AIR QUALITY AND TEMPERATURE MONITORING SOLUTIONS FOR CLASSROOMS - Request for Information - PIN# I1851040 - Due 6-30-25 at 3:00 P.M.

RFI202505-02

A. Introduction

The New York City Department of Education ("NYC DOE") serves approximately 1,800 schools and 200 central offices across New York City. In alignment with state laws and to support the health and safety of our students and staff, NYC DOE is seeking to partner with qualified vendors to provide comprehensive solutions for measuring and monitoring air quality and temperature in classrooms. We're seeking a connected system that helps schools ensure that they are in compliance with relevant regulations and remain in compliance over time, including adherence to recent state temperature guidelines outlined in the New York State Assembly Bill A9011A, and security protocols such as the Enterprise Request Management Application (ERMA) standards. Our goal is to maintain optimal indoor air quality and temperature in classrooms across the NYC public school system, ensuring a healthy, safe, and conducive learning environment for all.

B. Background

Providing comfortable and healthy learning environments is a key priority for the NYC DOE. In alignment with this goal, the "AC for All" initiative was introduced to improve classroom temperature control by installing air conditioning units. However, despite the initiative's success, 17% of classrooms remain without functional AC due to factors such as non-repairable units, classrooms without windows, or classrooms converted from other spaces. Additionally, classroom air quality monitoring is an essential aspect of ensuring optimal learning conditions.

C. Objective

The objective of this RFI is to gather information on air quality and temperature monitoring solutions that can be implemented across

NYC public schools. This initiative seeks to address the following key priorities:

- a. Ensure indoor air quality and temperature remain within optimal and healthy ranges.
- b. Provide actionable data to facilities staff to proactively manage classroom environments.
- c. Compliance with State Law - as per New York State Assembly Bill A9011A; <https://www.nysenate.gov/legislation/bills/2023/A9011/amendment/A>, occupiable educational and support service spaces must maintain a temperature below 88°F. Custodial engineers are equipped to monitor air quality and temperature levels, and school principals are expected to coordinate with facilities staff to relocate students to properly cooled spaces when necessary.

D. Scope of Information Requested

Vendors are invited to submit detailed information on the following aspects of their proposed solutions:

a. Air Quality Monitoring Solutions

i. Pollutants Monitored – Please describe the types of pollutants your system measures, including but not limited to indoor and outdoor air quality indicators such as CO₂, VOCs, PM_{2.5}, PM₁₀, ozone (O₃), nitrogen dioxide (NO₂), and other common airborne pollutants. Solutions that include outdoor IAC (Indoor Air Quality) monitoring units to assess external environmental conditions are preferred.

ii. Measurement Accuracy and Frequency – Provide details on the accuracy specifications of each monitored pollutant and how frequently the measurements are recorded for both indoor and outdoor environments.

iii. Data Logging and Reporting – Explain the system's data logging capabilities, including how data is stored, retained, and exported. Highlight any reporting features, such as automated reports, threshold alerts, or regulatory compliance summaries. Data from both indoor and outdoor units should be clearly distinguished and available for historical review.

iv. Integration with HVAC Systems – Describe how your monitoring solution integrates with existing HVAC systems, including the ability to trigger ventilation adjustments based on indoor and/or outdoor air quality readings.

v. Outdoor Monitoring Capability – Include details on the specifications and weather resistance of outdoor IAC monitoring units. Clearly state how outdoor air quality data is collected, transmitted, and visualized alongside indoor data.

vi. Maintenance and Calibration – Outline the ongoing maintenance and calibration requirements for both indoor and outdoor monitoring devices, including intervals and whether remote diagnostics or automatic calibration features are available.

vii. Dashboard – Describe the centralized dashboard used for tracking building air quality data. Must support real-time monitoring, trend analysis, and alerting for both indoor and outdoor readings.

viii. Platform – Specify the available platforms for accessing the system (e.g., desktop software, web-based portal, mobile app, or all). Systems offering cross-platform access and user role management are preferred.

