PROCEEDINGS OF THE BOARD OF RAPID TRANSIT RAILROAD COMMISSIONERS.

AT A MEETING OF THE BOARD HELD IN NO. 320 BROADWAY ON MONDAY, FEBRUARY 25, 1907.

There were present—John H. Starin, Vice-President, presiding; Mayor George B. McClellan, Comptroller Herman A. Metz and Commissioner Charles Stewart Smith. George L. Rives, of counsel, and George S. Rice, Chief Engineer, also were present. The minutes of the meeting of the 20th of February were read and it was moved that they be approved.

Ayes—The Vice-President, Mayor, Comptroller and Commissioner Smith.

Nays—None.

Carried.

Report of the Special Committee appointed to investigate and report in connection with chapter 109 of the Laws of 1906 was read as follows:

To the Board of Rapid Transit Railroad Commissioners:

The undersigned members of the Special Committee, to which was referred the communication received from the President of the New York Central and Hudson River Railroad Company, dated January 7, 1907, on the subject of the removal of the west side tracks of that railroad from the surface of the streets, do now report as follows:

Mr. Jesup (much to the regret of the undersigned) has been prevented by illness from taking any part in the work of your Committee.

Your Committee, by its representatives, has had a number of conferences with the representatives of the railroad company, in which the whole subject of the west side tracks, in the Borough of Manhattan, has been minutely discussed. As the result of these conferences a plan has been tentatively agreed upon as follows:

The railroad company agrees to build a subway, at its own expense, from its present freight yard, at or about Thirtieth street and Eleventh avenue, up Eleventh avenue to a point where it will join the present track system between Sixty-first and Sixty-seventh streets and Twelfth avenue. The subway is to be of sufficient width to accommodate not more than six tracks, and is to be constructed at such grade as not to require any change of grade on the surface of Eleventh avenue north of Thirtieth street.

From the railroad yards, near Sixtieth street, the railroad company is to continue with not more than six tracks at their present grade to a point near where the prolongation of One Hundred and Twenty-second street would intersect the present tracks, from which point the tracks are to rise in grade so as to cross One Hundred and Twenty-ninth, One Hundred and Thirtieth, One Hundred and Thirty-first, One Hundred and Thirty-second, One Hundred and Thirty-third, One Hundred and Thirty-fourth and One Hundred and Thirty-eighth streets on a viaduct with a clearance of at least 13 feet between the lowest portion of the railroad structure and the established grade of the streets above mentioned, the tracks to descend and to join the present grade of the tracks at about One Hundred and Forty-fifth street; from this latter point not more than six tracks to continue at the present grade to Spuyten Duyvil, where they are to join the present main line.

At the present time the railroad company claims a right of way from about Seventy-third street to Spuyten Duyvil 66 feet in width, except where it is of greater width for the purpose of operating yards, and within this right of way at present operates from two to five tracks. The operating of six tracks will require a right of way of 90 feet.

Within this new right of way the railroad company is to build walls on either side of the tracks having a height of at least 8 feet above the base of rail—except for that portion of the road north of Seventy-second street where the viaduct above mentioned is to be built—that is, between about One Hundred and Twenty-fifth and One Hundred and Forty-fifth streets. The wall along the easterly side of the tracks is to be first built, and the westerly wall is to be built along such portions of the water front as the City has improved or shall hereafter improve for either commercial or park purposes.

Foot path crossings are to be carried across and over the tracks along Riverside Park as shall be required by the City, and road crossings at Seventy-ninth street, Ninety-sixth street, One Hundred and Fifty-fifth street, One Hundred and Fifty-eighth street and Dyckman street and such other streets as may hereafter be lawfully laid out and opened from One Hundred and Thirty-eighth street to Spuyten Duyvil by the City.

The expense of all such crossings is to be borne by the railroad company for such portion of the structure as lies within the 90-foot right of way, including the necessary abutments for the structure, the City to build the necessary approaches to the structure from the street, parks or marginal streets or wharves.

All changes in the City's sub-system of electrical conduits, sewers, water mains, etc., made necessary on account of the building of the subway to be done by the railroad company at its own expense.

The railroad company is to file complete plans showing the layout, grade, etc., of the subway and the additional tracks to be built, such plans before becoming effective to be subject to the approval of the Board of Estimate and Apportionment and of the Mayor of the City. These plans are also to show the changes made necessary in any established street and the necessary crossings referred to previously within park areas and the streets to be carried over the railroad right of way.

The railroad company further agrees to pay the sum agreed upon for compensation for the additional lands or land under water required for the increase in width of the right of way from Seventy-second street to Spuyten Duyvil, such compensation to be fixed by the Board of Estimate and the Mayor of the City and the railroad company.

In regard to the time in which this work is to be done, a report has been submitted that all the work called for in this report could be completed within a period of four years from the date of the passage of necessary legislation empowering the work to proceed.

