P R O C E E D I N G S

MR. SZARPANSKI: Good evening.

My name is Harry Szarpanski. I'm Assistant Commissioner for the Bureau of Long Term Export at the Department of Sanitation.

Welcome to the Environmental Justice Informational Meeting for the proposed Hamilton Avenue Converted Marine Transfer Station.

I am joined tonight by Vaughan Arnold and Sarah Dolinar of the Department of Sanitation.

We also have present with us representatives of the HDR Team. They conducted the environmental review for the project. The HDR team includes, Dan Harkins, Joyce Mariani, Elo Comfort, Nok Siriphonlai and Cade Hobbick.

The project design team, Greeley and Hansen, are represented this evening by Harvey Brodsky and Jay Lovelass.

Let me take just a few minutes to discuss the format of this meeting.

If you didn't sign in yet on your way in, please do so on your way out. We use the

2 sign-in sheet for mailings so we can notify you of
3 future hearings and meetings about this project.

4 What I'm going to do is I'm going to
5 make a short PowerPoint presentation on the
6 proposed project. Make sure you get one of the
7 handouts at the front desk as you came in that
8 contains my presentation and background
9 information. We also have copies in Spanish and
10 Mandarin Chinese.

11 After the PowerPoint, I'm going to
12 open up the meeting to your statements and
13 questions and answers.

14 To make a statement or ask
15 questions, you'll need to sign up at the table as
16 you came in and have a copy of the speaker sign-in
17 form.

18 Has anyone not picked up a speaker
19 form who does want to speak? Okay, we have
20 several speakers.

21 I'll call out the number and the
22 name. And forgive me if I mispronounce your name
23 just correct me when you come up to the
24 microphone.

25 We normally -- if this was a large

2 crowd, we limit each speaker to about three
3 minutes but I see no need to limit the time each
4 speaker takes tonight.

5 We're here to answer your questions
6 about the project and if there's something that we
7 can't answer and we can't turn it over to our
8 consultant team with an answer, we will follow up
9 with a response after the meeting.

10 If any elected officials are here
11 and want to speak, I don't see any right now, but
12 we will give them the courtesy of coming up when
13 they arrive so that they can make other meetings
14 they may have scheduled.

15 We are keeping a transcript of your
16 statements and our answers to your questions. We
17 have a reporter here so if at times for any reason
18 the stenographer doesn't quite get what you said,
19 we may ask you to say it more clearly or repeat.

20 Basically, I'm going to start with a
21 short PowerPoint presentation before we turn it to
22 over to your comments.

23 (Showing PowerPoint.)

24 MR. SZARPANSKI: We talked a little
25 about the objectives of the meeting. It's about

2 the converted marine transfer station we're
3 proposing.

4 We're going to talk about the New
5 York State Department of Environmental
6 Conservation permit process. We'll explain to you
7 how you can provide comments both to us, DSNY, and
8 the DEC in the future and we will answer your
9 questions.

10 The EJ, Environmental Justice plan,
11 calls for the preparation of a public
12 participation plan. The DEC has already approved
13 the public participation plan that we prepared
14 both for this project and the three other proposed
15 converted marine transfer stations.

16 This meeting is just one of the
17 elements of the plan and we are looking to do the
18 same kind of outreach program for each of the
19 other three converted MTSS.

20 Now, what the public participation
21 plan is all about, it's basically to identify the
22 stakeholders in the project, organizations or
23 individuals who have some sort of involvement in
24 what we're planning to do; describes the
25 information on the proposed project. I mean I'm

not going to go through every line here, I think some of these things are self-explanatory. You have it in your brochure.

Basically, it's an opportunity to reach out to everyone who may be interested in the project and provide them with the opportunity to review what we're proposing to do and then to provide us with input and have us answer any questions that they may have.

Some of the key dates leading up to today include the issuance of the Solid Waste Management Plant or SWMP, as we call it, back in October of 2004.

We did a Draft Environmental Impact Statement (DEIS) in October of '04 and a Final EIS (FEIS) was prepared in April of '05.

This came up before Community Board #7 as part of the ULURP, Uniform Land Use Review Process. And Community Board #7 voted for the project. The Borough President endorsed the project, the plan, which included this project and then the City Planning Commission approved the ULURP actions for all four MTSSs.

We then had SWMP adoption by the

23
24
25

City Council in July of 2006 and after that the plan was submitted to the State DEC. And the DEC approved the SWMP in October of 2006.

