BOROUGH OF BROOKLYN.

Report for the Quarter Ending September 30, 1905.

Brooklyn, N. Y., December 9, 1905.

Hon. GEORGE B. McCLELLAN, Mayor of The City of New York:

Dear Sir—In accordance with the provisions of section 1544 of the Greater New York Charter I submit to you herewith the report of the work of my office for the quarter ending September 30, 1905. You will kindly consider as a part of my report the statements of the Commissioner of Public Works and the bureau chiefs attached thereto. The quarter has been one of great activity in all the bureaus and many pieces of work of great importance have been undertaken or continued. Notable among these has been the Gowanus canal purification tunnel, for the installation of which the Board of Estimate and Apportionment appropriated \$750,000. The working plans for the improvement have been prepared and the job itself will soon be under contract.

Commissioner Brackenridge reports considerable progress upon the working plans for the construction of relief sewers under the two million dollar appropriation recently made by the Board of Estimate and Apportionment. During the quarter ninety contracts were signed by me, covering work the estimated cost of which in the total is close to eight hundred thousand dollars. Of these contracts sixty-three are for work to be done under the supervision and direction of the Bureau of Highways, twenty-three are sewer contracts and two are for work to be done under the supervision and direction of the Bureau of Public Buildings and Offices.

In the report of the Bureau of Highways it is noted that during the quarter 23.79 miles of improved pavement were laid. This work is subdivided as follows:

Miles of asphalt and asphalt block	19.20
Miles of granite block	1.70
Miles of macadam	2.35
Miles of medina block	0.54

This work, added to work of the same character done during the preceding months for the year, makes the total mileage of improved pavement laid during the three quarters of 1905 44.64. By this work the mileage of cobblestone pavement in Brooklyn has been reduced to 85.14. The cobblestone mileage when I assumed office in January, 1904, was 153.95, or 26 per cent. of the paved mileage of the borough. At present it constitutes only 13.6.

A very adequate idea of the progress made in repaving work can be obtained from the following table which I quote from the report of Commissioner Brackenridge:

	June 30, 1905.	Sept. 30, 1905.
Asphalt block and asphalt	229.99	248.47
Granite	140.65	140.86
Cobble	101.63	85.14
Belgian	41.06	40.91
Trap block	1.25	1.24
Macadam	97.99	100.33
Brick	4.40	4.00
Medina	3.07	3.61
Wood	2.00	2.00
Total	622.03	626.76

It pleases me to be able to inform you that all this work has been done economically.

During the quarter work has been in progress on 169 tracts, 100 of which are reported as completed.

Commissioner Brackenridge notes with much pleasure the effect of the price of paving material on the contract for repairing asphalt pavement. During the first three quarters of 1905 which have gone by the amount expended for repair work on asphalt was only \$35,575, notwithstanding the fact that in 1905 48,209 cubic feet of asphalt mixture and 10,461 feet of binder were used, as against 41,578 cubic feet of asphalt mixture and 9,502 of binder for the corresponding period in 1904.

The work of the Repair Division of the Bureau of Highways is worthy of particular attention, showing an increase of nearly 10,000 square yards in the amount of macadam repaired and relaid above the work done in the corresponding period of 1904.

The following macadam roads have been resurfaced during the quarter, and in most of them the condition of the original pavement was so bad that the work upon them is actually a repavement of the roadways:

Sixtieth street, from Eleventh avenue to New Utrecht avenue.

Fourth avenue, from Sixtieth street to Sixty-seventh street.

Eighty-eighth street, from Shore road to Seventh avenue.

Sixty-fifth street, from Fifth avenue to New Utrecht avenue.

Eighteenth avenue, from Seventy-ninth street to Eighty-fourth street.

Eighteenth avenue, from Forty-seventh street to Fiftieth street.

Seventy-ninth street, from Fort Hamilton avenue to Seventh avenue.

Seventh avenue, from Fifty-eighth street to Seventy-ninth street.

The Bureau of Sewers during the quarter installed 14,213 miles of sewers of all kinds. There also an increase is shown over the work done in 1904. On September 30 the estimated cost of the work in various stages of construction and preparation in the Bureau of Sewers amounted to \$7,237,000, the corresponding amount for the same date last year was \$5,531,807. During the three months 108 sewer basins were constructed and the Tenth avenue tunnel sewer was completed. This latter is one of the largest single pieces of construction which has been undertaken in Brooklyn, its cost being in excess of \$810,000. Another large piece of sewer construction closed during the quarter was the installation of the drains in Avenue C, from Coney Island avenue to Flatbush avenue, and in Foster avenue, from East Ninth street to Flatbush avenue, etc., at a cost of \$560,000.

The Maintenance Division of the Bureau reports 2,009 new sewer connections during the three months; the cleaning of 5,202 sewer basins and the examination of 596,000 feet of pipe and brick sewers.

Superintendent of Public Buildings and Offices reports the completion of the contract for repairing the interior of the Kings County Court-house, and progress upon the work of installing metal cases in the Hall of Records.

I find in Commissioner Brackenridge's report an item which I believe is worthy of particular attention. The Commissioner, during the quarter, approved of plans for the elimination of the grade crossings on the Brighton Beach Branch of the Brooklyn Union Elevated Railroad Company's system and the Bay Ridge Branch of the Long Island Railroad Company's system, which work is to be done under the supervision and in accordance with plans prepared by the Brooklyn Grade Crossing Commission. Mr. Brackenridge has given a great deal of attention to the work of this Commission, in which he has returned plans without his approval several times because they contemplated a change of grade which he considered too radical.

Superintendent of the Bureau of Buildings reports for the quarter a volume of work, the estimated cost of which is \$18,166,960. This covers the proposed construction of 2,441 buildings, of which 1,268 are dwelling houses of various kinds. In addition to considering permits for all these buildings, the Bureau has investigated many complaints and passed upon many plans. For the details of this work, I refer you to the report of the Superintendent attached hereto.

Very respectfully yours,

MARTIN W. LITTLETON, President, Borough of Brooklyn.

October 15, 1905.

Hon. MARTIN W. LITTLETON, President of the Borough of Brooklyn:

Dear Sir—I have the honor to present herewith the report of the Public Works Department for the quarter ending September 30, 1905, attaching hereto the reports from offices of the Assistant Commissioner of Public Works, the Chief Engineer of Highways, the Superintendent of Sewers, the Superintendent of Public Buildings and Offices and the General Bookkeeper.

Ninety contracts were entered into during the quarter, sixty-three of which were for work to be done under the supervision and inspection of the Bureau of Highways, twenty-three under the Bureau of Sewers and two under the Bureau of Public Buildings and Offices, the total estimated cost of the same being approximately \$800,000. The Assistant Commissioner's report contains a list giving the title of the improvement for which the contract was drawn, the number of bids received, the amount deposited as security on the bids, the successful bidder, the dates upon which the bids were received, together with the estimated cost computed upon the figures submitted by the lowest bidder in each case. The report of the Superintendent of Incumbrances, which accompanies the report of the Assistant Commissioner, indicates the operations of that Bureau as to the disposition of complaints received, obstructions and incumbrances removed, permits issued and moneys received from all sources, for the quarter ending September 30.

Under the supervision of the Bureau of Highways 23.79 miles of improved pavement were laid consisting of:

Miles of asphalt and asphalt block	19.20
Miles of granite block	1.70
Miles of macadam	2.35
Miles of medina block	0.54

This brings the total mileage of pavement laid during the first three quarters of 1905 up to 44.64 miles, an increase of 5.49 miles over the amount of pavement laid during the same period last year, and an increase of 6.19 miles of pavement laid during the same period in 1903. These operations have resulted in reducing the cobble mileage of the borough to 85.14.

Upon assuming office in January, 1904, the cobble mileage of the borough was 153.95, or approximately 26 per cent. of the total paved mileage in the borough. The 85.14 miles of cobble pavement we now have is less than 13.6 per cent. of the total paved mileage of the borough. The following table of mileages shows the progress that has been made in pavement work for the quarter:

	June 30, 1905.	Sept. 30, 1905.
Asphalt block and asphalt	229.99	248.67
Granite	140.65	140.86
Cobble	101.63	85.14
Belgian	41.06	40.91
Trap block	1.24	1.24
Macadam	97.99	100.33
Brick	4.40	4.40
Medina	3.07	3.61
Wood	2.00	2.00
Total	622.03	626.76

During the quarter the low prices that have prevailed during the last year and a half continues. Work has been in progress on one hundred and sixty-nine contracts, of which one hundred have been completed. During the same quarter last year work was in progress on one hundred and fifty-one streets, of which fifty-four were completed.

On account of the economical figures received this year on the contract for repairing asphalt pavement where the guarantee has expired, we have been able to complete the work which we had to do for a considerably smaller sum. The total cost for the repairs for the first three quarters of 1905 was \$33,575 against \$43,533 for the same period in 1904. During this period we used in 1905, 46,209 cubic feet of asphalt mixture and 10,461 of binder. In 1904 to September 30, 41,578 cubic feet of asphalt mixture and 9,502 of binder had been used. Thus it will be seen that the amount of material used this year has been greater and the total cost for repairs less.

I beg to call your attention to the detailed statement of work done by the Repair Division of the Bureau of Highways, as indicated on page 9 of the Chief Engineer of Highways' report. On nearly every item an increase is shown in the amount of work done this year over that done last year. The one notable exception is under the heading of cobblestone pavement relaid. Less work has been done this year on this item than was done last year, because of the greatly decreased mileage of this form of pavement. The work of the Repair Division of the Bureau of Highways on macadam and dirt roads is greatly in excess of the work of a similar character done during 1904, there being an increase of nearly 10,000 square yards in the macadam repaired and relaid, an increase of 20 miles or nearly 60 per cent. of the miles of macadam repaired and cleaned, an increase of 5 miles on the miles of dirt roadway repaired, and an increase of 56 miles, or over 65 per cent. of the miles of gutters made and cleaned.

The following macadam roads have been resurfaced during the quarter:

Sixtieth street, from Eleventh avenue to New Utrecht avenue.
Fourth avenue, from Sixtieth street to Sixty-seventh street.
Eighty-eighth street, from Shore road to Seventh avenue.
Sixty-fifth street, from Fifth avenue to New Utrecht avenue.
Eighteenth avenue, from Seventy-ninth street to Eighty-fourth street.
Eighteenth avenue, from Forty-seventh street to Fiftieth street.
Seventy-ninth street, from Fort Hamilton avenue to Seventh avenue.
Seventh avenue, from Fifty-eighth street to Seventy-ninth street.

During the coming quarter the macadam roadways on the following streets will be resurfaced, contracts for stone for the same having already been let:

Midwood street, from Flatbush avenue to Rogers avenue.
Fifteenth avenue, from Forty-second street to Seventy-ninth street.
Sixtieth street, from Fort Hamilton avenue to New Utrecht avenue.

In many of the suburban sections which are developing with such remarkable rapidity, the matter of sprinkling macadam roads has been the subject of many inquiries, petitions and personal calls in the attempt to secure immunity from the dust nuisance which invariably attends a macadam road. Every effort has been made this year to increase the number of sprinklers in an effort to meet the demands. During the three quarters just ended we have expended 11,392 hours in this work, as against 5,512 hours spent during the third quarter of the year 1904. The increase you will note is over 100 per cent. The result has been a great decrease in the number of complaints received from this source.

In the chemical and physical testing laboratory a total of 866 samples have been examined, of which 532 were samples of hydraulic cements, and 334 were samples of asphalt and asphalt mixtures; 8,730 separate tensile tests were made of hydraulic cements, which is an increase of over 50 per cent. compared with the corresponding period last year. As a result of the work done and the information gained by the tests on the asphalt and the asphalt mixtures, the formulae used have been improved upon.

In the map room of the Bureau of Highways sixty-two assessment maps and lists in duplicate, have been prepared during the quarter, affecting 3,240 lots. Fifty-six plans for new work have been completed and 494 maps of miscellaneous character, such as profiles in duplicate for the Board of Assessors, change of grade maps, proposed parks, playgrounds and tables have been prepared and forwarded. Forty-seven estimates have been made for the Local Board, covering work for which the estimated cost has been nearly \$500,000.

I respectfully refer you for further details to the very complete report of the Chief Engineer of Highways.

The Sewer Bureau has completed during the third quarter 14.213 miles of sewer of all kinds. This is an increase of 3.6 miles over the accomplishments of the same quarter in 1904. The total value of the work in various stages of completion and preparation at the close of the third quarter this year is \$7,237,000. The corresponding amount for the same date last year was \$5,531,807. One hundred and eight sewer basins have been constructed during the quarter. During the quarter the Tenth avenue tunnel sewer was completed. This is one of the largest single pieces of sewer construction which has been undertaken in this borough, the cost of same being in excess of \$810,000. The accounts for the sewers in Avenue G, from Coney Island avenue to Flatbush avenue, and in Foster avenue, from East Ninth street to Flatbush avenue, etc., was also closed. The cost of these two sewers was over \$560,000. The statement of these and other sewer contracts completed during the quarter accompanies the Sewer Bureau's report. I would respectfully refer you to the Bureau of Seers' report also for details as to the nature and location of sewer work now in progress and also for the list of work for which contracts have been authorized and for which plans and specifications are in preparation.

A large and important piece of work of great importance to the whole city and particularly to the one portion that it effects, is the tunnel intake and pumping station for the improvement of the sanitary conditions of Gowanus canal for which we secured from the Board of Estimate and Apportionment \$750,000. I have been devoting considerable personal time and attention in an effort to facilitate the work on the preparation of these plans.

I would also remark in closing the report on the work of the Sewer Bureau, that there are now in preparation plans for the construction of relief sewers so badly needed in this borough for which the estimated cost is \$2,000,000. This is a part of the large system of relief sewers referred to in my annual report which will cost when completed approximately \$7,500,000.

In the Maintenance Division of the Bureau of Sewers 2,009 new sewer connections were made during the three months ending September 30, 1905, as against 1,446 during the same quarter in 1904; 5,202 basins were cleaned as against 4,829 last year; 7,642 cubic yards of deposit were removed from the sewer basins this year as against 6,979 removed last year. A total of 596,000 feet of pipe and brick sewers examined as against 280,000 during the three months of 1904, and 320,000 feet of pipe and brick sewers cleaned during the three months just ended as against 212,000 in 1904. These figures are taken from the Superintendent of Maintenance report and are indicative of the energy that has been displayed in that branch of the Sewer Bureau to maintain the maximum efficiency of the sewers already constructed.

The Borough Hall and the other municipal buildings received the attention of the Superintendent of Public Buildings and Offices as occasion required, the contract awarded to N. B. Smythe for the painting of the entire interior of the Kings County Court-house being perhaps the most important work when considered from the standpoint of total cost.

In the Kings County Hall of Records the Van Dorn Iron Works Company are proceeding with their metal case contract upon the completion of which depends the finishing of Mr. Jackson's contract for electric wiring and Cassidy & Sons' contract for gas fixtures.

The free floating baths have been placed in their winter quarters, they having been used by over 1,000,000 patrons during the summer season. Early in October the Duffield street bath building was opened, thus securing the completion of the first complement of public bath buildings in this borough.

For details as to the disposition of the funds for the quarter, I would respectfully refer you to the attached copy of the General Bookkeeper's report.

