[From the Proceedings of the Board of Aldermen, March 4, 1902.]

COMMUNICATIONS FROM CITY, COUNTY AND BOROUGH OFFICERS.

The Chairman laid before the Board the following Departmental Estimates:
No. 242AP.

DEPARTMENT OF PUBLIC CHARITIES,

Boroughs of Manhattan and The Bronx.
Commissioner's Office, foot of East Twenty-sixth street,
New York, March 1, 1902.

Hon. C. V. FURNES, President Board of Aldermen:

Dear Sir—Pursuant to a resolution adopted by the Board of Estimate and Apportionment on January 6, 1902, I beg to send herewith a revised estimate of this Department for the year 1902, together with an explanatory letter. I have the honor to remain

Yours very respectfully,

HOMER FOLKS, Commissioner.

Department of Public Charities, Boroughs of Manhattan and The Bronx.
Commissioner's Office, Foot East Twenty-sixth Street,
New York, February 28, 1902.

To the Honorable Board of Estimate and Apportionment:

Gentlemen—I beg to submit herewith, pursuant to a resolution adopted by your honorable body on January 6, 1902, an estimate of the expenditure of this Department for the year 1902, showing the amount allowed for each purpose by the Board of Estimate and Apportionment on October 30, 1901, for the year 1902, and the amount now proposed for each purpose. In explanation of these estimates I desire to submit the following:

SALARIES.

In preparing this schedule I have had constantly in mind the desire of the Board of Estimate and Apportionment that every item of expense not absolutely necessary for conducting the public business should be excluded and every item included should be reduced to the lowest possible expenditure consistent with efficient service. You will note that in every instance the payrolls of the various offices in this Department have been decreased; that the payroll of the Central Office in Manhattan and The Bronx has been decreased from \$38,830 to \$35,206, of the Central Office in Brooklyn from \$52,640 to \$41,420 and of the Outdoor Poor Department from \$30,853 to \$29,908. After a careful examination, however, I have not felt able to recommend any reduction in the numbers of those actually engaged in the care of patients in the hospitals and other institutions in this Department; in fact, in two or three instances, I have felt constrained to ask for an increase in the number of nurses, having become convinced that the present nursing service in two or three of the institutions is inadequate for the proper and creditable care of the sick.

I have also felt obliged to ask for an increase in the number of Engineers employed in several of the institutions. I find that this Department has been violating both the spirit and the letter of the law requiring a licensed engineer to be in charge at all times of boiler plants. The hours of service required of the engineers have also been excessive. The increase which is necessary to comply with the law regarding licensed engineers, to approximate the eight-hour day (though not to secure this fully), and to more nearly approach the prevailing rate of wages, amounts to \$5,300 per annum.

The Bakery in this department was, during the latter part of 1900 and the early part of 1901, manned by paid men, but on account of the scarcity of funds, prison labor was again restored in the Bakery about the middle of 1901. The paid Bakers, were, however, reinstated by my predecessor in December last, to take effect on January 1, 1902. I have continued the employment of paid men, finding a consensus of opinion throughout the department that the results when paid men are employed are much more satisfactory than when the work is performed by prisoners. I have also been obliged to ask for a moderate appropriation for the salaries of nurses and helpers in the new tuberculosis pavilion, which I have opened in connection with the Metropolitan Hospital.

In Brooklyn, two new hospitals are about to be opened by this department, and this necessitates a considerable increase in the salary list for 1902, as compared with December 31, 1901. Another fact which increases the payroll for 1902, as compared with December 31, 1901, is that a Reception Hospital is maintained during the summer months at Coney Island, the employees of which do not appear on any payroll of December 31, 1901.

SUPPLIES.

The appropriation for supplies includes not only food supplies, but also fuel and light, clothing, bedding, lumber, hardware, paints, glass, crockery, tinware, brooms and brushes, soap, furniture, medicines and medical supplies including liquors, surgical supplies, horsefeed, harness, postage, etc., etc. The actual expenditure for food supplies consists of about 60 per cent. of the total appropriation for supplies.

In the item for supplies the appropriation made for 1901 affords no proper standard for the necessary appropriation for 1902. The appropriation for 1901 seems to have been based upon the supposition that the Department would close the year with absolutely no stock on hand—a result which in this Department is impossible. The appropriation for 1901 was added to in the course of the year by the transfer by the Board of Estimate and Apportionment of \$25,000 from the appropriation for Alterations, Additions and Repairs, although the appropriation made for that purpose was also insufficient, and with the result that necessary and urgent repairs could not be made. It was further added to by a transfer by the Board of Estimate and Apportionment of \$13,000 from an unexpended balance of the appropriation for some other Department. In addition to this there were unexpended balances on the contracts of 1899 and 1900 amounting to \$28,168.48, which were called in and used in 1901. Notwithstanding these additions to the original appropriation, the supplies provided were wholly inadequate. A cut of about 20 per cent. on the most expensive items of supplies, that of meats, was made in May, 1901. The amount of clothing and bedding provided was extremely inadequate and led to much discomfort and suffering on the part of the patients in the hospitals and to great embarrassment to those in charge. Practically no lumber was supplied for making the ordinary and usual repairs. Little or no hospital furniture was supplied with the result that the medical service became greatly embarrassed and discouraged by lack of the ordinary facilities for carrying on their work. The Department opened the year 1902 with extraordinary and immediate needs in all of these directions.

