APPEARANCES:	2	PROCEEDINGS
For The City of New York Department of	3	
Sanitation:	1	MR. SZARPANSKI: Good evening.
Sarah Dolinar	5	My name is Harry Szarpanski. Em
Vaughan Arnold	6	Assistant Commissioner for Long Term Export with
Walter Czwartacky	9	the Department of Sanitation.
•	8	With me tonight are Walter
ALSO PRESENT:	9	Czwartacky, at the far end, Vaughan Arnold and
Henningson, Durham & Richardson Team	10	Sarah Dolinar from the Department also.
Greeley & Hansen Team	111	We have with us representatives of
Ecology & Environment Team	12	two of our consulting teams. We have Dan Harkins
The Media	13	and the rest of the HDR team. HDR is responsible
The Public	14	for conducting the environmental review for the
	15	project.
	16	We also have we also have Harvey
	17	Brodsky leading G&H, Greeley and Hansen. They're
	18	responsible for the design of this marine transfer
Marc Russo	19	station and the other three MTSs.
Reporter	20	f see we don't have big crowd so we
t .	21	can be a little more informal.
	22	First let me talk about the format
	Lan	of the continue
	23	of this receting.
	24	First, if you didn't sign in, please

ŀ

Ί 2 our mailing list so if we need to notify you of subsequent meetings, we can do that. I will make 3 a short Powerpoint prescritation. We also have 4 5

After the Powerpoint I'll open it up to statements, comments, questions, et celera. I see so far there's only one person signed up to speak. If other people want to speak, please fill out one of those speaker sheets at the table as you entered

We typically ask people to limit their comments to three minutes, but I don't think that will be necessary tonight.

If there are some specific questions you asked that we can't answer ourselves, we'll turn to our consultants and I'm sore they'll help us out. And if we can't answer them tonight, we'll get back to you at some future date.

We typically allow elected officials: to speak first, if they want. It's not the case tonight. But we do have representatives from Councilman Liu's office and Councilman Avella's 7

of the four MTSs are in EJ communities, but we decided early on in this process to treat all communities in the same way. So we're holding four of these environmental justice meetings.

The policy that DEC has calls for us to prepare a Public Participation Plan. DEC has already received that from us. They've approved it and this is part of the plan having this meeting.

Then also an implementing and outreach program to make sure that all the stakeholders are aware of these and are able to participate.

The PPP, the Public Participation: Plan, also describes all of the information about the project. And I'm not going to go through all of these in detail. You can look at what's involved in this in your handout.

And basically it asks us to allow communities to have an interactive session with os so that they can ask questions. We answer them and inform the community.

In terms of some of the major. milestones in the development of the solid waste

я

6

office with us tonight

And we are making a transcript of this meeting. So as you're speaking if something, is not clear, we'll ask you to repeat it for the stenographer

Let me now start with the short Powerpoint presentation.

(Showing Powerpoint.)

MR. SZARPANSKI: The objectives for tonight are basically to provide you a briefing on what this project is all about, the North Shore, proposed North Shore converted Marine Transfer Station. We'll explain what the New York State Department of Environmental Conservation's process is in terms of their role in the pennitting.

We'll talk about how you can get comments to us and we will answer questions that you might have.

This meeting is called an environmental justice informational meeting. The DEC requires us to hold these meetings to make sure that we do our outreach to environmental justice communities, as they define it. Not all

management Plan, this facility being one of those elements of the plan, we issued a Draft SWMP, Solid Waste Management Plan back in October '04. And then we did a Draft Environmental Impact

Statement. And then in April of 2005 we issued the Final Environmental Impact Statement.

Community Board #7 voted yes as part of the ULURP process. The Borough President endorsed the project. And the City Planning Commission approved this as the last step in the ULURP process

The City Council adopted the SWMP in '06, in July of '06 and then it went to the State DEC and the DEC approved the SWMP in October of '06.

This is somewhat of a small, husy drawing. You have a copy of that in your handout.

It shows how waste, in the various wastesheds, is allocated to various facilities. that are part of the SWMP. The area for this wasteshed is shown in light brown. And it's Queens 1, 2, 3 -- I'm sorry. Queens -- it's hard for me to read. 1, 2, 3, 4, 5, 6. No, I'm sorry. 7, 11, 8, 9, 10, 12 and 13 and 14.

This is just a site plan. It shows how the facility is going to be laid out. It's superimposed over the existing marine transfer. station on the hottom.

And this is a typical cross section. of what one of these marine transfer stations will look like.

Trucks will arrive onto the tipping floor through the door here (indicating.) The truck will backup and dump its waste onto the next level, which is the loading floor. Waste will then be pushed by a front-end loader into an opening in the floor. There are four such openings and under each opening is a container. The waste will then be tamped into the container, This all occurs still within the enclosed building,

The container gets moved over and the lid gets put on. And once the lid is on and secure, the container is moved outside of the building where a gantry crane will pick it up and place it onto the barge.

The floor plan for that facility shows that there's a scale as the truck comes in.

10

10

The trucks then tip from the tipping floor to the next level, the loading floor. And you can see the equipment here. And the containers eventually wind up outside the building once they're scaled and go onto the barge.

The capacity and how much we're seeking to permit at the facility is shown in this

It's important to note that this facility and all the other marine transfer stations will handle the same historic wastesheds that were handled by the marine transfer stations. when they used to operate and waste was delivered. to the Fresh Kills landfill.

The expected average daily throughput is shown as 2,200 tons a day of Department of Sanitation managed waste. And there's capacity to handle up to another 1,000. tons of commercial waste.

The permit that we're seeking will have limits on it, limits on not-to-exceed amounts on a daily basis and on a weekly basis. There's a 20 percent allowance in those calculations for seasonable variability and growth in the wasteshed | 25 11

and redundancy.

There's what's called a Maximum Peak Day. Since waste is collected and varies on a weekly basis from day to day, there are heavy days. and lighter days. Usually the first collection. day of the week is the heavier day. We want to make sure that we can handle the Maximum Peak Day which occurs on a day that's normally a heavy day but also on a post-holiday collection where you're collecting waste in only five days that you normally would have collected in six days,

Some of the key elements or features of the marine transfer station.

