sewers to extend from the Morgan avenue sewer to a branch of the Newtown Creek canal existing between Meadow and Stagg streets, and the acquirement of the title to the old Vandervoort avenue sewer, now the property of a citizen, due to the closing of said Vandervoort avenue between Knickerbocker avenue and the Newtown Creek canal. Every endeavor should be made to hasten these proceedings of condemnation, in order that these two sewers can be constructed.

I again most urgently recommend the alteration and reconstruction of the Knickerbocker avenue sewer from George street to Johnson avenue, and in Johnson avenue from Knickerbocker avenue to White street, which I mentioned in my last quarterly report and other writings which have been sent from this office.

I am now giving especial attention to the study of the necessity of more relief sewers, to provide for a heavier rainfall than that of two inches per hour, from the fact that within the past three or four years unexceptional rainfalls have demonstrated that such will be advisable. Especially was this brought to mind on October 9, when the heaviest rainfall ever recorded in this vicinity occurred. The result of my labors will be placed before you when they are finished, which I anticipate will be completed before the preparation of the annual report, and will be, if so completed, therein contained.

Yours respectfully,

HENRY R. ASSERSON, Chief Engineer of Sewers.

Borough Hall.

During the past three months the first contract for alterations and repairs to Borough Hall, which was authorized last year, has been completed. This contract was with W. & T. Lamb, and was under the direct supervision of Architect Axel S. Hedman. It involved an expenditure all told of \$17,456.25. The work consisted mainly of repairs in the southwesterly wing of the building, corner of Joralemon and Court streets. This part of the building had been condemned for a number of months and found to be in such an unsafe condition that many temporary supports had to be erected to carry the floors. In consequence thereof none of the rooms could for some time be occupied. The southwesterly wing was necessarily completely gutted by removing all interior partitions and three floors. All of the new work under Mr. Lamb's contract is thoroughly fireproof, consisting of cast iron columns, steel beams for three new tiers, concrete arches and fireproof partitions, etc.

The second contract in connection with this building was entered into on June 3 with Daniel J. Ryan, Mr. Hedman being the architect in charge of this proposition also for repairs and alterations for new quarters for the Appellate Division, Supreme Court, and additional work in the offices of the President of the Borough. The work included in this contract covered practically one-third of the building on the second and third floors, and comprehended a courtroom, rooms for stenographers, lawyers and a library on the Joralemon street side of the third floor; on the westerly and northerly side of the same floor four chambers for the Judges and office for Secretary and Court Attendants; a private stairway on the second floor, and one large chamber for Judges, offices for Clerks and Attendants and a large courtroom.

This work is now almost completed. The rooms have been rearranged to accommodate the requirements of the court. The courtroom is entirely new throughout, excepting the ceiling, where some new work has been added. Mr. Ryan's contract included also the bookcases, hangings, gas and electric fixtures, decorations of the rooms mentioned, a new mosaic floor for the third-story hall, marble base, etc., and decorations of the second and third story halls. This entire contract cost nearly \$55,000.

General repairs and alterations have been made to this building, as the occasion required it during the past quarter.

Municipal Building.

A number of small undertakings in the line of repairs were made to this building during the past three months. New fronts were placed in two of the boilers, brick work of the boilers was renewed, the roof was more or less repaired, and two motor fans for the purpose of improving the atmospheric conditions of the rooms of the Collector of Taxes in the basement were installed. New floors were laid, new book racks placed and new doorway cut through Rooms 7 and 9, and both rooms redecored at a cost of less than \$700; partitions were removed and a new closet built in Room 21; Room 51 was equipped for use of the Department Chemist with new closets, wood benches, plumbing, slate and hardwood partitions under contract with John Byrne at a cost of \$2,745. Room 25 was enlarged at a cost of \$130, and Rooms 16 and 20 were enlarged and redecored at a cost of \$482.

Kings County Courthouse.