I'm sure you can't see the slide from where you're sitting. It's a very busy slide, but it's in the handout. And basically, it shows the various wastesheds, which community board waste will go to which facilities.

If you look at the bottom there in Brooklyn, the blue area is the wasteshed for the proposed Hamilton Avenue Marine Transfer Station.

This is the site plan. On the upper right end is the Gowanus. The facility is laid out so that part of it is over water and part of it is on land. And I think the Home Depot is just below it.

This is what a typical marine transfer station cross section looks like. Off on the right there, those two dark areas, are the doors where trucks will drive into the facility. Once the trucks are in the facility, everything is enclosed. No handling of waste occurs out in the open.

The trucks drive onto what's called

24
25

the tipping floor. That's the highest level and you'll see a little truck there in yellow or gold dumping its waste to the next level which is the loading level.

On the loading level you have equipment front-end loaders which manage the pile and basically push waste through four openings in the floor.

Under each opening there's a container. Waste goes into the container. Then with the waste still within the building, the container is moved to the left in the diagram here where the lidding of the container occurs. Once the container is totally sealed, the container then moves outside. And this is the pier level where the containers are then picked up by a gantry crane and placed onto a barge.

This is just an overhead view of the same operation. You can see on the right is the tipping floor. The center section is where waste is loaded into the openings, pushed into the openings to be put into the containers.

To the left of that gray area is where the gantry crane picks up those containers

and places them onto a barge.

The proposed capacity for the Marine Transfer Stations.

One of the basic elements of the plan that was agreed to by both the Council and the administration, was to make sure that the wastesheds for each of the converted MTSS remain the same as the wastesheds for the previous Marine Transfer Stations that were operated at that site.

The wastesheds listed there are the historical wastesheds that were used when the Fresh Kills Landfill was being barged.

We expect a daily throughput to be about 1,900 tons a day of Department, DSNY managed waste and the capacity there for up to 1,240 tons of commercial waste.

There are going to be limits set in the permits on daily tonnage that can arrive and be processed there, and weekly limits. And those are shown.

There is also a built-in twenty percent allowance for seasonal variability and for growth in the wasteshed in the future.

There is a proposed maximum peak day

2 limit -- the most that can ever go through at a
3 facility on a daily basis -- of 3,500 tons, and
4 the maximum peak day limit is really to take care
5 of post holiday days, if for instance, there's a
6 holiday on a Monday and we don't collect waste on
7 a Monday, on a Tuesday we need to be able to
8 handle the previous two days' waste. And the peak
9 days are designed to be able to allow for that
10 processing.

11 Just to put it in perspective, when
12 we operated the old Marine Transfer Stations, the
13 permit for each of those was 4,800 tons per day.

14 Some key features of the Marine
15 Transfer Station.

16 Everything is processed within an
17 enclosed area inside the building. And there's
18 what's called "negative air pressure" to prevent
19 odors from going out. What that means is that
20 fans basically draw air into the facility. The air
21 then is treated and neutralized before it comes
22 out so that you don't have any air that's in the
23 building escaping through doors without being
24 treated.

25 I mentioned that all waste is in

1
2
3

21
22
23
24
25

sealed, leak-proof containers. And the Final EIS found that there were no significant adverse impacts from the MTS construction or its operation.

Commercial waste.

The plan calls for each of the Marine Transfer Stations to have a certain capacity to handle commercial waste at those facilities.

The limit on how much commercial waste can be sent to each of these facilities is based on the hours that they come. And commercial waste will only be allowed in these facilities between eight p.m. and eight a.m. And that matches the collection methodology used by commercial haulers and it's limited so that there is no impact from noise.

There's probably more capacity at each of these facilities to process commercial waste, but the limitation is that we did not want to exceed any noise thresholds in the community so there's a limit on how much commercial waste can go to each of these facilities.

Where we are in terms of the

21
22
23
24
25

permits.

We submitted to the State DEC basically three permit applications for each of these facilities. There's what we call a Part 360 Permit which deals with the solid waste components.

There is the Part 608/681. These are related to marine aspects of the project, has to do with protecting the waters.

And the third part is the State Facility Air Permits for a minor source.

There isn't any burning or anything going on at this facility but there are pieces of equipment inside. And all the emissions from any equipment goes out through a vent or stack and that needs to be permitted.

We have several places where the public can view these particular permit applications. The applications themselves are pretty big. One set is at the Community Board #7's office . There's another set at the Sunset Park Library. The permit applications are also on the Department's web site.