All waste is processed in an enclosed building and negative air is going to be maintained so that odors don't escape. We will treat the air using a neutralizing agent, not a masking agent.

The waste leaves in scaled containers. And when we concluded the covironmental review, results that we found were that there would be no significant adverse impacts. from the facility construction or operation,

We looked at how much capacity would

12

be available for commercial waste. And the commercial waste would only be allowed to come in from eight p.m. to eight a.m. And the amount that we calculated was based on limiting the number of trocks going in based on making sure that we would not exceed any noise thresholds.

We've submitted our permit applications to the State DEC. We are waiting for them to deem the applications complete. And there are three permits.

The first one is called a Part 360 Permit. That pertains to the solid waste aspect. of the facility.

The second one, the 608/661 is marine related having to do with the construction. of water and what quality.

And the third one is a Minor Source Pennit, It's an Air State Facility pennit.

If you're interested in looking at the complete permit applications, they're available both at Community Board #7's office and at the library listed here. They're also on our web page.

Yes,

for are, you know, where are these containers going to go, where are the ultimate disposal locations.

В

I can tell you a few things which have been already disclosed in the press and some vendors may have disclosed.

One of the locations that's been proposed where the containers will be off-loaded and then put onto either a barge or rail is the New York Container Terminal on Staten Island. It's one of the locations. It's not the only. And there are options there going by rail or by waterborne vessel to its ultimate disposal location.

I think that's all that we've disclosed publicly at this point. So as much as I'd like to tell you more detail, we're precluded from doing so by the City's procurement process.

MR. ROBERT LOPINTO: Okay.

The second item is concerning the commercial -- the use of the marine transfer stations for disposal of commercial waste.

We're concerned on a number of issues. One, how is the City going to effect this

Jaunaica.

So the Council asked us to look at the ways of making sure that commercial waste can wind up at the marine transfer stations. And the analysis we did, as part of the commercial waste study, allocated capacity at the these marine transfer stations to commercial — to use for commercial waste.

At this point we have -- well, starting from the point we're at now, we are looking -- we think that commercial waste, some commercial waste will be attracted to these facilities based on the proximity where their commercial waste is generated.

We don't know exactly how much will be attracted. Obviously it's what the cost to the carter is to come to our facilities versus what the cost to him is to go to other facilities. But there's an economic advantage of being near where the generation is.

We have thought about mechanisms of inducing commercial waste carters to come to this facility. We haven't come to any conclusions yet. I would assume if we can't attract a sufficient

from happening. We understand, according to the plan, that only a certain number of truck tickets will be issued to the vendors, so you would limit the number of trucks? The question is would they also be limited by the time of the night that they're coming so that you have a proper number per hour.

And the other flip side of that coin is if this City finds that vendors are not forthcoming to use the facility, is the City going to institute some procedure to force commercial carters to use the facility, and if so — to make sure that all thousand tons are utilized therefore reducing the overhead cost. And if so, also, how is the pricing going to be affected.

MR. SZARPANSKI: Okay. As you know, one of the big concerns for the administration and the Council in implementing this plan is to make it a more equitable waste disposal system throughout the City of New York.

Right now we have a situation where commercial waste is primarily disposed of in three cluster areas: In the South Bronx, in Williamsburg, Greenpoint/Williamsburg and in

amount - and I don't know what that sufficient amount would be - that we may consider some inducement to maybe lower the price. And in our negotiations with vendors we're looking at an incremental price structure so that, you know, if our waste has a certain cost to it, then the vendor should be able to handle some increment above our rate at a lower cost than the average cost charged to us so that we can possibly charge commercial waste handers an amount that's lower than our average cost and induce them in that way.

All of these things are things we're looking at. We haven't reached any conclusions. I think we're going to have to wait to see when the system is up and running how much commercial waste winds up at these facilities on its own without any inducements and then we'll look at other methods of bringing commercial waste into the facility.

MR. ROBERT LOPINTO: Okay.
Questions now from the community
board point of view. Some of it similar.
Truck traffic.
First of all, when the old marine

2 t

transfer station was here, you did have a considerable amount of Sanitation traffic that you expect to have a similar amount under this proposed Solid Waste Management plan. You're now adding commercial waste which you had at the old MTS until 1988 when you raised the rates so high you drove everyone away.

In the meantime the neighborhood has changed even from three years ago when you did your EIS. The Cotlege Point area has become heavily trafficked with the Corporate Park and the retail shopping area.

You have down that one street besides your own -- your own garage and trucks from Board #11's area. You have the Home Depot. You have Con Edison. You have a number of commercial enterprises that all use that street.

They all end up coming back to College Point Boulevard and there's a limited mechanism for them to get back to the arterial highways.

What I'd like to know is one, how are you going to control your traffic, all of Sanitation's and the commercial traffic to by and

even it out as best as you can, or for those times when the rest of the traffic in the area is heavy, even lower yours.

And also, are you planning on any controls of your own besides the truffic light at the end of 31st and College Point Boulevard?

MR. SZARPANSKI: Okay. With respect to the commercial waste I think it's important to keep in mind that commercial waste will only be allowed to come to this facility between hours of eight p.m. and 8 a.m. That matches well with their collection practices.

It also comes at a time where one traffic, the Department's traffic is not high and assuming the neighborhood traffic to stores is not going to be high also.

Are there any other comments you want to add on the commercial waste?

MR. WALTER CZWARTACKY: Mostly I would inticipate that most commercial waste would arrive at the facility after midnight, which would really put them out of the window of our operations and the peak traffic periods in the neighborhood.

As it pertains to our trucks, we, in our traffic analysis so far, have not -- do not foresee any problems that we can't mitigate signal changes and certain turn light operations, which is, in part, a consequence of the distance of travel that some of the trucks comes from, so that even though there is a peak hour where we would get like 30 trucks, the spread of the entire -- the remainder is -- over the eight-hour period is considerable and therefore doesn't jam up the intersections during the peak hour on otherwise.

If there are problems, we will respond, as we've responded in other locations, with controls in terms of dispatching trucks to the dump site and the like. And we've done those kinds of operations in the Bronx to prevent traffic problems and we would do them here in the future should it prove necessary.