Contracts for alterations and improvements to the plumbing and drainage systems of this building, which at the time of my last quarterly report, were being advertised, have been let during this quarter, and the work is now under way. Generally they meditate a thorough overhauling of the heating and ventilating conditions, improvements which have been long asked for by the various court officials quartered in the structure. The work on the plumbing and drainage contract is very nearly completed. It should be completed in or about ten days. This included the work of the three lines on the easterly side of the building, two of which serve the Law Library, that were left until the last in order to meet the requirements of that portion of the building. The heating and ventilating work is not in so satisfactory a condition. For a period of ten days no work in the heating and ventilating line was done, as the contractor, on request, withdrew all his men for the purpose of enabling the plumbing contractor to get his marble work finished; at that time the marble contractors refused to enter the building while the steam fitters and sheet metal workers were there. Previously and during the summer, for at least a month, the sheet metal workers refused to enter the building, and there were no steam fitters at work during part of this time. These delays were due to the labor troubles prevalent during the last two months. At present these troubles, with the exception of that of the sheet metal workers, appear to have been adjusted, and I think that this readjusted trouble will not delay the work materially, particularly as the marble work is very nearly completed. Alterations in the steam piping have, for the greater part, been completed, and the direct radiators and steam coils have been set. None of the direct-indirect radiators have been set. The sheet metal work is about two-thirds completed. The foundations and electrical wiring for the fans and motors have been provided, but none of the fans and motors have yet been delivered. The work can

be completed so that steam can be turned on in about three weeks. The fans and motors should be set up about ten days after they are delivered to the building, and the engineering firm in charge of the work is impressing upon the heating and ventilating contractor the necessity of having the fans and motors at the building at the earliest possible moment.

The customary emergency repairs have been made to this building.

Hall of Records.

The work in connection with the contract of Thomas Dwyer for alterations and repairs to the Hall of Records is going along very satisfactorily. The contractor intends to close the building before cold weather sets in. Mr. Dwyer's contract, it would seem now, should be completed on time.

On open orders of the Bureau a number of small changes, consisting mainly of location of desks and shifting partitions in the Register's and Commissioner of Record's offices, made necessary by alterations in the building as per Mr. Dwyer's contract, were made at a small cost.

Kings County Jail.

Emergency repairs, mostly to the plumbing and heating systems of this building, have been made as occasion demanded.

Disciplinary Training School.

Considerable small repairs to the heating plant of this building have been made, and some minor improvements to the building itself have been taken care of. The window sashes throughout the building were found to be in a very dilapidated condition, and were thoroughly repaired.

Free Floating Baths.

The five floating baths were towed into their winter quarters during the last week of September, and placed in charge of winter attendants.

Magistrates' and Municipal Courts.

Small repairs of comparatively insignificant cost have been made to these buildings during the last three months.

Wallabout Market Administration Building.

The only expense incurred by this building during the last three months was in connection with the repairs to the self-winding clock in the tower, a comparatively trifling matter. The old frame building situated within the market land and used by this Bureau as a wagon shed, was thoroughly repaired at a cost of about \$225.

Gates Avenue Courthouse.

An appropriation of \$50,000 for the purpose of erecting a building to quarter the Gates Avenue City Magistrate's Court and the Bedford Avenue Municipal Court, on the site of this old station house, has been granted, and plans prepared for the structure. With the exception of a small detail, the Municipal Art Commission has approved these plans, and the project is in line for quick attention.

New Children's Court.

These quarters on Court street, consisting of second and third floors of a commodious building, which were recently leased for Judge Wilkin's Court-room, were completely equipped for court purposes under the supervision of this Bureau; new platform, benches, rails, partitions, fitting up of Clerks' room, all at the expense of about \$3,000, were provided.

Firemen's Hall.

This building has cost the Bureau no expense whatever during this quarter.

INTERIOR PUBLIC BATHS.

Hicks Street.

N. B.—Since the opening of the bath for patronage, which occurred on December 2, the daily attendance has averaged 992, of which number one-third have been females.

This building has been completed during the last three months. The contract for the work was arranged the latter part of last year. The entire proposition cost nearly \$61,000. The structure is thoroughly fireproof throughout. The sanitary work, such as piping, fixtures, etc., is of the best and most durable make. The heating and ventilating systems are complete in every detail. The former is mostly a blast system, hot air being forced into the building by electric fans, and direct radiators are provided at exposed points for night use. The ventilation is controlled by exhaust fans of sufficient capacity to completely change the air in the building six times every hour. All flooring throughout is of Italian marble, terrazzo and soapstone and mosaic. All partitions throughout the shower compartments are made of soapstone, while the exterior of the compartments and the wainscoting in the large passages are of white Italian marble. On the first floor on each side are large skylights with ventilated sashes, and an abundance of light is obtained therefrom. The boilers installed are of a very economical kind to run, and a very simple and effective hot-water system has been introduced. The cellar contains boiler plant, heating stacks and hot-air system with fan, and all pipes for drainage. Hot and cold water pipes are exposed and readily accessible. The front of the building is of simple and dignified design, and constructed of limestone. The capacity of the building is as follows:

First floor for Men—14 showers, 2 bath tubs, toilet accommodations, wash basin and drinking fountain.

