Comparison with the first quarters of the year shows greater success in securing compliance with orders, and a larger reduction in the number of outstanding violations. The nature of the violations issued is shown in the following tabulation of the orders contained in them.

As compared with the first quarter an increase is seen especially in structural orders, such as cutting windows in dark interior rooms, replacing wooden door panels with glass to light dark halls, providing proper skylights, removing school sinks, providing new water closets and adequate means of egress in case of fire.

The above table shows a considerable increase in all classes of orders complied with, with only three exceptions—"miscellaneous cleaning," an unimportant class under which comparatively few orders are issued; "repairing or cleaning school sinks"—orders which are reduced in number by increase in orders to remove school sinks—and night lighting of halls.

Little can be done in this last class of orders, by reason of the inadequacy of the force at our disposal, except on complaint, in which case inspections are made and the appropriate orders issued.

During the quarter 10,277 citizens' complaints were received, about 600 less than for the preceding quarter. Of these, 7,549 related to Manhattan property, 382 to The Bronx, 2,192 to Brooklyn, 145 to Queens and 9 to Richmond; 4,180 cases, or 41 per cent., resulted in violations; in 970 cases, or 9 per cent., the cause of complaint was removed without issuing violations, and in 1,064 cases, or 19 per cent., the matter complained of was already before the attention of the Department.

The nature of the complaints was as follows, counting each item of complaint separately:

During the quarter 160 buildings were recommended for vacation in the Borough of Manhattan, 11 in The Bronx, 61 in Brooklyn, 9 in Queens and 1 in Richmond, making 242 for the entire city. This is 21 less than for the previous quarter.

Plans for the alteration of tenements were filed as follows during the quarter:

This is an increase of 374 houses and \$181,239 estimated cost over the preceding quarter. The alterations planned for were on the average of a less expensive nature than for the previous quarter, as the increase in number of buildings was 24 per cent., while the increase in estimated cost was only 11 per cent. The approximate average cost per building of alterations was as follows for the first and second quarter:

	First Quarter, 1907.	Second Quarter, 1907.
Manhattan	\$1,425 00	\$1,380 00
The Bronx	500 00	580 00
Brooklyn	470 00	325 00
Queens	415 00	430 00
Richmond	405 00	365 00

Plans for new buildings were filed between April 1 and June 30, 1907, and in force the latter date, as follows:

New York City	633	100.00	1,330	100.00	14,706	100.00	28,007,650 00	100.00

Compared with the second quarter of the preceding year, a considerably smaller number of new buildings is shown, 1,330 as against 1,911, a difference of 30 per cent. All boroughs share in this decrease except The Bronx, where there were 43 more buildings planned for than in the second quarter of 1906. The difference in cost is about the same as the difference in houses, 30 per cent. smaller, but a difference in the character of the buildings planned for in the different boroughs is shown by the table below giving comparative average cost per building for the quarters. The significant changes are in Manhattan and The Bronx; in the one, the greater activity being shown in the higher class buildings as shown by the higher average cost; in the other, the increased popularity of the smaller buildings as shown by the much lower average cost.

The estimated average cost of buildings for the second quarters of 1906 and 1907 was as follows:

	Second Quarter of	
	1906.	1907.
Manhattan	\$55,107 00	\$74,096 00
The Bronx	37,620 00	20,215 00

BOARD OF ESTIMATE AND APPORTIONMENT.

EXTRACT FROM

MINUTES, BOARD OF ESTIMATE AND APPORTIONMENT, CITY OF NEW YORK, SEPTEMBER 27, 1907.

RAPID TRANSIT RAILWAY.

Broadway, from Ninety-sixth Street to One Hundred and Second Street, Borough of Manhattan.

Consideration of the communication, dated August 19, 1907, from the Public Service Commission for the First District, transmitting resolutions as to route and general plan adopted by the Board of Rapid Transit Railroad Commissioners June 27, 1907, providing for additions to the rapid transit railway adopted by the Board of Rapid Transit Railroad Commissioners on February 4, 1897, and requesting the approval and consent of this Board to the construction of such additional rapid transit railway, in accordance with such plans and conclusions.

The consideration was fixed for this day by resolution duly adopted September 20, 1907.

Hon. William R. Willcox, Chairman of the Public Service Commission for the First District, Abel E. Blackmar, Counsel, and George S. Rice, Chief Engineer of said Commission, appeared and requested favorable consideration.