This just gives a little more detail

2 on what each of those permits are, what a solid
3 waste facility permit looks at. And it has to do
4 with the construction and operation of the
5 facility, and there has to be an engineering
6 report as part of the requirement.

7 The marine related permits deal with
8 the construction that goes on in the water, over
9 the water, any platforms and bulkhead construction
10 and any dredging that's associated with the
11 project.

12 The Part 201 State Facility Air
13 permit deals with emissions resulting from the
14 facility.

15 This is another busy slide and
16 probably difficult to see from the audience. But
17 you can, at your leisure review it. It's in the
18 handout. It basically traces the steps that the
19 DEC will be taking once our process gets to the
20 point where we have a complete permit application.

21 The first box basically shows that
22 once the DSNY gets a Notice of Complete
23 application from the State DEC, the DEC will then
24 put out a notice and it will probably be one
25 notice that includes the three items: Notice of

1
2 Complete Application, a notice of the public
3 comment period, and when the public hearing will
4 actually take place.

5 There'll be an opportunity for
6 people to comment as soon as this notice is out.
7 People can write to the DEC. And we have
8 information about how you can do that and the DEC
9 will then hold the actual hearings for each of the
10 facilities.

11 We will be discussing the location
12 of those hearings. It may very well be at the
13 same location as you are here for today for the
14 Hamilton Avenue facility and the locations where
15 we're going to hold the actual public meetings, EJ
16 meetings, for the other facilities.

17 The step after that is there will be
18 maybe one or two nights or maybe more of DEC
19 public hearings. Then there'll be a date by when
20 all the comments have to be in. The record for
21 the public hearings will be complete and the DEC
22 will make a decision on whether to issue or deny a
23 permit for the facility.

24 On your handout at the bottom you
25 have the name of the person at the DEC. And it's

2 Michelle Moore. And she's the designated person
3 to receive any calls or any questions about the
4 DEC process.

5 In terms of how your comments will
6 be addressed, we are going to keep a transcript of
7 this meeting and forward a copy to the State DEC.
8 We ask that any comments you have be submitted to
9 us by April 30th.

10 The record of all of this will be on
11 our website and you can look up anything related
12 to this process. You also have my address here
13 where you can mail comments to me and my fax
14 number, if you want to fax those comments.

15 There is more than these slides in
16 your PowerPoint, in your handout. Some of them
17 relates to other parts of the Solid Waste
18 Management Plan, about the recycling component,
19 the waste component.

20 At this point, I will open the floor
21 to questions and answers. And we have several
22 speakers who signed up and I'll call the first
23 speaker.

24 Mr. Henry Charles Marahan.

25 MR. HENRY MARAHAN: Thank you.

I'm a resident of the area for so many years.

Today we are faced with a paramount health problem. Our Center for Disease Control, located in Atlanta, Georgia, our Food and Drug Administration centered in the Foghorn capital of the United States and our Agricultural Department, are all totally dysfunctional.

We have a Katrina Disaster of epic proportions in the making, of our land, as well as our political hacks who are appointed to our New York State and City Department of Health.

The greedy politicians want to use compactors to push human trash into steel containers and transport the human detritus elsewhere aboard steel barges.

Never forgot for one moment that we had a mental giant for Mayor of the City of New York, who ran and won by the name of John V. Lindsay. This genius required, back in the late 1960's, the total elimination of apartment house incinerators. As a direct result we got two hundred and fifty-plus rats -- euphemistically called rodents per human inhabitant.

25

Each rodent eats twenty-five pounds-plus per rodent of our human waste, which is now required by law to be in plastic bags. Rodents eat wood, plastic and even ingest glass particles and survive.

We use huge blocks of green and blue Warfarin, and we have managed to make the rodent superior to the fictional character in America's DC Comic Book, Superman.

The writer of this speech would love to see the garbage transfer station established on Fifth Avenue and 71st Street in Manhattan and have the apartment house demolished in line with eminent domain.

No one ever mentions how the Japanese eliminated not only grass through combustion, but even hazardous waste through incineration.

Our term-limited flunkies give out contracts to gangsters who build these compactors according to substandard health codes.

Vegetable matter, meat and fruit juice and fruit fiber bring in cockroaches that rival the European Airbus 380, and can accommodate

2 raccoons, who are far more fastidious in their
3 culinary habits than we humans.