For Women—15 showers, 3 bath tubs, toilet accommodations, wash basin and drinking fountain.

Second Floor—26 showers for men and boys, 3 bath tubs, toilet accommodations, wash basin and drinking fountain, or a total capacity of 55 showers, 8 bath tubs, 7 water closets, 4 urinals, 4 wash basins and 3 drinking fountains.

Pitkin Avenue.

This building, the construction of which was started about the first of this year, is now rapidly nearing completion. Owing to the many and serious labor troubles this year, and some extent to the unfamiliarity of the contractors and mechanics generally with this type of building, the completion of the work has been more or less delayed. Now, however, the building is almost practically completed, requiring only the finishing touches and the testing of some of the apparatus preparatory to turning it over to Borough President Swanstrom. The intent of the plans and specifications has been adhered to in the spirit as well as in the letter in connection with this work, with the result that there has been obtained a building second to none for its purpose, and one which should prove a credit to the borough and a lasting benefit and ornament to the locality in which it is built.

Montrose Avenue.

Contract for the Montrose avenue bath building was registered early in July. This building is planned on about the same lines as the building on Pitkin avenue, excepting as to facade and some minor details. Considering several unavoidable delays, the work has progressed very favorably. It was found that the nature of the earth was such that piling would be necessary; that the sidewalk vault would have to be altered and the heating and ventilating work in the basement rearranged. After the drainage was altered to meet the new conditions, and the necessary arrangements made with the contractor relative to the changes, the work was again gotten under way and good progress has since been made. The foundations and basement walls in the front portion of the building are about completed and ready for the first tier of beams. The work of piling for the rear or extension is about half finished. Should the weather prove favorable it is expected that the roof will be on in about two and one-half months.

PUBLIC COMFORT STATIONS.

Borough Hall.

This building was opened to the public for inspection on September 17 and for use on September 18, 1903. It has been in constant use since, and shows an average attendance of about 7,500.

Manhattan and Greenpoint Avenues.

This building will be opened for inspection on October 7 and for use on October 8, 1903. There is still a small amount of odds and ends to be completed, which will be done in less than two weeks.

N. B.—Since the opening of the comfort station for patronage the daily attendance has averaged about 3,000.

Hamilton Avenue and Richards Street.

This building is in such a condition that it will be thrown open to the public for inspection on October 21 and for use the following day.

East New York and Liberty Avenues.

This building should be ready for opening on October 21. The electric fans for the ventilating plant not yet having arrived, the opening may be delayed for two or three days.

Lorimer Street and Broadway.

In this building the rough plumbing is all in, the walls are carried up to the required height, and the roof beams will be placed in a day or two. This station from present appearances should be ready by December 1, 1903.

Reid Avenue, Pulaski Street and Broadway.

In this structure the rough plumbing is in, the walls are up, and the beams on. This station should be ready for opening by December 1, 1903.

And with the right or franchise to cross such other streets and highways and bridges (named and unnamed) as may be encountered in said routes.

Section 2. The grant of this franchise is subject to the following conditions:

First—The consent, in writing, of the owners of half in value of the property bounded on said streets and highways and bridges to the construction and operation of said railway shall be obtained by the grantee, or in the event that such consent cannot be obtained, the grantee shall obtain the favorable determination, confirmed by the Court, of three Commissioners, appointed by the Appellate Division of the Supreme Court, in the manner provided by the Railroad Law, before said railway is built or operated.

Second—The said right, privilege and franchise to construct and operate said railway shall be held and enjoyed by said railway company, its lessee or successors, for the term of twenty-five years from the date when this ordinance is signed by the Mayor, with the privilege of renewal of said grant for a further period of twenty-five years upon a fair revaluation of said right, privilege and franchise, but such renewal shall not provide for any further renewal. Such revaluation shall be of the right, privilege and franchise to maintain and operate said railway by itself, and shall not include any valuation derived from the ownership, operation or control of any other railroad by the grantee, its successors or assigns. It shall be made in the following manner:

One disinterested freeholder shall be chosen by the Board of Estimate and Apportionment, or its successors in authority; one disinterested freeholder shall be chosen by the railway company; these two shall choose a third disinterested freeholder; and the three so chosen shall act as appraisers and shall make the revaluations aforesaid. Such appraisers shall be chosen at least six months prior to the expiration of the grant, and their report shall be filed with the Comptroller, or his successor in authority within three months after they are chosen. They shall act as appraisers and not as arbitrators. They may have their judgment upon their own experience, and upon such information as they may obtain by inquiries and investigations without the presence of either party. They shall have the right to examine the books of the railway company. The valuations so ascertained, fixed and determined shall be conclusive upon both parties, but shall not in any event be less than the minimum amount fixed as the sum to be paid annually for the last five years of the original franchise.