It is gratifying for me to be able to report that during the quarter I have approved plans for the elimination of the grade crossings on the Brighton Beach Branch of the Brooklyn Union Elevated Railroad Company's system and the Bay Ridge Branch of the Long Island Railroad Company's system, which work is to be done under the supervision and in accordance with the plans prepared by the Brooklyn Grade Crossing Commission. This is a work that I have been much interested in.

Before my appointment as Commissioner of Public Works I strongly advocated the enactment of laws providing for the removal of these two barriers across the borough, which would necessarily interfere with the proper growth of the borough. In due

time the law was passed and the Commission created, and they have during the last quarter submitted to this office plans for the elimination of grade crossings on both divisions. In several instances I have returned these plans because the change of grade provided by them for the intersecting streets was excessive and because by carrying the grade back farther from the intersection of the principal streets with the right-of-way of the railroads or by depressing the road a few feet farther than originally shown on the plan, the grade might be lessened.

At the present time the contractor is at work on part 1 of the Brighton Beach improvement and at several locations of the Bay Ridge Branch of the Long Island Railroad. The completion of these improvements will be a boon both to those owning property in the immediate vicinity of the two roads and also to those who are compelled to travel on the roads.

The cost of this vast improvement, of which the City is to pay half, is \$7,000,000. This half does not represent the whole cost of the improvement as the railroads at their own expense are to construct storage yards, terminals, etc., far in excess of this amount.

The reports from the several bureaus handed you herewith contain tables which show in a comprehensive form the many and varied operations of the individual bureaus which for the sake of conciseness I omit in this report.

Respectfully submitted,

J. C. BRACKENRIDGE, Commissioner of Public Works.

City of New York, Borough of Brooklyn,
Office of the Assistant Commissioner of Public Works,
Municipal Building.

Hon. JOHN C. BRACKENRIDGE, Commissioner of Public Works, Borough Hall,
Borough of Brooklyn:

Dear Sir—Herewith I beg to submit report of the transactions of the office of the Assistant Commissioner of Public Works, Borough of Brooklyn, for the three months ending September 30, 1905, together with the work done in the Bureau of Incumbrances and Permits during the same period.

During the past quarter ninety contracts were entered into in the three bureaus under the jurisdiction of the President of the Borough of Brooklyn, at a total estimated cost of \$796,091.70, as follows:

	Contracts.	Amount.
Bureau of Highways.....	63	\$474,114 06
Bureau of Sewers.....	25	304,838 64
Bureau of Public Buildings and Offices.....	2	17,139 00
	90	\$796,091 70

For information in detail as to the work done in this office and in the Bureau of Incumbrances and Permits, I would respectfully refer you to the statements hereto attached, which speak for themselves and cover the ground more fully.

Respectfully submitted,

JAMES S. REGAN,
Assistant Commissioner of Public Works.

The following is a list of sealed bids or estimates opened by the President of the Borough of Brooklyn from July 1 to September 13, 1905:

On July 6, 1905.

1. For grading, curbing and laying sidewalks on Ames street, from East New York avenue to Sutter avenue.
Six bids were received.
Deposited as security on bids, \$480.
2. For paving with asphalt on concrete Crystal street, from Liberty avenue to Belmont avenue.
Three bids were received.
Deposited as security on bids, \$600.
3. For paving with asphalt on concrete East Eleventh street, from Beverley road to Cortelyou road.
Four bids were received.
Deposited as security on bids, \$1,000.
4. For grading, curbing and laying sidewalks on East Fourteenth street, from Beverley road to Cortelyou road.
Three bids were received.
Deposited as security on bids, \$90.
5. For laying crosswalks on Fourteenth avenue, from Sixty-ninth street to Seventy-fifth street.
Five bids were received.
Deposited as security on bids, \$150.
6. For grading, curbing and laying sidewalks on Hopkinson avenue, from Eastern parkway to Blake avenue.
Six bids were received.
Deposited as security on bids, \$900.
7. For grading and curbing Sherman street, from Tenth avenue to Eleventh avenue.
Five bids were received.
Deposited as security on bids, \$250.
8. For paving with asphalt on concrete Starr street, from Irving avenue to Knickerbocker avenue.
Three bids were received.
Deposited as security on bids, \$225.
9. For setting combination curb and gutter on both sides of Thirteenth avenue, from Eighty-second street to Eighty-third street.
Two bids were received.
Deposited as security on bids, \$100.
10. For grading and curbing on Westminster road, from Beverley road to Cortelyou road.
Three bids were received.
Deposited as security on bids, \$195.

On July 19, 1905.

1. For furnishing all the labor and materials required for constructing sewer in Twentieth street, from Terrace place to Vanderbilt street, etc.
Six bids were received.
Deposited as security on bids, \$750.
2. For furnishing all the labor and materials required for constructing sewer in Sixty-first street, from Third avenue to Fourth avenue, etc.
Seven bids were received.
Deposited as security on bids, \$700.
3. For furnishing all the labor and materials required for constructing sewer-basins at the northeast and southeast corners of Dumont and Rockaway avenues, etc.
Five bids were received.
Deposited as security on bids, \$50.
4. For paving with asphalt pavement on concrete Ames street, from East New York avenue to Sutter avenue.
Four bids were received.
Deposited as security on bids, \$560.
5. For paving with asphalt pavement on concrete Bedford avenue, from Malbone street to Flatbush avenue.
Four bids were received.
Deposited as security on bids, \$6,000.
6. For paving with asphalt pavement on concrete East Fourteenth street, from Beverley road to Cortelyou road.
Four bids were received.
Deposited as security on bids, \$600.

7. For paving with asphalt pavement on concrete East Thirty-fifth street, from Glenwood road to Avenue H.
Four bids were received.
Deposited as security on bids, \$360.
8. For paving with asphalt pavement on concrete Seventy-fourth street, from Second avenue to Third avenue.
Four bids were received.
Deposited as security on bids, \$280.
9. For paving with asphalt pavement on concrete Westminster road, from Beverley road to Cortelyou road.
Four bids were received.
Deposited as security on bids, \$600.
10. For constructing cement concrete sidewalks in various places and on various streets.
Three bids were received.
Deposited as security on bids, \$120.
11. For constructing cement concrete sidewalks in various places and on various streets.
Three bids were received.
Deposited as security on bids, \$90.
12. For constructing cement concrete sidewalks in various places and on various streets.
Three bids were received.
Deposited as security on bids, \$180.
13. For constructing cement concrete sidewalks in various places and on various streets.
Three bids were received.
Deposited as security on bids, \$90.
14. For constructing cement concrete sidewalks in various places and on various streets.
Three bids were received.
Deposited as security on bids, \$120.
15. For constructing cement concrete sidewalks in various places and on various streets.
Three bids were received.
Deposited as security on bids, \$45.
16. For fencing vacant lots in various places and on various streets in the borough.
One bid was received.
Deposited as security on bid, \$15.
17. For fencing vacant lots in various places and on various streets in the borough.
One bid was received.
Deposited as security on bid, \$10.
18. For grading, curbing and laying sidewalks on Crescent street, from Liberty avenue to Pitkin avenue.
Three bids were received.
Deposited as security on bids, 150.
19. For grading, curbing, guttering and laying sidewalks on Eighty-first street, from Eleventh avenue to Thirteenth avenue.
Seven bids were received.
Deposited as security on bids, \$1,750.
20. For regulating and grading on Eleventh avenue, from Fifteenth street to Terrace place, etc.
Five bids were received.
Deposited as security on bids, \$625.
21. For grading, curbing and laying sidewalks on Eckford street, from Engert avenue to Briggs avenue.
Three bids were received.
Deposited as security on bids, \$90.
22. For grading, curbing and laying sidewalks on Engert avenue, from Graham avenue to Leonard street.
Three bids were received.
Deposited as security on bids, \$105.
23. For curbing and laying sidewalks on Sixty-second street, from Fourth avenue to Fifth avenue.
Four bids were received.
Deposited as security on bids, \$200.

On July 26, 1905.

1. For furnishing and delivering office furniture, carpets, shades, etc., for the offices of the County Clerk, Hall of Records, Borough of Brooklyn.
Six bids were received.
Deposited as security on bids, \$1,500.

On August 2, 1905.

1. For grading, curbing, guttering and laying sidewalks on Bay Twenty-sixth street, from Cropsey avenue to Eighty-sixth street.
Five bids were received.
Deposited as security on bids, \$750.

QUARTERLY REPORT OF THE CHIEF ENGINEER, BUREAU OF HIGHWAYS, BOROUGH OF BROOKLYN, FOR THE THREE MONTHS ENDING SEPTEMBER 30, 1905.

City of New York, Borough of Brooklyn,
Office of Commissioner of Public Works,
Bureau of Highways, Chief Engineer's Office,
October 1, 1905.

Hon. JOHN C. BRACKENRIDGE, Commissioner of Public Works:

Dear Sir—I submit herewith report of the operations of this Bureau for the quarter ending September 30, 1905.

The weather conditions have been such that the work has proceeded very rapidly and more pavement has been laid during this quarter than for the same period ever before. The amount in detail is as follows:

	Miles.
Asphalt and asphalt block.....	19.20
Granite block.....	1.70
Macadam.....	2.35
Medina block.....	0.54
Total.....	23.79

This is a very favorable showing, as during the same quarter last year, when a larger number of contracts were in force, there were laid but 26.8 miles. During the first three quarters of this year, however, there have been laid 44.64 miles, while in 1904 there were laid 39.15 miles, and in 1903 38.45 miles, for the same period.

I show herewith mileage of pavements to the end of the quarter, as compared with that for the quarter ending June 30, 1905:

	June 30, 1905.	September 30, 1905.
Asphalt and asphalt block.....	229.99	248.67
Granite.....	140.65	140.86
Cobble.....	101.63	85.14
Belgian.....	41.06	40.91
Trap block.....	1.24	1.24
Macadam.....	97.99	100.33
Brick.....	4.40	4.00
Medina.....	3.07	3.61
Wood.....	2.00	2.00
Total.....	622.03	626.76

I append table showing in detail contracts registered during the quarter.

I also append a table showing the streets upon which work has been carried on during the quarter. You will notice that the work in progress during this time was upon one hundred and sixty-nine contracts, of which one hundred were completed. This includes work on five private contracts, but which were carried out under the supervision of this Bureau. During the same quarter last year work was in progress on one hundred and fifty-one contracts, of which fifty-four were completed.

Map Room.

Since the last quarterly report was submitted the force of this office has been increased by the appointment of two Topographical Draughtsmen, one on July 24 and the other on August 1. The present force consists of an Assistant Engineer in charge, two Transmitters, three Draughtsmen and one Clerk. That this increase was necessary is shown by the following:

On July 1 there were on hand thirty-three assessment lists to be prepared and since that date thirty-four more have been added. All of these, with the exception of five, have been completed. In addition to these there are some twenty-six contracts completed, the certificates for which have not been received in this office and for which assessment lists must be prepared.

The following statement shows the completed work for the quarter:

Cesspools cleaned and repaired.....	11	...
Twenty-five washouts, cubic yards of fill used.....	2,412	...

Three hundred and sixty-four feet of trench made.
One thousand and forty feet of drain pipe laid.
Gate and fence at North Eighth street corporation yard repaired.
Bridge at Montgomery street, between Franklin and Washington avenues, repaired.
130 loads of miscellaneous gutter (3.4 miles) cleaned after repair gangs.
130 loads of flagging carted from Corporation Yard to work, 20,830 linear feet.

Linear feet of street (3.9 miles) cleaned after repair gangs, 18,226 linear feet.
The following macadam roads have been resurfaced:
Sixtieth street, from Eleventh avenue to New Utrecht avenue.
Fourth avenue, from Sixtieth street to Sixty-seventh street.
Eighty-eighth street, from Shore road to Seventh avenue.
Sixty-fifth street, from Fifth avenue to New Utrecht avenue.
Eighteenth avenue, from Seventy-ninth street to Eighty-fourth street.
Eighteenth avenue, from Forty-seventh street to Fiftieth street.
Seventy-ninth street, from Fort Hamilton avenue to Seventh avenue.
Seventh avenue, from Fifty-eighth street to Seventy-ninth street.
There still remains to be completed, for which we have contracts to supply us with stone delivered on streets, the following streets:
Midwood street, from Flatbush avenue to Rogers avenue.
Fifteenth avenue, from Forty-second street to Seventy-ninth street.
Sixtieth street, from Fort Hamilton avenue to New Utrecht avenue.

Of these the contract for stone on Midwood street has not as yet been registered. On Fifteenth avenue one-half of the material has been delivered. On Sixtieth street one-third of the material has been delivered. The deliveries on this contract have been so irregular that much time has been lost and the City has suffered a very considerable loss in that this contract should have been completed September 1. We would then have had this roller gang for use on macadam maintenance work, work which is imperative if the roads are to be kept in good condition.

One roller gang has been employed on maintenance work since September 1. The amount of work that can be done by one gang for one month is very limited, so that it cannot be said that the maintenance work on macadam is up to the mark. If we are to do as much resurfacing work next year as we have done this year, and it being necessary that we should do it, it is advisable that another steam roller be purchased in order that a gang may be kept on maintenance work throughout the season.

Asphalt Repairs.

Owing to the thorough repairs made to the asphalt pavement during the spring and early summer but one gang was necessary on this work during July and August. Beginning the first week in September three gangs were put on these repairs and the work is progressing rapidly. It is aimed to have all the asphalt pavement out of guarantee in good repair soon after the 1st of November in order that there can be no doubt that when the season closes the streets will be found in good condition.

Chemical and Physical Testing Laboratory.

A summary of the number of samples is as follows:

Hydraulic cements.....	532
Asphalt and asphalt mixtures.....	334
Total	866

The number of separate tensile tests of hydraulic cements was 8,730. This shows an increase of over 50 per cent. for the corresponding period last year. This result is especially gratifying, as it was due not alone to increased activity in this Bureau, but also to the large number of tests which we have carried on for the Bureau of Sewers. The strength developed by the various brands used has been in most cases equal to the standard developed by high grade cements for several years past. Tests of asphalt mixtures have been carried on from day to day, samples of the material being taken directly from the street as it is being laid and carried to the laboratory. The number of samples examined shows an increase of 11 per cent. over those examined in 1904. The same high grade of asphalt mixture has been maintained, irrespective of the kind of asphalt used, and in not a few cases formulas have been improved on.

TOPOGRAPHICAL BUREAU.

Street Lines.

In the determination of street lines the work was mostly with the streets about the new approaches of the Williamsburg Bridge. Considerable time was also taken in surveys to determine and hold the lines of streets affected by street improvements. Maps for adoption, for filing, and miscellaneous maps were prepared as heretofore; perhaps the most important of these maps completed was for the extension of Grand street at the Williamsburg Bridge.

The main features of street opening work consisted in the preparation of a large number of reports, statements of facts that would indicate an easement acquired for public use, and the usual street opening maps used by the Corporation Counsel's office in condemnation proceedings. Of the latter the final benefit maps of Railroad avenue and the draft damage map of Grand street extension at the Williamsburg Bridge are probably the most important. As heretofore a large amount of oral information has been given which would not figure in a report of this kind. This information often took considerable time and almost always interrupted other work.

