### BOARD OF ESTIMATE AND APPORTIONMENT.

Minutes, Meeting of Board of Estimate and Apportionment, City of New York, Held in Room 16, City Hall, Friday, March 18, 1910.

(PUBLIC IMPROVEMENT MATTERS.)

The Board met in pursuance of an adjournment.

Present—William J. Gaynor, Mayor; William A. Prendergast, Comptroller; John Purroy Mitchel, President, Board of Aldermen; George McAneny, President, Borough of Manhattan; Alfred E. Steers, President, Borough of Brooklyn; Cyrus C. Miller, President, Borough of The Bronx; Lawrence Gresser, President, Borough of Queens, and George Cromwell, President, Borough of Richmond.

The Mayor, Hon. William J. Gaynor, presided.

After disposing of the franchise and financial calendar, the following PUBLIC IMPROVEMENT MATTERS were considered:

The minutes of the meeting held March 11, 1910, were approved as printed in the CITY RECORD of March 16, 1910.

ACQUIRING TITLE TO PATTERSON AVENUE, FROM THE BULKHEAD LINE OF THE BRONX RIVER TO THE PROPOSED BULKHEAD LINE OF PUGSLEYS CREEK, BOROUGH OF THE BRONX.

(At the meeting of the Board held on March 11, 1910, this matter was laid over for one week.)

The President of the Borough of The Bronx offered the following resolution:

Resolved, That the Board of Estimate and Apportionment of The City of New York, in pursuance of the provisions of section 970 of the Greater New York Charter, as amended, deems it for the public interest that the title, for the uses and to the extent thereof as herein mentioned, to the lands and premises required for the opening and extending of Patterson avenue, from the bulkhead line of the Bronx River to the proposed bulkhead line of Pugsleys Creek, in the Borough of The Bronx, City of New York, should be acquired by The City of New York.

Resolved, That the title to be so acquired is hereby determined to be a title in fee in such premises.

Resolved, That the Board of Estimate and Apportionment, deeming it for the public interest so to do, hereby requests the Corporation Counsel to make application to a Special Term of the Supreme Court, for the appointment of Commissioners of Estimate and of one Commissioner of Assessment, and to take the necessary proceedings, in the name of The City of New York, to acquire title as herein determined, wherever the same has not heretofore been acquired for the use of the public for the same purpose, to the lands, tenements and hereditaments that shall or may be required for the purpose of opening and extending Patterson avenue from the bulkhead line of the Bronx River to the proposed bulkhead line of Pugsleys Creek, in the Borough of The Bronx, City of New York, upon the receipt by him of a rule map, damage map and profile, certified as having been approved by this Board.

Resolved, That no portion of the cost and expense of said proceedings, incurred by reason of the provisions of title 4, chapter 17, of the Greater New York Charter, as amended, shall be borne and paid by The City of New York, but that the whole of such cost and expense, including the expense by the Bureau of Street Openings, the cost and expense incurred by the President of the Borough of The Bronx, in the preparation of rule, damage, benefit and profile maps, for the use thereof; and of the awards, if any, for damages caused by intended regulation and all other expenses and disbursements authorized by section 997 of said title, as amended, shall be assessed upon the property deemed to be benefited thereby; and

Whereas, It appears from the affidavit of the Supervisor of the CITY RECORD that due notice was given therein that at the time of the adoption of the resolution directing the institution of proceedings herein to acquire title to the lands required for this improvement that the Board of Estimate and Apportionment would consider a proposed area of assessment as therein described and would give a public hearing thereon upon the 11th day of March, 1910; and

Whereas, At the aforesaid time and place a public hearing was given to all persons interested in such proposed area of assessment who appeared, and such proposed area of assessment was duly considered by this Board;

Resolved, That the area of assessment for benefit in these proceedings be and is hereby fixed and determined to be as follows:

Beginning at a point on the proposed westerly bulkhead line of Pugsleys Creek where it is intersected by the prolongation of a line midway between Lacombe avenue and Patterson avenue, as these streets are laid out west of White Plains road, and running thence southeastwardly along the said proposed bulkhead line to the intersection with the prolongation of a line midway between Stephens avenue and Pugsley avenue; thence southwardly along the said line midway between Stephens avenue and Pugsley avenue, and along the prolongation of the said line, to the intersection with the prolongation of a line midway between Patterson avenue and O'Brien avenue as these streets are laid out between Newman avenue and Taylor avenue; thence westwardly along the said line midway between Patterson avenue and O'Brien avenue, and along the prolongations of the said line, to the intersection with the easterly bulkhead line of the Bronx River; thence northwardly along the said bulkhead line to the intersection with a line bisecting the angle formed by the intersection of the prolongations of the center lines of Lacombe avenue and Patterson avenue, as these streets are laid out between Bronx River avenue and the bulkhead line of the Bronx River; thence eastwardly along the said bisecting line to the intersection with a line parallel with Patterson avenue, as laid out west of White Plains road, and passing through the point of beginning; thence eastwardly along the said line parallel with Patterson avenue to the point or place of beginning.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

AMENDING THE PROCEEDING FOR ACQUIRING TITLE TO LEFFERTS AVENUE, BETWEEN ST. ANNS AVENUE AND ROCKWAY ROAD, BOROUGH OF QUEENS.

(At the meeting of the Board held on March 11, 1910, this matter was laid over for one week for the purpose of having a resolution prepared amending the district of assessment.)

The President of the Borough of Queens offered the following resolution:

Resolved, That the proceeding authorized by the Board of Estimate and Apportionment on July 2, 1909, for acquiring title to the lands and premises required for the opening of Lefferts avenue, between St. Anns avenue and Rockaway road, in the Fourth Ward, Borough of Queens, City of New York, be and the same is hereby amended by omitting therefrom that portion of Lefferts avenue lying between St. Anns avenue and Liberty avenue.

Resolved, That the Corporation Counsel be and he hereby is requested to take the necessary steps to have this amendment carried into effect.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The President of the Borough of Queens then offered the following resolution:

Whereas, The Board of Estimate and Apportionment of The City of New York on the 18th day of March, 1910, amended the proceeding authorized by the said Board on July 2, 1909, for acquiring title to the lands and premises required for the opening of Lefferts avenue, from St. Anns avenue to Rockaway road, in the Fourth Ward, Borough of Queens, by omitting therefrom that portion of Lefferts avenue lying between St. Anns avenue and Liberty avenue; and

Whereas, The Board of Estimate and Apportionment is authorized to fix and determine upon an amended area of assessment for benefit for said proceeding as amended;

Resolved, That the Board of Estimate and Apportionment, in pursuance of the provisions of section 980 of the Greater New York Charter, hereby gives notice that the following is the proposed amended area of assessment for benefit in this proceeding as amended:

Bounded on the north by a line always distant 100 feet northerly from and parallel with the northerly line of Liberty avenue, the said distance being measured at right angles to Liberty avenue; on the east by a line midway between Spruce street and Birch street as these streets are laid out adjoining Liberty avenue, and by the prolongation of the said line; on the south by a line distant 100 feet southerly from and parallel with the southerly line of Rockaway road as this street is at the present time in use and commonly recognized, the said distance being measured at right angles to Rockaway road; and on the west by a line midway between Walnut street and Briggs avenue, as these streets are laid out adjoining Liberty avenue, and by the prolongation of the said line.