MR. SZARPANSKi: And Bob, we can show you copies, we can give you copies of the profite of the anticipated arrival rules to show you that --

MR. WALTER CZWARTACKY: Let's just remember, the profiles -- the profiles that we ran

in the EIS are actually very conservative. They're based on '98 tonnages, which are higher than today's. We anticipated less in the truck than we're currently getting and then they included a contingency amount for safety.

So the numbers projected in the EfS and analyzed in the EfS actually -- are actually higher than the numbers we anticipate will go there. So don't -- as some communities have, don't run around saying they fold us this and now they're saying that.

MR. ROBERT LOPINTO: 1 understand that.

I guess specifically then, are you going to be -- you're fimiting your connecreial traffic to 91 trucks, that's what it said. Are you going to final it to so many an hour? Are you giving a ticket that says you can come between 3 and 4 or are you going to give 91 tickets out and they all decide, 91 of them decide to come at two in the morning and you have so much noise everyone in the neighborhood is now up in arms?

MR, SZARPANSKI: I think since that mechanism is within our control, we're going

1 25 1 27 2 to see how things work out. Commercial waste 2 So a number of trucks will actually 3 naturally doesn't all come at the same hour. 3 be exiting south on College Point coming up north а because of the collection practices, 4 along College Point in order for them to access I think if we find that it becomes 5 the facility thereby not exacerbating any traffic 6 problematic, it will basically mean that we have 6 problem you have at Linden Place. 7 to do something about how we sell the tickets, 7 MR. ROBERT LOPINTO: Since then in 8 whether we sell a certain number of tickets per 8 last three years. Flushing has been growing in 9 hour and we can control that. 9 that direction. There's development at College. 10 MR. ROBERT LOPINTO: All right, 4 10 Point and Roosevelt Avenue, and there's 11 mean the main concern was that when you did your U anticipated increased residential development down 12 noise analysis, you assumed a certain number of 12 towards College Point Boulevard. So there will 13 per bour for your maximum. That's part of the way 13 also be increased traffic on College Point. 14 you had to limit the thousand tons. 14 I don't know, someone's -- you're 15 MR. SZARPANSKI: Right, 15 going to have to look at this later on and balance MR. ROBERT LOPINTO: I guess what 16 16 out your routing because you may find that the 17 17 I'm getting at is if it actuality starts to go College Point exit may be worse than the Linden 3.8 18 beyond that, then you've got to do something to Place. I'm just saying it's -- you know, there's 19 cut it back so that none of the hours are over the 19 nothing you can answer now but it's something you 20 20 noise threshold. should be aware of that as the development in 21 MR, SZARPANSKI: That's correct. 21 downtown Flushing changes, you may have to MR. ROBERT LOPINTO: Okay, readdress your routing. 22 22 23 The other problem is is that the 23 MR. SZARPANSKI: Okay. Well, 24 entire area has seen a lot more traffic than what 24 that's a good point. And we will re-examine it 25 you had even three years ago. There's been 25 when the facility starts operating, yes. 26 28 1 26 1 28 studies done. The Board is still asking for a 2 2 MR. ROBERT LOPINTO: And I'm 3 revised traffic study for that whole area. 3 assuming that Sanitation has some control over I behoove you to coordinate with the 4 4 your vehicles during the day as to how they're 5 other City agencies, EDC, traffic, et cetera, to 5 coming. I mean do you actually have some sort of look at the traffic problems there. You know that 6 6 communications --7 the Van Wyck Expressway, the Whitestone Expressway 7 MR. SZARPANSKI: We do. A are being redone. We're now going to have two А Absolutely, yes, 9 exits, one direction. We have the turnsround 9 MR. ROBERT LOPINTO: -- with the 10 10 lanc. vehicles? So, you know, if there's more of them 1.1 Actually it would assume your 11 coming, you can slow some down in the middle of 12 vehicles are going to go through that Linden Place 12 the day if it looks like there --13 turnaround lane. I've never even checked on that, 13 MR. SZARPANSKI: Certainty if it 14 That's the one that keeps them off of Linden 14 becomes a problem, we can communicate with our 15 Place. As they come north on the service road, 15 vehicles, yes. 16 they can do a U-turn to go south and they'll go 16 MR. ROBERT LOPINTO: What 17 back to 31st to get to your -ŧ٧ percentage of your vehicles will be coming after 18 MR. SZARPANSKI: Elo Comfort with 18 daytime shift? 19 HDR. 19 MR, SZARPANSKI: A very small 20 MR, ELO COMPORT: When we were 20 percentage. Let me see if we have some actual-21 originally doing the traffic study, one of the 21 numbers for you. 22 things that the Department of Transportation asked 22 MR. ROBERT LOPINTO: And I'm 23 us to do was to try and route trucks away from the 23 assuming that's mainly from 6 p.m. till midnight. 24 Lindea Place exit because of the congestion 24 MR. SZARPANSKI: Yes. It's --

25

MR. WALTER CZWARTACKY: It's less

25

problems that already exist there.

MR. GENE KELTY: Thank you. Goodevening, I'm Gene Kelty, the Chair from Board

Het Bob handle the technicalities. okay, but I also have Joc, who's my transportation guy and that's what we're talking about.

You better be realistic to what's going on in that area. What you say is not going to happen.

The -- if you looked at page eight, on your diagram, if you put that back up there, which is your site plan. They're using 28th Avenue as they're coming in and out now and they're going through a residential area 'cause they're cutting through to get in and get out of the area, maybe not the commercial people as well, But when they back up on 31st

don't care about the community other than our own people.

So go back and do the traffic schedule again and tell them they're not coming in that way. I don't care if you have to put trailblazing signs up on College Point Boulevard that says "marine transfer station only entrance" or something like that. But don't think they're not going to go in that way. They will use 28th Avenue.

MR. SZARPANSKI: Gene, are they using rootes that are not designated truck routes? MR. GENE KELTY: Yes, they are.

because it's easy for them. Nobody watches them. You have to understand that's an industrial area and back there we have coal fire. We had another Sanitation unit that was back there, a private carter and they used to use that area. So it's conducive for the local people to go in. So what's the difference if a Sanitation truck goes through there.