The estimates for supplies submitted herewith have been based on the system recommended by the Commissioners of Accounts on October 27, 1899. This calculation has heretofore been made on the actual expenditure for the first six months of the year preceding that for which the estimate is made, which amount has been doubled, and then increased or diminished for each institution, according to the movement of the census during the six months of actual expenditure as compared with the corresponding six months of the preceding year. Making the revised estimate after the close of the year, we have been able to base the calculation on the actual expenditure for the whole of 1901, instead of the first six months, as heretofore. This per capita method of making the estimate for supplies would be a good one if the amount given for supplies for the preceding year had been based on a careful consideration of what was actually and properly required, or if the amounts provided had been found by experience to afford proper care for the inmates of the

city's charitable institutions. As a matter of fact, neither of these suppositions was true. I here therefore felt compelled to add to the estimate, as reached by the per capita calculation, sums necessary to supplement in part the deficiency in the appropriations of 1900 and 1901. I have also added an estimate for supplies for the new tuberculosis division of the Metropolitan Hospital. This estimate is based on the actual cost of supplies for the patients in the Metropolitan Hospital during 1901—namely, .3813 cents per diem. The amount paid by the city to private institutions of the care of consumptives is one dollar per diem. The objects of the establishment of this tuberculosis pavilion are two: First, to provide a retreat for those who are in the advanced stages of the disease in which they may spend the remainder of their days in reasonable comfort, with adequate shelter and care. Heretofore there has been no institution in which many of these unfortunates could find anything more than temporary care, and they have passed from hospital to hospital and from institution to institution. Second, to provide for the small number of tuberculosis patients in the early stages of the disease who come under the care of the Department such remedial treatment as is possible. Of the tuberculosis patients under the care of this city when this tuberculosis division was established, February 4, 1902, there were 26 who were in the less advanced stages of the disease and for whom it was thought there was some hope of improvement. These were given accommodations separate from the advanced cases. I have just received (February 25) detailed history of each of these patients since admission. This report shows that of these 26 patients 20 have improved and show an average gain in weight of 4 and 13.32 pounds during the period of 19 days, with, in many cases, a marked diminution of the active symptoms of tuberculosis. Six patients are unimproved and show an average loss in weight of 1 and 1.3 pounds. I am well aware that the period covered is a short one but these results at least afford rational ground for hope that the disease may be arrested, if not cured, in a fair proportion of incipient cases coming under the city's care.

If it should seem best to the Board of Estimate and Apportionment to disregard the per capita calculation based on the actual expenditure of 1901 and make an appropriation to this Department for supplies, based on the rate of 40 cents per capita per diem for hospitals, 22 cents per capita per diem for almshouses, and 30 cents per capita per diem for the asylum and schools, which figures, I feel confident, will not appear to you to be excessive, such an appropriation would be entirely agreeable to this Department.

ALTERATIONS, ADDITIONS AND REPAIRS TO BUILDINGS AND APPARATUS.

As stated above, the appropriation for this purpose for 1901 (Manhattan and The Bronx), was \$70,000, of which sum \$25,000 was subsequently transferred to the Supply Account. The original appropriation of \$70,000 was, however, grossly inadequate, the corresponding appropriation for 1900 having been \$133,500, and for 1899 \$200,000. It must be remembered that the buildings in this Department accommodated in 1901 an average of 7,999 inmates. A moderate estimate of their cost would be \$450 per capita, or a total of \$3,599,650. Many of these buildings are old and there is constant need of minor repairs, renewal of plumbing, heating and ventilating apparatus, etc., etc. An estimate for repairs of 4 per cent. per annum on the original cost of the buildings would certainly be a very moderate one and would indicate an expenditure of \$143,986 annually for ordinary repairs. In addition to this certain alterations and additions are necessary in order to fit the buildings for their respective uses, many of them having been built for quite different purposes.

I have given in the estimate a detailed statement of each item of repairs, alterations and additions which we can now foresee to be necessary during 1902 for the economical protection of the buildings from further deterioration, for securing sanitary conditions for the inmates of the hospitals and almshouses of this Department and for making such minor alterations as will fit the buildings reasonably well for the uses to which they are now put.

MISCELLANEOUS APPROPRIATIONS.

In the minor appropriations for transportation of paupers, poor adult blind, etc., etc., no changes from the appropriations already granted for 1902 seem to be necessary.

The Department would strongly recommend that appropriations be made to it without regard to borough lines. This will permit of the free transfer of inmates so that those of similar grade can be grouped together and a better classification secured; overcrowding in any borough can be relieved, or at least equalized throughout the city without the construction of additional buildings; the distribution of the adult blind can be made in uniform sums throughout the entire city, as has been suggested by the Board of Aldermen; employees can be transferred to meet special needs arising in any borough and a better organization of the Department as a whole effected.