The following was offered:

Whereas, The Board of Rapid Transit Railroad Commissioners for The City of New York, constituted pursuant to the provisions of chapter 4 of the Laws of 1891 and the acts amendatory thereof, has duly determined upon a route or routes and general plan of construction of a rapid transit railway for the conveyance of persons and property, to be established in said City, in addition to the already existing lines, and did, by resolution of June 27, 1907, adopt such route or routes and general plan; and

Whereas, Chapter 429 of the Laws of 1907, abolished the Board of Rapid Transit Railroad Commissioners and created the Public Service Commission for the First District, and conferred upon the latter Commission all the powers and duties conferred and imposed by any statute of this State upon the Board of Rapid Transit Railroad Commissioners; and

Whereas, Thereafter said Public Service Commission for the First District did transmit to the Board of Estimate and Apportionment of The City of New York a copy of the plans and conclusions for said route or routes, as adopted by the Board of Rapid Transit Railroad Commissioners, which plans and conclusions were received by said Board of Estimate and Apportionment on the 20th day of September, 1907, at a meeting of said Board of Estimate and Apportionment, duly held on said day; and

Whereas, Said Board of Estimate and Apportionment, by resolution duly adopted at said meeting, did appoint a day not less than one week nor more than ten days after the receipt thereof for the consideration of such plans and conclusions, to wit: the 27th day of September, 1907, at 10.30 o'clock a. m., and has proceeded with such consideration; and

Whereas, The plans and conclusions are fully set forth in the resolutions of said Board of Rapid Transit Railroad Commissioners, adopted June 27, 1907, and which resolutions are as follows:

Resolutions Adopted by the Board of Rapid Transit Railroad Commissioners, June 27, 1907.

Whereas, This Board did, on the 14th day of January, 1897, and the 4th day of February, 1897, adopt certain routes and general plan for a rapid transit railroad in The City of New York, a copy of which is hereto annexed, entitled "Copy, Routes and General Plan;" and

Whereas, The said routes and general plan were afterward duly approved by the municipal authorities of The City of New York, and were duly consented to by commissioners appointed by the Appellate Division of the Supreme Court, which consent was duly confirmed by the said Appellate Division, in lieu of the consent of the owners of a majority in value of the property along said routes; and

Whereas, Thereafter, and on or about the 21st day of February, 1900, The City of New York did by this Board enter into a certain contract with John B. McDonald for the construction and operation of the said rapid transit railroad; and

Whereas, By written instrument bearing date the 10th day of July, 1902, the said John B. McDonald, with the written consent of this Board, concurred in by six members thereof, duly assigned the right or obligation to maintain and operate the said rapid transit railroad for the term of years specified in the said contract, and all rights included in the leasing provisions of the said contract, together with the obligation to provide equipment for the said railroad, unto Interborough Rapid Transit Company, which company also guaranteed the performance by the said John B. McDonald as such contractor, of the provisions of his said contract not so assigned to it; and

Whereas, It is the interest of The City of New York, and, in the opinion of the said Interborough Rapid Transit Company, it is likewise in its interest as such lessee, and it desires that said routes and general plan shall be changed in the respect hereinafter mentioned, but without other change in the said routes and general plan; now therefore it is

Resolved, That, subject to the consents and approvals to be first obtained as in these resolutions hereinafter mentioned, the said routes and general plan heretofore adopted by this Board be and they hereby are modified by adding to the said routes the following, to wit:

"And also an additional track extending along the easterly side of Broadway from a point near the centre line of Ninety-sixth street to a point about seventy-five (75) feet north of the northerly line of One Hundred and Second street. The said easterly additional track is more particularly described as follows:

"A track, the centre line of which shall begin at or near a point where the centre line of Ninety-sixth street intersects the centre line of the easterly track as originally constructed upon this route; thence diverging from the said easterly track originally constructed and running northeasterly and northerly and generally parallel with the easterly line of Broadway, and distant therefrom not less than twenty-four (24) feet and nine (9) inches, and so continuing to a point near the southerly line of One Hundred and Second street; and thence curving northwesterly, and again uniting with the said easterly track of the railroad as originally constructed upon this route, at a point about seventy-five (75) feet north of the northerly line of One Hundred and Second street.

"Also two additional tracks extending along the westerly side of Broadway, from a point near the centre line of Ninety-sixth street northerly to a point near the centre line of One Hundred and First street. The said two tracks are more particularly described as follows:

"First—A track, the centre line of which shall begin at or near the point where the centre line of Ninety-sixth street intersects the centre line of the westerly track as originally constructed upon this route; thence diverging from the said westerly track originally constructed and running northwesterly and northerly and generally parallel with the westerly line of Broadway, and distant therefrom not less than twenty-four (24) feet and nine (9) inches, to a point about fifty (50) feet south of the southerly line of One Hundredth street; and thence curving northeasterly, and again uniting with the said westerly track as originally constructed upon this route, at a point near the intersection of the centre line of the said westerly track with the centre line of One Hundred and First street.