MR. SZARPANSKI: Do you know if this has been brought up to our Commissioner's attention?

1 33 1 35 2 MR. GENE KELTY: Well, the 2 things tend to, you know, get cleared up 3 Commissioner might talk about a lot of things 3 immediately but may not last so. about Board #11 landing in our district. We 4 4 MR. GENE KELTY: It's only because haven't talked about that. I'm just bringing to it's an industrial area they don't pay attention 5 your attention, with your trallic study, make sure 6 Ğ to it, that's why. And I do understand we're busy 7 that trailblazing goes on. I'm only taking 7 over there. But 31st Avenue was made wide enough 8 responsibility for Board #7's district. Board #11 θ for them to queue up. And I don't care if they has been using 32ml Avenue continually and it 9 9 have to go up to the side streets there by Home shouldn't be my guys, meaning Board #7, going 10 10 Depot and then sit up there, but they've got to 11 after Board #11. Let their supervisors go after $_{\rm LL}$ make sure they keep the road open and stay on 31st them and trace them down and make them follow the 12 Avenue. That's the main road in and out of that 12 13 13 area, okay. 14 But I'm telling you I've got Eusy. 14 Thank you. 15 Pack. I've got Lot Cleaning, I got Borough 1.5 MR. SZARPANSKI: Thank you. Equipment and I got a salt dome. And when the 16 16 We have another speaker that signed 17 crap hits the fan, they don't care how they do, 17 UD. they're going to get them in there. And I've got 18 18 Jim Singletary. 19 a lot of trucks on the street which means they'll. 19 MR. SINGLETARY: Twenty-cight 20 use the parking in the lot back to maneuver 20 Avenue Homeowners Association. 21 around. And I also used to have too the household. 21 I won't rehash everything that Gene-22 dump over there which we were fighting to get back 22 just said, but I'm a resident of over 40 years. 23 but that's a different story. 23 I don't want to rehash everything 24 I'm jost telling you make sore you. 24 Gene just said, but I'm a resident over 40 years 25 watch the traffic plant very closely because 25 in this particular area. And I can tell you when 34 36 1 34 1 36 2 you'll hear from some people here from 28th Avenue you had the marine terminal there, it was 3 and they said it does happen. Not as it did in 3 operating until they put the Department of the past, but it's going to happen now. 4 4 Sanitation buildings there. And when they get 5 Plus I want one of his people to be 5 bottled up, they start coming the 28th Avenue way. ĸ sitting on with us because we have the new police. G I don't know if you visualize what I'm getting at. 7 unit that's going to go right across the street 7 Your existing Department of 8 from your 131st Avenue. So if you don't think A Sanitation trucks that I'm talking about, when 9 traffic is going to be that light, it's going to 9 they can't get out on 30th Avenue, they'll start 10 be increasing more and more on College Point 10 coming out 122nd Street right across 28th Avenue, Boulevard and 31st Avenue. The police now is 1] 11 And when they come in from Linden Place across 1,2 coming to us to put their school over there, 12 28th, if they see it's crowded on College Point 13 So that's in the development so your 13 Boulevard, they'll come right down 28th Avenue and 14 plan, when you did it originally, didn't include 14 go all the way to 120th Street and make a U-turn 15 that. It's now going to have to include that so 15 to go around to get into their depot. 16 you're going to have to go back and look at that. 16 Aud this -- if you can promise me 17 MR. SZARPANSKI: Okay, Well, 117 you're going to monitor this, because it was so typically on an environmental review perspective a 18) 0 bad now that they're lighting with the industrial

Commissioner's level. I'm sure you'll get some

long, please come and tell us again because these

immediate relief, but if it doesn't last for too.

But from a practical perspective I hear what

you're saying. We will bring this up to the

3	37	1	39
2	right of way. And I heard them arguing. And I	2	to the Solid Waste Management plan, we all
3	come over and I say, neither one of you's have the	3	realized that probably all of us here today
9	right of way. This is a residential street, 28th	4	probably will not be here when perhaps these
5	Avenue, on our side. Maybe you do on the other	5	things go into effect. Certainly all the Council
- ਜ 	side going into Linden Place. And all they said	6	people will no longer be here because they'll be
7	is well, I'm sorry, sir, you know, we're all	17	term-limited out.
8	messed up down on 31st Avenue for whatever reason.	8	So one of the important things we
9	MR. SZARPANSKI; We'll clear	9	put in the plan was that every marine transfer
10	that	10	station will have a community advisory board
11	MR. HM SINGLETARY: That's not	11	attached to it that will meet regularly about the
12	the right way to do business, you know.	12	concerns of the community starting this year.
13	MR, SZARPANSKE: You're right. We	13	So as the planning goes forward, as
14	have to look into this and	14	the construction goes forward and as the
15	MR, JIM SINGLETARY: 1 just want] 15	implementation goes forward, there will constantly
16	to know if there's some kind of mechanism you can	16	be community input as to the problems that occur.
17	set us up with, a phone number or something. Even	17	So if a new traffic situation come up, if the
18	if we can call the DS itself and say, you know,	18	trucks are using the wrong streets, that will all
19	you got these tracks up there, what are they doing	19	be able to be spoken about at the community
20	all the way up on 28th Avenue.	20	advisory board and made known to the Department
21	And if they get stalled and parked	21	and to the elected officials.
22	one on top of each other, their engines are	22	Now, the community advisory board
23	attining, it's not a practical I know it's not	23	will be made up of appointees. There will be
24	your particular problem, sir.	24	three from the City Council members whose district
25	MR. SZAŘPANSKI: No, no, but it's	25	the facility is in. Three from the Borough
		1