Third—Upon the termination of the said franchise, right or privilege, whether original or renewal, if the Board of Estimate and Apportionment of The City of New York, or its successors in authority, shall so desire, there shall be a fair valuation of the plant and property of the grantee necessary for traction purposes upon the said streets and highways and bridges, and of the land in private ownership upon which the said railway shall be operated or the easements of right-of-way or other necessary easements in such lands, as the case may be, including power-house, equipment, tracks and appurtenances, which plant and property shall be and become the property of The City of New York at the option of the said Board of Estimate and Apportionment, or its successors in authority, on the termination of this grant and the payment to the grantee of such valuation. The valuation shall be based upon a fair appraisal of the property, excluding any value derived from the franchise, and such value

shall be determined by the Board of Estimate and Apportionment, or its successors in authority; provided that in the valuation of the land in private ownership, on which such railway is constructed, or the easements affecting such land, as the case may be, their value shall not be fixed at an amount in excess of the original cost thereof, to the grantee of said franchise, its successors or assigns. A sworn statement of such cost executed by such grantee and verified by the affidavit of one of its officers, shall be filed with the Comptroller of The City of New York before any act is done by the grantee, or its successors or assigns, in the construction or operation of the railway upon any route hereinbefore mentioned, which includes private property.

Fourth—The New York and Long Island Traction Company, its successors or assigns, shall pay for this franchise to The City of New York the following sums of money: During the first term of five years an annual sum which shall in no case be less than \$1,000, and which shall be equal to three per cent. of its gross annual receipts derived from passenger and freight traffic, within the limits of The City of New York, if such percentage shall exceed the sum of \$1,000; during the remaining twenty years of the term, an annual sum which shall not be less than \$2,000, and which shall be equal to five per cent. of its gross annual receipts as above, if such percentage shall exceed the sum of \$2,000.

In computing the amount of the gross receipts derived from passenger traffic and above referred to, the routes hereinbefore mentioned shall be considered, and the persons who are upon the cars of the company at any point upon such routes shall be deemed to have paid the fare provided to be paid by the ordinance granting the franchise aforesaid, whether they enter or leave the car upon such route or upon any other route upon which the grantee, or its successors or assigns, operates its cars.

Such sums shall be paid into the Treasury of The City of New York on November 1 in each year; provided, however, that the first payment shall only be for that proportion of the above sums as the time from the signing of this ordinance by the Mayor to September 30 next preceding, shall bear to the whole of one year. The fiscal year shall end on September 30 next preceding said date of payment, and the provisions of the Railroad Law as it existed at the time of the adoption of this ordinance relating to the manner of payments and statements of percentages of gross receipts of street railway companies shall, as to said railway, be strictly followed. The intention of this paragraph is to fix an annual charge to be paid by the grantee, its successors or assigns, to The City of New York for the rights and franchise hereby granted, and it shall not be construed as providing for the payment by the grantee, its successors or assigns for said franchise, of a percentage of gross receipts within the meaning of any general or special statute.

Fifth—The said annual charge or payments shall continue throughout the whole term of the franchise hereby granted, whether original or renewal, notwithstanding any clause in any statute or in the charter of any other railway company providing for payments for street railway rights or franchises at a different rate, and no assignment, lease or sublease of the rights or franchises hereby granted, whether original or renewal, or of any part thereof, or of any of the routes mentioned herein, or of any part thereof, shall be valid or effectual for any purpose unless the said assignment, lease or sublease shall contain a covenant on the part of the assignee or lessee that the same is subject to all the conditions of this grant, and that the assignee or lessee assumes and will be bound by all of said conditions, and especially said condition as to payments, anything in any statute or the charter of such assignee or lessee to the contrary notwithstanding, and that the said assignee or lessee waives, so far as this franchise is concerned, any more favorable conditions created by such statute or its charter, and that it will not claim by reason thereof, or otherwise, exemption from liability to perform each and all of the conditions of this grant.