"Second—A track, the centre line of which shall diverge from the centre line of the additional track last above described, at a point about twenty (20) feet south of the northerly line of Ninety-sixth street; and thence running northerly and parallel, or nearly so, with the westerly line of Broadway, and distant about forty (40) feet therefrom, to a point fifty (50) feet north of the northerly line of One Hundredth street; and thence curving northeasterly and continuing to a point near the intersection of the centre line of One Hundred and First street with the centre line of the lower westerly track originally constructed upon this route, and known as the southbound Lenox Avenue track.

"And also spurs or connections to unite the said three additional tracks, or any one or more of them, with any of the other tracks constructed upon this route.

"The additional tracks, spurs and connections herein provided for shall be built (except where the same curve to unite with or diverge from any of the four tracks first constructed upon this route) between the walls of the railroad or subway and the easterly and westerly sides of Broadway, respectively.

"The additional track on the easterly side shall descend from a point at or near the centre line of Ninety-seventh street at a grade of about 1 per cent. to a point about forty (40) feet north of the centre line of Ninety-ninth street, and then level to a point about thirty-five (35) feet below the surface of Broadway and near the southerly line of One Hundredth street, at which point a spur or connection shall diverge to connect with other tracks. Said easterly additional track, as above described, shall from said lowest point ascend to about the centre line of One Hundred and Second street, and shall continue thence on the same grade as the easterly line originally constructed upon this route, which is known as the northbound Broadway track.

"The first of the two additional westerly tracks shall be constructed upon the same grade as the westerly track first constructed upon this route, which is known as the southbound Broadway track.

"The second of the two additional westerly tracks shall continue on the same grade as the first of the said additional westerly tracks from the point of beginning, as above described, to a point near the intersection of the centre line of Ninety-eighth street; from thence it shall descend to a point about the northerly line of One Hundredth street, at which it will be on the same grade as the two centre tracks first constructed upon this route, known as the Lenox Avenue tracks; and from thence it shall continue on the same grades as the said two Lenox Avenue tracks.

In all other respects the provisions of the said general plan of construction adopted January 14 and February 4, 1897, as heretofore amended, shall be applicable to the portion of the route hereinbefore mentioned; and it is further

Resolved, That whereas this Board has duly made the inquiries and investigation necessary or proper in the premises, and has determined that the modification aforesaid of the said routes and general plan are necessary for the interests of the public and of The City of New York, and should be established as herein provided, this Board does hereby determine and establish the said routes and general plan as hereby modified, subject to the consents and approvals to be first obtained as hereinafter mentioned; and it is further

Resolved, That the said modifications of the routes and general plans shall take effect only upon and after the following consents and approvals thereto shall be duly had, to wit:

1. The consent of the Board of Estimate and Apportionment of The City of New York as the local authority having control of the streets above mentioned.

2. The consent of the Mayor of The City of New York.

3. The consent of the owners of a majority in value of the property along that portion of Broadway, in the Borough of Manhattan, which is

included in the portion of the routes added as aforesaid; or, if such consents cannot be obtained, then, in lieu thereof, the determination of three commissioners to be appointed by the Appellate Division of the Supreme Court duly confirmed by the said Appellate Division.

4. The consent of the said John B. McDonald, contractor, and of his sureties, as follows: Rapid Transit Subway Construction Company, the United States Fidelity and Guaranty Company, the Empire State Surety Company, American Surety Company of New York, National Surety Company and Fidelity and Deposit Company of Maryland, and also Interborough Rapid Transit Company; and it is further

Resolved, That this Board hereby adopts the drawing now produced and entitled "Board of Rapid Transit Railroad Commissioners of The City of New York: Proposed additional tracks between West Ninety-sixth and West One Hundred and Third streets. Drawing No. 1715B, June 24, 1907," as showing in general the additions to and modifications of the original routes and general plan hereby adopted.

Now therefore be it

Resolved, That the Board of Estimate and Apportionment of The City of New York, by a majority vote, according to the number of votes by law pertaining to each member of the Board, hereby approves such plans and conclusions and consents to the construction of a railway or railways in accordance therewith.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following matters not on the calendar for this day were considered by unanimous consent:

New York and Queens County Railway Company.

A petition was received from the New York and Queens County Railway Company for a franchise to construct, maintain and operate a double track street surface railway as an extension to its existing railway, from the intersection of Jackson and Thompson avenues, in the former city of Long Island City, and upon and along Thompson avenue and the Hoffman boulevard to Fulton street, in the former village of Jamaica.

Which was referred to the Chief Engineer.

The full minutes of the meeting of this day will appear in the CITY RECORD at a later date.

JOSEPH HAAG, Secretary.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.