4 We have managed to virtually
5 annihilate the wolf in the Lower 48 States but are
6 now trying to bring them back. With all our
7 intelligence and cunning, we cannot eliminate the
8 coyote. This mammal is now in our five boroughs
9 and is here to stay. Perhaps we can get the NYPD
10 to fire one hundred thousand bullets in hope of
11 eliminating only one poor creature.

12 We have an asthma epidemic
13 nationwide, not only amongst children but also
14 adults. The writer of this speech wants mustard,
15 phosphine and chlorine and VG released into the
16 atmosphere at 17th Street and Hamilton Avenue.

17 Have you, my friends, looked at the
18 health records of City employees working in sewer
19 treatment plants? It is indeed a very grim
20 record.

21 Take a careful look at your
22 near-empty paint cans. We have eliminated lead
23 paint except for ships, bridges. But we now have
24 replaced lead with chrome dust and toluenyl, which
25 is used to decaffeinate tea and coffee and used in

explosives. And paints in sufficient quantities can give the appearance of nitro-glycerin effects -- a drunken stupor that causes permanent neurological damage.

You get rid of one element and you bring in a mass carcinogen. Do you people ever look at how the City, State and Federal Government maintain their facilities?

Go to Europe and Japan, not England. England is another giant trash heap. Just look at how your local sanitation department and private trash companies operate.

How can a nation survive on crass stupidity and greed? We have lost the war in Iraq and Afghanistan. And we have Spitzer, Bloomberg chomping at the bit for money from taxpayers pockets.

We need a water barrier to protect the five boroughs, not blather. Already the North Atlantic has risen two feet. It means our beloved rats will have to vacate New York City leaving our stupid citizens to fend for themselves, as in Katrina.

Maybe we can hire Blackwater

Corporation to fire at our rent-free rodents at better than a thousand dollars per day. We truly need Eric Prince to run our City and be guaranteed a financial taxpayer bill. A dollar-year man, making billions at the expense of New York residents. All this City has had from colonial times is murderous, greedy caricatures of Mr. Abramoff.

MR. SZARPANSKI: Thank you.
Our next speaker is Elizabeth

Yeampierre.

MS. ELIZABETH YEAMPIERRE: Buenas noches. Good evening.

My name is Elizabeth Yeampierre and I'm the Executive Director of UPROSE. It's Brooklyn's oldest Latino community-based organization. We are an intergenerational organization committed to environmental social justice. We are Sunset Park's environmental justice organization.

I'm also the Chair of the New York Committee of Environmental Justice Alliance. And I sit on the US EPA National Environmental Justice Advisory Council. And I share all of those things

1

21
22
23
24
25

with you because I'm here where we have a number of rats.

As co-founder of the organization which, as you know, is the City-wide coalition that was responsible for helping getting the SWMP passed, we are relieved that coming up with an equitable plan that would reduce garbage in New York City's most environmentally burdened community was the way to lead forward.

We understand that most of the garbage coming out of Manhattan goes to three communities of color in New York City, and so as such, UPROSE, a community-based organization in Sunset Park, decided that it's necessary to support fair share, to fight for borough self-sufficiency and to ensure that the plan that's passed was one that was equitable.

It's important tonight to tell you what environmental justice is as this is called an Environmental Justice Hearing.

Environmental justice is the disparate siting of garbage in the communities of color. It also speaks to something else. It speaks to building community power and consensus

1

2 around environmental justice issues.

3

4

5

6

7

8

9

So for the former I would say that we were actually concerned that you were holding an environmental justice hearing in East 91st Street, which is one of the most privileged communities in New York City, because it is not an environmental justice community but a community like Sunset Park is.

10

11

12

13

14

15

16

17

18

19

20

For the latter, I think that we should not be, that technically, there are not a lot of community people here, should not lead you to think that there are not some concerns regarding the retrofit of the Marine Transfer Station in Sunset Park. While we supported it, and we supported the siting of it, the people in this community because we thought that it was necessary for infrastructure and that it would reduce truck traffic throughout the City of New York.

21

22

23

24

25

We are also a community -- and in this EJ community we've got over a hundred and twenty-two thousand people; thirty-five thousand people under the age nineteen, and less than a quarter acre of open space for every one of the

2 people living here. And we have a sludge
3 treatment plant, a highway, a power plant and all
4 of the environmental burdens that you find in
5 communities of color.

6 Our organization has been working
7 hard for over ten years to try to address those
8 environmental burdens in addition to fighting the
9 siting of a power plant in this community.