Work completed for the three months ending September 30, 1905:

A statement giving in detail the work completed for this quarter is inclosed herewith. This statement takes no notice of the work started or such as has not yet been completed. A great deal of routine work of the office which took considerable time cannot well be included in this statement of work completed. This routine work comprises the following:

The care and preservation of monument stones.
The keeping of all records pertaining to this and other branches of topographical work.
The accumulation of records now missing.
The investigation of reports.
Replying to numerous applications for information, etc.
The work accomplished comes under four divisions, and is as follows:
To retain, determine and fix on the ground the lines of the existing street system, and to fix the new street lines as they are adopted.
This work includes the proper preservation and replacing of all monument stones and the placing of the new monument stones in position wherever they are needed. It necessitates the surveying and computation of traverse lines for the determination of block distances and angles; the determination of standards of measurements, and the compilation and care of monument records and maps.

A—Field Work.

Accurate traverses were carefully run as follows:

a—For the Determination of Street Lines.

1. Division avenue, Bedford avenue and Broadway.
2. Division avenue, Bedford avenue, Heyward street and Broadway.
3. Bedford avenue, Broadway, Driggs avenue and Division avenue.

About 32 additional small traverses were run in connection with the approaches to the Williamsburg Bridge.
Additional precise survey lines were run out for the determination of 11 street lines.

Monument stones, fixing streets:

Of 473 monuments looked for, 238 were not found, 73 were reported lost, and 162 were found, of which 124 were above the surface and 38 below the surface. In 43 instances accurate references were taken. One monument was raised, 1 reset, 1 lowered, 3 were tested and 2 had covers put on.

B—Office Work.

The usual records were kept of all monument stones.

A more systematic effort was made to index and keep the records pertaining to monument stones and street lines, with the result that considerable additional information is becoming available. No time could be found for computations.

2. Maps Affecting Changes in the Established Street System of the City.

This division includes all work affecting changes in lines of existing streets, parks, closing and laying out streets, and changes in the established elevation of streets. It necessitates the preparation of maps for adoption and for filing, and a variety of miscellaneous maps.

These consist of four maps, one each of Montrose avenue extension, Grand street extension, Bedford avenue extension and of a map of Lawrence avenue, from Ocean parkway to Newkirk avenue.

3. Streets and Street Openings.

A mass of oral information was given on this subject.

The work completed is recorded under the following subdivisions:

I. Certificates as to the dedication to public use of streets.

II. Maps prepared for the Corporation Counsel's office in condemnation proceedings.

I. Certificates as to the Dedication to Public Use of Streets.

Certificates were furnished as to the dedication to public use of a number of streets for which surface or subsurface improvements are contemplated in conjunction with affidavits of property owners or users of streets; these certificates are made out to prove that the public has an easement to the use of the street, and thus street opening proceedings preliminary to needed improvements are avoided. These certificates now practically consists of a statement of facts tending to prove dedication, which are presented for an opinion to the Corporation Counsel. It is to be expected by this arrangement that not only will differences of individual opinions be avoided, but furthermore the legal rights of the public to a street will be clearly defined in each case. These certificates containing a statement of facts are now all made in the same way, irrespective of their use in connection with surface improvements or with sewers.

Certificates forwarded were the following:

II.—Maps Prepared for the Corporation Counsel's Office in Condemnation Proceedings.

Wherever it is necessary, resolutions are passed by the Board of Estimate and Apportionment to initiate street opening proceedings. On request of the Corporation Counsel's office this office has prepared a number of maps. The work consists in making surveys, searches, technical descriptions and maps for the Commissioners of Estimate and Assessment in the matter of acquiring title to streets, public places, parks, etc., etc. This includes a number of maps of different kinds that are used in condemnation proceedings in the Bureau of Street Openings of the Corporation Counsel's office.

A—Field Work.

The field work consists of surveys by field parties for the maps given below. The necessary surveys were made for the maps completed in the course of three months. A number of additional locations were made, including a survey for Robinson street.

B—Office Work.

This comprises the preparation of maps as follows:

- a—Rule maps in triplicate and technical descriptions of land to be taken in street opening proceedings.
- b—Draft damage maps, which give dimensions of every plot of land to be taken, encroachments on the streets, property-owners and any information of service to the Commissioners.
- c—Draft benefit maps showing every lot included within the limits of the assessment for the opening and giving dimensions and block and lot numbers.
- d—Final damage maps in duplicate and final benefit maps in triplicate.
- e—Rule maps and technical descriptions for closing avenues and streets.
- f—Precise surveys made in connection with street openings.
- g—Inspection and testimony.
- h—Amendments and additions to street opening maps.

a—Rule Maps and Technical Descriptions.

These maps are sent in triplicate and have technical descriptions showing the land taken in street opening proceedings. They are used by the Corporation Counsel in his application to the Supreme Court for the appointment of Commissioners of estimate and assessment in the matter of acquiring title to streets.

e—Rule Maps and Technical Descriptions for Closing Avenues and Streets.

No rule maps of this nature were requested by the Corporation Counsel's office in the course of three months.

f—Profiles Made in Connection With Street Openings.

No profiles of this nature were made by this Bureau.

g—Inspection and Testimony.

Whenever a draft damage map of a street was completed it was taken on the ground, and the existing conditions were carefully inspected and compared with the map.

h—Amendments and Additions to Street Opening Maps.

As circumstances require it amendments and additions are made to street opening maps that were previously forwarded.

The following were forwarded:

I. Draft Benefit Maps.

1. Eleventh avenue, between Fifteenth street and Terrace place.

The subdivisions of one block were changed, resulting in the loss of one map number.

II. Final Damage and Benefit Maps.

1. Eleventh avenue, between Fifteenth street and Terrace place.

The same change as noted above.

4. To keep a record of everything pertaining to the items of topographical work. As far as time permitted a complete record was kept of all current work. As already stated more systematic efforts have been begun in this direction, and it is hoped they may be continued and further enlarged upon because of their great utility. As already noted the records of the Bureau serve a useful purpose in giving valuable information to other departments of the City and to the public generally.

Triangulation of the Borough of Brooklyn.

Very little could be done on the preparatory work for the triangulation that is carried on by the engineers of the United States Coast and Geodetic Survey, under the auspices of the Board of Estimate and Apportionment. We were behind hand in many other matters so that only the most pressing immediate needs could be attended to. It is hoped, however, that additional men will soon be obtained who may be detailed to this work.

Summary of work for the three months ending September 30, 1905:

1. Determination and Preservation of Street Lines.

The results of the work were embodied in maps for adoption and maps for filing and in street opening maps. The field for this work is very large and it deserves much more attention than it has hitherto received.

2. Maps for Adoption and Maps for Filing and Miscellaneous Maps.

On July 1, 1905, 18 items were pending; in the course of the quarter 31 new items were added, and 28 items were disposed of. The 28 items completed comprise a total of 101 maps.

3. Streets and Street Openings.

The items here noted comprise requests from the Corporation Counsel's office for the different kinds of maps already noted in this report. On July 1, 1905, 28 items were pending; in the course of the quarter 30 new items were added, and 25 items were disposed of. The 25 items disposed of comprise a total of 45 maps and, in addition, 207 sheets and amendments to 4 maps. Certificates as to the dedication to public use were furnished for 45 streets.

On July 1, 1905, 121 street opening proceedings were pending; in the course of the quarter 2 proceedings were initiated, 2 proceedings discontinued and 5 proceedings were confirmed, leaving a total of 117 proceedings pending October 1, 1905. From January 1, 1898, to September 30, 1905, a total of 115 street opening proceedings were confirmed.

4. Record of Topographical Work.

This work covers many general items that cannot be readily summarized in the form of a report.

5. Reports and Letters.

In the course of the three months ending September 30, 1905, 131 communications were received and 345 written reports and letters were sent. The letters and reports sent are as follows:

1. Reports on conditions of streets in relation to opening proceedings or improvements. (These reports were made either on petitions presented to the Local Board, or were for the use of other departments of the borough).....	175
2. Reports accompanying street opening maps.....	26
3. Reports on change of lines, laying out, closing etc., and change of grades.....	25
4. Miscellaneous reports.....	119
Total.....	345

The field is large for the necessary topographical work of this borough, and with a projected enlargement of the working force it is expected much other urgent work can be done.

Respectfully submitted,
GEO. W. TILLSON, Chief Engineer.

The City of New York,
Office of the President of the Borough of Brooklyn,
Bureau of Sewers,
Brooklyn, October 24, 1905.

Hon. JOHN C. BRACKENRIDGE, Commissioner of Public Works:

Dear Sir—I have the honor to submit a report of the transactions of affairs in that branch of the Department of Public Works, known as the Bureau of Sewers, for the third quarter of the year 1905.

I also submit with this writing, and make the same a part of my report, a statement from the Chief Engineer of Sewers relating to the construction of new sewers and the business transacted under the Engineering Division of this Bureau; also a statement from the Superintendent of Maintenance giving the conduct of the business in maintaining and cleaning the existing sewerage system in the borough.

You will notice in both the reports of the Chief Engineer and the Superintendent of Maintenance that tabular statements are shown giving details of the work performed.

I submit herewith a tabulated statement of the financial transactions concerning this Bureau, setting forth the money expended, the charges against the appropriation accounts as well as those charged against the various bonded accounts, for which new construction work is paid from.

A summary is given in the Chief Engineer's report setting forth the status of the contracts in force. You will note that the value of the work under supervision amounts approximately to \$7,237,000.

It is gratifying to me to testify to the continued efficiency and energy of the officers and employees of this Bureau. I have found them at all times willing and ready to perform cheerfully the duties imposed upon them.

Yours respectfully,

ARTHUR J. O'KEEFFE, Superintendent of Sewers.

Reinforced concrete, 30-inch to 120-inch.....	3,974	.752
Total.....	75,046.9	14.213

The mileage, however, is not increased by this amount, for the reason that some of these sewers were reconstructed, some repaired and some removed, this amount being 3,414.7 feet, or 0.647 mile; the net mileage being, therefore, 13,566 miles, which increases the mileage of the borough on June 30, 1905 (743.097 miles), to 756.663 miles.

In addition to, and not included in the above, the work of taking up and relaying the sewer in Eighty-fifth street, between First avenue and Third avenue, has continued to the extent of 760.5 feet, 0.144 mile. This does not affect the mileage.

The number of sewer basins built during this quarter is 107, which, with the basin built on requisition, on the northeast corner of Humboldt street and Debevoise street, makes the total basins now connected with the sewerage system 9,126.

You will find appended to this report tabular statements, divided in such manner as to show our work in detail. These include a table of contracts entered into during the quarter; a table of contracts completed during the quarter and the amount expended on same; a table showing the estimated amount of work performed on contracts which are in progress; a table showing contracts for which bids have been received, which are in the course of consummation; also a table showing the work performed by the draughting forces for contracts authorized by the Board of Estimate and Apportionment, which also require the preparation of specifications. A table will also be found which sets forth where the work is being performed and how many linear feet of sewer, etc., have been completed in each contract.

From these statements you will see that there is being supervised by your engineering forces work to the value of \$7,237,268.62.

I wish to thank you for the courtesies you have extended me, and for the confidence you have placed in me.

Yours respectfully,

HENRY R. ASSERSON, Chief Engineer of Sewers.

Borough Hall.

A new flag pole, at a cost of \$96, the result of a competition which elicited bids ranging from that figure to \$1,200, made necessary by the old flag pole having been shattered by lightning, was placed on this building in August; the iron scroll work of the elevator and the elevator gate were repaired; the furniture of the Corporation Counsel's office on the third floor was thoroughly repaired; a new flat top desk was furnished for the Borough President's office; the carpets and rugs in the various offices throughout the building were taken up and cleaned; over the law library of the Corporation Counsel's office a new ventilator, at a cost of \$174, was placed; the tiling on the second floor corridor was repaired, and the roof over the main offices of the Bureau of Buildings was renewed.

Small repairs to the plumbing fixtures in various parts of the building were made at a total expense of \$150.

Municipal Building.

At the request of Deputy Receiver of Taxes Jacob S. Van Wyck, and to comply with the requirements of the surety company in which the cashier of Mr. Van Wyck's office is bonded, I caused to be reconstructed the cashier's cage, so that that official would be better protected during the annual rush to pay taxes; new electric lamps were installed in Mr. Van Wyck's office, and new tin signs to indicate the parts of the office at which tax payments of the various sections of the borough are received were placed in position; new toilet accommodations were placed in Room 42B, and lighting fixtures in Assistant Engineer Van Buskirk's room on the second floor were rearranged, so as to provide additional light.

Kings County Court-house.

All of the brick work of the boilers were repaired; new grate bars furnished, and the blow-down pipes in the boiler room covered with asbestos; metal hoods were placed over the registers and radiators throughout the building to prevent the heat discoloring the walls; new shelving for the Law Library was placed, at a cost of \$373; the office of the Chief Clerk of the County Court was divided by an oak and glass partition; a new window was cut into the open in County Judge Crane's private room; the large oil paintings in the various court rooms were repaired and their frames regilded; the court bench and platform were reconstructed to more conveniently suit the requirements of the Justices, and a new platform and an addition to the Judge's bench of the Supreme Court, in Room 28, was arranged for.

The most extensive improvement to this building during the quarter was comprehended by an advertised contract, for which Mr. N. B. Smyth was the lowest bidder, for the painting of the entire interior of the structure. Mr. Smyth's bid was \$11,739. The work is now almost completed. It has proved to be one of the best executed contracts under my administration. The building was sadly in need of this attention, and Mr. Smyth's work has been commended by the officials generally located in the Court-house.

Kings County Hall of Records.

Most of the contracts for this building, which have been pending for some years, have been completed, or are approaching the last stages of completion. Thomas Dwyer's contract for the reconstruction of the building will be completed before the close of this month. Mr. Dwyer's modified contract for miscellaneous changes, his contract for the Surrogate's Court and for extra foundation work, are practically completed; his contract for remodeling the front entrance should be completed by October 9, the only work remaining to be done on this contract consisting of the completion of the hardware and the furnishing of the glass globes for the candelabra; Mr. Jackson's contract for electric wiring and the Cassidy & Sons' contract for gas fixtures cannot be completed until the Van Dorn Iron Works Company's contract for metallic cases has been finished, it being figured that it will require about two weeks to complete all of the work after the metallic cases are installed. The Van Dorn Company's contract for metallic cases has not gone along satisfactorily from the first, and I cannot, with any degree of accuracy, calculate when it will be completed. The company estimate that the work will be finished by November 15. Chiefly the work yet to be done under this contract consists of installing metallic cases in the Surrogate's court room, all of the partition work and the furnishing of counters in the County Clerk's offices, and metallic cases in the County Clerk's old record room.

Kings County Jail.

Besides the overhauling and repairing of the entire heating plant in this building in September, I had the laundry range thoroughly repaired, whitewashed the stable, in keeping with an order of the Board of Health, placed new skylights and ventilators on the cooks' house, and made sundry repairs to the plumbing as occasion required.

Brooklyn Disciplinary Training School.

I have declined to honor a number of requisitions for repairs to the building occupied by this institution, for reasons which I set forth in a recent communication to Borough President Littleton, but all absolutely necessary repairs to the structure have been made. The heating apparatus is now being thoroughly overhauled and placed in condition for use as soon as the cold weather sets in.

Free Floating Baths.

The five river baths of the borough, after a summer season of unusually large patronage, were towed to their winter quarters the latter part of September and laid up for the winter. It is a cause of great satisfaction that not one of the more than one million patrons of these baths this summer met with a serious accident.

Firemen's Hall.

