Recycling Collection Service

GARBAGE handled by:

- ☒ DSNY
☐ Private Carter

PAPER recycling handled by:

- ☒ DSNY
☐ Private Carter

BEVERAGE CARTONS, BOTTLES, CANS, METAL & FOIL recycling handled by:

- ☒ DSNY
☐ Private Carter

Type of service (select all that apply)

- ☐ recyclable materials set out curbside
☒ paper dumpster
☐ garbage set out curbside
☒ garbage dumpster

Building Maintenance Service provided by:

☒ DCAS Custodial staff

- handles internal collection of:
 - ☒ trash
 - ☒ recycling
- handles outside setout of:
 - ☒ trash
 - ☒ recycling

☐ Vendor

- handles internal collection of:
 - ☐ trash
 - ☐ recycling
- handles outside setout of:
 - ☐ trash
 - ☐ recycling

AGENCY WASTE PREVENTION, REUSE & RECYCLING PLAN

Submit with Agency Site Information by June 30, annually.

RECYCLING (Cadman Plaza)

- **Mixed paper and cardboard** is disposed of throughout the facility in specific rectangular bins that are located in 28 locations on the main bullpen floor, in most offices, next to all copiers and printers, in the cafeteria and scattered in common areas throughout the building. It is then placed in a white EZ-Pack container along Adams St each night. The container is emptied by DSNY once per week.
- **Beverage cartons & drink boxes, plastic bottles & jugs, glass bottles & jars, metal, and foil** can be recycled in a tall blue recycling container in each kitchenette or cafeteria on the floor. It is also placed in the white EZ-Pack container along Adams St each night.
- The emptying of trash cans and setting out trash is performed by DCAS staff.
- Recycling signs are posted in the copier areas and kitchenettes of each floor describing what can be recycled and where.

RECYCLING (930 Flushing)

- **Mixed paper and cardboard** is disposed of throughout the office areas of the facility in blue rectangular bins. Under normal circumstances, this waste is put on the curb for regular pickup. On special occasions, we have filled up an EZ-Pack container with cardboard and requested a recycling truck to pick up the waste.
- **Beverage cartons & drink boxes, plastic bottles & jugs, glass bottles & jars, metal, and foil** can be recycled in a tall blue recycling container in the kitchenette in the mezzanine area. These bags are put on the curb for recycling pickup.

WASTE PREVENTION AND REUSE

- OEM has made environmental responsibility a priority in all aspects of our operations. In 2006, OEM became the first NYC agency to build a LEED – Silver headquarters. The agency began using fully electric vehicles back in 2002 and had six charging stations installed into the new facility.
- To reduce paper use, OEM encourages staff to only print documents when necessary. We have also set the printers to default to double-sided printing. All paper used at OEM is 30% post-consumer content.
- To meet green purchasing requirements, the agency follows the EPP procurement guidelines. We have also repeatedly offered to be a pilot location for the testing of green custodial products by our DCAS custodians. Finally, we have made strides toward becoming a non-toxic work place by eliminating the purchase of all toxic office supplies. This goal will be achieved as soon as we consume existing supplies of materials purchased in bulk in years past.
- OEM follows all Salvage policies implemented by the DCAS Office of Surplus Activities. We have even worked to develop environmentally responsible means of finding a final home to products for which DCAS issues a “Destroy Order.” The agency has a Waste Match account to list unwanted materials and a network of not for profit disaster response partners that we have urged to set up accounts as well.
- OEM has a Veolia account for the disposal of e-waste and other products and has been using it since the EPA Settlement. An annual budget for the disposal of e-waste has been set up.
- A Call-2-Recycle battery tube was set up in the main bull pen area and staff are encouraged to use it for the disposal of expired batteries whether they were in use at work or in their homes.
- Over the last year, the agency reduced the number of printers and copiers from 65 to 27. Additionally, over half of the remaining units are the new green copier produced by Xerox that uses non-toxic wax-based ink and has virtually no wasted materials and very limited packaging.

**Waste Prevention, Reuse, and Recycling Plan
for New York City Agencies and Institutions**

- An electronic purchase requisition system has been implemented that reduces the quantity of paper created by our internal procurement process.
- A quarterly “Green Activities” meeting is held with members from Facilities, MIS, Procurement and any other interested OEM staff.