In the operation of the subway and main lines of track from Spuyten Duyvil to Thirtieth street electrical operation is to be substituted for the present steam locomotives, except in the case of breakdown or other emergency necessitating the operation of steam locomotives during such period of the suspension of electrical traction, except for the operation of the yards at Seventy-second street and in the vicinity of One Hundred and Fifty-fourth street, where, for an agreed upon period, it may be legal for the railroad company to operate the yards by means of steam locomotives.

It is further agreed that the disposition to be made of the company's tracks south of Thirtieth street—which is a matter involving a number of other considerations than those that apply to the road north of that point—shall be the subject of further examination and discussion.

In order to carry out the plans thus far agreed upon it will be necessary to secure some additional legislation. Chapter 109 of the Laws of 1906, commonly known as the Saxe Law, directed this Board to prepare a plan for the removal of the tracks above referred to from the surface of the streets, and empowered the Board to make an agreement with any railroad company now operating a railroad by steam locomotive power in the Borough of Manhattan for removing its tracks from all streets upon which the railroad was operated at grade.

In accordance with the provisions of that act the Board will remember that its Engineer was instructed to make a careful study of the situation and to prepare such plan as the Saxe Law contemplated, and that Mr. Rice did, under date of November 14, 1906, present a comprehensive report, accompanied by complete maps, showing how the west side tracks of the New York Central Railroad could be removed from the surface of the streets by placing them in subways south of Fifty-ninth street. North of Fifty-ninth street Mr. Rice reported that the most practical way of avoiding any grade crossing of streets would be to have the tracks remain at their present elevation, except at the crossing of Manhattan Valley, between One Hundred and Twenty-ninth and One Hundred and Thirty-eighth streets, where he proposed to elevate the tracks. At the other street crossings of this portion of the road he proposed to elevate the streets and have the same cross above the railroad tracks and go down on an incline parallel to the railroad until the level of the wharves or piers along the river front is reached. Mr. Rice pointed out also that the main object of the act could thus be obtained and that an amendment to enable this to be done would not appear to be inconsistent with the purpose of the Legislature.

Mr. Rice's report also pointed out that while freight traffic could be handled in the subway it would be exceedingly difficult to do so; that it would cause serious delay and that it would be enormously expensive.

The practical difficulties in regard to the handling of freight so as to run cars into warehouses or on wharves or piers occur almost entirely south of the railroad yards on Thirtieth street, whereas the serious dangers to life in the use of the surface of the streets occur north of that point.

Having these facts in view, it is proposed to have a bill drawn which will authorize the carrying out of the tentative agreement above outlined, and will substitute for the rigid provisions of the Saxe Law authority, first, to construct the road north of Fifty-ninth street in the manner recommended by Mr. Rice; second, to postpone for the present the solution of the difficulty south of Thirtieth street, and, third, to add to the requirements of the Saxe Law the condition that electricity shall be substituted for steam for operating the road, with the exception already noted.

Your committee thinks that the arrangement which they have outlined above ought to prove highly satisfactory to the Legislature and the public. If carried out the plan proposed will solve the problem of removing the New York Central car tracks from the street surface all the way from Thirtieth street to Spuyten Duyvil—a distance of nearly ten miles. It will secure the placing of the road in a subway under Eleventh avenue throughout the whole of the populous section from Thirtieth street to Sixty-first street. It will assure to the City the building (without cost to it) of adequate masonry walls on both sides of the tracks, along the Riverside Park and wherever else, north of the Manhattan Valley, such protection is desired. The use of steam will be abolished. A long, doubtful and extremely expensive litigation will be avoided. The difficult problem of handling the railroad traffic south of Thirtieth street will be put in the way of careful study and solution. And the railroad company will be enabled to purchase and construct adequate terminal facilities in Manhattan for conducting its freight traffic—a matter of the utmost consequence to the people of the City, whose welfare depends at least as much on the adequacy of the freight terminals as on the adequacy of the passenger terminals within its boundaries.

Dated February 25, 1907.

Dr. S. T. Armstrong, the General Medical Superintendent, reported as follows:
From January 13 to January 19, inclusive, fifty-three operations were performed at Bellevue, fourteen at Gouverneur, seven at Harlem and nine at Fordham Hospital, at all of which the Attending Surgeons or their assistants were present.

Approval is requested to have the baker's oven in the kitchen of Bellevue Hospital repaired, at a cost of \$177.50.

In order to comply with the State law, a partition should be placed in the Out Patient Department of Bellevue Hospital, so as to provide separate rooms for men and women patients suffering from tuberculosis. It is recommended that authority be given to have a partition erected, at a cost of \$187.

As the new Harlem Hospital is virtually completed, it is believed that the services of Mr. William E. Barton, Inspector of Construction, could be dispensed with.