Sixth—The rights and franchises granted hereby shall not be assigned, either in whole or in part, or leased or sublet in any manner, nor shall title thereto, or right, interest or property therein, pass to or vest in any other person or corporation in whatsoever, either by the act of the New York and Long Island Traction Company, its successors or assigns, or by operation of law, whether under the provisions of the statutes relating to the consolidation or merger of corporations or otherwise, without the consent of The City of New York, acting by the Board of Estimate and Apportionment, or its successors in authority, evidenced by an instrument under seal, anything herein contained to the contrary thereof in anywise notwithstanding, and the granting, giving or waiving of any one or more of such consents shall not render unnecessary any subsequent consent or consents.

Seventh—The said railway may be operated by overhead electrical power, substantially similar to the system of overhead electrical traction now in use by the New York and North Shore Railway Company, or by the underground electric system now in use by the Interurban Street Railway Company in the Borough of Manhattan, and by any other motive power, except locomotive steam power or horse-power which may be approved by the Board of Railroad Commissioners, and consented to by the owners of property, in accordance with the provisions of the Railroad Law.

Provided that the Board of Estimate and Apportionment, or its successors in authority, upon giving to the grantee, its successors or assigns, one year's notice, in writing, may require it or them to operate its railway upon the whole or upon any portion of its route by underground electrical power substantially according to the system now in use on the railways in the Borough of Manhattan above referred to, and thereupon to discontinue the use of the overhead trolley system, and to remove its poles, wires and other structures used by it for that purpose from the streets and highways and bridges of The City of New York.

Eighth—The said railway shall be constructed, maintained and operated subject to the supervision and control of all the authorities of The City of New York, who have jurisdiction in such matters under the Charter of the City.

Ninth—Said railway shall be constructed and operated in the latest improved manner of street railway construction and operation, and the railway and property of said company shall be maintained in good condition throughout the term of this grant.

Tenth—The rate of fare for any passenger upon said railway shall not exceed five cents within the limits of The City of New York; the said company shall not charge any passenger more than said sum for one continuous ride from any point on said railway, or a line or branch operated in connection therewith to any point thereof, or of any connecting line or branch thereof within the limits of The City of New York. The rates for the carrying of property upon the cars of the grantee shall in all cases be reasonable in amount, and shall be subject to the control of the Board of Estimate and Apportionment, or its successors in authority, and may be fixed by such Board after notice and hearing to the grantee, and when so fixed such rate shall be binding upon said grantee, its successors or assigns, and no greater sums shall be charged for such services than provided for by it.

Eleventh—The cars on the said lines as proposed shall run at intervals of not more than one hour, both day and night, and as much oftener as the

reasonable convenience of the public may require or as may be directed by the City ordinances; provided, however, that said railway company during the first five years of this franchise shall not be required to operate its cars on any of its lines within The City of New York between the hours of twelve o'clock midnight and five o'clock a. m. each day, unless the Board of Estimate and Apportionment of said City shall determine after a hearing had thereon that public convenience requires the operation of its cars during said hours.

Twelfth—The said railway company shall apply to each car run over said railway a proper fender and wheelguard in conformity to such laws and ordinances as are now in force or may hereafter be enacted or adopted by the State or City authorities.

Thirteenth—All cars on said railway shall be heated through the cold weather in conformity to such laws and ordinances as are now in force, or may hereafter be enacted or adopted by the State or City authorities, and each car shall be well lighted either by the Pintsch gas system or by electricity, or by some system of lighting equally efficient.

Fourteenth—The said company shall at all times keep the street between its tracks, and for a distance of two feet beyond the rails upon either side of said streets, free and clear from ice and snow.

Fifteenth—The said railway company, as long as it shall continue to use any of the tracks upon said streets and highways and bridges, shall have and keep in permanent repair that portion of the surface of said streets and highways and bridges, between its tracks, the rails of its tracks and two feet in width outside of its tracks, under the supervision of the proper local authorities, and whenever required by them to do so, and in such manner as they may prescribe. And The City of New York shall have the right to change the material or character of the pavement of any street and highway and bridge, and in that event the grantee, its successors or assigns, shall be bound to replace such pavement in the manner directed by the proper city officer at its own expense, and the provision as to repairs herein contained shall apply to such renewed or altered pavement.

Sixteenth—The said railway company, its successors and assigns, so long as it shall continue to use any of the tracks upon the streets and highways and bridges hereby granted, shall cause the entire roadway of each of the same to be watered at least three times in every twenty-four hours when the thermometer is above 35 degrees Fahrenheit, except that when the width of any roadway between curb lines shall exceed 60 feet, then a roadway of but 60 feet shall be watered as above.