The Department is now for the first time under one Commissioner. There will be many advantages, and as far as can be seen no disadvantages by making its appropriations without regard to borough divisions, as is the evident intention of the Charter.

I have the honor to remain,

Yours very respectfully,

HOMER FOLKS, Commissioner.

New icehouse, coal yard and hoisting apparatus.....	5,000 00
(We have a dock near which it is intended to locate an icehouse and a coal yard.)	
(The present method of handling ice is wasteful in the extreme, and the construction of an icehouse and a coal yard would make us independent of Workhouse labor in regard to the handling and storage of these most important supplies.)	
Repairs to Retreat Building.	
New steam heating and ventilating system, to consist of direct radiation and induction coils and flues for the entire building, including new steam mains	15,000 00
New plumbing	5,000 00
New metal ceilings to replace ceilings fallen, repairs to sidewalks, doors, sashes, window frames, flooring, painting, etc.....	12,000 00
(This is a stone building, the walls and roof of which are in good condition, and with the expenditure of the above amount of money will be suitable for a phthisis hospital. The building is three stories in height, and consists largely of single rooms. This, in the opinion of the Medical Board, is a desirable feature.)	

Repairs to Amusement Hall.	
Alterations, new floors, new steam heating apparatus, metal ceilings, repairs to walls, window frames, sashes, plumbing, etc.	8,000 00
Infants' Hospital, Randall's Island.	
Repairs to gas works and apparatus.	600 00

Installation of hot water supply and additional heating surface in seven of the buildings	6,500 00
Alterations to Male Helpers' Dormitory, formerly occupied as prison, desired to remove cells and provide sleeping rooms instead.	8,000 00
New roofs for Dormitory No. 2 and main kitchen.	1,500 00

Engineers' and plumbing supplies.	3,000 00
(This includes material with which to make repairs to engines, boilers, laundry machinery; also repairs to existing steam heating and plumbing apparatus.)	
General Drug Department.	
Alteration and addition to General Drug Department.	8,000 00
(This contemplates vacating clothes room east end of present building, now occupied by hospital authorities, and the erection of a second story between the office division and the present dormitory. This additional room, if provided for the General Drug Department, will enable them to vacate that part of the east wing of the main hospital now occupied, and will also afford room for storage of drugs, medicines and surgical supplies, which are now stored in various cellars of the hospital, and which have frequently been damaged and destroyed in the past, together with such barrel goods as are at present kept out of doors.)	
Pier Shed, Foot of East Twenty-sixth Street.	
Painting and repairs	3,500 00
Morgue, painting inside and outside.	2,000 00
New boiler plant, Twenty-sixth street dock.	7,000 00
(The reason for this call is that steam for heating the Morgue, Central Office, Outdoor Poor Department, together with power for driving ice machine for refrigerating purposes in the Morgue, is now furnished from Bellevue Hospital boiler plant, and the system is wasteful in the extreme. The refrigerating machine is located in the boiler room at Bellevue Hospital, and distant about 800 feet from the Morgue. The pipes conducting the ammonia from the compressor to the coils in the Morgue are placed in the ground under an asphalt roadway, and, having been laid in 1896, they have deteriorated, and it is only a question of a very short time when the refrigerating plant will fail. Should this occur in summer it would result in a dreadful condition in the Morgue. I would, therefore, recommend that two boilers be installed on the pier at the east end of the old building. These boilers are to furnish steam heat to Central Office, Outdoor Poor Department and the Morgue, which would result in a considerable saving to the city. I would also recommend that the refrigerating machine now located in the boiler house at Bellevue Hospital, and used exclusively for the Morgue, be removed from that point and set upon the dock near the boilers. While this would necessitate the employment of two engineers, the economy that would result from the improvement to the service would more than justify the expenditure.)	
Fire Escapes.	
Fire escapes	10,000 00
(A special inspection of all the buildings belonging to this Department was recently completed by the officials of the Bureau of Buildings. The inspection was made at the request of this Department for the purpose of ascertaining in how far the buildings belonging to this Department complied with the law with regard to fire escapes. A communication from the Bureau of Buildings which has just been received states that twelve (12) of our large buildings are not provided with sufficient fire escapes, and do not comply with the law, and violations have been placed upon these buildings. The cost of meeting the requirements of the Bureau of Buildings will be \$10,000.)	
Roads on Randall's Island.	
The roads on Randall's Island are in an almost impassable condition, and now that a central steam heating plant is in operation, it is imperative that a macadamized road be provided from the dock to the steam heating plant. The other roads of the Island, a total of between two and three miles, must be repaired. The Correction Department states that it is unable to do the work. If loose stone can be secured from Blackwell's Island, the cost of building the roads can properly be kept within.	5,000 00
Total	\$191,700 00

BROOKLYN AND QUEENS.

Kings County Almshouses.