Resolved, That this Board consider the proposed amended area of assessment at a meeting of the Board to be held in The City of New York, Borough of Manhattan, in the City Hall, on the 22d day of April, 1910, at 10.30 a. m., and that at the same time and place a public hearing thereon will then and there be had.

Resolved, That the Secretary of this Board cause these resolutions and a notice to all persons affected thereby to be published in the CITY RECORD for ten days prior to the 22d day of April, 1910.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

On motion, the Secretary was then directed to return the rule map, damage map and profile to the Borough President for alteration.

**PROPOSED AGREEMENT WITH THE LONG ISLAND RAILROAD COMPANY PROVIDING FOR THE ACQUISITION OF CERTAIN RIGHTS FROM THAT COMPANY IN CONNECTION WITH THE CONSTRUCTION OF THE 72-INCH STEEL PIPE LINE ON LONG ISLAND AND GRANTING THE RAILROAD COMPANY CERTAIN RIGHTS IN EXCHANGE THEREFOR.**

(At the meeting held by the Board on March 4 last this matter was laid over one week and the Division of Franchises was instructed to report as to whether the property of the City is available for railroad use and its value for franchise purposes.)

(At the meeting of the Board held March 11, 1910, the Division of Franchises was granted another week for the preparation of the report.)

The following report of the Division of Franchises was presented:

Report No. 102.

Board of Estimate and Apportionment,  
Division of Franchises,  
March 15, 1910.

Mr. NELSON P. LEWIS, Chief Engineer:

SIR—On March 4, 1910, there was submitted to the Board a communication from the Commissioner of Water Supply, Gas and Electricity, dated February 15, 1910, transmitting a proposed form of agreement between the Long Island Railroad Company and the City, providing for the compensation for damages to be paid by the City for the acquisition of certain parcels of land in fee from the Long Island Railroad Company under condemnation proceedings, which land was taken from the Company as a portion of the lands required for a right of way within which to construct the new 72-inch pipe line from a point at Valley Stream, near the City line, to a point near Wantagh, Nassau County, Long Island. The lands purchased in these proceedings, together with lands already owned by the City, form a continuous right of way on the southerly side of said railroad from the City line to Amityville, Suffolk County, Long Island. The length of the right of way acquired in the present condemnation proceeding is a little over eight miles.

The agreement is submitted by the Commissioner of Water Supply, Gas and Electricity to the Board for its approval pursuant to section 507 of the Charter, which provides that agreements made by the Commissioner of Water Supply, Gas and Electricity with owners or persons interested in any real estate to be taken for the purposes of water supply, as to the amount of compensation to be paid to such owners or persons for such real estate, shall be subject to the approval of the Board of Estimate and Apportionment.

The communication and proposed form of contract were accompanied by a report by the Chief Engineer of the Board dated February 21, 1910. The consideration of the matter was laid over for one week, and the Division of Franchises was instructed to make a report upon the same, such reference being made upon motion of the President of the Board of Aldermen.

On March 11, the matter was again laid over for one week to await the report from the Division of Franchises.

No resolution was adopted by the Board making such reference, but it would appear from the statement made by the President of the Board of Aldermen at the meeting, and from subsequent conversation had with him, that the matter had been referred to the Division of Franchises for report upon three questions:

First—What effect would the proposed agreement have, if the same were executed, upon the availability of the lands acquired by the City in this proceeding for the construction thereon of a railroad?

Second—What would be the value of a franchise right to construct such a railroad?

Third—What is the value of the easements and leases of the parcels of land which by the terms of the agreement are granted to the Long Island Railroad Company for railroad purposes?

In order to arrive at an answer to these questions, it is evident that the terms of the agreement must be thoroughly understood.

The lands acquired by the City under such condemnation proceedings consist of strips varying in width from about 100 to 250 feet and are for a large part of the distance adjacent to and on the southerly side of the right of way of the Montauk Division of the Long Island Railroad, although there are at certain points along such strips, lands between the property acquired by the City and the right of way of the Long Island Railroad.

The proposed agreement is one, the terms of which have been agreed upon by the Commissioner of Water Supply, Gas and Electricity and the Railroad Company, to provide for the compensation to be paid as damages for the taking and using of the parcels formerly owned by the Railroad Company falling within the strips of land acquired by the City. The maps showing the property to be acquired by the City, which have heretofore been approved by the Board of Estimate and Apportionment, show that the acquisition of property from the Railroad Company is to be subject to perpetual easements for railroad purposes, not inconsistent with pure water supply, and in the communication from the Commissioner of Water Supply, Gas and Electricity transmitting the proposed form of contract to the Board for approval, it is stated that this land must be acquired subject to such easement, pursuant to the Charter, and the Commissioner cites a portion of section 485 of the Charter which,

according to his interpretation, is the law which requires that this easement shall be given to the Railroad Company.

The agreement recites in the preamble that the title of the property became vested in the City on December 15, 1908, by the filing of the oaths of Commissioners of Appraisal duly appointed pursuant to law, and names the parcels (twenty-four in number), which were formerly owned by the Railroad Company and for which compensation is provided by the terms of the agreement, though no mention is made in the agreement of the easement which is proposed to be given to the Long Island Railroad Company upon such parcels for railroad purposes. It is presumed therefore that in the deed to be tendered to the City by the Railroad Company this reservation will be made.

The provisions of the agreement are, briefly, as follows:

(1) The City grants to the Railroad Company "a perpetual right to use for the purposes of its railroad commensurate with and adapted to its needs and not inconsistent with pure water supply, certain parcels of land" aggregating in area 6.2902 acres. These parcels are thirty-five in number, varying in width from about 8 to 75 feet, with the exception of one parcel which is about 100 feet in width, and are in all cases situated on the northerly side of the strip of land acquired by the City and adjacent to the southerly side of the right of way of the Long Island Railroad. None of such parcels extend through the entire width of the strip of land acquired by the City.

(2) The City grants to the Company the right to use two parcels of land at Rosedale within the city limits for the term of ten years with the right to a renewal for a further term of ten years for the purposes of its railroad, commensurate with and adapted to its needs and not inconsistent with pure water supply. These two parcels aggregate in area .8730 acres.

(3) The City grants to the Railroad Company the right to use three parcels of land situated at Valley Stream, Watt's Pond and Clear Stream for a term of ninety-nine years and for purposes of its railroad, commensurate with and adapted to its needs and not inconsistent with pure water supply. The three parcels aggregate in area .9048 acres. The Company agrees to pay to the City the sum of two hundred and fifty dollars (\$250) per annum as rental for these three parcels.

(4) The Railroad Company grants to the City "such rights not inconsistent with uses for railroad purposes as may be required by the party of the second part for the purpose of water supply in and to certain parcels of land situated at Clear Stream; Hook Creek pumping station, Rosedale; Horse Brook pumping station, Rockville Centre; Rockville Centre pumping station, between Rockville Centre and Baldwin; Baldwin pumping station, Baldwin; Millburn pumping station, Baldwin and Massapequa pumping station, Massapequa."

These parcels aggregate in area .5909 acres and are in each case situated across the right of way of the Long Island Railroad Company. The rights in these parcels are for the purpose of permitting the City to connect its new 72-inch pipe line with the old Brooklyn Aqueduct or pumping station situated on the northerly side of the Long Island Railroad.