1		J .	40
2	our Department and we're responsible.	2	President, I believe and three from the Mayor or
3	MR. JIM SINGLETARY: We're not	3	four?
4	going to hold up progress, but if you really get	4	MR. SZARPANSKI: Four from the
5	the true picture of what's going on over there,	5	Mayor. Three from the Borough President.
6	it's kind of unbelievable.	6	MR. CARMEN COGNETTA: Four from the
7	MR. SZARPANSKI; Let me bring	7	Mayor, three from the Borough President, three
Я	this to the attention of our Commissioner, Pag	8	from the Council members.
9	sure he'll will act on this.	9	Now, those community advisory boards
10	MR. JIM SINGLETARY; Thank you	10	are being formed now so if anylady'S interested in
11	very anech for your time.	11	being on them, they should talk to Councilmember
12	MR, SZARPANSKI: Thank you,	12	Avella who's district this is or the Borough
13	Is there anybody clse who would like	13	President. And we hope to get them having their
14	to speak even if you didn't sign up, on any topic.	14	first meeting in July of this year so that they'll
15	(Laughter,)	15	be active and be able to put input into this
16	MR. SZARPANSKI: Is it anybody's	16	process from the very beginning so.
17	birthday today?	17	MR. SZARPANSKI: Thank you, Cormen.
18	MR. CARMEN COGNETTA: Did you talk	18	Anybody else? Yes, Please stand up
19	to the community advisory board?	19	and state your name.
20	MR. SZARPANSKI: No, 1 did not.	2.0	MR. GENE KELTY: Yes. Gene Kelty
21	Carmen Cognetta, Counsel to the City	21	ngain.
23	Council Committee on Sanitation?	2 2	One other thing I want to go after,
23			
	MR. CARMEN COGNETTA: And solid	23	as a reminder, when we did the original CLURP
24	waste management.	23 24	as a reminder, when we did the original CLLRP application by the community hoard, there was a