Two elevators (one for male and one for female building). These are necessary to an economical and convenient administration of these buildings. Many of the old people have to be carried up three flights of stairs in a chair, and cannot get out of doors in fair weather except in this manner; estimated at \$6,000 each.	\$12,000 00
Metal ceiling for male and female buildings. Many of the present ceilings are in a dangerous condition; patches are frequently falling.	7,000 00
Heating system (in male building). Present system heats the foul air in the basement, and sends it through the building. It is old and worn out.	10,000 00
Engineers', Plumbers' and Carpenters' supplies.	2,000 00
Kings County Hospital.	
Additional locomotive boiler to add to present auxiliary plant. There is now one locomotive boiler used in connection with regular steam plant, the whole being insufficient to heat all buildings in cold weather.	2,500 00
Iron stairway, inclosed with ironwork, should be constructed on the north side of old building, at a central point. The present fire escapes are 220 feet apart, and there are only wooden stairs between them.	5,000 00
Engineers', Plumbers', Painters' and Carpenters' supplies.	3,000 00
Total	\$41,500 00

BOROUGH PRESIDENT.

Title of Appropriation—Salary of the President of the Borough of Richmond.	
As required by the Charter.....	\$5,000 00

SALARIES.

Title of Appropriation—Salaries: Commissioner of Public Works, Superintendents, Engineers, Secretaries, Clerks and Subordinates.	
Departmental Estimate, 1901.....	\$43,093 34
Final Estimate,	43,093 34
Departmental Estimate, 1902.....	53,260 00

An increase in the salary appropriation is made necessary for the following reasons:

First—The borough form of government and the subdivision into bureaus requiring Superintendents, whose salaries have already been authorized by the Board of Estimate and Apportionment and the Board of Aldermen.

Second—The imposing on the President of the Borough of Richmond and his office, in addition to his former duties, that portion of the clerical work formerly performed in the large departmental main offices of Highways, Sewers, Street Cleaning, Public Improvements and Public Buildings, Lighting and Supplies, pertaining to the Borough of Richmond, together with

Third—The preparation of advertisements and the letting of all contracts, with work incidental thereto, formerly performed by the main offices above mentioned.

TOPOGRAPHICAL MAP.

Recapitulation for 1902.

1st—Salaries.....	\$58,640 00
2d—Supplies.....	16,360 00
Departmental Estimate.....	\$75,000 00

The preparation of the map of the Borough of Richmond is an absolute necessity and precedes any proper system of public improvements. No work has as yet been done in any accurate manner, except the United States Coast Survey Chart prepared many years ago.

The Revised Charter (section 439) imposes on the Borough President this important duty, and requires its completion by January 1, 1907. Richmond is the only borough where the surveys have not been started, though appropriations have been asked for year after year.

Many improvements are desired by the residents; some have been actually authorized by the late Board of Public Improvements, but few of them can be carried out until the basic plan is ready.

The hilly nature of the borough furnishes many series of water courses, and consequently many groups of street systems. It is the intention, if the appropriation now asked for is granted, to at once organize the proper corps, and this season complete the base lines, triangulations and co-ordinate systems, and in the thickly settled portions and those parts petitioning for improvements, as much of the filling in as possible.

In order to complete the fifty-seven square miles of area within the prescribed time, next year and thereafter the corps of employees will need to be very materially increased beyond those estimated for this budget; a larger number than those herein considered would be unwieldy until the primary work is finished.

PRELIMINARY SURVEYS.

Title of Appropriation—Preliminary Surveys.

Departmental Estimate, 1901.....	\$5,000 00
Final Estimate, 1901.....	500 00
Departmental Estimate, 1902.....	7,500 00

Note—This appropriation is required to provide plans for improvements for which petitions are in hand and work in many instances authorized, particularly for drainage questions, as required under section 444, Greater New York Charter, but for which the allowed appropriation of \$500 is absolutely inadequate.

The work requires the almost continual services of a complete party—Assistant Engineer, Transitsman, Leveler, 2 Rodmen, Chainman, Axeman and Draughtsman.

(These men are included in the "Salary" List "B," but, as made plain in the note thereto attached, the expense of their services is deducted from the appropriation therein asked for.)

ENGINEERS' SUPPLIES.

Title of Appropriation—Engineers' Supplies and Contingencies.

Departmental Estimate, 1901.....	
Final Estimate, 1901.....	
Departmental Estimate, 1902.....	\$2,500 00

Detailed Estimate for 1902.

1 rain gauge.....	\$175 00
3 Engineers' transits.....	690 00
1 Engineers' level.....	110 00
Leveling rods, drawing materials, stakes, nails, tacks, etc., and traveling expenses.....	1,525 00

Departmental Estimate..... \$2,500 00

Note—Such expenses have previously been charged to Bond Accounts, Labor, Maintenance and Supplies and different contingent funds, but it seems a better and fairer method to make a specific appropriation therefor.

STREET OPENING MAPS.

Title of Appropriation—Maps for Street Openings and Changes of Grade.

Departmental Estimate, 1901.....	
Final Estimate, 1901.....	
Departmental Estimate, 1902.....	\$5,000 00

Note—This work requires the services of several competent Draughtsmen and Surveyors, involving the preparation of all maps for the opening and closing of streets, the acquisition of easements, changes of grade, etc., as required by sections 447, 448 and 449 of the Revised Charter.

