

### **Executive Summary**

The 4<sup>th</sup> Avenue, Sunset Park project set out to improve safety between 15<sup>th</sup> and 65<sup>th</sup> Streets, a 2.5 mile stretch of 4<sup>th</sup> Avenue through Sunset Park that contained among the highest incidence and severity of total traffic and pedestrian injuries in Brooklyn, including 7 pedestrian fatalities between 2006-2011. Problems such as double parking, speeding and long crossing distances resulted in corridor which did not function well for both pedestrians and vehicles. 4<sup>th</sup> Avenue had 3 substandard travel lanes in each direction, with short, narrow left turn bays. It also has 6 subway stations and 4 priority schools within the project boundaries.

In response, DOT worked with the community, through a workshop and open house, to develop a community supported redesign which improved safety by better organizing the flow of traffic and widening medians to shorten the crossing distances for pedestrians.

#### **Results Summary**

#### Safety

- Total crashes were reduced by 12%
- Pedestrian injuries decreased by 29%
- Speeding was reduced by 38%
- Zero fatalities in the project area since completion

#### **Mobility**

- Northbound (AM) traffic volumes were essentially unchanged
- Southbound (PM) traffic volumes were essentially unchanged
- Travel times slightly improved in the northbound and southbound peak directions
- Pedestrian volumes generally increased at intersections throughout the corridor

#### **Economic Vitality & Quality of Life**

- "It's unbelievably different...I feel so calm now compared to what I felt before on that speedway...Trying to cross Fourth Avenue was unbelievably scary... I'm no longer as afraid as I was before."--Gene Aronowitz, Sunset Park Resident
- FDNY and NYPD Report no adverse effects on their operations

### **Project Summary**

#### **Completed November 2012:**

- Re-allocated road space to provide two high quality, appropriate width travel lanes in each direction.
- Widened medians at selected intersections to allow safer pedestrian crossings
- Banned left turns at select low volume locations

### **Project Summary**

#### **Completed November 2012:**

- Instituted rush hour parking regulations north of 38<sup>th</sup> St
- Added pedestrian countdown signals at 50 intersections
- Added new truck loading/unloading zones to reduce double parking
- Extensive outreach to the Sunset
   Park community, including a safety
   visioning workshop and an open
   house

# Safety

 Total crashes were reduced by 12%

#### **Crashes, One-Year After Analysis**

4<sup>th</sup> Av (15<sup>th</sup> St to 65<sup>th</sup> St)

Each before year period is the 1 year period beginning August 1 and ending July 31. The 1-yr after period is December 1, 2012 to November 30, 2013. The implementation period of August 1, 2012 to November 30, 2012 is excluded. Source: NYPD AIS/TAMS Crash Database

## Safety

# Crashes and Injuries One-Year After Analysis, 4th Avenue (15th St to 65th St)

 Pedestrian injuries decreased by 29%

		Before			
	'09/ '10	10/ '11	11/ '12	Average	'12/ '13
<b>Total Crashes</b>	658	606	625	629.7	551
Crashes w/ Injuries	133	121	133	129.0	119
Motor Vehicle Occupant	99	105	116	106.7	117
Pedestrian	62	47	48	52.3	37
Cyclist	15	12	15	14.0	12
Total Injuries	176	164	179	173.0	166

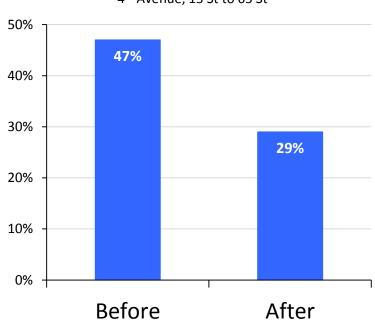

Each before year period is the1 year period beginning August 1 and ending July 31. The 1-yr after period is December 1, 2012 to November 30, 2013. The implementation period of August 1, 2012 to November 30, 2012 is excluded. Source: NYPD AIS/TAMS Crash Database