(5) It is agreed that the physical work of protecting tracks, buildings, structures, etc., on any of the lands in which the Railroad Company gives the City an easement shall be done by the Railroad Company and the expense thereof is to be paid by the City.

(6) The fourth section of the agreement provides that the City shall, upon a petition in writing of any proprietor or lessee of property who desires that a railroad connection with his property be made, grant to the Railroad Company the right to cross the right of way of the City heretofore acquired for the purposes of water supply between Springfield Junction in the County of Nassau and Amityville in the County of Suffolk, with its railroad tracks, for the purposes of affording to such petitioner commercial, industrial and railroad facilities whenever such application shall be accompanied by a map showing the angle and direction of the proposed crossing and by the written approval of the Railroad Company evidenced by the signature of its President or Vice-President and the Chief Engineer, "unless it shall appear to the Commissioners of the Sinking Fund that the granting of such application would be prejudicial to the public rights."

The agreement provides for the conditions upon which such crossings shall be granted, as follows:

(a) An annual rental shall be paid to the City, the amount to be fixed by the Commissioners of the Sinking Fund.

(b) The petition shall contain a provision that in the event of the granting of the application the Commissioners of the Sinking Fund shall not be held to interfere with or diminish the right of the City to enter upon and use the premises for the repair of the City's subsurface structures or the laying of additional structures.

(c) Such crossing is to be made by the most direct, practical route and to follow the route shown upon a map to be submitted with the application.

(d) If such crossing is not used for a period of one year it is to be removed on demand of the City.

(e) Such crossing is not to be used for the storage of cars.

(7) The Company agrees to pay the taxes upon surface structures placed upon lands described or mentioned in the contract.

(8) The Company agrees to permit the City to connect its pipe line lying on the south side of Long Island Railroad with the pipe line lying on the north side of the Long Island Railroad should the City desire to make such connection, as per the provision of the agreement hereinabove described as (4).

(9) The Company agrees not to use any of the lands in which it is given rights or easements by the terms of the agreement for any purpose which shall not be consistent with the sanitary protection of the water supply of The City of New York.

As hereinbefore set forth, the matter was referred to this Division for report upon three questions.

**THE FIRST QUESTION.**

It would appear that the provisions of the agreement as above noted which could have a bearing upon the availability of the land for railroad purposes at some time in the future are those referred to as (1), (2), (3) and (6) and the further fact that it seems to be the intention to give to the Railroad Company perpetual easements for railroad purposes upon all lands which were acquired from the Railroad Company in the proceeding.

Effect of Provision Above Described As (1)—This provision grants to the Railroad Company a perpetual easement to strips of land varying in width from about 8 to 75 feet, with the exception of one piece which is about 100 feet in width, and aggregating in area 6.2902 acres of land. These strips aggregate in length approximately 9,500 feet, or a little less than two miles. At no place do these strips occupy enough of the City's right of way to exclude the construction and operation of a railroad at some future time upon the remainder of such right of way.

Effect of Provision Above Described As (2)—By this provision the City leases to the Company the right to use two parcels of land at Rosedale for ten years with a renewal of ten years. It appears that these parcels, one of which is more than 700 feet in length and the other more than 1,600 feet in length, and each 16 feet in width, are the only parcels mentioned in the contract which are within the City limits. These two parcels are situated on the northerly side and adjacent to the right of way of the Long Island Railroad Company, between Foster Meadow road and Ocean avenue, and is property which has formerly been acquired by the City for water supply purposes along the route of the old Brooklyn Aqueduct. Even if these two parcels are leased to the Long Island Railroad Company there will yet remain sufficient space upon City property to permit of the operation of an additional railroad.

Effect of Provision Above Described As (3)—This provision of the agreement gives the right to the Long Island Railroad Company to use and occupy three parcels, one at Horton avenue, Valley Stream, one at Watts Pond, Valley Stream, and one at Clear Stream, for ninety-nine years.

The parcel at Horton avenue, Valley Stream, consists of a strip of land about 570 feet in length and about 12 feet in width, being situated adjacent to and on the northerly side of the right of way of the Long Island Railroad Company, and being property which has been previously acquired by the City for the old Brooklyn Aqueduct, and, therefore, does not prevent the construction of a railroad upon the property acquired in this proceeding for the new aqueduct on the southerly side of the Long Island Railroad. The area of this parcel is 0.1567 acre.

The parcel at Watts Pond, Valley Stream, is situated on the southerly side of and adjacent to the right of way of the Long Island Railroad and consists of a strip of about 1,130 feet in length and is 18 feet in width and consists of 0.4666 acre. This property was formerly acquired by the City for water supply purposes, known as the

Watts Pond property, and is situated between two parcels which have been acquired by the City in this proceeding. There remains after taking this strip by the Railroad Company sufficient space for the construction of an additional railroad.

The parcel at Clear Stream is a strip of land of varying widths, situated on the southerly side of and adjacent to the right of way of the Long Island Railroad Company at the Clear Stream curve of the railroad, and is property which has formerly been acquired by the City for water supply purposes. The parcel is less than 20 feet wide at the widest point, is about 1,300 feet in length and contains 0.2815 acre. There is, it would seem, sufficient space remaining within the property formerly acquired by the City for the operation of an additional railroad after this parcel has been taken for the Long Island Railroad Company.

Effect of Granting Perpetual Easements to the Long Island Railroad Company Upon Lands Acquired From It by the City—This refers to the easements mentioned in the communication from the Commissioner of the Department of Water Supply, Gas and Electricity before referred to, in which the Commissioner stated that easements must be granted to the railroad company pursuant to section 485 of the Charter.

These parcels in no case extend across the entire property of the city's right of way except at five points; one being at the point where the Far Rockaway Branch of the Long Island Railroad leaves the Montauk Division at Valley Stream; the second being a parcel which is approximately 400 feet westerly from the last-mentioned property; the third being at the point where the Long Beach Division of the Long Island Railroad leaves the main line; the fourth being adjacent to Rocklyn avenue, Linbrook, and the fifth being a parcel adjacent to Brookside avenue at Baldwin.

In consequence, any franchise or right given to any railroad company to construct an additional railroad upon the City's right of way would be subject to the easement or prior right of the Long Island Railroad to also occupy those parcels for railroad purposes.

The other parcels purchased from the City do not extend entirely across the City's right of way, and it would seem that there is sufficient space between the southerly side line of the City's right of way and the southerly side of such parcels to permit of the operation of an additional railroad.

Effect of Provision Above Described As (6)—This provision of the agreement binds the City to grant the right to any owner or lessee of property to construct a railroad connection "to cross the right of way of the City heretofore acquired for the purposes of water supply between Springfield Junction in the County of Queens and Amityville in the County of Suffolk."

It would appear that, pursuant to this provision, such spur tracks could be constructed across the property acquired either in this or any prior proceeding for water supply purposes, meaning, of course, that it applies to the City's right of way on the northerly side of the right of way of the Long Island Railroad, as well as on the southerly side of the railroad. Such spur tracks would not absolutely prevent the construction and operation of an additional railroad upon the City's right of way but the construction of many of such spur tracks would certainly create the problem of determining whether the operation of such tracks on such a railroad should be permitted at the same grade or whether at different grades.