MONUMENTING STREETS.

Title of Appropriation—Monumenting Streets and Avenues.

Departmental Estimate, 1901.....	
Final Estimate, 1901.....	
Departmental Estimate, 1902.....	\$1,000 00

Note—Wherever the street improvements are carried out a certain amount of engineering service is needed, which cannot equitably be charged to the improvement itself, and deep-set stone and metal monuments are required for purposes of future reference. With the proposed topographical survey the need will be far more apparent than heretofore.

(The Engineers intended to receive some compensation from this fund are included in the "Salary" List "B," but as told in the note thereto attached, that compensation is omitted from said salary appropriation.)

HIGHWAYS.

Wm. R. Hillyer, Superintendent.

Title of Appropriation—Labor, Maintenance and Supplies (Highways).

Departmental Estimate, 1901.....	\$189,120 00
Final Estimate, 1901.....	135,000 00
Departmental Estimate, 1902.....	168,450 00

Recapitulation for 1902.

First—Labor.....	\$97,050 00
Second—Maintenance.....	61,400 00
Third—Supplies.....	10,000 00

Departmental Estimate..... \$168,450 00

The demands for maintenance for this year and for the years to come are and will be much greater than in the past, as the great mileage of macadam roads (182 finished) built under the Road Bond issues of the several towns just before and in the first year after January 1, 1898, have just about reached the age when they need and will continue to need care, which before this time was less necessary.

The apparent decrease in total amount asked for 1902 from that asked for 1901 is due to certain cleaning gangs being turned over to the street cleaning branch of our public work.

DETAILED ESTIMATE FOR 1902 AND NOTES.

1st—Labor.

5 Inspectors, at.....	\$5,000 00
-----------------------	------------

The borough has been divided into four inspection districts, to each of which one of these five Inspectors has been assigned for general oversight. He visits at least once each day every Foreman in charge of the work in his district and receives report of such work and transmits the same, with his own observations, to the Superintendent of Highways. He also is required to inspect and make report on every street, road and avenue in his district, as to its condition and needs at least once each week.

The fifth man is an Inspector-at-Large for the care of Special cases, including the inspection of openings in streets and for general assignment by the Superintendent.

These five men are subject to call for night duty and Sunday and holiday emergencies without extra compensation; consequently the asked for change to annual salary from payment by the city.

4 Foremen at \$2.50 per day—estimated.....	3,200 00
--	----------

Note—These men, one for each inspection district, are employed all the year, as experience has shown that there is need for at least one gang of laborers in each district at all times.

20 Foremen at \$2.50 per day. \$500 each per year of 200 days.....	10,000 00
--	-----------

Note—These men will be required during eight months of the year—March 15 to November 15.

Laborers, 35,000 days, at \$2 per day.....	70,000 00
--	-----------

Carts, 700 days, at \$3 per day.....	2,100 00
--------------------------------------	----------

Teams, 1,500 days, at \$4.50 per day.....	6,750 00
---	----------

Departmental Estimate..... \$97,050 00

2d—Maintenance.

Sprinklers, 6,000 days, at \$5 per day.....	\$30,000 00
---	-------------

Note—These street sprinklers cost \$250 each, deteriorate rapidly, and require expensive repairs.

The \$4 per day rate heretofore allowed for sprinklers has been found insufficient (being no more than the rate allowed teams with dirt trucks), and the owners of sprinklers were promised last year that every endeavor possible would be made to obtain an additional allowance for 1902. Five dollars per day is reasonable compensation.

Steam rolling, 500 days, at \$13.....	6,500 00
---------------------------------------	----------

Note—Increased from 320 days in 1901 because of increased need of macadam repairs and because of the omission of necessary work in 1901.

Broken stone, 10,000 yards, at \$2.25 per yard.....	\$22,500 00
---	-------------

Note—We will use about 20,000 yards this year for maintenance of macadam roads, but have on hand a surplus of 10,000 yards from 1901.

Maintaining and repairing bridges, 240 small wooden deck bridges, at \$10 each.....	2,400 00
---	----------

Departmental Estimate..... \$61,400 00

Note—Many of these are on old town roads, and were originally built with rough, dry supporting walls, poorly constructed by unskilled men, and are now in or near a state of collapse. Many of them require rebuilding, at a cost of several times \$10—the whole number will certainly average \$10 each.

3d—Supplies.		
Tools and repairs; horses, wagons, and care of same.....	5,000 00	
Steam roller	2,500 00	
Note—There is no steam roller in the plant of this Bureau at present, and as the rollers owned by contractors cost us \$13 per day, it seems that we could own one to good advantage.		
Present expense, \$13 day, for 200 days.....	\$2,600 00	
Estimated owning our own roller:		
Engineer, per day.....	\$3 00	
Watchman, per day.....	3 00	
Fuel, oil and repairs, per day.....	3 00	
—\$9 00, for 200 days.....	1,800 00	
Net saving.....	\$800 00	
Wind Mills.....	2,500 00	10,000 00

Note.—A large proportion of our roads are entirely outside the radius of the water supply system. It is therefore necessary to cart water for sprinkling purposes long distances at great expense, and it is impossible under the circumstances to give the roads the sprinkling they need.