This building, which is owned by the City and occupied by the Eastern District Veteran Firemen's Association, was a source of some little expense during the quarter. I had the roof and the gutters repaired and repainted at a cost of \$162, and painted and kalsomined the large room on the first floor, besides the main hall and vestibule.

Magistrates and Municipal Courts.

Repairs of a miscellaneous character to the eight City Magistrate's and the five Municipal Courts buildings were made as necessity required. In the new Gates avenue building I changed the bench of the Municipal Court to suit the convenience of Justice Van Wart. At the Eighth District City Magistrate's Court at Coney Island, I repaired the cell gates and locks and the iron door leading from the cells to the court room; at the Fifth District City Magistrate's Court, on Manhattan avenue, I made some repairs to the furnace and its connections, and at the First District City Magistrate's Court, on Adams street, I reconstructed the skylight over the court room and made other incidental repairs, in order to comply with a complaint from the Board of Health. The plumbing of this building also received considerable attention during the quarter.

Public Baths and Comfort Stations.

After considerable delay on the part of the contractor for the Duffield street bath building, which should have been ready for patronage months ago, I finally succeeded in having the building in a condition to warrant its opening early in October. Towards the latter part of this quarter the building was practically ready to be placed in commission; additional delay, however, ensued by reason of my inability to secure transfers of Attendants, Enginemen and Stokers from Manhattan, whom I preferred rather than to take new and inexperienced men from the Civil Service list. This matter is now adjusted, and the bath will be ready to receive patrons before the first week in October. The four other bath buildings have called for repairs of a varied character during the quarter. In the Hicks street building the marble work was pointed up; considerable repairs to the plumbing of the Montrose avenue building were made; new mixing valves were placed in the Pitkin avenue building, and repairs to the automatic faucets and washbasins were made in the Montrose avenue structure.

The six comfort stations were somewhat of an expense in the plumbing relation.

Wallabout Market.

Except for the expense of refilling the brooms used in the street sweepers in the Wallabout Market, the Bureau has been put to no expense in that field of its activities.

Bureaus of Sewers and Highways.

I have supervised the construction of a number of propositions incidental to advertised contracts during the three months just closed for both Superintendent O'Keefe and Chief Engineer Tillson's Bureaus, and have exercised due vigilance in purchases for these two bureaus of quantities of supplies of different kinds.

Sanitary Bureau.

The following communications were received from the Sanitary Superintendent:
1st. Weekly reports of the Sanitary Superintendent. Ordered on file.
2d. Weekly reports from the Willard Parker, Reception, Riverside and Kingston Avenue Hospitals. Ordered on file.

3d. Certificates in respect to the vacation of premises at No. 321 East One Hundred and Sixteenth street, Borough of Manhattan.

On motion, the following preamble and resolution were adopted:
Whereas, The Sanitary Superintendent has certified to this Board that the building situated upon lot No. 321 East One Hundred and Sixteenth street, in the Borough of Manhattan, has become dangerous to life, and is unfit for human habitation because of defects in the plumbing and draining thereof, and because of the existence of a nuisance on the premises which is likely to cause sickness among its occupants.

Ordered, That all persons in said building situated on lot No. 321 East One Hundred and Sixteenth street, in the Borough of Manhattan, be required to vacate said building on or before December 27, 1905, for the reason that said building is dangerous to life, and is unfit for human habitation because of defects in the plumbing and drainage thereof, and because of the existence of a nuisance on the premises likely to cause sickness among its occupants.

And further, that this order be affixed conspicuously on the front of and in said building and be served as the law requires, under the direction of the Sanitary Superintendent.

4th. Report on compliance with certain orders to vacate premises, etc.

On motion, it was

Resolved, That the following orders be and are hereby rescinded, for the reason that the causes for the same have been removed:

Mortimer Denyse, December 16, 1905.

Report relative to the vacation of the premises heretofore occupied by the Department of Health at No. 1237 Franklin avenue, Borough of The Bronx, was received from the Assistant Chief Clerk assigned to duty in the Borough of The Bronx, and ordered on file.

The notice of the expiration on December 31, 1905, of the lease of the premises Nos. 1034 and 1036 East One Hundred and Thirty-fourth street, Borough of The Bronx, now occupied by the Department of Health as a stable in the said borough, was received, and the Secretary was directed to notify the owner of the premises, J. H. C. Johansmeyer, that this Department has elected to renew for the term of one year, commencing January 1, 1906, upon the same terms and conditions as contained in the lease heretofore made between the owner, J. H. C. Johansmeyer, of the premises above mentioned, and The City of New York, and on recommendation of the President, it was

Resolved, That an application be made, and is hereby respectfully made to the Honorable, the Commissioners of the Sinking Fund, for the lease of the premises situated at Nos. 1034 and 1036 East One Hundred and Thirty-fourth street, Borough of The Bronx, to be used for the purpose of an ambulance and disinfecting stable, for the housing of ambulances, disinfecting wagons and horses of the Department of Health for a period of one year, commencing January 1, 1906, with the privilege of renewal, at an annual rental of \$950, and otherwise upon the same terms and conditions as contained in the former lease heretofore made between J. H. C. Johansmeyer and The City of New York.

Upon recommendation of the President, the following preambles and resolutions were adopted:

Whereas, The needs of the children attending the public schools of The City of New York, and other persons suffering from tuberculosis, scarlet fever, diphtheria and measles, as well as patients sent to the Trachoma Hospital of the Department of Health, demand the continuance of the work performed by the nurses in the employ of the Department of Health during the year 1905; and

Whereas, The Board of Estimate and Apportionment has made no provision in the Budget of the Department of Health for the continuance of said work during the year 1906; be it

Resolved, That the work performed by the trained nurses in the Department of Health in caring for certain varieties of contagious and communicable diseases in the schools and tenements, having been so useful during the year 1905, the same should be continued during the year 1906; it is therefore

Resolved, That pursuant to the provisions of chapter 535 of the Laws of 1893, the Board of Health of the Department of Health of The City of New York, hereby certifies to the Board of Estimate and Apportionment that the sum of seventy thousand dollars (\$70,000) should be appropriated for the year 1906 for the purpose of defraying the necessary expenses required to be incurred by the Board of Health for the preservation of the public health in paying the salaries of nurses to be employed by the Department of Health in caring for certain varieties of contagious and communicable diseases in the schools and institutions of The City of New York, and for indigent persons suffering from tuberculosis.

On recommendation of the President, the following preambles and resolutions were adopted:

Whereas, The President of this Board lately obtained options on certain parcels of land located in the Town of Mt. Hope, Orange County, State of New York, containing 1,200 acres, more or less, for the purpose of locating a sanatorium for the care and treatment of persons, resident in The City of New York, affected with tuberculosis; and

Whereas, The Board of Estimate and Apportionment at its meeting held July 14, 1905, did authorize the issue of Corporate Stock to the amount of \$250,000 (two hundred and fifty thousand dollars) for the purpose of providing means to acquire the site located in the Town of Mt. Hope, Orange County, State of New York, covered by the options obtained by the President, and for the erection of proper and suitable buildings to be used for the care and treatment of such persons as were admitted; and

Whereas, No provision has been made for the moneys required for the care of the patients to be treated in this sanatorium for the payment of the salaries of Hospital Physicians, Internes, Nurses, Orderlies and other employees thereat or for the purchase of supplies and such contingencies as are required; therefore be it

Resolved, That, pursuant to the provisions of chapter 535 of the Laws of 1893, the Board of Health of the Department of Health of The City of New York hereby certifies to the Board of Estimate and Apportionment that the sum of \$150,000 (one hundred and fifty thousand dollars) should be appropriated for the year 1906 for the purpose of defraying the necessary expenses required to be incurred by the Board of Health for the preservation of the public health in caring for the patients to be treated in the Tuberculosis Sanatorium, conducted and operated by the Department of Health of The City of New York, in the Town of Mt. Hope, Orange County, State of New York, for the payment of the salaries of Hospital Physicians, Internes, Nurses, Orderlies and other employees thereat and for the purchase of supplies and such contingencies as are required.

BOARD OF ESTIMATE AND APPORTIONMENT

EXTRACT FROM

MINUTES, BOARD OF ESTIMATE AND APPORTIONMENT, CITY OF NEW YORK, MARCH 2, 1906.

The Secretary presented the following:

CITY OF NEW YORK, OFFICE OF THE MAYOR, }
February 16, 1906. }

To the Secretary, Board of Estimate and Apportionment.

SIR—The Mayor has this day approved the resolution adopted by the Board of Estimate and Apportionment on February 16, 1906, fixing a date for a public hearing on the application of the Seaboard Refrigeration Company, and has designated the Brooklyn "Daily Eagle" and the Brooklyn "Citizen" as the daily newspapers in which notice of such hearing shall be published.

The resolution, duly approved, is herewith returned.

Respectfully,

FRANK M. O'BRIEN, Secretary.

Which was ordered printed in the minutes and filed.

Seaboard Refrigeration Company.

The public hearing as advertised for this day in the matter of the application of the Seaboard Refrigeration Company for a franchise to construct, maintain and operate a pipe line under and along certain streets in Coney Island, Borough of Brooklyn, for the transportation of refrigeration to supply customers along the lines of its mains, was opened.

Thomas D. Rambaut, of counsel, appeared in favor of the proposed grant and presented a petition signed by owners and lessees of property in Coney Island requesting that the franchise be granted.

No one appeared in opposition.

The Chair declared the hearing closed.

The Secretary presented the following:

Board of Estimate and Apportionment, }
Bureau of Franchises, No. 280 Broadway, }
February 26, 1906. }

Hon. GEORGE B. McCLELLAN, Mayor, Chairman of the Board of Estimate and Apportionment:

SIR—The Seaboard Refrigeration Company, under date of November 2, 1905, by its president, Mr. Charles E. Booth, petitions the Board of Estimate and Apportionment for the right or franchise to lay a system of refrigeration conduits, with all the requisite fittings and equipment for the proper circulation of such substances as may be employed in the process of refrigeration in the streets of Coney Island, Borough of Brooklyn, City of New York.

The petition designates certain streets in which the company wishes to lay pipes as follows: West Eighth street, West Twelfth street and West Twenty-first street, between Surf and Neptune avenues; Neptune avenue, between West Twenty-first and West Eighth streets; and Surf avenue, between West Twenty-fifth and West Fifth streets. A map accompanies the petition showing the location of a plant and existing pipes which are to be used by the company. The pipe line applied for is shown by red lines. A section of the proposed pipe line and a typical section of a manhole to be employed are also indicated upon the map.

The Seaboard Refrigeration Company was incorporated pursuant to the provisions of the Business Corporations Law of the State of New York and filed its certificate in the office of the Secretary of State on September 14, 1904. The business of the company as set forth is to erect and trade in all kinds of cold storage plants and systems and to install ice or refrigerating machines and to manufacture, sell and supply refrigerated air, ice and other cooling agents and to carry on a business relating to refrigeration or refrigerating machinery.

The certificate of incorporation states that the duration of the company is to be perpetual and the capital stock is to be \$100,000, one-half of which is to be preferred stock with accumulative dividends at 8 per cent, the other half to be common stock. At the present time only a small amount of stock has been issued for which about \$500 has been received. Officers of the company now own a plant situated on the westerly side of West Eighth street, between Surf and Neptune avenues, and also about 4,000 feet of pipe line, more than one-half of which is on private property, and which will be subsequently turned over to the company, when it receives a franchise. This plant, I am informed, has been owned by several companies since it was established, among which are the Lange Refrigerating Company, the West Brighton Refrigerating Company, which filed its certificate of incorporation on February 9, 1897, and the Security Refrigerating Company, which filed its certificate of incorporation June 15, 1901.

The business has not been in operation for more than two years. The president of the company has frankly stated that a careful search by him has failed to reveal a record of any franchise being given by the authorities to any of the preceding companies. The existing pipe line is so antiquated in design and in such poor repair that it will be impossible to use it without a large outlay for reconstruction.

The object of the present application is to secure the right to enlarge and equip the system with the latest improvements, in order to supply refrigeration to patrons. This business the company believes will be quite large, owing to the enormous growth in the vicinity of the plant, of amusement enterprises and restaurants during the past two or three years.

The streets in which rights are applied for cover an area much larger than is anticipated will be needed for the present, but it is believed by the company that such rights will eventually be required to enable it to increase its business as may be necessary in consequence of the increase in the number of enterprises desiring refrigeration along the proposed route.

Proposed Pipe Line Structure and Method of Operation.

The proposed pipe line structure, as described by representatives of the company and indicated on the map submitted, will consist of three pipes inclosed in one conduit, 14 inches in diameter, all to be placed approximately 2 feet and 6 inches below the surface. The total length of the conduit line applied for is about 13,000 feet. Manholes are to be placed approximately 500 feet apart to insure quick access in case of emergency.

The method of refrigeration which will be used by the applicant company is the ammonia process—that is, cooled ammonia is forced through the pipes at a high pressure and expanded at the cold storage box or room. It is stated that the pressure in the pipes will be about 150 pounds per square inch, and that the pipes will be of sufficient strength to resist a pressure of 500 pounds per square inch. It is claimed that the method of refrigeration as proposed by the company is much more convenient to the consumer than that by the use of ice, being much cleaner and requiring little or no attention.

It is recommended that the Board of Estimate and Apportionment consider favorably the application, provided the company is so restricted by the terms of the contract that both the interests of the City and of the consumer are protected, and that proper compensation is paid to the City for the privilege.

Prior Grants for Pipe Line Privileges.

I have caused an examination to be made of the privileges for pipe lines which have heretofore been made by The City of New York, in order to obtain, if possible, data fixing the terms and conditions of the proposed grant to the Seaboard Refrigeration Company. Such examination shows that the business of refrigeration through pipes in public streets, under rights obtained from the City, which are of record, is limited to a few companies and that the consents under which these companies operate contain few restrictions.

Subsequent to the opening of the new West Washington Market, in the Borough of Manhattan, considerable rivalry existed between several applicants seeking the right

to furnish refrigeration to the tenants of the market. In the year 1890 applications for the privilege were received by the Commissioners of the Sinking Fund from five companies and one individual; four applicants proposed to circulate cold salt water through pipes to the refrigerating boxes of the standholders, while two applicants proposed to use the process similar to that which is to be employed by the Seaboard Refrigeration Company.

The Commissioners of the Sinking Fund authorized the Comptroller to sell the right at auction, and accordingly on May 7, 1890, the Comptroller did sell the right to the New York Refrigerating Construction Company, one of the applicants, and on May 15, 1890, a contract for a term of ten years was entered into by the Comptroller and the company whereby the company agreed to pay annually \$5,500 and 5 per cent. of the gross receipts, stipulating that the monthly charge to the standholders would not exceed three (3) cents per cubic foot of the contents of the refrigerating box or room.

The project was not a success financially, and the contract was canceled by the Commissioners of the Sinking Fund on March 30, 1893, the City receiving only a portion of the amount due under the contract by way of settlement. The same system, however, is now in successful operation in the new West Washington Market by the Manhattan Refrigerating Company, whose plant is situated at the northeast corner of Horatio and West streets. This company has succeeded to the rights in the streets in the vicinity of the market, which rights were given to the Greenwich Refrigerating Company by resolution of the Board of Aldermen on April 1, 1890. This resolution gave the right to lay two pipes not more than six inches in diameter each, and made no provision for compensation to the City, but stipulated that the company should save the City harmless from damages arising from laying or maintaining such pipes.