This problem, however, is one which must, pursuant to section 68 of the Railroad Law, be determined by the Public Service Commission as successor to the State Board of Railroad Commissioners, which Commission has the power to determine whether such railroads shall or shall not be operated at the same grade and to fix the proportion of the expense of such crossing paid by each railroad. If a large number of these crossings were constructed across the City's right of way at the time of the construction of a new railroad along the right of way, it might be possible that the Public Service Commission would determine that the new railroad should be built above the grade of the existing crossings, and necessitate the construction of the new railroad at an elevation above the natural surface throughout its entire length upon the City's right of way.

In that event, the value of the right which the City would be able to give to the new railroad company would be of much less to it than would be the case if it were able to construct a road upon the natural surface without interference from such railroad crossings.

Even if the Public Service Commission did not determine that such road should not be constructed above the grade of the crossings, the question of safety in operation would arise which might influence the City in making it a condition that the Railroad Company must construct its railroad above the grade of the crossings, in which event the result as to value to the Railroad Company would be proportionately reduced.

#### THE SECOND QUESTION.

This question refers to the value of a franchise to a Railroad Company to operate upon the City's right of way.

In acquiring the property for the City's right of way, it appears from the maps that many of the parcels were acquired subject to easements for highway purposes. In addition to that, nearly the entire strip for a distance of more than a mile in the villages of Rockville Centre and Freeport was acquired, in fee, subject to an easement on the surface for highway and parkway purposes. In consequence, whatever right the City could grant to such a railroad company, it must be subject to easements or surface rights granted at the time the fee is acquired by the City, and the Company must obtain from the towns and villages along the route the right to cross such public highways or parkways. The City would have no jurisdiction whatever over such highways or parkways, except to preserve the subsurface for water supply purposes and to prevent the occupation of the property for purposes inconsistent with pure water supply.

The City's position with respect to the parcels upon which it could grant a complete right to operate a railroad would be similar to that of any other owner possessed of a large area desired by the railroad company, and could, when granting a franchise or right to occupy such property for railroad purposes, impose such terms as seem fit for the protection of its property and to preserve pure water supply or any other conditions which would seem at the time to be necessary for the City's interest.

The present authority of the City to grant the right to a railroad company to use such property is a question of law, and therefore one to be determined by the Corporation Counsel. In order, however, to determine what the value of such franchise right will be, it is necessary to discuss the provisions of the Charter, which seem to limit the conditions upon which such rights can be given.

A portion of section 242 of the Charter reads as follows:

"The board of estimate and apportionment shall hereafter \* \* \* have the exclusive power in behalf of the City to grant to persons or corporations franchises or rights to make contracts providing for or involving the occupation or use of any of the streets, avenues, highways, boulevards, concourses, driveways, bridges, tunnels, parks, parkways, waterways, docks, bulkheads, wharves, piers or public grounds or waters within or belonging to the city whereon, under or over the surface thereof, for railroads, pipes or other conduits or highways or otherwise for the transportation of persons or property or the transmission of gas, electricity, steam, light, heat or power."

This section seems to require the approval of the Board of Estimate and Apportionment, but apparently a further right to occupy such land must be obtained from the Sinking Fund Commissioners in the form of a lease, the value of which must be fixed by the Sinking Fund Commissioners after an appraisal, as provided by the first part of section 205 of the Charter, which reads as follows:

"The board shall, except as in this act otherwise specifically provided, have power to sell or lease for the highest marketable price or rental at public auction or by sealed bids, and always after public advertisement for a period of at least fifteen days in the City Record, and after appraisal under the direction of said board made within three months of the date of sale, any city property except parks, wharves and piers and land under water, but no such lease shall run for a term longer than ten years nor a renewal for a longer period than ten years."

The value of such a right to occupy the land for railroad purposes to the railroad company would depend:

First—Upon what it would cost the Company to condemn the right of way upon other lands;

Second—The term of grant which it could obtain from the City under sections 205 and 242 of the Charter; and

Third—Whether the cost of construction of the railroad would be the same upon the right of way obtained from the City and upon the private right of way condemned by the Company.

A company seeking such a right would be in the position of either making a contract with the City for the occupation of its water supply lands for railroad purposes, or of purchasing or condemning a private right of way upon other lands.

The land which the railroad company would acquire by condemnation proceedings would be owned in fee while the franchises which it would be required to obtain for street crossings might, outside of City limits, be granted for an indefinite period. Under section 242 of the Charter, rights can only be granted by the City for fifty years as the maximum and the lease under section 205 can be made for a term not exceeding in the aggregate twenty years, that is, if section 242 of the Charter applies to lands outside the City limits.

If such a railroad company could obtain the right upon satisfactory conditions, it probably could afford to pay to the City a fair rate of interest upon the value of the land occupied or the interest upon the cost of condemning private right of way upon other lands, though it would seem that such Company could not afford to construct its railroad under a contract which assures its right to occupy the land for only twenty years upon terms less favorable than would be the case if the Company actually condemned and owned its right of way, provided the cost of construction would be the same in each case.

The matter of cost of the construction, however, is one which it is impossible to determine without knowing the route upon which the railroad would be constructed, both upon the City's property and upon a private right of way on other lands, and whether it would be necessary to construct such railroad upon the City's property at an elevation above the natural surface, because of the spur tracks or connections which the City binds itself to grant to applicants by the terms of the agreement under discussion, as above noted.

No idea of the income from such a lease can be given in actual figures without at least an appraisal of the value of land so used. The awards have not as yet been finally made by the Commissioners of Estimate and Appraisal, so that no idea of such value can be obtained from that source. It is fair to assume, however, that if there should develop a need for such a railroad, and a railroad company would accept the right to construct the same upon the short term lease, as provided by the first portion of section 205, as above quoted, the income to the City should equal a fair rate of interest upon the portion of the City's right of way acquired in fee without easements, and used by such a railroad company.

At this point it might be well to call the attention to the fact that any railroad company before completing its rights to operate such a railroad must obtain from the Public Service Commission, as successor to the State Board of Railroad Commissioners, a certificate of convenience and necessity, pursuant to section 59 of the Railroad Law, providing such a railroad is not constructed as an extension to an existing railroad, and it must obtain a certificate of approval pursuant to section 53 of the Public Service Commissions Law if it is in the nature of an extension to an existing railroad.

Such a railroad constructed upon the City's right of way would parallel the existing Long Island Railroad throughout the entire length of Nassau County, and if constructed along the City's conduit line in the Borough of Queens, it would be parallel for a considerable distance to the Long Island Railroad in that Borough and to the New York and Long Island Traction Company's electric railway for a distance of approximately four miles; two miles of which is in the Borough of Queens and two miles in Nassau County.

If the application for such a certificate is made to the Public Service Commission, that Commission will no doubt take into consideration that such a railroad will parallel and be almost adjacent to existing lines.

Another question that might be raised here is one that is purely a question of law, and that is whether the City can legally grant the rights to railroad companies to use property that has been acquired for water supply purposes other than by section 485 of the Charter, which seems to provide for the perpetual use of real estate acquired or used for railroad purposes to the railroad company which acquired or uses such property, or by section 205, which authorizes the Sinking Fund Commissioners to lease land outside the City acquired by the City for sanitary protection of water supply and to grant in perpetuity or shorter periods easements or rights of way over or across such lands for the improvement of the facilities and the public service of the railroads heretofore located thereon.