Jiest want to do the boiler plate application on he here and make the statement. The height of the building has to be in agreement with the FAA and Port Authority, And I understand it was 1 just want to make sure that we're at agreement with that. MR. SZARPANSKI: Yes. Let me bring you up to date on what happened there. The Port Authority initially bring you up to date on what happened there. The Port Authority initially bring you pro date on what happened there. The Port Authority initially bring you pro date on what happened there. The Port Authority with the building. We had namy discussions with them as to whether or not this was an obtacle or in any way interfered with aliprort operations. We agreed with the Port Authority to reduce the building beight by ten feet. The Port Authority withdrew their objections so that's been settled. MR. GENE KELTY: Thunk you. MR. SZARPANSKI: Yes, sir, Your name. MR. GENE KELTY: Thunk you. MR. SZARPANSKI: Yes, sir, Your name. MR. GENE KELTY: Thunk you. MR. SZARPANSKI: Yes, sir, Your name. MR. GENE KELTY: Thunk you. MR. SZARPANSKI: Yes, sir, Your name. MR. JOSEPH FEMENIA: Joe Femenia, on the birds, see guils. They wantly surround 42 this area. Did they come up with a decision based on the birds, see guils. They wantly surround 42 this area. Did they come up with a decision based on the birds, see guils. They wantly surround 42 this area. Did they come up with a decision based on the birds, see guils. They wantly surround 42 this area. Did they come up with a decision based on the birds, see guils. They wantly surround 42 this area. Did they come up with a decision based on the birds, see guils. They wantly surround 43 MR. SZARPANSKI: Well, look, in the past when we operated marine transfer stations, we used upon hopper barges. Garbage is exposed to the air. Birds came and followed our barges. Surround when the Diff will the containers are seated that the containers go outside the building. So we do not be believe that this ficility will attract bin	1	41	1	43
here and make the statement. The height of the building has to be in agreement with the FAA and Port Authority. And I understand it was. I just went to make sure that we're at agreement with that. MR. SZARPANSKE: Yes. Let me birdy out up to date on what happened there. The Port Authority initially objected to the height of the building. We had a lipset openitions. The We agreed with the Port Authority to reduce the building height by ten feet. The Port Authority withdraw their objections so that's been settled. MR. GENE KELTY: Thank you. The Port Authority initially we had alipset openitions. Whether it's happening from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids to bur here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're just bringing panoids from here or not, we're at La Goadla Ai	2	I just want to do the boiler plate application on	2	
in agreement with the AA and Port Authority. And bunderstand it was, I just want to make sure that we're at agreement with the Aard Port Authority with the Birdy you up to date on what happened there. The Port Authority initially objected to the height of the building. We shad many discussions with them as to objected rout it is was an obstacle or in uny way interfered with airport operations. We agreed with the Port Authority to the reduced by the free the The Port Authority withdrew their objections so that's been settled. We agreed with the Port Authority to the reduced by the free the The Port Authority withdrew their objections so that's been settled. MR. GENE KELTY: Thank you. MR. GENE KELTY: Thank you. MR. JOSEPH FEMENIA: Joe Femenia, Community Board #7. Another part of fleat height issue was the birds, sea gells. They usually surround 42 this urea. Did they come up with a decision based on the birds? MR. JOSEPH FEMENIA: Yes. And the planes landing. MR. SZARPANSKI: Well, took, in the past when we operated marine transfer state exposed to the air. Birds saw this. Birds came and followed our barges. MR. JOSEPH FEMENIA: Yes. And the exposed to the airn. Birds saw this. Birds came and followed our barges. The way this facility is designed the rucks comes into the facility. No waste is ever exposed to the atmosphere. No waste is seen by mybody. Waste goes into sealed containers and sellowed our barges. MR. JOSEPH FEMENIA: Except for the trucks' causes they're not scaled. MR. JOSEPH FEMENIA: Except for the trucks' causes they're not scaled. MR. JOSEPH FEMENIA: Except for the trucks' causes they're not scaled. MR. JOSEPH FEMENIA: Except for the trucks' causes they're not scaled. MR. JOSEPH FEMENIA: Except for the trucks' causes they're not scaled. MR. JOSEPH FEMENIA: Except for the trucks' causes they're not scaled. MR. SZARPANSKI: Well, you know, as sometoudy clea at no end of the facility. The not sealed to the most point asked whether trucks as sometoudy clea at no end of the facility. Th	3	here and make the statement.	<u> </u> 3	., .
5 in agreement with the FAA and Port Authority. And be a lunderstand it was, Jints want to make sure that we're at agreement with that. 7 we're at agreement with that. 8 MR. SZARPANSKI: Yes. Let me bring you up to date on what happened there. 10 The Port Authority initially on any decussions with them as to whether or not this was an obstacle or it may way interfered with a largor operations. 12 We agreed with the Port Authority to reduce the building heigh by ten feet. The Port Authority withdraw their objections so that's been settled. 12 MR. GENE KISTTY: Thank you. 13 MR. GENE KISTTY: Thank you. 14 MR. JOSEPH FEMENIA: Joe Femenia, was the birds, see guils. They usually surround 15 was the birds, see guils. They usually surround 16 district in Queens, Board #7, And the problem to the Port Authority or at La Goardia Airport. 17 Maturity over at La Goardia Airport. 18 Mr. SEARPANSKI: Well, you know, waste is ever a problem to the Port Authority which we their or incities that may be attered before in the statement of the building. So that is been at the past when we operated marrin transfer to states, we used open hopper harges. Garbage is exposed to the air. Birds saw this. Birds came and followed our harges. 17 The way this facility is designed the truck comes into the facility will a triased our marges. 18 MR. JOSEPH FEMENIA: Yes. And the planes alanding. 19 The way this facility is designed the truck comes into the facility will, that facility is designed the truck comes into the facility will attract birds at landing. 19 MR. SZARPANSKI: Well, you know, and for coming. If you are on on list, you'll be notified when the DicC will hold its permit hearings. 10 MR. JOSEPH FEMENIA: Except for the brid scause they're not scaled. 11 MR. JOSEPH FEMENIA: Except for the brid cause they're not scaled. 11 MR. SZARPANSKI: Well, you know, so sonebody che at one point asked whether trucks.	4	The height of the building has to be	4	
1 understand it was. I just want to make sure that 2 we're at agreement with that. MR. SZARPANSKI: Yes. Let me 3 bring you up to date on what happened there. 10 The Port Authority initially 11 objected to the height of the building. We had 12 many discussions with them as to whether or not 13 this was an obstacle or in any way interfered with 14 aliphort operations. We agreed with the Port Authority to 16 reduce the building height by ten feet. The Port 17 Authority withdrew their objections so that's been 18 settled. MR. GENE KHLTY: Thank you. 20 MR. SZARPANSKI: Yes, sir, Your 19 mane. 21 mane. 22 MR. JOSIPH PEMENIA: Joe Femenia, 23 Community Board #7. Another part of that height issue 25 was the birds, sea guils. They usually surround 26 mR. SZARPANSKI: Are you referring 27 to birds that may be attracted no our facility? 28 MR. SZARPANSKI: Well, look, in 29 place landing. 30 MR. SZARPANSKI: Well, look, in 31 place and followed our barges. 31 The way this facility is designed 32 the truck comes into the facility. No waste is seen 33 this read by anybody. Waste goes into scaled containers and 34 to bring the more special marine transfer and followed our barges. 35 The way this facility is designed 36 the truck comes into the facility is designed 37 the way this facility is designed 38 the truck comes into the facility will attract birds at all. 39 MR. SZARPANSKI: Well, you know, and followed our barges. 40 MR. SZARPANSKI: Well, you know, and followed our barges. 41 MR. JOSHPH FEMENIA: Except for the continers go outside the building. So we do not believe that this facility will attract birds at all. 41 MR. JOSHPH FEMENIA: Except for the continers are one point asked whether trucks 42 MR. SZARPANSKI: Well, you know, and followed our barges. 43 MR. SZARPANSKI: Well, you know, and followed our barges. 44 MR. SZARPANSKI: Well, you know, and followed our barges. 45 MR. SZARPANSKI: Well, you know, and followed our barges. 46 MR. SZARPANSKI: Well, you know, and followed our barges. 47 MR. SZARPANSKI: Well, you kno	5		5	district in Queens, Board #7. And I've got a lot
bing you up of acte on what happened there. The Port Authority initially objected to the height of the building. We had namy discussions with them as to whether or not this was an obstacle or in any way interfered with aliport operations. We agreed with the Port Authority to reduce the building height by ten feet. The Port Authority withdrew their objections so that's been settled. MR. GENE KILLY: Thank you. MR. SZARPANSKI: Yes, sir, Your name. MR. JOSEPH FEMENIA: Joe Femenia, Community Board #7. Another part of that height issue was the birds, sea guils. They usually surround MR. JOSEPH FEMENIA: Are you referring to birds that may be attraced to our facility? MR. JOSEPH FEMENIA: Yes, And the formal plants and followed our harges. The way this facility is designed the truck comes into the facility. No waste is ever exposed to the aimosphere. No waste is seen and followed our harges. The way this facility is designed the truck comes into the facility. No waste is ever exposed to the aimosphere. No waste is seen by anybody. Waste goes into sealed containers and to containers go outside the building. So we do not believe that this facility will attract birds at all. MR. JOSEPH FEMENIA: Except for the truck's cause they'ro keeping the recyclable frucks one point asked whether trucks. Authority over at La Goardia Airport. Whether it's happening from there or not, we're just bringing anothe booker just one, to work push to it way be lot your facility be wait in Recause they'ro keeping the recyclable frucks over three. It's happened they which is Boards to the birds was us obstacle on the properties of the safe statemen. Make sure you look at it. Because they robic push in the Port Authority to recyclable frucks over three. It's the same recyclable frucks one the truck over the child in the part the part of the facility. We and the part of the facility will attract birds MR. SZARPANSKI: Well, look in the plant of the building. MR. SZARPANSKI: Well, you know, the plant of the properties of comments, thank yo	6	I understand it was, I just want to make sure that	6	
MR. SZARPANSKI: Yes, Let me bing you up to date on what happened there. The Port Authority initially objected to the height of the building. We had almost ecussions with them as to whether or not this was an obstacle or in any way interfered with alipnot operations. We agreed with the Port Authority to reduce the building height by ten feet. The Port Authority with the Port Authority to reduce the building height by ten feet. The Port Authority to reduce the building height by ten feet. The Port Authority with the Port Authority to the settled. MR. GENE KBLTY: Thank you. MR. SZARPANSKI: Yes, sir, Your name. MR. JOSEPH FEMENIA: Joe Femenia, Community Board #7. Another part of that height issue was the birds, see guils. They usually surround Authority wither it's happening from there or not, we're just bringing another boiler plate statement. Make sure you look at it. Because maybe not your facility because it's enclosed, but the rest of the facility which is Roard #7 and partially Board #8 hecause they're keeping the recyclable trucks cover there. It's the same maybe not your facility because it's enclosed, but the rest of the facility which is Roard #7 and partially Board #8 hecause they're keeping the recyclable trucks over there. It's the same immediate area. So the birds are as to the birds are on the recyclable trucks over there. It's the same to your facility but in the immediate area. So we're asking you to make sure you was the birds area on the hirds are asking you to make sure you to he will be recyclable trucks over there. It's the same to your facility which is Roard #7 and partially Board #8 hecause they're keeping the recyclable trucks over there. It's the same of the middle area. So the birds are so the birds are so that the gibt issue Was LOSSPIT FEMENIA: Joe Femenia, you. MR. SZARPANSKI: Well, look, in the planes and followed our barges. The way this facility is designed the truck comes into the facility. No waste is seen by anybody. Waste goes into scaled containers and believe that	7	we're at agreement with that.	9	street. And the birds were a problem to the Port
bring you up to date on what happened there. The Port Authority initially objected to the height of the building. SUMMARY OF NORTH SHORE (NS) EJ INFORMATIONAL MEETING ISSUES and RESPONSES