10 We have led the community in
11 fighting a three-lane thruway. And we helped
12 pass, let's say, the first sound piece of
13 legislation.

14 We've worked with the community as
15 partners to have a waterfront park and we
16 basically train our young people to be organizers
17 in this community.

18 And I share this with you because
19 I'd like you to consider the fact that there are
20 concerns that need to be addressed.

21 When we decided that we were going
22 to support this plan, we were also told by the
23 administration that there would be assurances,
24 that there would be things that would be provided
25 to address our concerns about capacity, about the

1

2 number of trucks, about pollution emissions.

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

And so we want to make sure that you did not misunderstand that the fact that the people are not here does not mean that there is a consensus. And while we have been really useful and helpful and making sure that we've got that consensus, we've gotten political support, we've gotten support from large community departments. There's also a consensus about the fact that those needs need to be addressed.

We want to thank you for being here with so many people, with so many consultants, particularly because there are so few community people here. We see that as a sign of respect for our community and we do appreciate that.

We also want to say that whatever you do to move forward in Sunset Park, it should be consistent with the main decision -- at least as it is being articulated on the sustainability and long-term planning work that we have been doing for the past few months, and that if the assurances that this community received are not realized, or are not consistent with that plan, it will really undermine the work that the Mayor is

doing to address issues of stability of carbon emissions around the City of New York, and you first have to look at those communities since those are the ones that have the highest number of environmental burdens.

I'm going to be brief. I've been working on this plan for ten years and so there isn't anything about this plan that we don't know but we are concerned about Sunset Park's Marine Transfer Station and others.

We are in a very different situation, as I mentioned. I can't say that enough. This is an EJ community that accepted it in the interest of justice and fair play. And so in that regard, we expected to be treated in-kind and if not, then we will have to revisit our tactics and ways and provide support and handle this issue very differently.

The community board - I don't know if anyone from the community board is here - has a bunch of organizations. They include setting up community advisory committees, turning over the unused 52nd Street Pier and the Bush Terminal Park Plan; relocated the BK10 garage to its own

district. Working towards the closure of IESI on 50th Street.

And I would also like you to work with IESI so that they can consider using the Marine Transfer Station so that we can stop all of the queuing of all those trucks in our community.

Some people in the community have suggested the retrofit of local tug fleets with cleaner engines. And the BK 7 should be relocated off the waterfront.

And another suggestion that has been made by members of our organization is that Sanitation trucks traveling to and from the facility minimize routes on residential streets and the facility should maximize water delivery.

Then, as you know, we have suggestions about what to do regarding reserve capacity, throughput and the increase in that.

Those are the technical things that we're going to be expecting. And we're hoping that we can get those assurances in time that will make it possible for us to move forward on not only working with the Mayor's Office in good faith, but being able to deliver a message to New

1
2 York City that, in fact, it does work in those
3 communities and does understand what environmental
4 justice is.

5 We really believe that when the
6 Mayor decided to push the Solid Waste Management
7 plan, we thought that it was a victory for the
8 environmental justice community. How you treat
9 the community will be a reflection of whether or
10 not those promises are kept.

11 Muchas gracias.

12 MR. SZARPANSKI: Thank you very
13 much for your comments.

14 I also want to thank you for your
15 ongoing support of the Solid Waste Management
16 Plan. We really appreciate that and we are
17 committed to keep on working with you to try to
18 improve the situation and make this facility not a
19 burden to the community.

20 Thank you.

21 Is there anyone else here who wants
22 to speak? Are there any questions?

23 Mr. Marahan.

24 MR. HENRY MARAHAN: There are
25 thousands of toxins emitted from collecting

1
2 garbage: Formaldehyde, toluenyl, alcohol,
3 nitro-glycerin, amino nitrates, you name it. The
4 list goes on to forty thousand industrialized
5 carcinogens that affect human beings. With this
6 fact, tryptone is used in your ordinary kitchen
7 utensil. You ingest this. It's a killer. It
8 causes cancer. You people better use your brains
9 if you have any.

10 MR. SZARPANSKI: Anybody else?

11 (No response.)

12 MR. SZARPANSKI: We're going to stay
13 for a little longer. If you want to stay, you're
14 welcome to stay. Maybe some other people will
15 join us.

16 But I thank you all for coming.

17 (At 7:35 p.m., the hearing was
18 temporarily suspended.)

19 (At 8:50 p.m., the proceedings were
20 concluded.)