To overcome this difficulty the scheme of using wind mill pumps and tanks located along the outlying roads at their intersection with creeks, has been tried to good advantage. Two such plants are now being used with great economy, and three more are partly completed. It is deemed wise to further extend this system and so \$2,500 is asked for.

Departmental Estimate..... \$168,450 00

SEWERS.

3d—Relaying Section of South Avenue Sewer, Third Ward.

Taking up 6-inch sewer in South avenue, from Arlington place 775 feet south, and relaying same with 8-inch pipe.....

1,500 00

Note.—It is very necessary that the above repairs be made during the coming season, as conditions are liable to arise that will result in damage suits against the city. The work was originally done on assessment, so cannot be re-charged to the property benefited.

4th—Northfield Ditch.

Cleaning Northfield Ditch.....

450 00

Note.—Section 3, chapter 421, Laws of 1889, authorizes the expenditure of \$250 per annum for opening and maintaining the Northfield Ditch, through the former Town of Northfield, now the Third Ward. This water-course drains hundreds of acres of land, and it is very necessary that it be put in good condition during the coming season, as no work has been done on it since 1897, owing to the fact that, being a matter of public maintenance, it was not brought to the notice of the proper authorities until October, 1900.

5th—Contingencies.

Note—These men are required for an improvement in the service which has for its object the discontinuance of the present practice of placing garbage and ash cans on the curb. They are liable and most likely to be overturned by dogs and cats and mischievous small boys and their contents scattered over the sidewalk and street, creating a nuisance and an offence to both sight and smell. Under the new plan these men will take the cans from inside the premises.

New Stock—Plant.....

300 00

Departmental Estimate..... \$79,260 00

New Stock or Plant (Bond Issue).

1 Crematory..... \$25,000 00

Note.—A new crematory is an absolute necessity, as the present one is on the verge of a collapse, and at its best is of insufficient capacity to consume the entire output of garbage and light refuse collected in the borough. In the event of a breakdown the Board of Health will at once order the removal of these materials to Barren Island, no other disposition being possible. This would involve a vastly increased expense.

PUBLIC BUILDINGS AND OFFICES.

John Timlin, Jr., Superintendent.

Title of Appropriation—Maintenance and Supplies (Public Buildings and Offices).

Departmental Estimate, 1901.....	\$29,100 00
Final Estimate, 1901.....	14,400 00
Departmental Estimate, 1902.....	16,150 00

There is in contemplation the changing of certain offices and methods to make possible many economies in carrying on the public business, that will involve some expenses not considered by the former administration when preparing its estimate for 1902.

A more careful investigation also as to repairs on several structures in the care of the Borough President shows more work advisable than hitherto planned for.

A special item, that of Rent of Telephones, seemed proper to include in this estimate, as against the former method of distributing that expense among different administrative funds.

BUREAU OF BUILDINGS.

New Brighton, February 27, 1902.

Hon. GEORGE CROMWELL, President of the Borough of Richmond, New Brighton, N. Y.:

Dear Sir—In accordance with the letter of his Honor, Mayor Low, as published in the "City Record," February 8, 1902, and the directions of the Board of Estimate and Apportionment, I beg to respectfully submit comparison of salaries of 1898 and 1902, as far as possible, and the Departmental Estimate for 1902.

Yours respectfully,

JOHN SEATON, Superintendent of Buildings.

BUREAU OF BUILDINGS.

Salary Schedule Compared as Far as Possible with December 31, 1898.

	Salary, Dec. 31 1898.	1902. Present.	1902. Proposed.	Explanation.
Daniel Campbell, Commissioner.	\$3,500 00	*Abolished.
John G. Vaughan, Superintendent.	1,500 00	Dismissed.
James Nolan, Chief Clerk.	1,200 00	\$1,350 00	\$1,350 00	Salary increased December, 1899, on account of arduous duties.
Timothy Sullivan, Chief Inspector.	1,200 00	Dismissed.
Thomas Willoe, Inspector.	1,000 00	1,200 00	1,200 00	Salary increased December 1900. No reason given.
Andreas Andreoli, Inspector.	1,000 00	1,200 00	1,200 00	Salary increased December, 1901. To make all equal.
Richard Silles, Jr., Inspector.	1,000 00	1,200 00	1,200 00	Salary increased December, 1901. To make all equal.
John Croak, Stenographer.	1,000 00	Resigned January 11, 1902. Salary then \$1,200.
John Duffy, Messenger.	600 00	Deceased.

..... Private Secretary.	1,200 00	Authorized by Board of Aldermen.
..... Consulting Engineer.	600 00	Services required instead of Plan Examiner. \$10 per day for sixty days.
..... Plumbing Inspector.	1,200 00	Services required. Formerly Inspector came from Queens as needed.

Note.—A strict comparison between salaries December 31, 1899, and the present is impossible, because, prior to December 31, 1901, the Building Departments of Richmond and Queens were combined. Now they are separate and distinct. Therefore some positions are necessarily duplicated where formerly one salary covered work in both boroughs.