The last question, in so far as it applies to a new railroad company to be located on the right of way of the City, is one upon which the City has not yet been advised by the Corporation Counsel.

It would seem, however, that there is some doubt as to the jurisdiction of the Sinking Fund Commissioners to grant such rights for the reason that there has been introduced in the present session of the Legislature a bill to amend section 205 of the Charter so as to permit the Sinking Fund Commissioners to lease in perpetuity or for shorter periods lands heretofore or hereafter acquired outside of the City limits for the sanitary protection of water supply or for other purposes for the improvement of the facilities of public service of railroads or street railways heretofore located or hereafter located thereon. I refer to Senate Bill Introductory No. 28, which was referred to the Committee on Cities in both the Senate and Assembly on January 12 and 17, 1910, respectively.

#### THE THIRD QUESTION.

This question refers to the value of the easements and leases of the parcels of land which by the terms of the agreement are given to the Long Island Railroad Company for railroad purposes.

First—Those outside the City.

Of the first class there are three types:

(a) Perpetual easements for railroad purposes upon lands acquired by the City from the Long Island Railroad Company; area, 6.9234 acres.

(b) Perpetual easements for railroad purposes in lands acquired by the City from owners other than the railroad company; area, 6.2902 acres.

(c) Leases of three parcels for railroad purposes acquired other than by this proceeding for water supply purposes, for a term of ninety-nine years; area, .9048 acre.

The City's position with respect to granting rights upon these lands is similar to that described under the discussion of the second question, namely, that of a property owner, except in regard to the easements upon the lands acquired by the City from the railroad company. With respect to the latter it has already been pointed out that the Commissioner of Water Supply, Gas and Electricity has assumed that such easements must be granted upon the acquisition of those lands, and the compensation to be paid to the railroad company for the underlying fee is to be made with that understanding.

As to the value of the perpetual easements which the City grants to the railroad company upon lands acquired in these proceedings from owners other than the railroad company, it would appear that the railroad company obtains rights in such lands which are equal in value as if the same were condemned for railroad purposes and acquired in fee by the railroad company; the only difference being that the City retains the underlying fee for water supply purposes.

As to the value of the leases of three parcels for railroad purposes for a term of ninety-nine years, it would appear that the value of the lease for the present time should be based upon the value of the land. In view of the fact, however, that it is for the long term of ninety-nine years, the increase in the value of the land before the expiration of the lease is indeterminable, but it is possible that the value of the lease may be based upon the value of the land which may be materially greater during the latter part of the term than at the present time.

There is no data on hand on which to determine the value of this property. The only precedent that can be found is the lease to the New York and Long Island Traction Company for the right to occupy for railroad purposes the lands acquired for water supply in the Borough of Queens and the County of Nassau.

In 1903 the Board of Aldermen granted a franchise or right to construct, maintain and operate a street surface railway to the New York and Long Island Traction Company in the Borough of Queens. A portion of the route of this company was upon a private right of way adjacent to the line of the aqueduct of the Brooklyn water supply, and crossing one parcel of land owned by the City and in use for a branch to the main conduit line. The company also succeeded in obtaining rights in Nassau County, the route of which also crossed five similar parcels of City lands. The same year the company obtained a lease to occupy such parcels of lands for railroad purposes from the Sinking Fund Commissioners for a period of ten years and a renewal of ten years. The aggregate area of such parcels in Nassau County is 2.194, and the area of the parcel within The City of New York is equal to .07 acre, making a total of 2.264 acres. The lease was sold at public auction for \$100 per annum, that amount

being fixed as the minimum or upset price by the Commissioners of the Sinking Fund in the resolution authorizing the sale.

As to the second class above mentioned, the contract provides for a lease of two parcels of land at Rosedale aggregating an area of .8730 acre for a term of ten years with the privilege of renewal for a further term of ten years. The value of said lease would be based upon the value of the land and without appraisal it would be impossible to state what the annual income of such a lease would be. Pursuant to section 205 of the Charter, the Sinking Fund Commissioners are required to make an appraisal of such property before the sale of the lease. The agreement provides for no annual rental of these two parcels of land, but is given by the City as part payment for the lands acquired from the railroad company.

If the railroad company desires these two parcels to be used for additional tracks, the City might safely consider the leasing of this property without any franchise conditions, even though it is within the City limits, for the reason that the two parcels are located on each side of a highway, and in order to use the same it will be necessary to occupy a portion of this highway, and in order to do so the Company must obtain its right from the Board of Estimate and Apportionment, pursuant to section 242 of the Charter, which provides for the granting of franchises to occupy public property. When such a franchise is considered by the Board it can insert such conditions as seem necessary to protect the City.

It is a question of law as to whether lands acquired for water supply purposes may be disposed of by perpetual easements, by leases made for a term of ninety-nine years, or by leases made for a period of ten years with ten-year renewal without being appraised and sold at public auction, but there is apparently no section of the Charter which permits such easements or long term leases for railroad purposes, and the agreement itself is silent as to any statute pursuant to which these rights are given.

Under the second question is discussed quite fully the provisions of the Charter which seem to govern a grant to a new company and those same provisions seem to apply to existing companies as well, unless a railroad company has heretofore been located upon such lands acquired for water supply purposes; in that case it appears that such a railroad company may be given perpetual easements or rights for a shorter period upon such lands.

#### CONCLUSIONS.

The lengths of the parcels abutting on the right of way of the Long Island Railroad Company upon which that Company is given easements or leases by the terms of the agreement are as follows:

	Feet.
(a) Lengths of strips upon which a perpetual easement is granted, such land being property acquired from owners other than the railroad company....	9,500
(b) Lengths of parcels leased for the term of ninety-nine years, in Nassau County .....	3,000
(c) Lengths of parcels leased for the term of ten years, with renewal of ten years at Rosedale, Borough of Queens.....	2,300
(d) In addition to the above the railroad company retains an easement on property acquired from it by the City, all of which is adjacent to the Company's right of way.....	3,500

The total length of parcels adjacent to the right of way upon which the Company retains easements upon property which it sells to the City or upon which it obtains easements or leases by the terms of the agreement equals..... 18,300  
—or 3½ miles.

These rights apparently have the effect of widening the Company's right of way and will enable it to increase its facilities.

From the foregoing it would seem that easements which it is proposed to grant to the railroad company upon the property acquired from it gives the railroad company the right to object to the construction of an additional railroad upon the City's right of way at the points where such property extends across the entire right of way of the City.

The granting of easements to the railroad company upon strips of land adjacent to the Company's right of way, such land being that which has been acquired from owners other than the railroad company would not interfere with the City's authority to grant the right for an additional railroad upon its right of way for the reason that the strips of land within which such easements are given do not extend entirely across the City's right of way at any point.

The spur tracks or crossings upon the City's right of way for which the City binds itself to grant a right would not absolutely prevent the construction of an additional railroad, but if a large number of such crossings was constructed, it might be necessary for such additional railroad to be constructed above the grade of the crossings, and thereby making the expense of such construction so great that the lease or right to occupy such land would have no value to such railroad company.

