Department of Health and Mental Hygiene (DOHMH)	Transportation-related Injuries	Rates of traffic injuries provided here are based on all live transportation-related injury discharges from a NYC hospital and include emergency department visits and hospitalizations among residents and non-residents of NYC. Neighborhood data are based on zip code of residence for NYC residents only who were discharged from a hospital located in NYC. Crash locations are not available in these data. Visits to emergency departments and hospital stays reflect injuries that require immediate medical treatment. Minor injuries not treated at a hospital are not captured through emergency department and hospitalization data. Data were obtained from the New York State Department of Health Statewide Planning and Research Cooperative System (SPARCS). Transportation-related injuries are defined by the International Classification of Diseases, Clinical Modification (ICD-10-CM) and were recently revised. The revisions largely pertain to injury-related diagnostic codes including those that capture transportation-related injuries, allowing for better diagnosis. The Centers for Disease Control and national epidemiologists provided guidance to DOHMH for enumerating new injury codes. Because the two ICD systems differ in how they classify injuries, current data and previously posted data are not comparable. Data prior to 2016 are not shown because they use the older coding ICD-CM schema	Biennially	12/31/2021	Updated	Due to staff resources reassignment to the COVID-19 response, this dataset has been delayed and will not be released until 12/31/2021

Department of City Planning (DCP)	Metro Region Explorer - Municipality	<p>The municipality geography represents approximations for cities, towns, and villages within the NYC metropolitan region. The boundaries represent U.S. Census Bureau Minor County Division (MCD) geographies for all counties in New Jersey, Connecticut, and the Hudson Valley; U.S. Census Bureau Places (Places) boundaries for Long Island, unless otherwise noted; and, to represent NYC at municipality-comparable scale, DCP used the sub-borough geographies defined in the 2013 edition of The Newest New Yorkers report, "Chapter 3: Settlement Patterns". NYC geographies represent aggregations of U.S. Census Bureau Public Use Microdata Areas (PUMAs). It is important to note that "municipalities" represented in this tool do not imply or consistently represent jurisdictional boundaries or governance authority. Department of City Planning (DCP)	Open Data - Community Development Block Grant (CDGB) Eligibility by Census Tract	Community Development Block Grant (CDBG) eligible and ineligible census tracts. The U.S. Department of Housing and Urban Development requires local municipalities that receive CDBG formula entitlement funds to use the 2011-2015 ACS LMISD data file to determine where CDBG funds may be used for activities that are available to all the residents in a particular area. A CD-eligible census tract refers to 2010 census tracts where the area is primarily residential and at least 51.0% of the residents are low- and moderate-income as per the LMISD data file. For New York City, a primarily residential area is defined as one where at least 50.0% of the total built floor area is residential as determined by PLUTO 18v2.1. Low- and moderate-income persons are defined as persons living in households with incomes below 80 percent of the area median household income (AMI). Department of City Planning (DCP)	Population FactFinder - Neighborhood Tabulation Areas (NTA)	<p>Neighborhood Tabulation Areas (NTAs) were created to project populations at a small area level, from 2000 to 2030 for PlaNYC, the long-term sustainability plan for New York City. Since population size affects the error associated with population projections, these geographic units needed to have a minimum population, which we determined to be 15,000. This criterion resulted in combinations of neighborhoods that probably would not occur if one were solely designating boundaries of historical neighborhoods. Moreover, the neighborhood names associated with the neighborhood tabulation areas are not intended to be definitive. Another feature of the sustainability plan, was the creation of projections for Public Use Microdata Areas (PUMAs), which are approximations of New York City's Community Districts developed for use with the Census Bureau's Public Use Microdata Samples (PUMS). In order to make the boundaries consistent with</p>	<a href="https://popfactfinder.planning.nyc.gov/features">https://popfactfinder.planning.nyc.gov/features</a>	Every 10 years	TRUE	<a href="https://data.cityofnewyork.us/City-Government/Neighborhood-Tabulation-Areas-NTA-cpf4-rkhq">https://data.cityofnewyork.us/City-Government/Neighborhood-Tabulation-Areas-NTA-cpf4-rkhq</a>	No		No	Published on Open Data