ATTACHMENT 7

Summary of Transcript Comments

HAMILTON AVENUE CONVERTED MTS EJ INFORMATIONAL MEETING ISSUES SUMMARY

1. The Converted MTS will attract rats and vermin. Vector control and pesticide use continue to be issues. Marahan, p. 19, lines 2 and 8.
2. We have an asthma epidemic. Marahan, p. 20, line 12.
3. East 91st Street, which is one of the most privileged communities in New York City is not an environmental justice community, but a community like ours in Sunset Park is one. We have 122,000 people in the community; 35,000 under the age of 19 and less than ¼ acre of open space for every one of them. We have a sludge treatment plant, a power plant and all of the environmental burdens you find in communities of color. Yeampierre, p. 24, lines 4 - 9, 22 - 25, p. 25, lines 2 - 5.
4. Decision to support SWMP based on assurances that our concerns about the MTS capacity, number of trucks and pollution emissions would be addressed. Yeampierre, p. 25, lines 21 - 25 and p. 26, line 2.
5. If assurances are not honored it will undermine Mayor's sustainability plan. Yeampierre, p. 26, lines 17 - 25.
6. The CB conditioned its approval of the MTS on a list of community requests. If these requests are not honored, then the community will revisit its tactics and handle this issue differently. Yeampierre, p. 25, line 21 and p. 27, line 14.
7. CB conditions include setting up community advisory committees, turning over the 52nd Street pier and the Bush Terminal Park Plan, relocating BK10 garage and working towards the closure of IESI on 50th Street. Yeampierre, p. 27, lines 22 -25 and p. 28, lines 2-3.
8. DSNY should work with IESI and consider sending IESI waste to the MTS so that we can stop truck queuing in our community. Yeampierre, p. 28, lines 4-7.
9. DSNY should retrofit local tug fleets with cleaner engines. Yeampierre, p. 28, lines 8 – 10.
10. DSNY's BK 7 garage should be relocated off the waterfront. Yeampierre, p. 28, lines 10 -11.
11. Sanitation trucks traveling to and from the facility should minimize routes on residential streets. Yeampierre, p. 28, lines 14 – 15.
12. The community has concerns about what to do about reserve capacity, throughput and waste delivery increases at the MTS. Yeampierre, p. 28, lines 17 – 19.

Postcard Notifying Stakeholders of Issuance of Notice of Complete Application and Draft Permit and Establishment of Public Comment Period

DSNY Stakeholder Notice

The New York City Department of Sanitation (DSNY) has identified you as a stakeholder for the **Hamilton Avenue Converted Marine Transfer Station** project proposed to be located in the Red Hook section of Brooklyn.

This postcard notifies you that on September 26, 2007, the New York State Department of Environmental Conservation published a Notice of Complete Application in connection with DSNY's application for a permit to construct and operate the proposed Hamilton Avenue Converted Marine Transfer Station and issued a draft permit for the facility. A 30-day period was established for the receipt of comments on the project. The draft permit includes conditions for the following permits sought by DSNY:

- Article 27 Title 7 Solid Waste Management
- Article 25 Tidal Wetlands
- Article 19 Air State Facility
- Section 401-Clean Water Act Water Quality Certification

All project documents, including the Notice of Complete Application and the draft permit can be found on the DSNY website at <http://www.nyc.gov/html/dsny/html/reports/guides.shtml> and at each of the two document repositories:

NOTICE OF COMPLETE APPLICATION

Date: 09/24/2007

Applicant: NYC DEPT OF SANITATION
125 WORTH STREET
NEW YORK, NY 10013-4006

Facility: NYC-DOS HAMILTON AVENUE MTS
HAMILTON AVE & GOWANUS CANAL
BROOKLYN, NY 11232

Application ID: 2-6102-00010/00013

Permits(s) Applied for: 1 - Article 19 Air State Facility
1 - Article 27 Title 7 Solid Waste Management
1 - Article 25 Tidal Wetlands
1 - Section 401 - Clean Water Act Water Quality Certification

Project is located: in KINGS COUNTY

Project Description: Construction and operation of a converted marine transfer station (MTS) in the Gowanus section of Brooklyn. The proposed facility is designed to process 4,290 tons per day of municipal solid waste (MSW); allowing for 5,280 tons per day of MSW during emergency conditions. The Hamilton Avenue MTS is one of four proposed waste management facilities identified as part of NYC Solid Waste Management Plan - NYC Department of Sanitation long term waste export program. The existing marine transfer station will be demolished and the proposed containerized waste management facility, with a foot print of 63,305 square feet, will be built to provide for barge transport of MSW to out of NYC locations. All solid waste transfer and containerized activities will take place within the fully enclosed building.