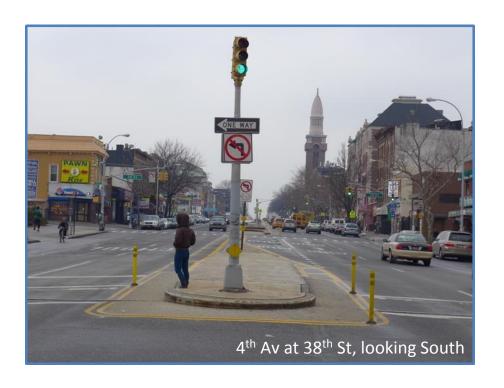

# Safety – Speeding

Speeding was reduced by 38%

#### Percentage of Drivers Traveling above Speed Limit

4th Avenue, 15 St to 65 St

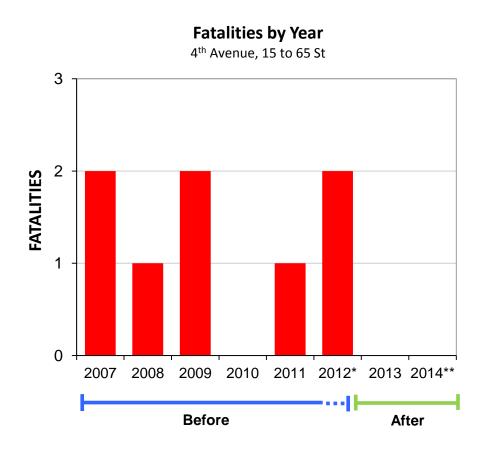

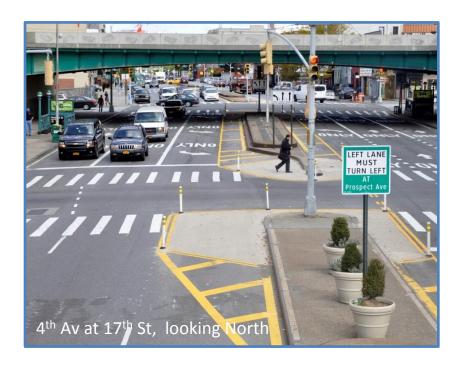

Radar speeds taken on 4<sup>th</sup> Avenue in both directions between 22 St and 23 St, 40 St and 41 St, 61 St and 62 St. Before: 11am-1pm January 19, 2011, After: 11am-1pm January 15, 2014

# Safety – Fatalities

Zero fatalities in the project area since completion

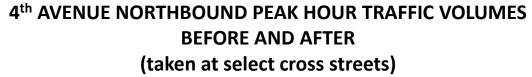

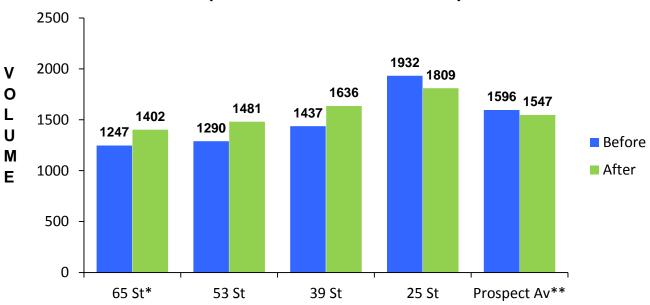

<sup>\*</sup> One fatality occurred during the project implementation period of August 1 to November 30, 2012

<sup>\*\*</sup> Fatality data as of November 1, 2014

### Mobility – Traffic Volumes

Northbound (AM) traffic volumes were essentially unchanged

Before: Average midweek AM peak hour (8-9 am) volume, week of June 14 and June 21, 2010

After: Average midweek AM peak hour (7-8 am) volume, week of October 21, 2013

10

<sup>\* &</sup>quot;After" peak hour at 65th St was 8-9am

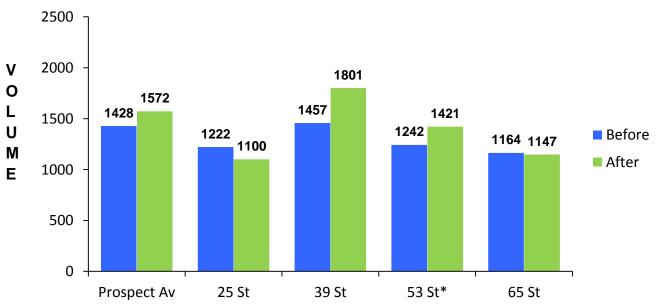

<sup>\*\* &</sup>quot;Before" peak hour at Prospect Ave was 7-8am

## Mobility – Traffic Volumes

Southbound (PM) traffic volumes were essentially unchanged

(taken at select cross streets)

Before: Average midweek PM peak hour (5-6 pm) volume, week of June 14 and June 21, 2010