On May 23, 1898, the Manhattan Refrigerating Company entered into an agreement with the Comptroller to furnish refrigeration in the market, and agreed to pay to the City 5 per cent. of the gross receipts. The payment made to the City under this agreement for the year 1905 was \$1,274.86, as against \$744.48 for the year 1900, showing a substantial increase during the past five years.

An example of the right to lay pipes in the streets and for which provision for compensation was made, though extremely inadequate, is the privilege obtained by the New York Steam Company. This right was granted by a resolution of the Board of Aldermen adopted December 14, 1880, the compensation fixed being three cents per linear foot of street in which pipes were laid until the total amount paid to the City should reach the sum of \$150,000. The company has laid about 65,000 feet of pipe, according to reports made to the Comptroller, and has paid to the City for the occupation of the streets, pursuant to the provisions of the grant, during a period of about twenty-five years, approximately \$2,000.

From the examples given it is manifest that the rights heretofore granted for pipes cannot be taken as a guide for fixing terms and conditions for a grant to the present applicant company, and therefore the data for such terms and conditions must come from other sources. I have hereinafter discussed and recommended certain conditions, which, in my opinion, should be made a part of the contract, should the Board of Estimate and Apportionment decide to grant the application, and have suggested certain sums which, in my opinion, should be paid to the City for the privilege.

Conditions of the Grant.

It seems advisable that one of the conditions which should be imposed in the grant to any company for the right to lay high pressure ammonia pipes in streets is that the pipes should be of sufficient strength to withstand the pressure equal to three times that proposed to be used. The pipes should be tested to such a pressure after being laid, and a certificate certifying that such a test has been made should be furnished to the proper City authority.

In an opinion, with reference to the previous application of the Kings County Refrigerating Company to lay pipes in certain streets, for the purpose of furnishing refrigeration to the tenants of Wallabout Market, Borough of Brooklyn, dated June 4, 1903, the Corporation Counsel states:

"In the case of streets and public places, the soil of which is owned in fee by The City of New York, the action of the Board of Aldermen and of the Board of Estimate and Apportionment, under the provisions of section 71 of the Charter, is all that is required in the ordinary case for the grant of such a franchise. Where, however, the soil of the street or public place remains in private ownership in the usual case it would be wise in addition to the grant of the franchise by the municipal authorities, under section 71 aforesaid, to obtain, preferably by deed, the consent of the persons owning the fee of the street or public place to such a use as the company in question proposes."

It is therefore recommended that a condition be inserted in the grant to the effect that any rights granted shall be subject to such further consents of the owners of the fee of the soil as may be required.

It would seem that in order to protect the interests of the consumer a maximum rate for charges should be made a condition of the grant. The company proposes to charge the consumer \$3.50 per ton of refrigeration supplied, that is, \$3.50 for the same amount of refrigeration which is produced by one ton of ice. I have made some inquiries as to the price of ice furnished at Coney Island and find that this is a little less than is charged at the present time, and I would recommend that such sum be made the maximum price which the company may charge, and that the Board of Estimate and Apportionment reserve the right to reduce or make a different rate if in its opinion such charges prove to be excessive, and to fix a minimum rate in case it is deemed advisable.

In a grant of this character, where a considerable amount of pipe line is authorized and where it is impracticable to require the company to file a detailed plan showing the position of the proposed structure previous to the construction of the same, it would seem advisable to require a map showing the exact location and length of the constructed pipe line from time to time as the work progresses. If such a course had heretofore been pursued in all cases of underground pipes and structures the data so obtained would at this time be extremely valuable in that it would furnish complete information in regard to the location of underground structures in the streets of the City. Such a map would also show whether the whole pipe line authorized or only a part of the same has been constructed. It is therefore recommended that such a map be required.

By granting the right to lay pipes in the streets, permission is also given to destroy the pavement for the purposes of construction, as well as for repairs from time to time, with a condition, of course, that the company receiving such rights shall restore the pavement to its original condition. The paving is done under the supervision of the Borough President, and is often guaranteed by the contractor for a period of time after being laid. It seems reasonable then to require the company to keep in repair all pavements removed by it for a period of one year after being laid, in a manner satisfactory to the Borough President. The actual construction done under the grant should, in so far as it may affect the structures under his care, be supervised by the Commissioner of Water Supply, Gas and Electricity. Detailed plans should be submitted and approved by both officials before work of construction is begun, and the expense incurred by them for supervision and inspection of the work should be borne by the refrigeration company.

There is a tendency on the part of applicant companies to attempt to secure privileges in sections not at present required, but which in the future will be necessary in order to enlarge the business in a profitable field. It has been stated by the President of the Seaboard Refrigeration Company that it will not at present be necessary for that company to lay pipes in all the streets for which rights are asked in order to supply those who now require refrigeration.

In my opinion the City should not grant privileges unless the applicant is willing to guarantee that the same will be utilized within a reasonable length of time, and if such guarantee is not fulfilled, the entire grant should cease and determine. Another condition which it seems as important to impose is that if any application for refrigeration is made by a person or corporation whose place of business is situated upon the routes granted, the company should be obliged at the time to extend its conduits and compelled to furnish such consumers. This I believe is one of the obligations which all public service corporations are bound to assume, but it appears advisable that it should be plainly stated in the contract. It is recommended that a limit of five years be fixed in which the company shall be bound to construct all lines granted.

I believe that the compensation should in part be dependent upon the gross earnings of the company, so that as the business increases so will the City share in such increase with the company. If such a method of payment is determined upon,

it will be necessary for the company to keep accurate books of accounts of such gross earnings and make a yearly report to the Comptroller stating the amount of such earnings for the preceding year. The Comptroller should have access to all books of the company, and the privilege to examine the officers under oath, in order to verify the statements made in the report. It is recommended, therefore, that a condition be inserted in the contract requiring the company to keep such books and give to the Comptroller the rights suggested.

A condition should be made in the contract restricting the pipes so laid to the use of the Seaboard Refrigeration Company, and for the sole purpose of refrigeration. I would suggest that in this case, as in all others where franchises for rights in streets are granted to public service corporations, a penalty for insufficient public service, or failure to maintain the structures in good condition, be imposed, and I would recommend that such penalty be not less than \$50 per day for each default. The usual deposit of either cash or securities to insure the faithful performance of the terms and conditions of the contract I believe should be fixed at \$5,000.

Limitation of Stock and Bond Issue.

One of the greatest evils of public service corporations is overcapitalization. This is frequently a capitalization of anticipated profits, and has a direct bearing upon the cost to the consumer of the product manufactured by the company so capitalized. If a company whose capitalization or whose funded debt is many times the value of its tangible property, and especially if the company has a monopoly of the business in which it is engaged, there is a temptation to that company to charge for its product an amount far beyond what would be sufficient to pay the cost of production plus a fair return upon an amount which would represent the actual value of the plant.

There are railroad companies in The City of New York whose capital stock outstanding and whose funded debt each are equal to many times the value of the tangible property. Probably the same may be said of other public service corporations in the City.

The City is, in a way, a partner in the business which requires the use of public property such as that conducted by railroad companies, gas companies, telephone companies or other enterprises requiring the use of public streets. These companies are supported by the revenue obtained from their patrons, while the City is, or should be, financially reimbursed for the occupation of public property. The occupation of the streets is absolutely necessary for these companies to carry on their business. On the other hand, it is to the City's interest that citizens be supplied with the conveniences or necessities which may be furnished by such companies at reasonable rates if the right is given for the streets to be occupied for that purpose.

The authorities are therefore interested in the business to such an extent, and any contract entered into between the City and the company applying for rights, should be such as will protect those citizens against a possibility of unfair charges, and if overcapitalization tends to develop such charges, then the contract should be sufficiently broad in its terms to prevent overcapitalization.

There is also another reason, from the City's standpoint, which seems to justify the insertion of a condition restricting overcapitalization. Should public service corporations receiving rights from the City fail in the future to give the people adequate service and for that or other reasons the City government deems it necessary to take control of such property, it will be impossible to do so by a payment of a fair value of the property if such a company is overcapitalized without, perhaps, doing an injury to innocent investors in stocks or bonds, which have been issued in excess of the value of the property.

I have prepared a clause which it is recommended should be inserted in the contract which will prevent the company from issuing or increasing the amount of its capital stock or bonds without first obtaining a certificate from the Board of Estimate and Apportionment authorizing such issue or increase. It also requires the company to report once each year, giving information which will aid the board in its decisions in regard to the issue of stocks or bonds.

Compensation and Term of Grant.

There is at the present time pending before the Board of Estimate and Apportionment two applications from companies other than the one in question, for the right to lay pipes in streets for the purpose of supplying cold storage boxes or rooms with refrigeration. The companies are the Merchants' Refrigerating Company in the Borough of Manhattan, and the Kings County Refrigerating Company in the Borough of Brooklyn. It seems, therefore, desirable to carefully consider what the annual charge for such a privilege should be.

The president of the Seaboard Refrigeration Company has stated that the estimated income is about \$17,000 per annum and that amount is expected from a business which requires only a fraction of the conduit line for which rights are asked, as it is not the company's intention at present to construct all of the conduit line.

The compensation to the city for this privilege should, in my opinion, consist of three items:

First—An initial payment for the right to do business in the streets.
Second—An annual sum per foot of conduit line laid, with a separate charge also for each manhole constructed.

Third—A percentage of the gross annual receipts with a fixed minimum sum.
The business of furnishing refrigerating material through the streets is not used extensively as yet, except in certain districts in Manhattan. In consequence, I believe the rights given should not be for the maximum period of time provided for in the City Charter, but rather for a period of, say fifteen years, with the privilege of renewal for ten years upon a revaluation, in order that the City may be enabled to determine the true value of the rights after the system is more fully developed.

To summarize, I would propose the following terms:

1. Five thousand dollars (\$5,000) in cash within thirty days after the signing of the contract.
2. During the first five years 4 per cent. of the entire gross receipts, with a minimum of \$850 per annum.
During the second five years 5 per cent. of the entire gross receipts, with a minimum of \$1,100 per annum.
During the remaining five years 6 per cent. of the entire gross receipts, with a minimum of \$1,400 per annum.
3. An annual payment of ten (10) cents per foot of pipe line laid.
4. An annual payment of two dollars (\$2) for each manhole constructed.

The sums of money to be paid as compensation for the privilege have been the subject of conference with Mr. Booth, president of the company. The figures given above are a little less than at first proposed, and were determined upon as a compromise. I believe the sums recommended would be a fair compensation for the rights applied for by this applicant.

I have embodied all of the foregoing terms and conditions in a tentative form of contract, which has been submitted to the applicant, and has for the most part been accepted.

The board has fixed March 2 for a public hearing, and notice of such hearing has been published in the CITY RECORD and will be published in "The Brooklyn Citizen" and "The Brooklyn Daily Eagle," newspapers designated by the Mayor, and after such hearing I would recommend that the board modify the proposed contract as it sees fit, and that the contract be then sent to the Corporation Counsel for examination and for such suggestions as he may deem it advisable to make, in order that the City's interest may be fully protected.

When approved by the Corporation Counsel the contract should be returned to the board, and if it is then the intention of the board to grant the franchise, a resolution should be adopted approving of the proposed terms and conditions, and ordering the same entered in full upon the minutes and to be advertised for twenty days in the CITY RECORD and twice in two daily newspapers, and a day set for a public hearing.

Respectfully,

HARRY P. NICHOLS, Assistant Engineer.

PROPOSED FORM OF CONTRACT.

SEABOARD REFRIGERATION COMPANY.

This contract, made this _____ day of _____ 190____, by and between The City of New York, party of the first part, by the Mayor of said City acting for and in the name of said City, under and in pursuance of the authority of the Board of Estimate and Apportionment of said City, and the Seaboard Refrigeration Company, a domestic corporation of the State of New York, hereinafter called the Company, party of the second part, witnesseth:

In consideration of the mutual covenants and agreements herein contained, the parties hereto do hereby covenant and agree as follows:

Section 1. The City of New York hereby grants to the Company, subject to the conditions and provisions hereinafter set forth, the franchise, right and privilege to construct, maintain and operate a conduit not to exceed eighteen inches in diameter, with the necessary branches and connections therefrom, leading directly into private property, for the sole purpose of supplying refrigeration to consumers, said conduit and branches to be beneath the surface of each of the following named streets, avenues and highways, between the points described as follows, all situate in the Borough of Brooklyn, City of New York, to wit:

In, under and along West Twenty-first street, West Twelfth street and West Eighth street, between Surf avenue and Neptune avenue; in, under and along Neptune avenue, between West Twenty-first street and West Eighth street; and in, under and along Surf avenue, between West Twenty-fifth street and West Fifth street, said routes being shown on a map entitled "Map to accompany the petition of the Seaboard Refrigeration Company to the Board of Estimate and Apportionment, dated November 2, 1905, for laying conduits along designated streets and avenues on Coney Island, Borough of Brooklyn, New York," signed by Charles E. Booth, President, and Henry Guttin, Engineer, copy of which is annexed hereto and made a part of this grant.

Sec. 2. The grant of this franchise right and privilege is subject to the following conditions:

First—The said franchise right and privilege to lay one conduit line in each of the streets, avenues or highways, and between the limits as hereinbefore described, and the franchise right and privilege to maintain and operate the same shall be held and enjoyed by the said Company, its lessee or successors, for a term of fifteen years from the date of the signing of this contract, with the privilege of renewal of said grant for a further period of ten years, upon a fair revaluation of said franchise right and privilege.

If the Company shall determine to exercise its privilege of renewal, it shall make application to the Board of Estimate and Apportionment of The City of New York, or to any authority which shall be authorized by law to act for the City in place of the said Board. Such application shall be made at any time not earlier than two years and not later than one year before the expiration of the original term of this grant. The determination of the revaluation shall be sufficient, if agreed to in writing by the Company and by the Board of Estimate and Apportionment, or by such other authority in its place. If the Company and the Board, or such other authority in its place for the City, shall not reach such agreement on or before the day one year before the expiration or the original term of this grant, then the annual rate of compensation for such succeeding ten years shall be reasonable, and either the City (by the Board or by such other authority, in its place) or the Company shall be bound upon request of the other to enter into a written agreement with such other authority, fixing the rate of such compensation at such amount as shall be reasonable; and if the parties shall not forthwith agree upon what is reasonable, then the parties shall enter into a written agreement fixing such annual rate at such amount as shall be determined by three disinterested freeholders selected in the following manner:

One disinterested freeholder shall be chosen by the Board of Estimate and Apportionment, or its successors in authority; one disinterested freeholder shall be chosen by the Company; these two shall choose a third disinterested freeholder, and the three so chosen shall act as appraisers and shall make the revaluations aforesaid. Such appraisers shall be chosen at least six months prior to the expiration of the contract, and their report shall be filed with the Board of Estimate and Apportionment, or its successors in authority, within three months after they are chosen. They shall act as appraisers and not as arbitrators. They may base their judgment upon their own experience and upon such information as they may obtain by inquiries and investigations without the presence of either party. They shall have the right to examine the books of the Company and its officers under oath. The valuations so ascertained, fixed and determined shall be conclusive upon both parties, but shall not in any event be less than the minimum amount fixed as the sum to be paid annually for the last year of this original grant. If in any case the annual rate shall not be fixed prior to the termination of the original term of this grant, then the Company shall pay the annual rate theretofore prevailing until the new rate shall be determined, and shall then make up to the City the amount of any excess of the annual rate then determined over the previous annual rate. The compensation and expenses of the said appraisers shall be borne jointly by the City and the Company, each paying one-half thereof.