It is suggested that the following title of appropriation, under which the Bureau of Buildings at present receives its moneys be abolished so far as this Bureau is concerned, viz:

"Salaries of Commissioner of Public Works, Clerks, Assistants, Engineers and employees, including \$5,000 for the supervision of buildings."

And that the following be substituted, viz.:

"Salaries and contingencies, Bureau of Buildings, Borough of Richmond."

No. 1.

Petition for the construction of sewers as described in the following report of the Department of Sewers:

(Copy.)

Office of the Commissioner of Public Works—Bureau of Sewers,
Borough of Brooklyn, City of New York,
Superintendent of Sewers' Office,
January 27, 1902.

Hon. WILLIAM C. REDFIELD, Commissioner of Public Works:

Dear Sir—In reply to your communication of January 13, 1902, with which you transmitted a communication from the Secretary of the President of the Borough, transmitting original petition of the Germania Real Estate & Improvement Co., and others, in relation to the construction of sewers through the following streets:

Avenue G, from Coney Island to Flatbush avenue.

Flatbush avenue, westerly side, from its northerly intersection with Avenue G to its southerly intersection with Avenue G.

Avenue G, from Flatbush to Nostrand avenue; Nostrand avenue, from Avenue G to Avenue F.

Avenue F, from Nostrand to Paerdegat avenue, southerly side.

Paerdegat avenue, southerly side, from Avenue F to East Forty-fifth street, East Forty-fifth street, from Paerdegat avenue, southerly side to Avenue G.

Avenue G, from East Forty-fifth street to Paerdegat avenue, southerly side.

Paerdegat avenue, southerly side, from Avenue G to Flatlands avenue, Also, Avenue F, from East Twenty-sixth street to Nostrand avenue.

I beg to state that it has been reported to me by the Chief Engineer of Sewers, Borough of Brooklyn, to whom this matter was referred, as follows:

I beg to report that the estimated cost for the above mentioned improvement, with a silt and trap basin at Flatlands and Paerdegat avenues, south side, is \$266,700, and that the assessed valuation of the real estate within the probable area of assessment is \$6,723,214.

I also beg to report that if it is the desire of the authorities of the city to institute proceedings to complete the entire drainage plan as adopted, outlet sewers will be necessary for the dry-weather flow of the above mentioned sewers in the streets hereinafter mentioned.

A pumping plant and building will be required to be built on land to be procured near Flatlands and Paerdegat avenues, north side, with a force main from said pumping plant through Paerdegat avenue, northerly side, from Flatlands to Ralph avenues; Ralph avenue, from Paerdegat avenue, northerly side, to Avenue D; also gravity sewers in

Ralph avenue, from Avenue D to Avenue C;

Avenue C, from Ralph avenue to Avenue D;

Avenue D, from Avenue C to Powell street;

Powell street, from Avenue D to Vienna avenue;

Vienna avenue, from Powell street to Williams avenue;

Williams avenue, from Vienna avenue to Fresh Creek Basin.

—to conduct the drainage of Map X in addition to the dry-weather flow of the territory in question.

For dry-weather flow only, an outlet is also required in

Vienna avenue, from Williams to Malta avenue;

Malta avenue, from Vienna to Wortman avenue.

—and in Wortman avenue, from Malta to New Jersey avenue, the estimated cost for which is \$405,300, and the assessed valuation of the real estate within the probable area of assessment, \$12,887,239.

I beg to state, however, that by the utilization of the trap basin as a temporary purification basin, the outlet sewers above mentioned would not be necessary for a year after the sewers petitioned for are built.

I also beg to explain that the dry-weather flow would be conducted from New Jersey avenue and Wortman avenue through sewers already built to the Twenty-sixth Ward purification plants, providing said outlets are authorized and built.

In regard to streets legally open, in which the sewers petitioned for, if built, will be authorized, I beg to report as follows:

Avenue G, from Foster avenue to Ralph avenue, which includes all the above limits petitioned for, opening proceedings passed the Board of Public Improvements July 17, 1901. (Page 1488, Bd. Pub. Imp. Minutes.)

Flatbush avenue, within the above limits, is legally open.

Nostrand avenue, from Avenue G to Avenue F, no record. This street is now occupied by trolley tracks, however, and the Corporation Counsel has ruled that streets thrown open to the public use may be considered as legally open.

Avenue F, from East Twenty-sixth street to Nostrand avenue. Proceedings to open this street from Foster avenue to Paerdegat Basin were advertised for a hearing before the Local Board March 1, 1900. ("City Record," February 19, 1900, page 1139.) This street has been closed, however, between Foster avenue and Ocean avenue.

Paerdegat avenue, south side, within the limits above described, no record.

East Forty-fifth street—Proceedings to open this street from Holy Cross Cemetery to Flatbush avenue passed Local Board October 30, 1899, and were referred to the Chief Topographical Engineer. (Bd. Pub. Imp. Minutes, page 2317, November 1, 1899.)