		<p>PUMAs, NTAs were created using whole census tracts, from the 2010 census, within PUMAs. Since NTAs were not permitted to cross PUMA boundaries, this further restricted our ability to identify what may be thought of as historical neighborhood boundaries. Thus, users need to be cognizant of the reason why NTAs were created and the demographic/geographic constraints inherent in how they were configured. Despite these limitations, NTAs are a valuable summary level for use with both the 2010 Census and the American Community Survey (ACS). Regarding the decennial census, these geographic areas offer a good compromise between the very detailed data for census tracts (2,168) and the broad strokes provided by community districts (59). For the ACS, NTAs offer a statistically reliable alternative to the high sampling error that renders data for most individual census tracts unusable.</p>

Department of City Planning (DCP)	Population FactFinder - Public Use Microdata areas (PUMAS)	The 2010 NYC Public Use Microdata Areas (PUMAs) are statistical geographic areas defined for the dissemination of Public Use Microdata Sample (PUMS) data. Department of City Planning (DCP)	ZOLA - Neighborhood Tabulation Areas (NTA)	<p>Neighborhood Tabulation Areas (NTAs) were created to project populations at a small area level, from 2000 to 2030 for PlaNYC, the long-term sustainability plan for New York City. Since population size affects the error associated with population projections, these geographic units needed to have a minimum population, which we determined to be 15,000. This criterion resulted in combinations of neighborhoods that probably would not occur if one were solely designating boundaries of historical neighborhoods. Moreover, the neighborhood names associated with the neighborhood tabulation areas are not intended to be definitive. Another feature of the sustainability plan, was the creation of projections for Public Use Microdata Areas (PUMAs), which are approximations of New York City's Community Districts developed for use with the Census Bureau's Public Use Microdata Samples (PUMS). In order to make the boundaries consistent with</p>	<a href="https://zola.planning.nyc.gov/">https://zola.planning.nyc.gov/</a>	Every 10 years	TRUE	<a href="https://data.cityofnewyork.us/City-Government/Neighborhood-Tabulation-Areas-NTA-cpf4-rkhq">https://data.cityofnewyork.us/City-Government/Neighborhood-Tabulation-Areas-NTA-cpf4-rkhq</a>	No		No	Published on Open Data

		<p>PUMAs, NTAs were created using whole census tracts, from the 2010 census, within PUMAs. Since NTAs were not permitted to cross PUMA boundaries, this further restricted our ability to identify what may be thought of as historical neighborhood boundaries. Thus, users need to be cognizant of the reason why NTAs were created and the demographic/geographic constraints inherent in how they were configured. Despite these limitations, NTAs are a valuable summary level for use with both the 2010 Census and the American Community Survey (ACS). Regarding the decennial census, these geographic areas offer a good compromise between the very detailed data for census tracts (2,168) and the broad strokes provided by community districts (59). For the ACS, NTAs offer a statistically reliable alternative to the high sampling error that renders data for most individual census tracts unusable.</p>

Department of City Planning (DCP)	Zoning Index Map - Zoning Map Index	Section zoning map index of New York City. This index is used to determine which zoning map is related to a specific geographic area in New York City. Zoning maps show the boundaries of zoning districts throughout the city. The maps are regularly updated after the City Planning Commission and the City Council have approved proposed zoning changes. The set of 126 maps, which are part of the Zoning Resolution, are displayed in 35 sections. Each section is identified by a number from 1 to 35 and is further divided into one to four quarters, each identified by a letter a, b, c or d (map 8d or 33c for example). Each map covers an area of approximately 8,000 feet (north/south) by 12,500 feet (east/west) or 100 million SF. Sections are approximately 16,000 feet (north/south) by 24,000 feet (east/west) or 400 million SF.	<a href="https://www1.nyc.gov/site/planning/zoning/index-map.page">https://www1.nyc.gov/site/planning/zoning/index-map.page</a>	As Needed	TRUE	<a href="https://data.cityofnewyork.us/City-Government/Zoning-Map-Index-Section/bpt7-i8t8">https://data.cityofnewyork.us/City-Government/Zoning-Map-Index-Section/bpt7-i8t8</a>	No		No	Published on Open Data