Seventeenth—In case of any violation or breach or failure to comply with any of the provisions herein contained this grant may be forfeited and avoided by The City of New York, by a suit brought by the Corporation Counsel on notice of ten days to the said railway company.

Eighteenth—If any of the streets and highways and bridges above referred to, or described, shall not now be open or in use as public highways, no right or franchise therein shall vest in the grantee by virtue of this ordinance until after such streets and highways and bridges shall be legally opened as a public highway, and such right or franchise shall expire at the end of the term created by this ordinance as above set forth. Nothing in this ordinance contained shall be construed as an obligation on The City of New York, in respect to the opening of such streets and highways and bridges, nor as in any manner granting property or rights of any kind in or upon its lands now owned or occupied by it under any title, except only the public streets and highways and bridges in the usual acceptance of such terms, which are specifically referred to above.

Section 3. This grant is also upon the further and express condition that the provisions of Article 4 of the Railroad Law, as it existed at the time of the adoption of this ordinance applicable thereto, and all laws or ordinances now in force or which may be adopted hereafter affecting the surface railways operating in The City of New York shall be strictly complied with.

Section 4. This grant is also upon the further and express condition that at any time after five years from the commencement of the operation of any portion of the railway hereby granted, the Board of Estimate and Apportionment, or its successors in authority, if it deems it necessary in the public interest so to do, may require the grantee, its successors or assigns, in case the railway upon any portion of the routes above described shall consist of a single track, to construct and operate a second track upon any or all of the routes hereby granted, whether on streets, highways and bridges or upon any private property or right-of-way included in any of such routes so as to make a double-track railway.

Section 5. Said grantee shall commence construction within three months from the date when it has obtained complete legal authority to begin construction, including necessary permits from the city officials and departments and shall complete the construction of at least six miles of single track railway on or before January 1, 1905, otherwise this grant shall be thereupon forthwith and immediately forfeited, without judicial or other proceedings. If upon any of the routes above described, or upon any portion thereof, there shall not be constructed and in actual operation by July 1, 1906, a railway properly equipped and operated as provided by this ordinance, the time for the completion of the work and the full performance of the contract is thirty (30) working days. The highest bidder will be required to pay the full amount of his bid or purchase money and the auctioneer's fee at the time of sale, together with the further sum of one hundred dollars (\$100) for expenses of examination, advertising, conveyance, etc. The quit-claim deed for the above-described premises to be delivered within thirty days from the date of sale.

The Comptroller may, at his option, resell the property if the successful bidder shall fail to comply with the terms of sale, and the person failing to comply therewith will be held liable for any deficiency which may result from any such resale.

The right to reject any bid is reserved. Maps of said real estate may be seen on application at the Comptroller's Office, Stewart Building, No. 280 Broadway, Borough of Manhattan.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, the names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be, or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. REPORT OF THE CORPORATION COUNSEL.

LAW DEPARTMENT—OFFICE OF THE CORPORATION COUNSEL,
NEW YORK, November, 1903.

Hon. SETH LOW, Mayor:

SIR—In compliance with the requirements of section 1544 of the Greater New York Charter, I transmit herewith a report of the transactions of the Law Department for the quarter ended September 30, 1903. The report contains:

First—The statistics of the business of the office of the Corporation Counsel, including the main office in Manhattan and the branch offices in the other boroughs, contained in eight schedules.

Second—An appendix containing reports from the Bureau of Street Openings, Bureau for the Collection of Arrears of Personal Taxes, Bureau of Penalties and the Tenement House Branch office; also statistics relative to proceedings begun for the several Bureaus of Buildings, and reports from special counsel retained in proceedings to acquire land in the Croton Watershed, and other matters.

The total amount collected by this Department from January 1, 1903, to September 30, 1903, was.....\$1,072,960 85
The expenses paid during the same period amounted to.....355,971 86

Leaving net surplus of.....\$716,988 99

The quarter under review embraces the three summer months during which almost all the courts are closed, so that little could be accomplished in the way of trying and disposing of cases. The office work has, however, been quite up to the average of other periods of the year. During this quarter 390 opinions were written, and 1,170 contracts, bonds, leases and other papers were approved as to form.

The number of pending proceedings naturally increased during the summer, as courts were not sitting. The increase consists almost entirely in two classes of cases: Actions by Laborers to recover wages withheld during their absence from sickness or other causes, and actions to recover damages for injuries from overflowing sewers.

