The new method of procuring practically all medical and surgical supplies by way of public

Immediate use. The new method of procuring practically all medical and surgical supplies by way of public bids has, on the whole, so far worked quite well, and is expected to work still better after more experience has been gained in the matter of adjusting the kinds and amounts of the many items of supplies to the probable or actual domand. As no the quality of the supplits received, it may be stated that none were accepted that did not comply with the specifications and similaries were also made for other institutions. The quality of milk delivered by the contractors has been carefully controlled by the daily examination of every can of cowst milk, and the periodical analysis of the condensed milk. Very respectively.

Very respectfully. CHARLES RICE, Chemist.