Department of Sanitation (DSNY)	Leaf Drop-Off Locations in NYC	Locations where NYC residents can drop off their leaves to be composted. For more information, see: <a href="https://www1.nyc.gov/assets/dsny/site/services/food-scraps-and-yard-waste-page/community-leaf-drop-off">https://www1.nyc.gov/assets/dsny/site/services/food-scraps-and-yard-waste-page/community-leaf-drop-off</a> . Please note that effective April 2, 2020, community gardens on NYC Parks property may remain open or closed to garden members only at the discretion of each garden group, and only for necessary maintenance and season preparation. Due to the relatively small spaces in most gardens and the difficulty in achieving safe social distancing of 6 feet or more, gardens must remain closed to the general public. Department of Transportation (DOT)	Vision Zero - Speed Limits	On November 7, 2014, New York City's default speed limit was changed from 30 mph to 25 mph. Unless otherwise signed, all streets in New York City are governed by this 25 mph speed limit. Driving at or below 25 MPH decreases stopping distance, gives drivers and pedestrians more time to see each other and react, and improves drivers' ability to avoid crashes. Pedestrians struck by vehicles traveling at 25 MPH are half as likely to die as those struck at 30 MPH. If crashes do occur, the severity of injuries is reduced at lower speeds. The information shown here was compiled by the New York City Department of Transportation for governmental purposes. The information is updated as soon as reasonably practicable. Department of Transportation (DOT)	Weekly Resurfacing Schedule	DOT issues a list of streets where crews will be doing milling or resurfacing work each week. Milling is the process of grinding off the top layer of asphalt or surface of a roadway. Milling is the process of grinding off the top layer of asphalt or surface of a roadway, and is usually done in preparation for paving. Resurfacing is the process of placing an asphalt overlay on a roadway, whether or not it has been milled. These lists are shared with Community Boards, local police precincts and other stakeholders via e-mail and posted on DOT's website.	<a href="https://www1.nyc.gov/html/dot/html/motorist/resurfintro.shtml">https://www1.nyc.gov/html/dot/html/motorist/resurfintro.shtml</a>	Monthly	TRUE	<a href="https://data.cityofnewyork.us/browse?DataCollection_Data-Collection=Vision+Zero+View+Data&amp;q=vzv">https://data.cityofnewyork.us/browse?DataCollection_Data-Collection=Vision+Zero+View+Data&amp;q=vzv</a>	No		Yes	Published on Open Data

<p>Mayor's Office of Contract Services (MOCS)</p>	<p>HHS Prequalification Reporting</p>	<p>Provider organizations that have been prequalified to compete for City funding in specific health and human services areas. In HHS Accelerator, the City's system for procuring health and human services, prequalification is based on: experience providing the service; a key staff member able to provide the service; or a capability statement describing the organization's ability to expand into the service area. Prequalification in a service area does not necessarily indicate that an organization currently provides the service at this time. Addresses provided below indicate the organization's administrative office, and may not be the location at which services are provided. # FOIL Metrics

## Local Law 244 of 2017: Freedom of Information Law Responses

Local Law 7 of 2016 requires agencies to “review responses to freedom of information law [FOIL] requests that include the release of data to determine if such responses consist of or include public data sets that have not yet been included on the single web portal or the inclusion” on the Open Data Portal. Additionally, each City agency shall disclose “the total number, since the last update, of such agency’s freedom of information law responses that included the release of data, the total number of such responses determined to consist of or include a public data set that had not yet been included on the single web portal and the name of such public data set, where applicable, and the total number of such responses that resulted in voluntarily disclosed information being made accessible through the single web portal.”

To view this table on NYC Open Data, visit: <https://data.cityofnewyork.us/dataset/2021-Open-Data-Plan-FOIL-Metrics/rcf4-4vq6>

Agency Name	Total number of FOIL responses that included the release of any data (public dataset or not)	Number of FOIL responses that included the release of a public dataset neither published nor scheduled for release on NYC Open Data	Number of FOIL responses that included the sharing of a public dataset already published or scheduled for release on NYC Open Data	Number of FOIL responses that resulted in data being posted voluntarily on NYC Open Data.

Office of Management and Budget (OMB)	City Employee Salary per Fiscal Year	Data is collected because of public interest in how the City's budget is being spent on salary and overtime pay for all municipal employees. Data is input into the City's Personnel Management System ("PMS") by the respective user Agencies. Each record represents the following statistics for every city employee: Agency, Last Name, First Name, Middle Initial, Agency Start Date, Work Location Borough, Job Title Description, Leave Status as of the close of the FY (June 30th), Base Salary, Pay Basis, Regular Hours Paid, Regular Gross Paid, Overtime Hours worked, Total Overtime Paid, and Total Other Compensation (i.e. lump sum and/or retro payments). This data can be used to analyze how the City's financial resources are allocated and how much of the City's budget is being devoted to overtime. The reader of this data should be aware that increments of salary increases received over the course of any one fiscal year will not be reflected. All that is captured, is the employee's final base and gross salary at the end of the fiscal year.	1	Already on Open Data