The latter class of cases is becoming more and more numerous, partly because of the growth of the City in districts where sewers are unquestionably inadequate in the event of sudden storms, and partly because the speculative possibilities of such litigation are becoming better understood among a certain kind of legal practitioners.

I have frequently called attention to the enormous number of pending actions to recover wages. We are now defending 8,970 cases, classified as "prevailing rate of wages," "suspension" and "overtime" actions; and besides these there are many suits for wages included in the classification "other actions on contract." It is safe to say that 10,000 actions to recover wages are now pending. The larger part of these could

be disposed of if the law were clearly settled; and two cases argued in the Court of Appeals since the close of the quarter—the Eckerson case and the Ryan case—will, it is hoped, finally decide some of the most important principles involved.

During the quarter sixty judgments were entered against the City, mostly on offers of judgment approved by the Comptroller. The aggregate amount is unusually large, namely, \$699,877.53; but this is explained by the fact that one judgment alone, recovered by the New York Floating Dry Dock Company, amounted to \$658,782.12. This judgment was entered upon the report of three referees, and the nature of the case was such that the recovery should rather be classed among awards in condemnation proceedings. The facts were that prior to April, 1899, the New York Floating Dry Dock Company was in possession of certain water front property which they used in their business. At about that date the Dock Department, pursuant to some understanding with the company, entered into possession of the property without any proper warrant of law, destroyed the structures then existing and proceeded to construct new wharves and piers. No condemnation proceedings were begun. The Dry Dock Company, not receiving compensation for its property, thereupon began suit against the City to recover possession of the property or its value, including the value of the new structures that had been erected by the Dock Board. The case was referred to three referees and ultimately resolved itself substantially into a condemnation proceeding; the question of the value of the property and the rule of damages being very earnestly contested. In the result the referees awarded the Dry Dock Company \$514,011, which, with interest and costs, make up the judgment above referred to.

In the Bureaus for the Recovery of Penalties and for the Collection of Arrears of Personal Taxes, work has been carried on along the usual lines, the details being found in the reports from those Bureaus hereto annexed.

In the Tenement House branch office a very greatly increased amount of work has been begun. During the quarter under review 1,275 complaints were received from the Tenement House Department, as against 742 during the previous quarter and 783 received during the fifteen months from January 1, 1902, to March 31, 1903. This, of course, is due to the more thorough organization of the Tenement House Department, and the more complete inspection it is able to carry on. If the same activity shall prevail in future in the Tenement House Department it will be difficult, if not impossible, for the Law Department to conduct the necessary legal proceedings with the present appropriation.

In the Bureau of Street Openings, 26 reports were confirmed during the quarter, making 117 confirmed during the nine months of 1903, as against 120 confirmed during the year 1902. The affairs of this Bureau are now, I believe, in much better condition than ever before, and its work can be disposed of as rapidly as the necessary preparation of maps by the Borough Presidents will permit.

The condemnation proceedings for property in the Croton Watershed are progressing satisfactorily, and all pending proceedings ought to be completed before the close of another year.

In my quarterly report for the three months ending June 30, 1903, I reviewed at some length the work of the Department for the previous eighteen months, and this fact makes it unnecessary to discuss more fully the meaning of the several schedules annexed hereto.

The following is a brief summary of the schedules forming the report of the main office:

REMARKS.

I am informed by the Tenement House Commissioner that a large number of violations of the law relating to school sinks await the result of the appeals now pending in this Moeschén case. These appeals will probably settle the constitutionality of not only section 100 of the Tenement House Act, but also of other important sections affecting the legal remedies and improvements required in existing houses.

The total number of violations upon which actions have been commenced by this Bureau within the last quarter alone is greater than the number of actions actually prosecuted during any previous year of the history of this branch of the Department. In the conduct of these actions it has been found necessary, in order to secure a prompt compliance with the law, to file notices of lis pendens in 1,560 cases.

Respectfully submitted,

MATTHEW C. FLEMING, Assistant Corporation Counsel.

Reports of Special Counsel.

REPORT OF H. T. DYKMAN.

November 9, 1903.