The Marine Engine and Machine Company have sent a bill of \$15 for repacking the operating valve and cylinder of the passenger elevator and adjusting the operating cable at Gouverneur Hospital. While this elevator is being used by the hospital, the work has not yet been accepted from the contractor. The company states that the repairs were necessary on account of the ordinary service of the elevator, but the architect states that the company has no just claim and advises that payment be refused.

Authority is requested to have the floor of Ward 4, Gouverneur Hospital, scoured, bleached and finished with a coat of floor varnish and a coat of spar varnish, at a cost of \$165.

Attention is invited to the fact that the coal storage vault at Gouverneur Hospital has between fifteen and twenty tons' capacity. It is recommended that increased storage capacity be provided and that the architect be requested to prepare plans and specifications for a vault to extend under the sidewalk on the north and west sides of the building so as to have a capacity between one hundred and one hundred and fifty tons, which will permit the storage of a month's supply, as is possible in both Fordham and Harlem hospitals. It is estimated that the cost of such a vault will be about \$4,000.

It is recommended that an ice conveyor be installed at the new Harlem Hospital at a cost of \$95; that a copper pan be placed over the main switchboard, at a cost of \$55; that an ash hoist with pit be installed, at a cost of \$490, and that a change be made in the basement window of the power house, at a cost of \$128.

On motion, duly seconded, it was
Resolved, That the estimate of Messrs. Duparquet, Huot & Moneuse, on repairing the baker's oven in the kitchen of Bellevue Hospital, at \$177.50, be and it hereby is approved and accepted.

On motion, duly seconded, it was
Resolved, That the estimate of A. Winternitz, \$187, on erecting a partition in the Out Patient Department of Bellevue Hospital, be and is hereby recommended and accepted, it being the lowest of the five estimates received.

On motion, duly seconded, it was

All the buildings, parts of buildings, etc., standing within the lines of the new street as an approach to Manhattan Bridge, extending from Nassau street to the intersection of Flatbush avenue and Fulton street, in the Fourth, Fifth and Eleventh Wards of the Borough of Brooklyn, City of New York, said property being more particularly shown on a draft damage map dated New York, October 14, 1904, approved by J. W. Brackbridge, Commissioner of Public Works, and being on file in the office of the Collector of City Revenue, Department of Finance, Room 141, No. 280 Broadway, Borough of Manhattan.

Pursuant to a resolution of the Commissioners of the Sinking Fund, adopted at a meeting held February 20, 1907, the sale of the above described buildings and appurtenances thereto will be held by direction of the Comptroller on

MONDAY, MARCH 11, 1907,

at 11 a. m., on the premises, upon the following

TERMS AND CONDITIONS.

It being understood that the purchasers, at the time of the auction sale, when the said bid is accepted by the City, shall execute a contract with The City of New York for the proper compliance with these terms and conditions, which contract shall provide for liquidated damages at so much per day for each and every day the removal of the buildings, etc., remains incomplete, after the expiration of sixty days from the day of sale. A copy of said contract is on file in the office of the Collector of City Revenue, Department of Finance, Room 141, No. 280 Broadway, Borough of Manhattan.

The buildings and appurtenances thereto will be sold to the highest bidder, who must pay immediately cash or a certified check, drawn to the order of the Comptroller of The City of New York, and must either give a cash bond or an approved bond of a surety company in the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale and of the contract.

All the buildings, structures and parts thereof, their fixtures and foundations of every class and description within the described area are to be torn down to a level two feet below the existing curb, and structures which may exist within any of the buildings, such as engine beds, boiler settings, etc., and all stoops and area walls, shall be torn down to the same level. All combustible matter, such as tar and felt roofing, broken laths and fragments of timber, chips, splinters, etc., which are of no value, shall be gathered together by the contractor and burned or carried away. The purchaser at the sale shall also shut off and cap all water pipes, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity.

Failure to remove said buildings and appurtenances, or any portion thereof, within sixty days from the day of sale, will work forfeiture of ownership of such buildings or appurtenances or portion as shall then be left standing, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and the said City of New York will without notice to the purchaser, cause the same to be removed and the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner and must be completed within sixty days from the day of sale, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damages and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of the said buildings by the said successful bidder.

Party walls and fences when existing against adjacent property not sold shall not be taken down, but all furrings, plaster, chimneys, projecting brick, etc., on the faces of such party walls, shall be taken down and removed. The walls shall be made permanently self-supporting without the aid of braces, the beamholes, etc., bricked up and the wall pointed and made to exclude wind and rain, and present a clean exterior. The roofs of the adjacent buildings shall be properly flashed and painted and made water-tight where they have been disturbed by the operation of the contractor.

The Comptroller of The City of New York reserves the right on the day of the sale to withdraw from sale any of the buildings or parts of buildings and machinery included in the foregoing parcel.

PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