In addition to the construction of a new facility building, the applicant proposes to dredge the adjacent waterway to allow for barge operations and disturb tidal wetlands for bulkhead reconstruction and to remove the existing over-water ramp and platform. The applicant will mitigate wetland habitat losses by creating and restoring additional tidal wetland areas at other areas within NYC, including other waste management facilities, for the proposed four converted MTS facilities.

The facility is subject to the provisions of the state facility regulations found at 6 NYCRR Sec. 201-7.2. The facility has potential emissions from exempt combustion sources and trivial activities and by the draft Air State Facility permit is capping its Oxides of Nitrogen emissions to less than 22.5 tons per year. The draft Air State Facility permit contains a listing of applicable federal, state and compliance monitoring requirements for the facility.

A draft permit has been prepared and is available for inspection at the document repositories established for this project:

- Sunset Park Library, 5108 4th Avenue, Brooklyn and;
- Brooklyn Community Board 7 Office, 4201 4th Avenue, Brooklyn

The site is located within Kings County Tax Block 625, lot 2, bounded by 17th Street, Hamilton Avenue, the elevated Gowanus expressway and the Gowanus Canal in the Red Hook / Gowanus section of Brooklyn.

Availability of Application Documents:

Filed application documents, and Department draft permits where applicable, are available for inspection under the provisions of the Freedom of Information Law during normal business hours at the address of the contact person.

This project is subject to the Department's Environmental Justice Policy and an enhanced public participation plan has been prepared and accepted as a component of application completeness. As part of the plan, a document repository has been established near the project area that contains application and project related materials. Information on the repository location and other outreach components of the plan is available from the identified DEC contact.

State Environmental Quality Review (SEQR) Determination:

A final environmental impact statement has been prepared on this project and is on file.

SEQR Lead Agency: NYC Department of Sanitation

State Historic Preservation Act (SHPA) Determination:

A cultural resources survey has been completed. The report of the survey is on file. No archaeological sites or historic structures were identified at the project location. No further review in accordance with SHPA is required.

Coastal Management:

This project is located in a Coastal Management area and is subject to the Waterfront Revitalization and Coastal Resources Act.

DEC Commissioner Policy 29, Environmental Justice and Permitting (CP-29):

The proposed action is subject to CP-29. An enhanced public participation plan was submitted by the applicant and has become part of the complete application.

Availability For Public Comment:

Comments on this project must be submitted in writing to the Contact Person no later than 10/29/2007 or 33 days after the publication date of this notice, whichever is later.

IN THE NAME OF THE PEOPLE OF THE STATE OF NEW YORK TO THE ABOVE-NAMED RESPONDENT:

A Petition under Article 10 of the Family Court Act having been filed with this Court, and annexed hereto

YOU AND EACH OF YOU ARE HEREBY SUMMONED TO appear before this Court at 303 Jay Street, Brooklyn, New York, 11201, Part 17, on OCTOBER 29, 2007, at 9:00 o'clock in the fore noon of that day to answer the petition and to be dealt with in accordance with Article 10 of the Family Court Act.

On your failure to appear as herein directed, a warrant may be issued for your arrest.

Dated: September 26, 2007

ROBERT RATANSKI CLERK OF COURT

FURTHER NOTICE: Family Court Act 815(4c) provides that petitions brought pursuant to Articles 4, 5, 6, 8 and 10 of the Family Court Act, in which an order of protection is sought or in which a violation of an order of protection is alleged, may be served outside the State of New York upon a Respondent who is not a resident or domiciliary of the State of New York. If no other grounds for obtaining personal jurisdiction over the Respondent exist aside from the application of this provision, the exercise of personal jurisdiction over the respondent is limited to the issue of the request for, or alleged violation of, the order of protection. Where the Respondent has been served with this summons and petition and does not appear, the Family Court may proceed to a hearing with respect to issuance or enforcement of the order of protection.

SUPREME COURT - COUNTY OF QUEENS

MORTGAGE ELECTRONIC REGISTRATION SYSTEMS, INC. AS NOMINEE FOR GMAC MORTGAGE CORPORATION, Plaintiff against LEWIS S. ANDERSON; SANDRA D. ANDERSON, et al Defendants.