The value of the franchise or right to occupy the City's right of way for railroad purposes, from the City's standpoint, would be dependent upon the value of the land so occupied, and, from the Company's standpoint, would depend to a considerable extent upon what rights the City can grant pursuant to the present laws. The provisions of the Charter, which seem to provide for the granting of such rights have not been passed upon by the Corporation Counsel, and appear to be very complicated.

The value of the easements and leases granted to the Long Island Railroad Company should depend upon the value of the land upon which such easements and leases are given. In no case can the money value of such rights be determined without an appraisal of the property, there being only one precedent for the lease of lands acquired for water supply purposes to railroad companies, and that being the lease to the New York and Long Island Traction Company.

Respectfully,

HARRY P. NICHOLS, Engineer in Charge.

Approved:

NELSON P. LEWIS, Chief Engineer.

On motion, the matter was referred back to the Commissioner of Water Supply, Gas and Electricity for the negotiation and preparation of a new agreement, omitting therefrom the question of spur tracks.

The President of the Borough of Queens moved that when the Board adjourns, it adjourn to meet Friday, April 1, 1910, and that the calendar for that day contain financial, franchise and public improvement matters.

Which motion was adopted.

The Board then adjourned to meet Friday, April 1, 1910, at 10.30 o'clock in the forenoon.

Present—Mr. John C. McGuire, President, and Commissioners Alexander Keogh and Richard Welling.

The President, Mr. John C. McGuire, presided.

Mr. Clement J. Driscoll, representing Local School Board District No. 2, Borough of Manhattan, appeared before the Commission in the matter of an alleged violation of the Civil Service Rules in the Department of Education in the employment of persons as Cleaners and Firemen who were not taken from the eligible lists for those positions.

There being no other appearances, the Chair declared the hearing closed.

Michael A. Batto, a candidate for Patrolman, who had been rejected by the Police Commissioner on account of poor references from his former employers, appeared before the Commission. After consideration of the matter, the Secretary was instructed to permit the candidate's name to remain upon the eligible list.

William T. Maroney, of No. 86 Clarkson street, Brooklyn, an applicant for the position of Patrolman, appeared before the Commission relative to the discrepancy in his name as set forth in the baptismal certificate furnished. The explanation of the applicant being satisfactory, the application was accepted.

Edward J. Kalbfleisch, of No. 334 East Fifth street, Manhattan, appeared before the Commission in relation to the date of birth given in his application for Patrolman, and in the various papers of the examination. On motion, the explanation of the candidate was accepted, and the Secretary was directed to permit the candidate to change the date of birth appearing in his papers as June 8, 1884, to read June 8, 1882, to conform with the baptismal certificate furnished.

The Commission then went into regular session, and the minutes of the meetings held January 19, 20, 21, 24 and 25, 1910, were approved.

On the recommendation of the President (the Committee on Transfers), the following transfers were approved:

Joseph Goldstein, from the position of Attendant to that of Assistant Foreman, in the Bureau of Sewers, office of the President of the Borough of Manhattan, he having formerly held the latter position.

James Dillon, from the position of Bridge Painter to that of Bridge Tender, in the Department of Bridges, pursuant to the provisions of section 22 of the Civil Service Law, Mr. Dillon being a veteran of the Civil War.

Joseph Lally, from the position of Inspector of Regulating, Grading and Paving to that of Inspector of Complaints in the Department of Public Works, Borough of Queens.

Louis Krummel, from the position of Rodman, at a salary of \$720 per annum, to that of Axeman, at \$900 per annum, in the Department of Bridges.

On the recommendation of the President (the Committee on Reinstatements), the reinstatement of Joseph G. Gordon, of No. 1422 Madison avenue, as Inspector of Meters and Water Consumption in the Department of Water Supply, Gas and Electricity, was approved, it appearing that Mr. Gordon had resigned, without fault or delinquency on his part, on June 21, 1909.

Present—President Miller, Chairman, and Alderman Fagan.

The reading of the minutes of the previous meeting was dispensed with and adopted as printed.

## Hearings.

No. 12. Regulating, etc., Whitlock avenue, from Leggett avenue to Longwood avenue, and all work incidental thereto.

Petition signed by Henry Keller and Jacob Froehlich. No one appeared in opposition. Estimated cost, \$10,600; assessed value of the real estate included within the probable area of assessment is \$190,130. The centre line length for this improvement is about 1,170 linear feet, and on this basis the average cost per linear foot of frontage will be \$4.53. On motion, seconded, it was

Resolved, That proceedings be and the same are hereby initiated for regulating and grading, setting curbstones and flagging sidewalks a space four feet wide, laying crosswalks, building approaches and erecting fences where necessary in Whitlock avenue, from Leggett avenue to Longwood avenue, and all work incidental thereto.

Unanimously adopted.

No. 13. Constructing sewer and appurtenances in East One Hundred and Thirty-fifth street, between Park avenue and Canal street West; and in Canal street West, between East One Hundred and Thirty-fifth street and East One Hundred and Thirty-eighth street.

Petition signed by H. W. Bell Company by Harry W. Bell, President, representing 290 feet frontage on Canal street West.

A representative from Mr. Olin J. Stephens appeared and presented two letters in opposition to the proposed improvement, one from Mr. Olin J. Stephens and one from Bradley L. Eaton, of Church E. Gates & Co.

A representative of Messrs. J. P. Duffy & Co. also appeared in opposition, claiming an ownership of 500 feet frontage on One Hundred and Thirty-fifth and One Hundred and Thirty-sixth streets.

Estimated cost, \$8,300; assessed value of the real estate, with improvements, included within the probable area of assessment is \$286,000. Title vested. Outlets built.

Based upon the foregoing approximate estimate of cost and judging from the methods employed by the Board of Assessors in apportioning the cost in somewhat similar matters, it is probable that the assessment for this work upon the property directly benefited thereby will not exceed \$100 per each 25-foot lot. This is based upon the assumption that the Board of Assessors will assess the property indirectly benefited at \$37.50 per each 25-foot lot.

Laid over until March 8, 1910, at 8 p. m.

President Miller stated that representatives of the press were anxious to have the meetings of the Local Boards changed from Friday night to some evening earlier in the week. On motion, seconded, it was

Ordered advertised for a public hearing on March 8, 1910, at 8 p. m.

The following communication was presented by Alderman Fagan:

"Hon. CYRUS C. MILLER, President, Borough of The Bronx:

"My Dear Sir—My attention has been called on many occasions to the great need of a floating bath for the accommodation of residents in the thickly populated sections of the Borough of The Bronx, similar to those maintained by the City in the other Boroughs, and which has proven such a great boon to the residents of those Boroughs.

"I therefore transmit the following resolution:

"That, pursuant to the provisions of subdivision 8, section 188 of the Greater New York Charter, it be and is hereby respectfully requested that the Board of Estimate and Apportionment approve of the issue of special revenue bonds of The City of New York to an amount necessary to provide and maintain a floating bath in the East River somewhere between the space in One Hundred and Thirty-fourth and One Hundred and Forty-ninth streets."