Second—Upon the termination of this contract, or if the same be renewed, then at the termination of the said renewal term, or upon the termination of the rights hereby granted for any other cause, all conduit lines and appurtenances thereto, constructed pursuant to this contract, shall be and become the property of The City of New York, without compensation therefor, and the same may be used by the City for any purpose whatsoever. If, however, at the termination of this grant, as above, the City by the Board of Estimate and Apportionment, or its successors in authority, shall so order by resolution, the said Company shall remove, at its own expense, said conduit line and all appurtenances thereto, and shall restore the streets and pavements to their original condition.

Third—The Company, its successors or assigns, shall pay for this privilege to The City of New York the following sums of money, to wit:

1. Five thousand dollars (\$5,000) in cash within thirty (30) days after the signing of the contract.

2. During the first five years of this contract an annual sum which shall in no case be less than eight hundred and fifty dollars (\$850), and which shall be equal to 4 per cent. of the gross receipts of the Company, if such percentage shall exceed the sum of eight hundred and fifty dollars (\$850).

During the second five years of this contract an annual sum which shall be in no case less than eleven hundred dollars (\$1,100), and which shall be equal to 5 per cent. of the gross receipts of the Company, if such percentage shall exceed the sum of eleven hundred dollars (\$1,100).

During the third and remaining five years of this contract an annual sum which shall in no case be less than fourteen hundred dollars (\$1,400), and which shall be equal to 6 per cent. of the gross receipts of the Company, if such percentage shall exceed the sum of fourteen hundred dollars (\$1,400).

3. An annual payment of ten (10) cents for each linear foot of conduit line and two dollars (\$2) for each manhole constructed within the limits of any street, avenue or highway. The sums due shall be calculated from the day when the permit is obtained to open the streets for any section of the work.

All sums herein provided for shall be paid into the Treasury of The City of New York on November 1 of each year, and shall be for the amount due to September 30 next preceding.

Any and all payments made by the terms of this franchise to The City of New York by the Company shall not be considered in any manner in the nature of a tax, but such payments shall be in addition to any and all taxes of whatsoever kind or description, now or hereafter required to be paid by any ordinance of The City of New York or by any law of the State of New York.

Fourth—The annual charges or payments shall continue throughout the whole term of the privilege hereby granted, whether original or renewal, as hereinbefore provided, notwithstanding any clause in any statute or in the charter of any other company, providing for payments of refrigerating rights or franchises at a different rate, and no assignment, lease or sublease of the rights or privileges hereby granted, whether original or renewal, or of any part thereof, or of any of the routes mentioned herein, or of any part thereof, shall be valid or effectual for any purpose unless the said assignment, lease or sublease shall contain a covenant on the part of the assignee or lessee that the same is subject to all the conditions of this grant, and that the assignee or lessee assumes and will be bound by all of said conditions, and especially said condition as to payments, anything in any statute or in the charter of such assignee or lessee to the contrary notwithstanding, and that the said assignee or lessee waives any more favorable conditions created by such statute or its charter, and that it will not claim by reason thereof or otherwise, exemption from liability to perform each and all of the conditions of this grant. Nothing herein contained shall apply to any mortgagee or mere lienor, but shall apply to any purchaser upon foreclosure or under or by virtue of any provision of a mortgage or lien.

Fifth—The rights and privileges granted hereby shall not be assigned either in whole or in part, or leased or sublet in any manner, nor shall title thereto or right, interest or property therein pass to or vest in any other person or corporation whatsoever, either by the act of the Company, its successor or assigns, or by operation of

law, whether under the provisions of the statutes relating to the consolidation or merger of corporations or otherwise, without the consent of The City of New York, acting by the Board of Estimate and Apportionment, or its successor in authority, evidenced by an instrument under seal, anything herein contained to the contrary thereof in anywise notwithstanding, and the granting, giving or waiving of any one or more of such consents shall not render unnecessary any subsequent consent or consents. This provision, however, shall not apply to the making of a mortgage, but shall apply to a sale under foreclosure.

Sixth—The grant of this privilege is subject to whatever right, title or interest the owners of abutting property or others may have in and to the streets, avenues and highways on the route heretofore described.

Seventh—If a conduit line as herein described shall not be constructed and in actual operation in all the streets and avenues, and upon all the routes hereby described, on May 1, 1911, all rights hereby given shall be thereupon forthwith and immediately forfeited without judicial or other proceedings, unless at least 50 per cent. of the conduit line shall then be constructed and in operation, when, in such case, the forfeiture shall affect only the Company's rights, privileges and franchises on the remaining portion of the conduit line hereby granted.

Eighth—All construction which shall be made under this grant shall be done in a manner solely upon the terms and conditions hereafter to be imposed by the President of the Borough of Brooklyn and the Commissioner of Water Supply, Gas and Electricity, or their respective successors in authority. The said Company shall submit a working plan of construction to the said President and to the said Commissioner, which shall include and show in detail the method of construction of said conduit line, connections, manholes and other appurtenances, and the mode of protection of all subsurface construction under the streets, avenues and highways described in the routes.

Ninth—The said Company shall bear the expense of keeping in repair for one year after it has been replaced, all pavement which may at any time be removed by said Company, either for the purpose of construction or for the repairing of the conduit line and its appurtenances.

Tenth—The said Company shall bear the expense of inspection, which may be required by the President of the Borough of Brooklyn and the Commissioner of Water Supply, Gas and Electricity, of all the work of construction required, or removal of the said conduit line, which shall be done under this grant.

Eleventh—The Company shall cause a test to be made of the pipes laid under this grant before said pipes shall be used for the conveyance of gas or fluid under pressure for refrigerating purposes. The pipes so tested shall be submitted to a pressure of 450 pounds per square inch, and such test shall be made under the supervision of the Commissioner of Water Supply, Gas and Electricity. A certificate showing that such a test has been made, without injury to the pipes, shall be executed by an officer of the Company, endorsed by the Commissioner of Water Supply, Gas and Electricity, and filed with the Board of Estimate and Apportionment.

Twelfth—The Company, its successors or assigns, shall not charge consumers more than three dollars and fifty cents (\$3.50) for the same amount of refrigeration which is produced by one ton of ice. During the term of this contract the Board of Estimate and Apportionment shall have absolute power to regulate the maximum and minimum rates, provided that such rates shall be reasonable and fair. All refrigeration which may be required by The City of New York at any point along the routes herein described, shall be furnished by the Company without cost to the city.

The Company, upon the application for refrigeration of any person or corporation located along the routes herein authorized, shall extend its conduit to such premises and furnish to said applicant refrigeration at the prices which are herein prescribed, or at which such prices may be hereafter fixed; otherwise this contract shall cease and determine at the option of the Board of Estimate and Apportionment.

Thirteenth—A correct map shall be furnished to the Board of Estimate and Apportionment by the Company, showing the exact location of all the conduit lines and manholes laid with reference to the curb lines of the streets and the street surface, and the same shall be furnished on the first day of November of each year until all conduit lines which are authorized by this grant are constructed or until the right hereby authorized to construct conduit lines along the routes described, have ceased by limitation, as herein provided.

Fourteenth—The grant of this privilege shall not affect in any way the right of The City of New York to grant a similar privilege upon the same or other terms and conditions to any other person or corporation.

Fifteenth—The Company shall assume all liability by reason of the construction and operation of the conduit line and the city shall assume no liability whatsoever to either persons or property by reason of its construction.

As a condition of this grant, the Company, its successor or assigns, hereby agrees to repay to the city any damages which the city shall be compelled to pay by reason of any acts or defaults of the Company, its successor or assigns. Due notice of any such demand shall be given to the Company.

Sixteenth—In case of any violation or breach or failure to comply with any of the provisions herein contained, this contract may be forfeited or avoided by The City of New York by a suit brought by the Corporation Counsel, on notice of ten days to the said Company.

Seventeenth—If the Company has in position a conduit or pipe line in streets or avenues other than those herein described, then the Company shall remove such conduit or pipe line at its own expense, within one year from the date of signing this contract. If the Company owns a conduit or pipe line in the streets or avenues herein described, such conduit or pipe line shall be deemed to be a conduit line herein authorized, but no right is hereby given to lay or construct a conduit line in addition to that which the Company already has in such streets or avenues.

Eighteenth—The conduit line hereby authorized shall be used only by the Seaboard Refrigeration Company and for no other purpose than for supplying refrigeration by the ammonia process or such other process as may be consented to by the Board of Estimate and Apportionment.

Nineteenth—The Seaboard Refrigeration Company hereby agrees not to issue stock or bonds other than have been heretofore issued, until a certificate of authority therefor has been issued by the Board of Estimate and Apportionment, or until such Board shall further certify in writing as to the amount of stock or bonds reasonably required for the purposes of the Company. The stock and bonds of the said Company shall not be issued in excess of the amount so certified.

The Seaboard Refrigeration Company shall not increase its capital stock or its bonded indebtedness without the consent in writing of the Board of Estimate and Apportionment stating the amount of the authorized increase. For the purpose of making this determination as to the amount of stock and bonds to be issued, or the amount of the authorized increase of the capital stock and bonded indebtedness of the Seaboard Refrigeration Company, the Board of Estimate and Apportionment may take and hear testimony under oath and examine the books and papers of the Company, and require verified statements from the officers thereof, pertaining to the value of the property and of the franchise owned or operated by the Company. Such determination shall be made within sixty (60) days after the final submission of the papers or of final hearing on the application for the issue or increase of capital stock or bonds of indebtedness.

The Company shall submit a report to the Board of Estimate and Apportionment not later than November 1 of each year, for the year ending September 30 next preceding, which shall state:

1. The amount of stock issued; for cash; for property;
2. The amount paid in as by last report;
3. The total amount of capital stock paid in;
4. The funded debt by last report;
5. The total amount of funded debt;
6. The floating debt as by last report;
7. The amount of floating debt;
8. The total amount of funded and floating debt;
9. The average rate per annum of interest on funded debt;
10. Statement of dividends paid during the year;
11. Number of feet of conduit now laid;
12. The total amount expended for same;
13. Amount, kind and capacity of machinery now in use and required for operation;
14. The total amount expended for same;
15. Number of tons of refrigeration furnished during the year;

16. Total receipts from refrigeration and the average price per ton received during the year;

17. Amounts paid by Company for damage to persons or property on account of construction and operation;

18. Total expenses for operation; including salaries;

—and such other information in regard to the business of the Company as may be required by the Board. For each failure to comply with the foregoing, the Company shall pay a penalty of one hundred dollars (\$100), which may be collected by the Comptroller without notice.

Twentieth—The Company shall at all times keep accurate books of accounts of the gross earnings from the privileges granted under this contract. The Company shall, on or before November 1 in each year, make a verified report to the Comptroller of The City of New York, of the business done by the Company for the year ending September 30 next preceding, as he may prescribe. Such report shall contain the number of feet of conduit laid and the number of manholes constructed during the year, and also a statement of the gross receipts from all business of furnishing refrigeration to consumers, together with such other information and in such detail as the Comptroller may require. The Comptroller shall have access to all books of the Company for the purpose of ascertaining the correctness of its report and may examine its officers under oath.

Twenty-first—If the said Company, its successors or assigns, shall fail to give efficient public service at the rates herein fixed, or fails to maintain its structures in good condition throughout the full term of its occupancy of such streets, the Board of Estimate and Apportionment of The City of New York may give written notice to the said Company specifying any default on the part of said Company, and requiring said Company to remedy the same within a reasonable time, and upon the failure of the Company to remedy said default within a reasonable time, said Company shall for each day thereafter during which the default or defect remains, pay to The City of New York a sum of fifty dollars (\$50) as fixed or liquidated damages, or the said City, in case such structures which may affect the surface of the streets, shall not be put in good condition within a reasonable time after notice by the Board as aforesaid, shall have the right to make all needed repairs at the expense of the Company, in which case the said Company shall pay to the City the amount of the cost of such repairs with legal interest thereon, all of which sums may be deducted from the fund hereinbefore provided.

Twenty-second—This grant is upon the express condition that the Company, within thirty days after the execution of this contract and before anything is done in exercise of the rights conferred thereby, shall deposit with the Comptroller of The City of New York the sum of five thousand dollars (\$5,000), either in money or in securities to be approved by him, which fund shall be security for the performance by the Company of the terms and conditions of this grant, especially those which relate to the payment of the annual charge for the privilege and the penalties herein provided, and in case of default in the performance by said Company of such terms and conditions, The City of New York shall have the right, after due notice, to collect the same from the said fund without legal proceedings, or after default in the payment of the annual charges shall collect the same, with interest, from said fund after ten days' notice in writing to the said Company. In case of any drafts so made upon this security fund, the said Company shall, upon thirty days' notice in writing, pay to the Comptroller of The City of New York a sum of money sufficient to restore the said fund to the original amount of five thousand dollars (\$5,000), and in default thereof the grant hereby made may be canceled and annulled at the option of the Comptroller of The City of New York, acting on behalf of said City. No action or proceeding or rights under the provisions of this section shall affect other legal rights, remedies or causes of action belonging to The City of New York.

Twenty-third—The Company promises, covenants and agrees on its part and behalf to conform to and abide by and perform all the terms, conditions and requirements in this contract fixed and contained.

In witness whereof the party of the first part, by its Mayor, thereunto duly authorized by the Board of Estimate and Apportionment of said City, has caused the corporate name of said City to be hereunto signed, and the corporate seal of said City to be hereunto affixed, and the party of the second part, by its officers, thereunto duly authorized, has caused its corporate name to be hereunto signed, and its corporate seal to be hereunto affixed, the day and year first above written.

SEABOARD REFRIGERATION COMPANY,

[Here add acknowledgments.]

The President of the Borough of Brooklyn requested that further consideration of the matter be deferred until March 16.

There being no objection, it was so ordered.

Manhattan Refrigerating Company.

Pursuant to resolution adopted February 16, 1906, the Manhattan Refrigerating Company was called upon to show cause on or before March 2, 1906, under what authority a certain pipe was laid under and along West Fourteenth street between Ninth and Tenth avenues, Borough of Manhattan, and why same should not be immediately removed.

Thomas A. Adams, president of the company, appeared and presented the following:

THE MANHATTAN REFRIGERATING COMPANY, GANSEVOORT STORES;
GANSEVOORT COLD STORAGE CO., FREEZING AND COLD STORAGE,
CORNER WEST AND HORATIO STREETS,
NEW YORK, February 28, 1906.

Board of Estimate and Apportionment of The City of New York.

GENTLEMEN—We beg to acknowledge receipt of your letter of February 16 enclosing copy of resolution adopted by the Board of Estimate on that day concerning pipes laid by the Manhattan Refrigerating Company on West Fourteenth street between Ninth and Tenth avenues.

