Premises affected, (14) Niagara Falls, Buffalo ave.; appellant, Niagara Alkali Co. (Appearing). 5—Prohibit occupancy. 6—Reconstruct present stairs to comply with Section 79-a. 7—Additional exit. Three-story fireproof factory building erected since Oct. 1, 1913; open lofts; no sprinklers; combustibles; no fire alarm; occupancy of building, 15, 4 of whom are employed on 3d floor, none on 2d floor; exits, one 42-inch unenclosed stairway constructed of concrete, with 10-inch tread and 9-inch rise. The work being done in this building requires that the employees work in shifts, each shift at no time to exceed 15 people; building contains 175 pounds of Toluol, which is similar to benzol and highly inflammable.

Recommendation: Accept the 42-inch concrete stairway with 9-inch rise on condition that same be enclosed with 4-inch hollow tile to form a wall, said enclosure to terminate at underside of roof, there being no safe egress from roof; stairway need not be continued to roof; said enclosure to have egress direct to outer air at grade, and if there be no window to outer air at each floor within enclosure, then a skylight to be provided in roof of enclosure measuring three-quarters the area of the shaft. All openings in said enclosure to be equipped with approved self-closing fireproof doors opening outwardly so as not to obstruct the stairway. As second means of exit, accept an exterior screened stairway to be erected on the northeast corner of building, to be screened 6 feet high and roofed over with asbestos board so that stairway may be kept free from snow and ice; asbestos board to be used because of the corrosive action of gases on iron; stairway to conform to Section 79-f-10.

Premises affected, (15) Rochester, 28-30 Scio st.; appellant, W. W. Armstrong. 4—Provide three fireproof enclosed stairways as per Section 79-a. This matter was before the Industrial Commission on June 20, 1917, when an outside iron stairway was accepted as a means of exit same to be erected on rear and lead from 2d floor to yard. Conditions are as follows: 2-story building erected since Oct. 1, 1913; contains 6,500 square feet of floor area; no sprinkler; combustibles carried; no fire alarm system; exit consists of a ramp, constructed of concrete, erected at north (center), which ramp is 9 1/2 feet wide and extends from 1st to 2d floors; there is no legal exit in the building. Appellant stated that he intended acquiring the property, adjoining in the rear, and then would add an addition to the building, wherein were to be provided legal exits. Ramp was accepted if the portion that was enclosed in wood was fireproofed and door leading to same be covered with metal and properly controlled by weight and fusible link. Owners unable to acquire right of way on rear property or to purchase same. Occupancy of building is now 13, with 4 on second floor.

Recommendation: Acceptance of fire escape on front of building conforming to Rule 4-a as one exit, and the ramp as an exit if same be fireproofed as per variation of June 20, 1917. Floor area 6,500 square feet, requiring now but two exits.

Premises affected, (16) Lockport, Grand and Lock sts.; appellant, Jas. R. Tyler (Covert Gear Co.). 6—Provide standard fireproof doors at openings into stair tower on Lock st. side of building. 7—Have all fire doors in new building marked with maker's name. 16—Properly enclose stairway at west end of older portion of building. 17—Provide fireproof passageway from foot of stairway in west end of older portion of building. Building erected since Oct. 1, 1913; plans were filed for the northerly section, but no plans were filed for the southerly section; according to plan filed, there were to be three exits, i. e., two fireproof enclosed stairways and a horizontal exit leading to adjoining building. When the building was erected the fire wall between the two buildings was eliminated, thus making one floor area; 3-story building partly fireproofed; open lofts; sprinklers installed; no combustibles; no fire alarm system; occupancy of building at time of inspection, 29 above the first floor. Exits, three interior stairways, two of which are properly enclosed in fireproof partitions; the one located along the westerly wall of the older portion is enclosed from floor to floor only, thus necessitating coming out into workroom in order to reach stairway between floors; openings to all stairways equipped with a two-ply door which does not comply with Rule 502 of the Industrial Code. At the westerly end of the northerly wing there is a horizontal exit on 2d floor only; doors to stairway enclosure open out, are self-closing; no safe egress from roof; imperfect fire escape on southeast corner of building; building so constructed that to enclose the stairway along the westerly wall of the older portion continuously would interfere with the elevator.

Recommendation: Accept stairway along westerly wall of older portion of building as at present enclosed, also accept the doorways provided. It being understood that all doors installed in future are to comply with Rule 502 of the Industrial Code.