FCA §§ 1035, 1055 Form 10-7C (Summons - Child Neglect Proceedings) 9/2003

FAMILY COURT OF THE STATE OF NEW YORK COUNTY OF QUEENS

Docket No: NN-18112/06 CHILD NEGLECT CASE

In the Matter of DAMONI WOODS a Proceeding under Article 10 of the Family Court Act DAMONI WOODS, EBONY MCBRIDE Respondent(s)

IN THE NAME OF THE PEOPLE OF THE STATE OF NEW YORK

NOTICE: PLACEMENT OF YOUR CHILD IN FOSTER CARE MAY RESULT IN LOSS OF YOUR RIGHTS TO YOUR CHILD. IF YOUR CHILD STAYS IN FOSTER CARE FOR 15 OF THE MOST RECENT 22 MONTHS, THE AGENCY MAY BE REQUIRED BY LAW TO FILE A PETITION TO TERMINATE YOUR PARENTAL RIGHTS AND TO COMMIT GUARDIANSHIP AND CUSTODY OF YOUR CHILD TO THE AGENCY FOR THE PURPOSES OF ADOPTION. ALSO, THE AGENCY MAY FILE BEFORE THE END OF THE 15-MONTH PERIOD, IF SEVERE OR REPEATED CHILD ABUSE IS PROVEN BY CLEAR AND CONVINCING EVIDENCE, THIS FINDING MAY CONSTITUTE THE BASIS TO TERMINATE YOUR PARENTAL RIGHTS AND TO COMMIT GUARDIANSHIP AND CUSTODY OF YOUR CHILD TO THE AGENCY FOR THE PURPOSES OF ADOPTION.

TO: EBONY MCBRIDE

A Petition under Article 10 of the Family Court Act having been filed with this Court and annexed hereto

YOU ARE HEREBY SUMMONED TO appear before this Court at 151-20 Jamaica Avenue, Jamaica, NY 11432, Part 1, ON NOVEMBER 15th, 2007, at 9:00 o'clock in the forenoon of that day to answer the petition and to be dealt with in accordance with Article 10 of the FAMILY COURT ACT.

ON YOUR FAILURE TO APPEAR as herein directed, a warrant may be issued for your arrest.

BY ORDER OF THE COURT HON. MARYBETH S. RICHROATH JUDGE OF THE FAMILY COURT

DATED: MAY 30, 2007

FURTHER NOTICE: Family Court Act 815(4c) provides that petitions brought pursuant to Articles 4, 5, 6, 8 and 10 of the Family Court Act, in which an order of protection is sought or in which a violation of an order of protection is alleged, may be served outside the State of New York upon a Respondent who is not a resident or domiciliary of the State of New York. If no other grounds for obtaining personal jurisdiction over the Respondent exist aside from the application of this provision, the exercise of personal jurisdiction over the respondent is limited to the issue of the request for, or alleged violation of, the order of protection. Where the Respondent has been served with this summons and petition and does not appear, the Family Court may proceed to a hearing with respect to issuance or enforcement of the order of protection.

Environmental Justice Informational Meeting Poster Placement List

POSTER PLACEMENT FOR HAMILTON AVENUE CONVERTED MTS HOST COMMUNITY

The posters to advertise the Environmental Justice Informational Meeting for the Hamilton Avenue Converted MTS host community were placed in the district (Brooklyn Community Board 7) in community or public spaces where there appeared to be a considerable amount of pedestrian traffic. The community and public places included the community board office, libraries, meeting venues, churches, schools, grocery stores, retail stores, restaurants/eateries, community health centers, and barbershops, among others.

Specifically, for the Hamilton Avenue host community, poster placement locations included, but were not limited to:

1. Good Food Grocery – 4124 4th Avenue
2. Double Dragon – 4318 4th Avenue
3. Iglesia Pentecostal Fuente Divina – 4621 4th Avenue
4. 1st Cup Café – 3910 4th Avenue
5. Marquez Perez Grocery Store – 471 45th Street
6. Daisy's Beauty Salon – 567 3rd Avenue
7. Ginasoles Deli Restaurant – 4408 3rd Avenue
8. New Sunset Unisex II – 867 43rd Street
9. Alma Grocery Store – 3910 4th Avenue
10. TW Pharmacy, Inc. – 804 54th Street
11. Charo Unisex – 4711 4th Avenue
12. Sunset Park Public Library – 5108 4th Avenue
13. Chase Bank – 5101 4th Avenue
14. Brooklyn CB # 7 Office – 4201 4th Avenue
15. St. Michael's Church – 371 43rd Street