The following preambles and resolution were presented by Alderman Fagan:

Whereas, The City of New York is committed to the establishment of recreation piers along the river front for the purpose of affording greater opportunity to its inhabitants for the enjoyment of the health-giving atmosphere adjacent to the waterfront; and

Whereas, The population of the Borough of The Bronx has increased considerably during the past years in the space between One Hundred and Thirty-fourth street and One Hundred and Forty-ninth street, East River, and said space is contiguous to a densely populated section, and because of its commanding view of the river and island thereon, makes an ideal place for the location of a recreation pier, and as the Borough of The Bronx has not as yet been designated a pier for such purpose and as we know it is sadly needed; therefore be it

Resolved, That the Commissioner of Docks be and hereby is respectfully requested to take such steps as may be necessary under the provisions of the Greater New York Charter for the location of a recreation pier within the designated space as herein described.

The following resolution was presented by Alderman Fagan and placed on file, as the matter had already been attended to:

Be it ordained by the Local Board of Morrisania as follows:

Resolved, That, pursuant to the provisions of subdivision 8, section 188 of the Greater New York Charter, it be and hereby is respectfully requested that the Board of Estimate and Apportionment approve of the issue of special revenue bonds of The City of New York to an amount necessary to construct and maintain on property already acquired by the City for said purpose of an interior public bath in East One Hundred and Forty-third street, south side, between Willis and Brook avenues, in the Borough of The Bronx.

The following was presented by Alderman Fagan:

Resolved, That the Board of Estimate and Apportionment be and it is hereby respectfully requested to set aside the space at The Bronx terminal of the Willis Avenue Bridge, bounded by Willis avenue on the west, Brown place on the east and the Southern boulevard on the north, for park, playground and recreation purposes.

The following resolution was presented by Alderman Fagan:

Resolved, That, in pursuance of the provisions of subdivision 8, of section 188 of the Greater New York Charter, the Board of Estimate be and it is hereby respectfully requested to authorize the Comptroller to issue special revenue bonds to the amount necessary for the erection of an iron fence under the Third Avenue Bridge, Bronx side, from Southern boulevard to One Hundred and Thirty-fifth street, said space to be used as a playground and resting place for women and children in the vicinity thereof.

The following resolution was presented by Alderman Fagan:

Resolved, That there be a joint special meeting (at an early date) of the Local Boards of the Borough of The Bronx, the object of said meeting being to discuss and devise, if found advisable, the drawing of a set of resolutions requesting an increase in the police and fire protection in the Borough.

And also to discuss the advisability of concurrent action by said Local Boards as to the matter of railroad franchises granted within the Borough and long lying dormant, particularly those granted to cross-town streets and upon certain avenues where nothing is being done as per promise and agreements entered into with said parties or companies securing said franchises.

Referred to joint meeting of Local Boards of this Borough.

On motion, the Board adjourned until March 8, 1910, at 8 p. m.

GEORGE DONNELLY, Secretary.

## MINUTES OF THE LOCAL BOARD OF CHESTER, TWENTY-THIRD DISTRICT.

No. 20. Regulating and grading, setting curbstones and flagging sidewalks a space four feet wide, laying crosswalks, building approaches and erecting fences where necessary in Beach avenue, from Bronx River avenue to Clasons Point road, and all work incidental thereto.

Ordered advertised for meeting of March 8, 1910, at 8.30 p. m.

No. 630 of 1907. Regulating and grading Ludlow avenue, from Clasons Point road to One Hundred and Seventy-seventh street, 100 feet wide in excavation, and 60 feet wide in embankment, and all work incidental thereto within said limits.

Under date of December 8, 1909, this matter was referred back to the President of the Borough, to be amended by excluding the section west of White Plains road, and attention was called to the desirability of specifying in resolutions of this character, the limits in which it is proposed to carry out only a partial improvement.

The Engineer of Highways, under date of February 3, 1910, reported the estimated cost at \$77,400; assessed value of the real estate included within the probable area of assessment at \$258,140, for the section between White Plains road and Tremont avenue.

The centre line length for the above named improvement is about 2,554 linear feet. On this basis the average cost per linear foot of frontage will be about \$14.20.

In the said report it was suggested that the proposed improvement read: "Ludlow avenue, from White Plains road to Tremont avenue, be regulated and graded, and all work done incidental thereto; from White Plains road to the west house line of Olmstead avenue, 100 feet wide in excavation, and 60 feet wide in fill, and from the west house line of Olmstead avenue to Tremont avenue, 100 feet wide in excavation and fill."

The Secretary of the Unionport Property Owners' Association appeared at this meeting and stated that he did not think the owners would be in favor of Chief Engineer Lewis' recommendation.

On motion, seconded, the matter was laid over until March 8, 1910, as was also the other section of Ludlow avenue, from Bronx River avenue to Clasons Point road, 100 feet wide in excavation, and 60 feet wide in embankment, and all work incidental thereto within said limits.

Estimated cost, \$102,000. Assessed value of the real estate included within the probable area of assessment is \$178,550.

Laid over until March 8, 1910, at 8.30 p. m.

No. 90 of 1908. Rosedale avenue, regulating and grading, setting curbstones, flagging sidewalks a space four feet wide, laying crosswalks, building approaches and erecting fences where necessary from West Farms road to Westchester avenue.

Resolution initiating proceedings was adopted by Local Board of Chester on October 15, 1908.

Estimated cost, \$106,800; assessed value of the real estate included within the probable area of assessment is \$222,410.

Title not vested. Proceedings initiated. Oaths of the Commissioners of Estimate and Assessment were filed January 25, 1908.

Under date of July 22, 1909, Chief Engineer Lewis of the Board of Estimate and Apportionment, recommended that the resolution be referred back to the President of the Borough to be amended as required to keep the cost within such limits as the valuations in the vicinity will justify, and at the meeting of November 5, 1909, the matter was accordingly sent back (see letter of November 11, 1909).

The estimated cost of the improvement including new curb, flagging, bridgestone, is \$102,000, and the assessed value of the real estate included within the probable area of assessment, is \$320,940.

The centre line length for the above improvement is about 3,000 linear feet. On this basis the average cost per linear foot of frontage will be \$17, but if the work is undertaken without including new curb, flagging or bridgestone, and omitting three basins, the estimated cost of the improvement would be \$88,900, and the average cost per linear foot of frontage will be reduced to about \$14.83.

On motion, seconded, the matter was laid over indefinitely awaiting the action of the Board of Estimate and Apportionment on the proposition to reduce the width of the street as laid out on the map.

Hearings.

No. 15. Paving with block asphalt One Hundred and Sixty-seventh street, from Webster avenue to Sherman avenue.

Petition signed by A. J. Schwarzler and five others. Estimated cost, \$35,900; assessed value of the real estate included within the probable area of assessment is \$518,380.

Title vested September 8, 1896. Grades legally established by final maps, section 9, November 2, 1895. Sewer, water main and gas main in the street. Gradient between Grant avenue and Sherman avenue is 7.5 per cent.

The centre line length for this improvement is about 2,061.5 linear feet. On this basis, the average cost per linear foot of frontage will be \$3.62.

In the foregoing estimate 10,230 square yards was estimated upon, and a supplemental estimate was submitted also which provided for the laying of 10,710 square yards of asphalt blocks, which included the amount of work necessary to connect the roadway of One Hundred and Sixty-seventh street, from Sherman avenue to the approach to the Grand Boulevard and Concourse. Estimated cost, \$37,500, or an average cost per linear foot of \$3.68.