In reply thereto we beg to say that the pipe laid in said street was laid pursuant to the franchise granted this company by resolution of the Board of Aldermen passed April 1, 1890, and approved by the Mayor April 8, 1890, a certified copy of which is submitted with this letter. We beg to call the attention of your honorable Board to the said franchise by which permission to lay such pipes was given in the streets and parts of streets immediately adjoining the new market, and that one of the streets mentioned is Fourteenth street, from Tenth to Thirteenth avenue. The meaning of this description as understood by this company was that it should cover the market district in the immediate vicinity of the new market, and accordingly it applied for and obtained permission to put in the extension along Fourteenth street to supply a customer who desired refrigeration at the end of that extension. Permit was given to open the streets by the Department of Highways, and that Department apparently construed the permit in the same way, and no question has heretofore been raised on that construction. We beg to submit that we have expended a considerable amount of money in laying the pipes and have in all respects complied with the franchise. The business conducted by this company in supplying customers in that district is still in an experimental stage and has not been a profitable one to the company. On the other hand, the company believes that it has supplied a real public want, and that the ability to secure refrigeration without the expense of independent plants has increased the demand for property in that neighborhood and has increased the value of property and increased the market business done there. The company has found it necessary to adopt new methods of construction and has gone to great expense in perfecting the system of public supply of refrigeration and believes that the withdrawal of its service would be a public detriment.

It submits, therefore, that the company should not be required to remove its present lines, but it will agree that it will make no further extensions and will accept

the construction of the franchise now proposed by your Honorable Board and will execute any agreement required that it will not extend the pipes beyond the present installation without obtaining further permit, authority or franchise from your Board.

In order better to meet the wishes of this Board and to show the good faith and desire of this company to continue its work as a public service corporation, this company hereby applies to your Honorable Board for a franchise running from Tenth avenue and Fourteenth street to Hudson street, along Hudson street to Gansevoort street, and down Gansevoort street to connect with its pipes at West street, and has authorized its president to present the petition in a more formal way for such franchise. If this franchise is granted the company will then be able to furnish refrigeration to the Atlantic Hotel Supply Company, whose application for a permit was recently before your Board.

The company has authorized its president to appear before your Board to present the matter more fully, and respectfully asks that a hearing may be given to him.

Very respectfully,

MANHATTAN REFRIGERATING COMPANY.

T. A. ADAMS, President.

To the Honorable Board of Estimate and Apportionment of The City of New York:

The petition of the Manhattan Refrigerating Company respectfully shows:

1. The said Manhattan Refrigerating Company is a corporation duly organized and existing under the laws of the State of New York, having its principal place of business at the northeast corner of West and Horatio streets in The City of New York, and has built and is operating a large plant at that point for artificial refrigeration, conducting a cold storage warehouse and also a pipe line for the supply of customers in the market and others whose places of business front on the streets and avenues in the immediate vicinity. That it has for the period of about seven years maintained and operated in certain streets in The City of New York mains and pipes for the supply of mechanical refrigeration, and has supplied all acceptable customers along the said lines at reasonable rates.

2. The said Manhattan Refrigerating Company, by assignment, duly made to it by the Greenwich Refrigerating Company, is the sole owner of a certain franchise granted by the Mayor, Aldermen and Commonalty of The City of New York, approved by the Mayor April 8, 1890, and respectfully petitions your Honorable Board to grant a license to lay a conduit not more than twelve inches in diameter, to contain refrigerating pipes, extending from the intersection of Fourteenth street and Tenth avenue to Hudson street; thence southerly along Hudson street to Gansevoort street, and thence westerly along Gansevoort street to West street, the said pipes to be laid under the surface of the streets, and branches in the intersecting streets west of Hudson street.

3. That said pipes are to be used to convey brine, ammonia or other refrigerating medium to connect with other pipes of the Manhattan Refrigerating Company at the terminal points. This company has a line of pipes used for said purpose extending along West street and Tenth avenue, from Horatio street to Fourteenth street, for the purpose of supplying to such customers as may desire the same refrigeration for properly insulated compartments for the preservation of meats and other perishable goods.

4. That the said district through which it is proposed to lay the said pipes is largely devoted to the meat and produce trade, and for the proper carrying on of which it is necessary to have refrigeration, and that this company has been requested by persons engaged in said business along said route to extend its lines and to supply such persons with refrigeration.

5. That should said permit be granted, your petitioners will supply to all persons providing proper compartments or boxes and requiring the same, refrigeration at reasonable prices, and will save the City harmless from any loss or damage to any sewer, gas or water pipe, or from any cause that may arise from the exercise of the privilege so obtained by it, and will furnish such indemnity or security as the City may require to insure the faithful compliance with the conditions that it may see fit to impose upon your petitioners conditioned to the license applied for.

6. This company desires that the said franchise may continue for the period of ten years from the date of granting the same, and the company offers to pay to the City as a reasonable compensation or tax therefor annually a sum equal to 2½ per cent. on the gross amount of receipts derived from the customers supplied by pipes to be laid under the proposed franchise, and also from any and all customers on its present lines, except the standholders of the new market, on which last named business this company is already paying a percentage of its gross receipts. The company further offers that the percentage of its gross receipts to be paid for said franchise after the period of five years shall be increased to 5 per cent. during the remainder of the term.

7. This company further petitions that it may have the right or option at the expiration of the said term of ten years to a further term of ten years upon paying a like tax of 5 per cent. upon the gross receipts from all its lines, as above specified, excepting the standholders in the new market.

8. That said proposed pipe line will not interfere with any fixtures or appurtenances forming part of the water mains, sewers, conduits, subways or sub-pavement fixtures of any kind, or of any sub-structures existing by virtue of any franchise heretofore granted, all of which appears from the map herewith submitted. The company will do all work under the said franchise under the directions of the proper officers and departments of the City Government and will comply with all requirements thereof.

Dated New York, March 2, 1906.

MANHATTAN REFRIGERATING COMPANY,

T. A. Adams, President.

City and County of New York, ss.:

Thomas A. Adams, being duly sworn, says: He is the president of the Manhattan Refrigerating Company, the petitioner named in the foregoing petition; that he has read the foregoing petition and that the same is true; that the reason this verification is made by deponent is that the petitioner is a domestic corporation organized and existing under the laws of the State of New York, and that he is the president thereof, as aforesaid, and has been duly authorized by the board of directors of said corporation to present and verify the foregoing petition.

T. A. ADAMS.

Sworn to before me this 5th day of March, 1906.

STEPHEN BARKER, Notary Public, New York County.

(When this petition was presented it was not verified, and was subsequently verified.)

The Comptroller moved that the matter be referred back to the Bureau of Franchises for further report and consultation with the President of the Borough of Manhattan.

Which was agreed to.

New York and Port Chester Railroad Company.

In the matter of the application of the New York and Port Chester Railroad Company for a franchise to cross the streets intersected by its route in the Borough of The Bronx, which was adjourned to this day, by motion duly adopted January 26, 1906, pending the decision of the Court of Appeals, on the constitutionality of the law, transferring the franchise granting power from the Board of Aldermen to this Board.

The Comptroller moved that the matter be adjourned to April 20.

Which was agreed to.

New York Central and Hudson River Railroad Company.

The Secretary presented the following:

In the Board of Aldermen.

Whereas, It is alleged that the New York Central and Hudson River Railroad Company have taken possession or are about to take possession of several blocks at One Hundred and Fiftieth street, in the Borough of The Bronx, for the purpose of the

construction of a conduit for transmitting power from the main line of said railroad to the Pocahontas Branch of said railroad, and said work has already been commenced or is about to be commenced;

Resolved, That the Board of Estimate and Apportionment is requested to cause its Bureau of Franchises to investigate the said matter and to report to the Board of Aldermen as well as the Board of Estimate and Apportionment as to whether the said railroad company or any other corporation or individuals has secured the legal right to the use of the City's streets for the purpose mentioned in the preamble hereof.

Adopted by the Board of Aldermen February 20, 1906, a majority of all the members elected voting in favor thereof.

P. J. SCULLY, Clerk.

Which was referred to the Bureau of Franchises for investigation and report.

Communications were received from the Paint, Oil and Varnish Club of The City of New York, requesting the Board to facilitate negotiations with the New York Connecting Railroad Company on terms that are fair and reasonable; and from the Brooklyn League, transmitting resolutions adopted by that body expressing itself in favor of the early completion of said railroad, on such terms as shall reasonably protect the present and future interests of this community.

Which were ordered filed.

A communication was received from the Allied Civic Associations of the Fourth Ward, Borough of Queens, requesting the Board to do everything necessary to expedite the construction of the Steinway Tunnel under the East river.

Which was ordered filed.

Union Railway Company of New York City.

The Secretary presented the following:

FLYNN'S MILITARY BAND AND ORCHESTRA,
NEW YORK, January 31, 1906.

Hon. HERMAN A. METZ, Comptroller:

DEAR SIR—The Union Railway Company of the Borough of The Bronx, operating on Jerome avenue, some time ago ran their cars on an 80 minutes headway, from 1 a. m. to 5 a. m. After many complaints by the residents of this section, I understand former Comptroller Grout brought some action against said company, and compelled them to maintain a 20 minutes headway after 12 o'clock, midnight. This continued for a short time. Then the company increased the headway to 24 minutes, and now they have made another change and increased it to 40 minutes, and, I presume, if there is no complaint, they will eventually resume the hour and twenty minutes headway.

This condition of affairs is an outrage, and a great inconvenience to the residents of this entire line.

I therefore ask if it is not possible for you to do as former Comptroller Grout did, and compel this company to run their cars every 20 minutes after midnight.

Hoping it will be within your power to do this, and sincerely appreciating any courtesy shown in the matter, I am

Yours respectfully,

FRANK J. FLYNN.

BOARD OF ESTIMATE AND APPORTIONMENT, THE CITY OF NEW YORK.
BUREAU OF FRANCHISES, No. 280 BROADWAY.
February 28, 1906.

Hon. GEORGE B. McCLELLAN, Mayor, Chairman of the Board of Estimate and Apportionment:

SIR—There was referred to me a communication, dated January 31, 1906, addressed to the Honorable Herman A. Metz, Comptroller, signed "Frank J. Flynn," a resident of the Borough of The Bronx, complaining of the poor service rendered by the Union Railway Company of New York City on its Jerome avenue line, between the hours of 1 a. m. and 5 a. m. I understand that similar complaints have been made to various newspapers.

The Union Railway Company operates a street surface railway over various streets and avenues in the Borough of The Bronx, under resolutions of the Common Council of the old City of New York, of August and December, 1892. The route on Jerome avenue is covered by franchises as stated.

The present ordinance regulating the headway of street surface railroads is section 595, and reads as follows:

"The several city railroad companies now running cars on the surface of any of the streets in The City of New York are hereby directed and required to cause their cars to be run and operated on their tracks as frequently as public convenience may require it, and not less than one car every twenty minutes between the hours of 12 midnight and 6 o'clock a. m. each and every day, both ways, for the transportation of passengers."

This ordinance is a section of the revised ordinances approved by the Mayor March 20, 1897, and is a re-enactment of a similar section of the ordinances approved by the Mayor of The City of New York June 3, 1890.

The failure of the Union Railway Company to comply with the foregoing ordinance of 1897 resulted in a suit instituted by The City of New York in 1900. The Appellate Term of the Supreme Court (City of New York v. Union Railway Company, 31 Miscellaneous, 451) held that the defendant therein is subject to the penalty imposed by the revised ordinances of 1897 for a failure or neglect in this respect. The Court held in the case referred to that the Union Company was bound to run its cars over its entire tracks at intervals of twenty minutes each. I would therefore suggest that the said company be required to maintain a legal schedule on said avenue, and that steps be taken to enforce the collection of the penalty provided by section 596 of the revised ordinances of 1897 if the company fail to maintain such legal schedules, and I would further recommend that a copy of this report, together with the resolutions for adoption, which I present herewith, be served upon said company.

Respectfully,

HARRY P. NICHOLS, Assistant Engineer.

The following was offered:

Whereas, A complaint has been received by this Board that the Union Railway Company of New York City fails to comply with the ordinance of this City regulating headway, and is operating cars on Jerome avenue, in the Borough of The Bronx, between the hours of 1 a. m. and 5 a. m. on a greater headway than twenty minutes and

Whereas, Section 595 of the revised ordinances provides as follows:

"The several city railroad companies now running cars on the surface of any of the streets in The City of New York are hereby directed and required to cause their cars to be run and operated on their tracks as frequently as public convenience may require it, and not less than one car every twenty minutes between the hours of 12 midnight and 6 o'clock a. m., each and every day, both ways, for the transportation of passengers."

—now, therefore, be it

Resolved, That the Union Railway Company of New York City be and it is hereby directed to comply with the terms of the said ordinance, and to make a return to this Board on March 15, 1906, of the schedule maintained on said avenue between the hours of 12 midnight and 6 a. m. daily from the date of the receipt of this notice to said date; and be it further

Resolved, That this Board, on proof of the failure of said Union Railway Company of New York City to maintain legal schedules, will request the Corporation Counsel to institute proceedings for the collection of the penalties provided by section 596 of the revised ordinances; and be it further

Resolved, That the Secretary of this Board be directed to serve a copy of the report of the Bureau of Franchises, dated February 28, 1906, and a copy of these resolutions upon the Union Railway Company of New York City.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx and Richmond—15.

The full minutes of the meeting of March 2, 1906, will appear in the CITY RECORD at a later date.

JOSEPH HAAG, Secretary.

BOROUGH OF RICHMOND.

Designation by Board of City Record April 26, 1904.

Amended July 22 and September 15, 1904, and February 7, 1905.

COLLEGE OF THE CITY OF NEW YORK.

BOARD OF TRUSTEES OF THE COLLEGE OF THE CITY OF NEW YORK.

PROPOSALS FOR BIDS OR ESTIMATES FOR SUPPLIES.

SEALED BIDS OR ESTIMATES WILL BE received by the Chairman of the Board of Trustees of the College of the City of New York at the office of the Board, No. 17 Lexington avenue, in the City of New York, until 12 o'clock noon on

THURSDAY, MARCH 20, 1906.

FOR FURNISHING AND DELIVERING CHEMICAL SUPPLIES, MATERIALS AND APPARATUS FOR THE DEPARTMENT OF PHYSICS OF THE COLLEGE OF THE CITY OF NEW YORK.

The time for the delivery of the articles, materials and supplies and the performance of the contract is between the 1st and 30th days of June, 1906, or thereafter from time to time as may be directed by the Professor of Physics not later than December 31, 1906.

The amount of security will be fifty per cent. (50%) of the amount of the bid or estimate.

For particulars as to the quantity and quality of the work required or of the materials to be furnished, bidders are referred to the specifications and the blank proposals and lists of articles, materials, supplies and apparatus to be furnished and delivered to the places designated. Such work and materials must conform in every respect to the specifications and schedules. The quality of the articles, supplies, goods, wares and merchandise must conform to and must be the same or equal in quality, character, finish and design to the samples furnished, or to those described by the names of well-known dealers and manufacturers, and referred to by catalogue numbers. Bidders are cautioned to examine the specifications for particulars of the articles, etc., required before making their estimates, and are cautioned against referring to any samples or specifications other than those furnished by the Board of Trustees. Such references are cause for rejecting bids whereon they are written, and will in no case govern the action of the Board of Trustees in passing upon tenders. Bidders must state the price of each item. Awards will be made to the lowest bidder on each item whose goods are the same or equal to the samples furnished for inspection or referred to by catalogue number.

Bidders shall describe the various items by reference to the particular maker's catalogue or circular, or by the submission of a sample. Only one bid will be received from a bidder for each item.