Premises affected, (17) Syracuse, 210 East Jefferson st.; appellant, William Rubin, appearing. Make stairway in new four-story building conform to Section 79-a. Building 200 East Jefferson st. is a four-story building erected prior to Oct. 1, 1913; exits, one interior stairway enclosed with wooden partitions and fire escape located at southerly end of easterly wall; 1st floor, mercantile; 2d floor, offices; 3d floor, club room and dressmaking establishment wherein are employed 4 males, 2 females; 4th floor, club room and tailoring shop, employing 4 males, 2 females; new four-story section has unenclosed stairway in southeast section. It is proposed to erect between the new and the old four-story buildings a four-story addition measuring 37 1/2 feet; occupancy of new four-story building is: 1st floor, mercantile; 2d floor, bakery and offices with one male and 3 females employed; 3d and 4th floors vacant at present. New addition completed with old four-story building by horizontal exits conforming to Section 79-f-9; fire escape on old four-story building to be removed. Requests for acceptance of stairway in new four-story part unenclosed.

Recommendation: Accept the present wooden stairway in the new four-story part; accept horizontal exits with one fire door at each exit.

Premises affected, (18) Syracuse, West Willow and North Clinton sts.; appellant, Woodhull, Conable & Bull. 1—Approved fire alarm system. 2—Enclose stairways. 3—Prohibit occupancy. Six-story nonfireproof factory building with divided lofts; sprinkler installed; combustibles carried; fire alarm signal system does not conform to Rule 375; occupancy above the 1st floor, 272; above the 2d floor, 226; exits, two unen-

closed interior stairways, one extending from grade to roof and the other extending from grade to 6th floor; doors open outwardly and are self-closing; no egress from roof; building divided by fire wall wherein is provided on each floor a horizontal exit conforming to Section 79-f-9; stairways located on each side of this horizontal exit alongside the fire wall; stairway in westerly section not remote from horizontal exit; on North Clinton st. side of building is an imperfect fire escape; fire alarm signal system consists of gong and push button directly under same which is located on the side wall of each floor. Clothing manufactured.

Recommendation: Accept as exits the stairway in easterly side of building unenclosed, the horizontal exits on each floor and stairway in westerly side of building when same has been enclosed with fire-resisting partitions as per Rule 504-C, said partitions to extend continuously from cellar to underside of roof, all openings therein to be provided with standard self-closing fireproof doors opening outwardly so as not to obstruct the passageway; fire alarm to be made to conform with Rule 375, Class C.

Premises affected, (19) Watertown, 31 Public Square; appellant, J. R. Miller Realty Co. 1—Prohibit occupancy. 2—Additional exit. Four-story nonfireproof building with open lofts; no sprinklers; combustibles carried; no fire alarm; occupancy above 2d floor, 17; exits, one interior stairway; no egress from roof; fire escape located on front of building; openings to balconies are equipped with wired glass, but frames are not fireproof, except on top floor where fireproof door is provided; straight-ladder fire escape on west side of building.

Recommendation: Accept fire escape while conditions and occupancy remain unchanged on condition that an unobstructed passageway be maintained to fire escape entrance, 3d floor.

AND it appearing that there are practical difficulties and unnecessary hardships in complying with the strict provisions of law and rules and regulations of the Industrial Code on the premises noted above and that in granting the variations recommended in each case the spirit of the law and of the rules and regulations will be observed and public safety secured; and

It further appearing that each of the appellants has been notified that he would be given an opportunity to be heard at this time and place if he desired to appear, and in default of appearance decision rendered would be confirmed without further notice; and such of the appellants who appeared having been heard by the Commission, therefore

Be it resolved by the State Industrial Commission that said Commission grant the variations set forth herein with the understanding that said variations be effective only during the time that conditions and occupancy remain as of this date.

Where there is no curb the elevation of the surrounding ground shall be considered curb level. All wells, cesspools, sinks, etc., existing on the property must be filled to the level of the surrounding ground with clean earth.

Where party walls are found to exist between buildings purchased by different bidders, the materials of said party walls shall be understood to be equally divided between the separate purchasers.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furnishings, plaster, chimneys, projecting brick, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beam holes, etc., bricked up, and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs and adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the Contractor.

No buildings, parts of buildings, fixtures or machinery sold for removal under these terms and conditions shall in any case be re-located or re-erected within the lines of any proposed street or other public improvement, and if any such buildings, parts of buildings, fixtures or machinery, etc., shall be re-located or re-erected within the lines of any proposed street or other public improvement, title thereto shall thereupon become vested in The City of New York and a resale at public or private sale may be made in the same manner as if no prior sale thereof had been made.