Amended petition necessary which will provide for that section of One Hundred and Sixty-seventh street, from Sherman avenue to the approach to the Concourse.

No one appeared in opposition. Mr. A. J. Schwarzler appeared in favor.

Laid over until March 8, 1910.

No. 16. Change of grade of Merriam avenue, from Ogden avenue to West One Hundred and Sixty-ninth street (Orchard street).

Petition signed by High Bridge Realty Company, Henry S. Chase, treasurer, and Max Rechintzer. Black print, dated February 9, 1910, also submitted.

The Topographical Engineer reported that this change was adopted on two previous occasions, the last time on May 5, 1904, and the Board of Estimate and Apportionment, on September 30, 1904, denied the application of the petitioners, because only two votes were in favor of the proposed change.

The cost of grading will become larger if the change is adopted, and the Topographical Engineer suggests that the owner of the building at the corner of Ogden avenue and Merriam avenue bind himself not to make a claim for damages to his building.

The architect of the building referred to and the owner appeared at this meeting and stated that they would enter into an agreement with the City as suggested by the Topographical Engineer.

Laid over to March 8, 1910.

Regulating and grading, setting curbstones and flagging sidewalks a space four feet wide, laying crosswalks, building approaches and erecting fences where necessary in Ryer avenue, from One Hundred and Eighty-third street to One Hundred and Eighty-fourth street, and all work incidental thereto.

The Engineer of Highways explained the conditions in connection with the improvement petitioned for by Gerald C. Conner and Mary S. Frost.

The owners of property who were present at this meeting stated that they were willing to have the limits of the improvement extended further north, but that the owners above One Hundred and Eighty-fourth street were not willing to petition for the improvement just now. No one appeared in opposition to petition No. 18. On motion, seconded, it was

Resolved, That proceedings be and the same are hereby initiated for regulating and grading, setting curbstones and flagging sidewalks a space four feet wide, laying crosswalks, building approaches and erecting fences where necessary in Ryer avenue, from One Hundred and Eighty-third street to One Hundred and Eighty-fourth street, and all work incidental thereto.

Mr. A. J. Schwarzler appeared in favor of petition 259 of 1909, and asked that the matter be acted upon favorably now as he thought the opposition had plenty of time to be heard.

New petitions ordered advertised for March 15, 1910.

Petition No. 259 of 1909 and all papers laid until March 15, 1910, 8 p. m.

Opposition by James H. Leddy and others. On motion of Alderman Hamilton, seconded, it was

Resolved, That the proposed change of map necessary in securing the proposed improvement referred to by Mr. Halley be laid over until the new petition is received.

## COMMISSIONERS OF THE SINKING FUND.

PUBLIC NOTICE IS HEREBY GIVEN THAT the Commissioners of the Sinking Fund, in accordance with the provisions of chapter 372 of the Laws of 1907, will hold a public hearing in Room 16, City Hall, Borough of Manhattan, at 11 o'clock a. m. on Wednesday, April 21, 1910, relative to a request of the Commissioner of Docks that the Commissioners of the Sinking Fund approve of the proposed amendment to the new plan previously adopted, for the improvement of the water-front between Grand and

Broome streets, East River, Borough of Manhattan, as adopted by the Commissioner of Docks in accordance with law, March 4, 1910.

Technical Description of "New Plan" for the Improvement of the Water-front Between Grand Street and Broome Street, East River, Borough of Manhattan.

The proposed "new plan" between Grand street and Broome street, East River, Borough of Manhattan, comprises the following:  
The establishment of two new piers 50 feet in width with a slip room of 140 feet extending from the established bulkhead line to the established pierhead line, the northerly side of the northerly pier being identical with the northerly side of the present Pier (old) 56, or Broome Street Pier.

Also the establishment of a new pier 45 feet in width, its northerly side extending from the proposed modified bulkhead line, its southerly side extending from the established bulkhead line to the established pierhead line. The southerly side of the new pier is coincident with the southerly side of the present Pier (old) 55, or Grand Street Pier; also the discontinuance of the marginal street, wharf or place between Grand and Broome streets.

The Commissioner of Docks in his communication to the Commissioners of the Sinking Fund states that this change is rendered necessary owing to the fact that when the plan was originally adopted ferries were in operation in this locality which have since been abandoned, and there is no likelihood that the area will be required for such purposes in the future. A pier layout is therefore shown in red lines, and when such piers are constructed, they will tend to greatly relieve the wharfage congestion in this vicinity. There is embodied in the plan a proposed modification of the bulkhead line, and request for same has been made to the War Department, which will, no doubt be approved. The marginal street, wharf or place, as shown on the plan adopted December 19, 1888, is to be discontinued, as there is no necessity for it; adequate access to the proposed piers can be had by the way of East street.

The proposed amended plan is open to the inspection of any citizen at the office of the Comptroller of The City of New York, at all times during business hours, from the beginning of this publication until the day of said hearing.

Chairman, Commissioners of the Sinking Fund.

Comptroller of The City of New York, and must  
 give a certified check or cash in full the  
 amount of the purchase price as security for the  
 faithful performance of the terms and conditions

of the sale. Where the amount of the purchase price does not equal or exceed the sum of \$50, the sum of \$50 shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but unfinished at the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the building or buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal, nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or any of these conditions shall forthwith void the sale and cause immediate forfeiture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing therein or permitting the occupancy of any such building by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

The sale will be as of the condition of the property on the date of delivery thereof to the purchaser. The City of New York will not be responsible for any change or loss which may occur in the condition of the buildings, or their appurtenances, between the time of the sale thereof and the time of delivering possession to the purchaser, after being properly vacated of all tenants. The sale and delivery to purchaser will be made as nearly together as the circumstance of vacating the structures of their tenants will permit.

All the material of the buildings, sheds, walks, structures and cellars of whatsoever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the exterior walls of the buildings and their foundations and the sidewalks and curb in front of said buildings, extending within the described area shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point. The exterior walls and their foundations shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building. Where there is no curb the elevation of the surrounding ground shall be considered curb level. All wells, cesspools, sinks, etc., existing on the property must be filled to the level of the surrounding ground with clean earth.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street, and the opening of the main sewer in street shall be properly closed in compliance with the directions of the Bureau of Sewers, Borough of the Bronx, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed.

The permit for all opening in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances or any part thereof within thirty days from the day of possession will work forfeiture of ownership of such buildings, appurtenances or portion as shall then be left standing, together with all moneys paid by said purchaser in account thereof at the time of the sale, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and The City of New York will, without notice to the purchaser, cause the same to be removed, and the costs and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and must be completed within thirty days from the day of possession and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Where party walls are found to exist between buildings purchased by different bidders, the materials of said party walls shall be understood to be equally divided between the separate purchasers.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furings, plaster, chimneys, projecting brick, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beam-holes, etc., bricked up, and wall pointed and made to exclude wind and rain and present a clean exterior. The roofs of adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the contractor.

The Comptroller of The City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids, and it is further:

Resolved, That, while the said sale is held under the supervision of the Commissioners of the Sinking Fund, the Comptroller is authorized to cause the sale to be advertised and to direct the sale thereof to financial officer of the City.