Samples will be on exhibition at the College of the City of New York, No. 17 Lexington avenue, Room 15, until the bids are opened.

All goods must be delivered as directed, in the original bottles or packages, at the Department of Physics, the College of the City of New York, One Hundred and Fortieth street and Convent avenue, Borough of Manhattan (unless otherwise stated in the specifications). The weight, measure, etc., will be allowed as received at the institution.

No charge will be allowed for freight expenses, boxes or cartage, but boxes may be taken away by the contractor.

Contractors who fail to make prompt deliveries will be considered as in default and debarred from bidding in the future.

Bidders are requested to make their bids or estimates upon the blank form prepared by the said Board of Trustees, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon written application therefor at the office of the College of the City of New York, and any further information can be obtained at the office of the said college, corner of Lexington avenue and Twenty-third street, Borough of Manhattan.

EDWARD M. SHEPARD.

BOARD OF ESTIMATE AND APPORTIONMENT.

PUBLIC NOTICE.

WHEREAS, THE COMMISSIONER OF THE City of New York, acting for and in behalf and in the name of The City of New York, in pursuance of the provisions of chapter 466 of the Laws of 1901, as amended, has selected and determined certain real estate (as the term "real estate" is defined in the said act) in the Counties of Kings and Queens, as and for sources of public water supply in and for The City of New York, and deems it necessary to take and acquire the same and all the rights, titles and interests therein, and to extinguish all claims or damages on account of such rights, titles and interests or growing out of such taking, for the

purpose of maintaining, preserving and increasing the supply of pure and wholesome water for The City of New York, and of providing additional water works to supply The City of New York with water, said lands being required for the purpose of building additional pipe conduits, pumping stations, borrow pits, etc.; and

Whereas, the said Commissioner has prepared and submitted to the Board of Estimate and Apportionment, under date of February 15, 1906, maps showing the said real estate to be taken and acquired as aforesaid, as provided in the said act; therefore, be it

Resolved, That a public notice be given of a hearing to be held by the Board of Estimate and Apportionment of The City of New York, in the Old Council Chamber, Room 16, City Hall, Borough of Manhattan, City of New York, on the 9th day of March, 1906, at 10.30 o'clock a. m., at which a full opportunity shall be afforded to any and all persons interested, to be heard respecting such maps and the taking and acquisition of the real estate as shown thereon.

Resolved, That such public notice be published in the City Record, in the Corporation newspapers, in two papers published in Kings County and in two papers published in Queens County, in which counties the real estate to be taken and acquired is situated, and in two daily papers published in The City of New York, once in each week for three successive weeks prior to the date of the hearing.

I hereby certify that the foregoing is a true copy of a resolution adopted by the Board of Estimate and Apportionment at the meeting of said Board, held on the 16th day of February, 1906.

CITY OF NEW YORK—DEPARTMENT OF FINANCE,
COMPTROLLER'S OFFICE, March 3, 1906. m5,21

CORPORATION SALE OF BUILDINGS AND APPURTENANCES THERETO, OF CITY REAL ESTATE.

AT THE REQUEST OF THE PRESIDENT of the Borough of Brooklyn, public notice is hereby given that the Commissioners of the Sinking Fund of The City of New York, by virtue of the powers vested in them by law, will offer for sale at public auction the buildings, parts of buildings, etc., standing within the lines and on property owned by The City of New York, acquired for street purposes, in the

BOROUGH OF BROOKLYN.

All of the buildings, parts of buildings, etc., standing within the lines of property acquired for the extension of Grand street, from the intersection of Havemeyer street and South Fourth street to Hooper street, in the Borough of Brooklyn.

A map showing the property to be sold is on file in the office of the Collector of City Revenue, Department of Finance, Room 141, No. 280 Broadway, Borough of Manhattan, and bidders should acquaint themselves with the extent and portions of the buildings to be sold and owned by the City.

By direction of the Comptroller, the sale of the above-described buildings and appurtenances thereto will be made under the supervision of the Collector of City Revenue. The sale will take place on Tuesday, April 17, 1906, at 11 a. m., on the premises, and will be sold for the highest marketable price at public auction on the following

TERMS AND CONDITIONS.

The buildings and appurtenances thereto will be sold to the highest bidder, who must pay immediately cash or a certified check drawn to the order of the Comptroller of The City of New York, and must give either a cash bond or an approved bond of a surety company in the amount of the purchase price as security for the proper performance of the work of removal, which must be completed within thirty working days thereafter.

All the buildings, structures and parts thereof, their fixtures and foundations of every class and description within the described area, are to be torn down to a level two feet below the existing curb; and any structures which may exist within any of the buildings, such as engine beds, boiler settings, etc., and all stoops and area walls shall also be torn down to the same level. All tin from roofs, cornices, sides of buildings or partitions, sheds and fences shall be removed from the premises. All brick laid in mortar, all floor beams, joists, studding, flooring, ceiling roofing, boards and woodwork of every description, and all gas, water, steam and soil piping shall be removed from the premises. All combustible matter, such as tar and felt roofing, broken lath and fragments of timber, chips, splinters, etc., which are of no value, shall be gathered together by the contractor and burned or carried away.

Failure to remove the said buildings and appurtenances, or any portion thereof, within said period, will work forfeiture of ownership of such buildings or appurtenances or portion as shall then be left standing, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and the said City of New York will without notice to the purchaser cause the same to be removed and the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against and from all suits and actions, claims and demands, of every name and description brought against it, them or any of them, and against and from all damages and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work or in guarding the same, or from any improper or defective materials or machinery, implements or appliance used in the removal of the said buildings by the said successful bidder, and the bidder's assent and agreement to the above conditions are understood to be implied by the act of bidding.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down, but all furrings, plaster, chimneys, projecting brick, etc., on the faces of such party walls shall be taken down and removed. The walls shall be made permanently self-supporting, without the aid of braces, the beamholes, etc., bricked up and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs of the adjacent buildings shall be properly flashed and painted, and made water tight where they have been disturbed by the operation of the contractor.

The Comptroller of The City of New York reserves the right on the day of the sale to withdraw from sale any of the buildings or parts of buildings and machinery included in the foregoing parcel.

H. A. METZ,
Comptroller.

CITY OF NEW YORK—DEPARTMENT OF FINANCE,
COMPTROLLER'S OFFICE, March 1, 1906. m5,217

Said section provides that "If any assessment shall remain unpaid for a period of sixty days after the date of entry thereof in the said Record of Titles of Assessments, it shall be the duty of the officer authorized to collect and receive the amount of such assessments to charge, collect and receive interest thereon at the rate of seven per centum per annum, to be calculated

to the date of payment from the date when such assessments became liens, as provided by section 159 of this act.

Section 159 of this act provides: "An assessment shall become a lien upon the real estate affected thereby, ten days after its entry in the said record."

The above assessments are payable to the Collector of Assessments and Arrears at the Bureau for the Collection of Assessments and Arrears of Taxes and Assessments and of Water Rents, in the Municipal Building, Borough of Brooklyn, between the hours of 9 a. m. and 2 p. m., and on Saturdays from 9 a. m. until 12 m., and all payments made thereon on or before April 24, 1906, will be exempt from interest, as above provided, and after that date will be subject to a charge of interest at the rate of seven per centum per annum from the date when the above assessments became liens to the date of payment.

NOTICE OF ASSESSMENTS FOR OPENING STREETS AND PARKS.

IN PURSUANCE OF SECTION 1005 OF THE Greater New York Charter, the Comptroller of the City of New York hereby gives public notice of the confirmation by the Supreme Court, and the entering in the Bureau for the Collection of Assessments and Arrears of the assessment for OPENING AND ACQUIRING TITLE to the following-named place, in the BOROUGH OF THE BRONX:

TWENTY-THIRD AND TWENTY-FOURTH WARDS, SECTIONS 9 AND 11.

JESSUP PLACE (Formerly Second Avenue)—OPENING, from Boscobel avenue to Marcher avenue. Confirmed May 5, 1905; entered February 20, 1906. Area of assessment includes all those lands, tenements and hereditaments and premises situate, lying and being in the Borough of The Bronx, in the City of New York, which, taken together, are bounded and described as follows, viz.:

Beginning at the point of intersection of a line parallel to and distant 100 feet southerly from the southerly line of that portion of East One Hundred and Sixty-ninth street lying between Cromwell avenue and Boscobel avenue with a line parallel to and distant 100 feet easterly from the easterly line of Boscobel avenue; running thence northerly along said mentioned line to its intersection with a line drawn at right angles to Cromwell avenue and through a point in the easterly line of Cromwell avenue equally distant from East One Hundred and Sixty-ninth street and East One Hundred and Seventieth street; running thence easterly along said last mentioned line to its intersection with a line parallel to and distant 100 feet easterly from the easterly line of Cromwell avenue; thence northerly along said parallel line to the westerly line of Macomb's road; thence northeasterly in a straight line to the point of intersection of the easterly line of Macomb's road with the southwesterly prolongation of a line parallel to and distant 100 feet southeasterly from the southeasterly line of Macomb's road; thence northerly along said southwesterly prolongation and parallel line to its intersection with a line drawn parallel to and distant 100 feet southerly from the southerly line of Featherbed lane; thence easterly along said parallel line to its intersection with a line drawn parallel to and distant 100 feet northerly from the northerly line of Belmont street; thence northwesterly along said parallel line to its intersection with the southerly line of Featherbed lane; thence northwesterly in a straight line to the point of intersection of the northerly line of Featherbed lane with a line drawn parallel to and distant 100 feet easterly from the easterly line of Macomb's road; thence northerly along last mentioned parallel line to its intersection with the southeasterly line of Nelson avenue; thence southwesterly along said line of Nelson avenue to its intersection with the northerly prolongation of the middle line of the blocks between Nelson avenue and Marcher avenue; thence southwesterly along said prolongation and middle line and its southwesterly prolongation to its intersection with a line parallel to and distant 100 feet southerly from the southerly line of High Bridge street; thence easterly along last mentioned parallel line to its intersection with a line parallel to and distant 100 feet westerly from the westerly line of Boscobel avenue; thence southerly along last mentioned parallel line to its intersection with the westerly prolongation of a line parallel to and distant 100 feet southerly from the southerly line of that portion of East One Hundred and Sixty-ninth street lying between Cromwell avenue and Boscobel avenue; thence easterly along said westerly prolongation and parallel line to the point of beginning.

The above-entitled assessment was entered on the date hereinbefore given in the Record of Titles of Assessments, kept in the Bureau for the Collection of Assessments and Arrears of Taxes and Assessments and of Water Rents. Unless the amount assessed for benefit on any person or property shall be paid within sixty days after the date of said entry of the assessments interest will be collected thereon, as provided in section 1006 of the Greater New York Charter.

Said section provides that "If any such assessment shall remain unpaid for the period of sixty days after the date of entry thereof in the said Record of Titles of Assessments, it shall be the duty of the officer authorized to collect and receive the amount of such assessment to charge, collect and receive interest thereon at the rate of seven per centum per annum, to be calculated to

the date of payment from the date when such assessment became a lien, as provided by section 159 of this act."

Section 159 of this act provides: "An assessment shall become a lien upon the real estate affected thereby ten days after its entry in the said record."

The above assessment is payable to the Collector of Assessments and Arrears, at the Bureau for the Collection of Assessments and Arrears of Taxes and Assessments and of Water Rents, in the Municipal Building, corner of One Hundred and Seventy-seventh street and Third avenue, Borough of The Bronx, between the hours of 9 a. m. and 2 p. m., and on Saturdays from 9 a. m. to 12 m., and all payments made thereon on or before April 21, 1906, will be exempt from interest, as above provided, and after that date will be subject to a charge of interest at the rate of seven per centum per annum from the date when above assessment became a lien to the date of payment.

CORPORATION SALE OF BUILDINGS AND APPURTENANCES THERETO OF CITY REAL ESTATE.

PUBLIC NOTICE IS HEREBY GIVEN that the Commissioners of the Sinking Fund, by virtue of the powers vested in them by law, will offer for sale at public auction on

FRIDAY, MARCH 9, 1906,

at 11 a. m., on the premises, all the buildings and appurtenances thereunto belonging, erected upon real estate acquired for Police Department purposes, belonging to The City of New York, all the right, title and interest of The City of New York in and to the buildings thereunto belonging, acquired for the Department of Police in the Borough of Manhattan, erected upon land described as follows:

Beginning at a point on the southerly side of West Thirtieth street distant 263 feet easterly from the southeasterly corner of West Thirtieth street and Seventh avenue; running thence southerly and parallel with Seventh avenue 76 feet 5 inches; thence easterly 6 feet; thence again southerly or nearly so 23 feet 5 inches to the centre line of the block between West Twenty-ninth street and West Thirtieth street; thence easterly along the centre line of said block and parallel with West Thirtieth street 91 feet; thence northerly and again parallel with Seventh avenue 98 feet 9 inches to the southerly side of West Thirtieth street; thence westerly along the southerly side of West Thirtieth street 100 feet 7 inches to the point or place of beginning, premises being known by Nos. 134 to 138 West Thirtieth street.

By direction of the Comptroller, the sale of the above-described buildings and appurtenances thereto will be made under the supervision of the Collector on Friday, March 9, 1906, at 11 a. m., on the premises.

The buildings on the premises above described shall be sold for the highest marketable price at public auction upon the following

TERMS AND CONDITIONS.

The buildings and appurtenances thereto will be sold to the highest bidder, who must pay immediately cash or a certified check drawn to the order of the Comptroller of the City of New York, and must give either a cash bond or an approved bond of a surety company in the amount of the purchase price as security for the proper performance of the work of removal, which must be completed within thirty working days thereafter.

All the buildings, structures and parts thereof, their fixtures and foundations of every class and description within the described area are to be torn down to a level two feet below the existing curb; and any structures which may exist within any of the buildings, such as engine beds, boiler settings, etc., and all stoops and area walls, shall also be torn down to the same level. All tin from roofs, cornices, sides of buildings or partitions, sheds and fences shall be removed from the premises. All brick laid in mortar, all floor beams, joists, studding, flooring, ceiling, roofing, boards and woodwork of every description, and all gas, water, steam and soil piping shall be removed from the premises. All combustible matter, such as tar and felt roofing, broken lath and

fragments of timber, chips, splinters, etc., which are of no value, shall be gathered together by the contractor and burned or carried away.

Failure to remove the said buildings and appurtenances, or any portion thereof, within said period will work forfeiture of ownership of such buildings or appurtenances, or portion as shall then be left standing, and the bidder's assent to the above conditions being understood to be implied by the act of bidding, and the said City of New York will, without notice to the purchaser, cause the same to be removed and the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against and from all suits and actions, claims and demands, of every name and description brought against it, them or any of them, and against and from all damages and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work or in guarding the same, or from any improper or defective materials or machinery, implements or appliance used in the removal of the said buildings by the said successful bidder, and the bidder's assent and agreement to the above conditions are understood to be implied by the act of bidding.

Party walls and fences, when existing against adjacent property not sold shall not be taken down, but all furrings, plaster, chimneys, projecting brick, etc., on the faces of such party walls shall be taken down and removed. The walls shall be made permanently self-supporting, without the aid of braces, the beam holes, etc., bricked up and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs of the adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operation of the contractor.

The Comptroller of The City of New York reserves the right on the day of the sale to withdraw from sale any of the buildings or parts of buildings and machinery included in the foregoing parcel.

PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 430 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