ISSUE: Need to identify the final disposal site or sites, including where the barges will go, where the containers will be transferred, how the containers will move to the disposal sites and how the City will control all of these container movements and disposal. NS Transcript p. 16, line 2

RESPONSE: DSNY is still in negotiations with companies that responded to our Request for Proposals procurement solicitation. While we are in negotiations, we are not permitted to disclose proposal details, including the responses to your questions. One detail about container transfer has been made public, however. One of the locations at which containers are proposed to be off-loaded for barge or rail transport is New York Container Terminal on Staten Island.

ISSUE: How is the number of trucks coming to the facility per hour going to be limited and controlled to the proper number? NS Transcript p. 18, line 4

How is the City going to attract commercial waste to the facility and if vendors are not interested to come, is there a mechanism to compel vendors to use the facility? NS Transcript p. 18, line 11

RESPONSE: Some commercial waste will be attracted to the facility based on its proximity to where the commercial waste is generated. We don't know exactly how much will be attracted. Obviously, it will depend on what the cost to the carter is to come to the MTS versus the cost to go to other facilities. We have thought about mechanisms to induce commercial waste carters to come to this facility, but we haven't come to any conclusions yet. If we can't attract a sufficient amount, we may consider some inducement to maybe lower the price. In our negotiations with vendors, we are looking at an incremental price structure that will allow us to possibly charge commercial waste haulers an amount that is lower than our average cost as an inducement. I believe we will wait until after the facility is up and running to see if inducements are necessary and then we'll look at other methods to bring in commercial waste.

ISSUE: How are you going to control traffic (signal times), yours and the commercial traffic to try to even it out so that when the neighborhood is congested, your contribution to it is limited? NS Transcript p. 21, line 23

Do you plan to institute any controls other than the traffic light at the end of 31st and College Point Blvd.? NS Transcript p. 22, line 6

RESPONSE: Commercial waste will only be allowed to come to this facility between the hours of 8 pm and 8 am. This is when Department traffic is not high and when neighborhood traffic to stores is not going to be high either. We would anticipate that most commercial traffic would arrive after midnight, outside the peak traffic periods for the neighborhood.

As to traffic controls, we don't anticipate any problems that we can't mitigate through signal changes and turn lane operations because we can spread the arrival of the trucks over the shift. If there are problems, we will respond by controlling the dispatching of trucks.

ISSUE: Are you going to limit the dump tickets issued to so many tracks per hour or will 91 tracks all decide to come at 2 PM and cause so much noise that the neighborhood is up in arms? NS Transcript p. 24, line 17

What will you do if the commercial traffic exceeds the number of trucks you assumed per hour to stay within the noise analysis limits? NS Transcript p. 26, lines 16-20.

RESPONSE: We have to see how things work out. Commercial waste doesn't naturally all come in during the same hour because of collection practices. If we find that delivery is problematic, we will have to control how we sell the tickets and we can do that. It is correct that if we go beyond the nighttime noise threshold for the facility we will have to cut back on deliveries.

ISSUE: Given an increase in traffic since the issuance of the FEIS, don't we need a revised traffic analysis? Efforts must be made to consider if the mitigation proposed at various intersections (e.g. Linden Place) affected by the Converted MTS is still appropriate for the levels of service. We ask that you coordinate with other City agencies to look at the traffic problems here. NS Transcript p. 25, line 24, p. 26, line 4 and p. 27, line 14

RESPONSE: When doing the traffic study, we were asked by DOT to try and route trucks away from the Linden Place exit because of existing congestion. As a result, our traffic plans are for trucks to also exit south of College Point to access the facility coming north on College Point, thereby avoiding Linden Place. We will examine the facility traffic when the facility starts operating.

ISSUE: Are you able to contact your collection vehicles so that if it looks like there is a traffic problem you can slow down vehicle arrivals? NS Transcript p. 28, line 10

RESPONSE: If there is a traffic problem, we are able to communicate with our vehicles.

ISSUE: What percentage of vehicles will arrive after the day shift? The local community is concerned with truck traffic and we need to make sure that your plans can be modified to meet the needs of the community. NS Transcript, p. 28, line 16 and p. 29 lines 8 - 16

RESPONSE: Less than ten trucks per hour starting from 4 PM to midnight. That is a good point. We will re-examine the routing when the facility starts operating.

ISSUE: DSNY trucks from Community Board 11 are not using designated truck routes to access a number of DSNY facilities (salt dome, Boro Equipment, lot cleaning, etc.) in

Queens CB 7. Efforts must be made to enforce truck route use for the Converted MTS. The appropriate routes should be equipped with signs to indicate that they are the only acceptable access roads to the MTS. NS Transcript p, 30 – 32 and p, 35 –38

RESPONSE: Do you know if this has been brought to our Commissioner's attention? We will bring this up to the Commissioner's level. I am sure he will act on this. You will get immediate relief. Please come back to us again if the problem arises again.

ISSUE: Your traffic plan is going to have to take into account the new police unit that is going in across the street from 131st Street. P. 34, lines 5 - 16

RESPONSE: Typically from an environmental review perspective, a facility that comes after an EIS is done needs to account for the traffic from our proposed facility as part of its analysis. But from a practical perspective, I understand what you are saying.