In regard to streets in which outlet sewers will be built, if authorized, I beg to report:

Paerdegat avenue, north side, from Flatlands to Ralph avenue, no record. This street is 100 feet in width, and the city owns a right of way 60 feet wide, acquired by the County of Kings.

Ralph avenue, from Paerdegat avenue, north side, to Avenue C, no record.

Avenue C, from Ralph avenue to Avenue D, no record.

Avenue D, from Avenue C to Powell street. Proceedings to open this street from Ralph avenue to Avenue E, so printed, which limits are not determinate, were advertised for a hearing before the Local Board March 19, 1900. ("City Record," page 1825 for said year.)

Powell street, from Avenue D to Vienna avenue, no record.

Vienna avenue, from Powell street to Malta avenue, no record.

Malta avenue, from Vienna to Wortman avenue. Resolutions to open this street from New Lots avenue to Vandalia avenue, passed by the Board of Public Improvements December 19, 1900. ("City Record," page 18, January 3, 1901.)

Wortman avenue, from Malta to New Jersey avenue, no record.

Williams avenue, from Vienna avenue to Fresh Creek Basin, no record.

Yours respectfully,

(Signed) JOHN THATCHER.

Superintendent of Sewers, Borough of Brooklyn.

No. 2.

Petition for the construction of a sewer, as described in the following report of the Department of Sewers:

City of New York, Borough of Brooklyn,
Office of Commissioner of Public Works, Bureau of Sewers,
Superintendent's Office, Municipal Building.
February 8, 1902.

Hon. WILLIAM C. REDFIELD, Commissioner of Public Works:

Dear Sir—I return herewith a communication addressed to the Bureau of Sewers by the Secretary of the President of the Borough, also a petition which requests information in relation to the construction of a sewer in Bedford avenue, between Eastern Parkway and Foster avenue, the same having been forwarded to me by you on February 5, 1902.

It is reported to me that a sewer exists in Bedford avenue, from Eastern Parkway to Union street, and contract has been awarded for the construction of a sewer in said avenue from Union to Montgomery street; that under date of February 7 communication was forwarded to you, including Flatbush avenue, from Bedford to Foster avenue; therefore, I report for a sewer in Bedford avenue, from Montgomery street to Flatbush avenue, the estimated cost of which is \$150,000, and the assessed valuation of the real estate within the probable area of assessment, which is \$7,533.385.

In regard to outlet sewers, information of which is requested by the Secretary of the President of the Borough, I beg to state that all necessary have been reported upon in my communication of February 7, under the heading of Sewers in Sixtieth street, from Fourteenth to Flatbush avenue. They are not repeated here to avoid confusion in authorization.

In regard to the opening of the street, information of which is requested by the Secretary of the President of the Borough, I beg to state that, according to Mr. Bischoff, of the Bureau of Highways, Street Opening Division, Commissioners have been appointed for opening Bedford avenue, from Eastern Parkway to Flatbush avenue, where not already opened, and that they have requested him to furnish a rule map.

Yours respectfully,

(Signed) JOHN THATCHER,
Superintendent of Sewers, Borough of Brooklyn.

No. 3.

Petition for the construction of sewer as described in the following report of the Department of Sewers:

Bureau of Sewers—Office of the Commissioner of Public Works,
Borough of Brooklyn, City of New York,
Superintendent of Sewer's Office,
January 27, 1902.

Hon. WILLIAM C. REDFIELD, Commissioner of Public Works:

Dear Sir—I herewith inclose a copy of a communication from the Secretary of the President of the Borough, with the original petition of Albert Kuelling and others, in relation to the construction of a sewer in New York avenue, between Avenue C and Avenue D.

I beg to state that the matter was referred to the Chief Engineer of Sewers, Borough of Brooklyn, who reports as follows:

"I beg to report that the estimated cost for the above improvement is \$2,000, and the assessed valuation of the real estate within the probable area of assessment is \$27,430.

"In regard to outlet sewers which will be necessary to provide drainage for the above, I beg to report that they will be needed in New York avenue, between Avenue D and Newkirk avenue; in Newkirk avenue, between New York and Nostrand avenues, and in Nostrand avenue, between Newkirk avenue and Avenue F, the estimated cost of which is \$14,600, and the assessed valuation of the real estate within the probable area of assessment, which is \$843,735.

"Other outlet sewers are necessary, but are included in my letter of this date to you, under the heading of 'Avenue G, from Coney Island to Flatbush avenue, etc.' I refrain from repeating them, with the estimated cost, in order to avoid confusing information to the President of the Borough and the Local Board of the district.

"In regard to the status of the legally opened streets, I find no record of New York avenue between these limits being open.

"Nostrand avenue, from Newkirk avenue to the old town line between Flatbush and Flatlands avenues (just south of Ditmas avenue), is open. From this line to Avenue F there is no record. The street has been occupied by trolley tracks for some years, however, and thereby thrown open to public usage.

"Newkirk avenue, between above limits, no record, but the same has been open upon the ground and publicly used for many years. (See Board Public Improvement proceedings for the year 1899, page 2321.)"

Yours respectfully,
