Emergencies affect every community differently, but you can help your community be prepared and resilient. Your Community Network can receive funding up to \$40K to work on a community emergency plan through NYC Emergency Management's Strengthening Communities Program.

The training program focuses on five key areas/deliverables to build an emergency plan specific to your community:

1. Creating a needs assessment
2. Designing community maps of the area where you provide services
3. Building a resource directory
4. Preparing a communication strategy
5. Creating donations and volunteer management plans

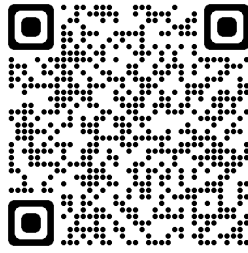

NYC Emergency Management staff provides training, coaching sessions and tools that guide participating networks through the program.