Hon. GEORGE L. RIVES, Corporation Counsel:

SIR—With the exception of the general run of detailed work, such as answering letters, etc., the only results that have been accomplished by my office during the months of July, August and September were in the Mahopac Sixth Separate Report, which included ten parcels, wherein the amount claimed was \$99,437.64, amount allowed, \$57,760, making a saving in favor of the City of \$41,677.64. Also in Seventh Cornell Dam, Final Report, the number of parcels being two hundred and forty separate plots, amount claimed, \$51,610; amount allowed, \$28,622, making a saving in favor of the City of \$22,988. New proceedings were instituted as follows: Certiorari proceedings were instituted against the Towns of Carmel, Kent and Southeast. Putnam County, also the Towns of North Salem, Yorktown, Somers, Cortlandt, Mount Pleasant, Greenburgh and North Castle, Westchester County, to review the action of the assessors for the year 1903.

Yours respectfully,
H. T. DYKMAN.

REPORT OF EDWARD H. HAWKE, JR.

NEW YORK, November 4, 1903.

Hon. GEORGE L. RIVES, Corporation Counsel, New York City:

My DEAR SIR—I have your letter of October 28, 1903, asking me to send you a report of the proceedings in which I am retained as Special Counsel for the City for the three months ending on September 30, 1903.

I am retained in only one matter—that is the Speedway matter.

Hearings were had before the Commissioners, during the month of July, to hear objections to their preliminary report, which had been previously filed, and additional testimony was taken in support of certain objections filed by various property owners.

During August the Commissioners adjourned for the summer vacation, and reconvened in September, at which time they began the taking of testimony as to \$168,000 of new claims which had been filed since the making of the preliminary report, various witnesses for property owners testifying, and these proceedings continued during the month of September, and are still going on, and will continue being held for a little while longer.

Very respectfully yours,

EDWARD H. HAWKE, JR.

REPORT OF WILLIAM WOOD.

NEW YORK, November 2, 1903.

Hon. GEORGE L. RIVES, Corporation Counsel:

DEAR SIR—In reply to your letter asking for report of progress made in Mahopac, Kirk, etc., Commission proceedings for the three months ending September 30, would state:

That up to the 30th September the Commission had taken proof for claimants on thirty parcels. On July 23 the Commission adjourned, and no meetings were held until September 1, since which time we have had two meetings each week.

Yours truly,

WILLIAM WOOD.

REPORT OF FREDERICK W. SHERMAN.

SUPREME COURT, SECOND JUDICIAL DISTRICT.

In the Matter

of

The Application of Robert Grier Monroe, as Commissioner of Water Supply, etc., to appraise lands about Wampus Pond, Wampus River, Rye Pond, Byram River and Bronx River, in Westchester County.

To the Honorable GEORGE L. RIVES, Corporation Counsel:

The undersigned, as Special Counsel appointed to conduct the above-entitled proceeding, respectfully reports:

That during the months of July, August and September there were held at the office of the Commissioners in New York City ten public hearings, and claims for the taking of fourteen parcels of land were taken up and closed upon one side.

As this quarter embraced the summer months it was not possible to hold as many meetings as is customary.

Respectfully submitted,

FREDK. WM. SHERMAN.

Dated Port Chester, September 30, 1903.

REPORT OF ROBERT C. BEATTY.

October 30, 1903.

Hon. GEORGE L. RIVES, Corporation Counsel:

DEAR SIR—I have received your letter of the 28th instant requesting a report of the proceedings of which I have charge for the quarter ending September 30, 1903.

As before reported, the only matters now pending in connection with the Change of Grade Damage Commission are twenty certiorari proceedings to review decisions of the Commission adverse to the respective relators. Two test cases were argued by me in the Appellate Division, First Department, on October 14, and the decisions reserved.

During the quarter ending September 30 the briefs in these two cases were partially prepared.

Very respectfully,

ROBERT C. BEATTY.

REPORT OF WILLIAM L. TURNER.

November 2, 1903.

Hon. GEORGE L. RIVES, Corporation Counsel:

SIR—Complying with your request I submit herewith the following brief statement of the condition of pending tax proceedings in which I hold retainers from the Law Department.

The people ex rel. Metropolitan Street Railway Company vs. Barker, and the People ex rel. Twenty-third Street Railway Company vs. the Same, both involving the capital and surplus assessments of the respective relator companies for the year 1897, are pending before Hamilton Odell, Esq., as referee. Proceedings brought by the same relators to review the capital and surplus assessments for the year 1898 are pending before Mr. Charles A. Jackson as referee.

These four proceedings have been held in abeyance until recently and until pending negotiations for settlement had failed, but dates for hearing in November, 1903, were lately fixed by the respective referees.

Respectfully,

WM. L. TURNER.