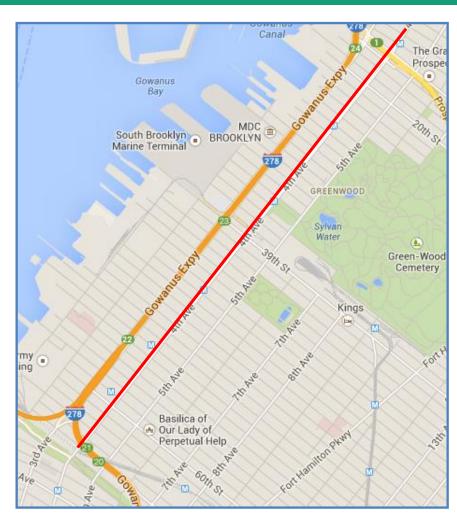

After: Average midweek PM peak hour (5-6 pm) volume, week of October 21, 2013

<sup>\* &</sup>quot;After" peak hour at 53rd St was 4-5 pm

# Mobility-Travel Times

 Travel times slightly improved in both the NB and SB peak directions

ROUTE	BEFORE	AFTER	+/-
	M		
NB 4 <sup>th</sup> AV (AM)	7:40	7:04	-7.8%
SB 4 <sup>th</sup> AV (PM)	8:31	8:25	-1.2%

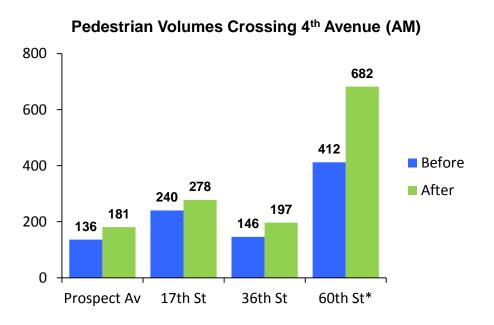

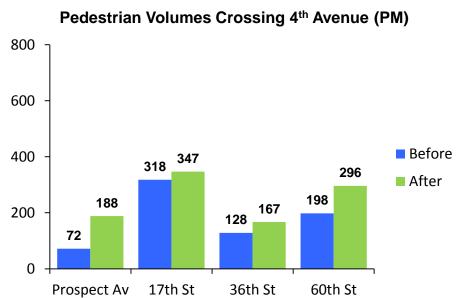

Before travel time runs done on 6/14/2012 and 6/21/2014 from 7-10am and 5-7 pm in peak directions. A total of 15 runs were completed in the NB direction and 10 runs in the SB direction.

After travel time runs done on 1/15/2014 and 2/6/2014 from 7-10am and 5-7 pm in peak directions. A total of 11 runs were completed in the NB direction and 9 runs in the SB direction.

### Mobility – Pedestrian Volumes

 Pedestrian volumes generally increased at intersections throughout the corridor

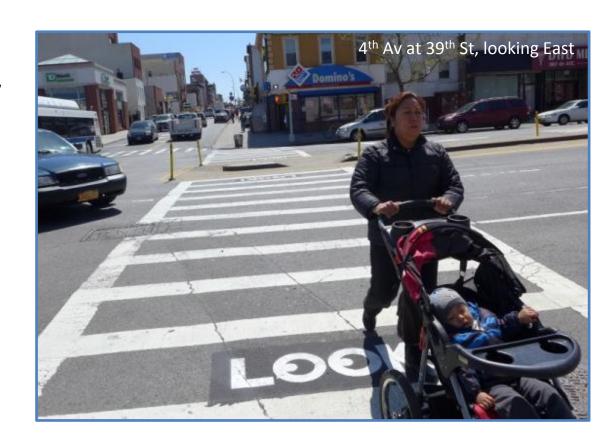

**Before:** 8-9 am and 5-6pm, September 20, 2010 **After:** 8-9 am and 5-6pm, October 24, 2013

<sup>\*</sup>Large AM increase at 60<sup>th</sup> St may be due to larger enrollment at PS 503 & 506

## Quality of Life

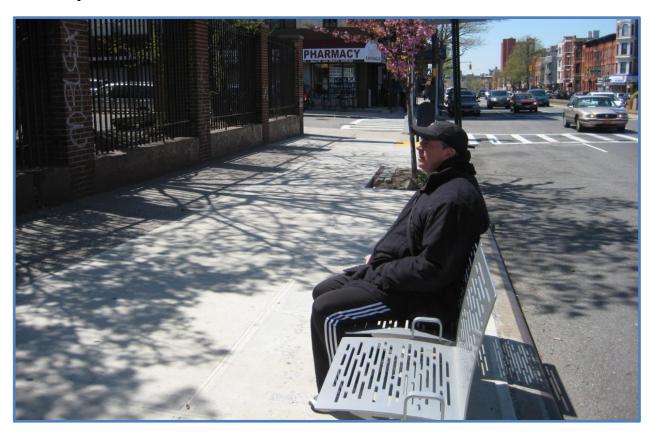

"It's unbelievably different...I feel so calm now compared to what I felt before on that speedway...Trying to cross Fourth Avenue was unbelievably scary... I'm no longer as afraid as I was before."

--Gene Aronowitz,
Sunset Park Resident

# Quality of Life

 FDNY and NYPD Report no adverse effects on their operations