ISSUE: The Council required that a community advisory group be established for each MTS facility and it will meet regularly about the concerns of the community. The community advisory group will be made up of appointees – 4 from the mayor, 3 from the borough president and 3 from the council member. So if a traffic issue comes up, the community advisory group can make the problem known to the elected officials and they will have input into this process from the very beginning.

RESPONSE: Thanks for making this point,

ISSUE: Is there still an FAA or Port Authority issue concerning the height of the proposed MTS? NS Transcript p.41, line 4

RESPONSE: The Port Authority initially objected to the height of the building. We had many discussions with them as to whether or not this was an obstacle or in any way interfered with airport operations. We agree with the Port Authority to reduce the building height by ten feet. The Port Authority withdrew their objections so that has been settled.

ISSUE: Another part of the height issue was the birds, sea gulls that surround this facility and are attracted to the planes landing. Did they come up with a decision based on the birds? NS Transcript, p. 42, line 2

RESPONSE: In the past, we used open hopper barges and the birds came and followed our barges. This facility is designed so that no waste is exposed to the atmosphere. Waste goes into containers that are scaled within the building. We do not believe this facility will attract birds at all. We don't see birds following our collection trucks. We will make sure that birds are not an issue when the facility opens.

To: M. Bimonte, First Deputy Commissioner

From: Henry Bluhardt, Deputy Director

Date: July 3, 2007

Subj.: DSNY Trucks Using Residential Streets - O7

The issue of DSNY Trucks using residential streets (i.e., 32 Ave & 28 Av.) to go to/from the DSNY Q7/11 Garage in Q7 was raised by several community residents and community board members several months ago at the Environmental Justice Informational meeting regarding the proposed conversion of the North Shore MTS conducted by the Bureau of Long Term Export. The issue was also raised by the Community Board 7 District Manager after the May 15, 2007 Queens Borough Cabinet meeting.

This matter was referred to Queens East Borough Chief Richard Beverly by you. Chief Thomas Albano, Executive Officer of Queens Fast Borough, reports that Chief Beverly had a message read at all roll calls in Sanitation Districts Q7 and Q11 reinforcing that trucks were only to use designated routes (LIE, Northern Blvd., College Point Blvd.) and were to avoid residential streets. District Supervisors were instructed to monitor the situation. The Q7 District Superintendent met with and advised Eugene Kelty, Chair, Community Board 7 of the steps taken.

Yesterday, I spoke with Marilyn Bitterman, District Manager of Community Board 7. She reported that her office typically receives regular reports from community residents and community board members, who live in that area, when DSNY trucks use residential streets. She was pleased to report that in the past two months no complaints have been received about DSNY trucks using residential streets to go to/from the DSNY facility in that area.

OUTSTANDING NORTH SHORE M'TS FAA ISSUE

BACKGROUND

- On September 18, 2006, the Federal Aviation Authority (FAA) issued a Determination of No Hazard to Air Navigation for the proposed North Shore MTS.
- On October 17, 2006, NYNJ Port Authority (Port Authority) representative Tom Bock filed a
 petition with the FAA requesting that the FAA review and reverse the Determination of No
 Hazard to Air Navigation issued for the proposed North Shore MTS.
- After discussions and negotiations, the Port Authority agreed to withdraw the petition submitted to the FAA after DSNY agreed to lower the height of the proposed North Shore MTS by 10 feet.
- Via a letter dated February 27, 2007, DSNY alerted the FAA of its agreement with the Port Authority, disclosed the revised height of the proposed structure and provided corrected coordinates for its location.
- Via a letter to the FAA dated February 28, 2007, Tom Bock withdrew the Port Authority petition filed on October 17, 2006.

ISSUE

- DSNY has heard that the FAA, despite the DSNY agreement with the Port Authority and the
 existence of a previously issued Determination of No Hazard, is still deciding whether or not
 to issue a Presumed Hazard or Hazard Determination for the proposed North Shore MTS.
- As best as DSNY can determine, the FAA may be looking to see if the MTS will be
 consistent with the installation of an instrument landing system. (Note installation of the
 instrument landing system has been discussed for many years, the system did not preclude
 the previous issuance of a Determination of No Hazard for the proposed North Shore MTS
 and many already existing structures would interfere with the system).
- FAA has assured DSNY that it will not issue a Determination on the North Shore MTS until
 all parties involved (DSNY, the FAA and the Port Authority) meet to discuss the issue. The
 meeting has yet to be scheduled.

DSNY Stakeholder Notice

The New York City Department of Sanitation (DSNY) has identified you as a stakeholder for the North Shore Converted Marine Transfer Station project proposed to be located at 31st Avenue and 122nd Street in the College Point section of Queens.

This postcard notifies you that on May 16, 2007, the New York State Department of Environmental Conservation published a Notice of Complete Application in connection with DSNY's application for a permit to construct and operate the North Share Converted Marine Transfer Station and issued a draft permit for the facility. A 30-day period was established for the receipt of comments on the project. The draft permit includes conditions for the following permits sought by DSNY:

- Article 27 Title 7 Solid Waste Management
 Article 25 Tidal Wetlands

Article 19 Air State Facility

• Section 401-Clean Water Act Water Quality Certification

All project documents, including the Notice of Complete Application and the draft permit can be found on the DSNY website at http://www.nyc.gov/html/dsny/html/reports/guides.shtml and at each of the two document repositories:

> Mitchell-Linden Library 29-42 Union Street, Flushing Farsana Mameni (718) 539-2330

Monday and Thursday 1 P.M. to 8 P.M., Tuesday 1 P.M. to 6 P.M., Wednesday and Friday 10 A.M. to 6 P.M.

Queens CB 7 Office 133-32 41st Road, Flushing Marilyn Bitterman

(718) 359-2800 Monday-Friday 9 A.M. to 5 P.M.

NOTE: All comments on the project must be submitted in writing to the following Contact Person no later than June 18, 2007:

Contact Person: John F Cryan, NYSDEC Region 2 Headquarters 47-40 21st Street, Long Island City, NY 11101 (718)482-4997