b. Temperature Monitoring Solutions

i. Measurement Accuracy and Frequency – Provide details on the accuracy of temperature readings and the frequency at which measurements are recorded. Include any specifications related to sensor range, sensitivity, and environmental tolerances.

ii. Data Logging and Reporting – Explain the data logging capabilities, including storage duration, export options (e.g., CSV, API), and automated reporting features. Systems should support historical data analysis and customizable alert thresholds.

iii. Integration with HVAC Systems – Describe how the temperature monitoring solution integrates with existing HVAC systems. Specify compatibility with the Niagara platform, which is the current graphical user interface in use. Highlight capabilities for real-time feedback, automated adjustments, and interoperability with other building systems.

iv. Maintenance and Calibration – Outline the maintenance and calibration requirements for temperature monitoring devices, including recommended intervals, procedures, and whether any tools or third-party services are required.

v. Dashboard – Detail the dashboard capabilities for real-time temperature tracking, historical trend analysis, and automated alerts.

The dashboard should support both granular and portfolio-level visibility across multiple buildings, with clear indicators for thresholds and anomalies.

vi. Platform – Indicate all platforms supported (e.g., desktop software, web-based interface, mobile app). Solutions offering seamless, multiplatform access with user role-based permissions are preferred.

c. Installation and Implementation

i. Process and Timeline – Provide a detailed installation process and timeline for the solution deployment across schools.

ii. Required Infrastructure – Identify the infrastructure and resources required for installation. Preferred hardware devices with BACnet MS/TP or BACnet over IP.

iii. Training and Support – Detail the training and support services for

DOE staff during the installation and operational phases.

E. Cost Estimates

a. Initial Setup Costs – Provide an estimate of the initial setup and installation costs.

b. Ongoing Maintenance and Operational Costs – Outline the ongoing maintenance and operational costs.

c. License – Pricing for maintaining superscription for dashboard.

F. Submission Requirements

Interested vendors should submit the following:

a. Company Profile – A brief overview of the company, including relevant experience in providing similar solutions, particularly within educational or public sector environments.

b. Proposed Solutions – Provide a detailed description of the air quality and temperature monitoring solutions being proposed, including technical specifications, features, and capabilities. Proposals must also address cybersecurity standards, including:

c. Data Security Protocols – Describe how data is encrypted in transit and at rest. Include details on authentication methods, access controls, and data integrity safeguards.

d. System Architecture – Indicate whether the system uses a cloud-based, on premises, or hybrid model, and explain how data is protected across that architecture.

e. Compliance – Identify alignment with relevant cybersecurity standards (e.g., NIST, ISO 27001, SOC 2), especially for solutions involving cloud-based storage or remote access.

f. User Access & Permissions – Describe how user roles and permissions are managed to limit access to sensitive data and system controls.

g. Patch Management & Vulnerability Response – Outline how software updates, patches, and threat responses are handled. Indicate the process for resolving vulnerabilities.

h. Audit Logging – Explain whether the system provides detailed audit trails for user activity and system events, including access logs and data modification history.

i. Case Studies/References – At least two case studies or references from similar projects where your solution was successfully implemented.

j. Cost Estimates – A detailed cost breakdown, including initial setup and ongoing operational costs.

k. Additional Information – Any other relevant information that would assist the NYC DOE in evaluating the proposal.

G. Submission Instructions

a. All responses must be submitted in PDF format using the online submission form: <https://app.smartsheet.com/b/form/0196efcb72b87be4b457856661aba512>

b. Submissions must include:

DEVELOPMENT OF A BUILDING MANAGEMENT PLATFORM FOR INTERNAL AND EXTERNAL SPACE USE - Request for Information - PIN# I1850040 - Due 6-30-25 at 3:00 P.M.

REQUEST FOR EXPRESSIONS OF INTEREST (RFEI) - RFEI No. 202505-01

The New York City Public Schools (NYCPS) system encompasses approximately 1,800 schools and 200 central offices citywide. In alignment with applicable New York State laws, NYCPS is seeking expressions of interest from qualified vendors to design, implement, and support a new digital platform to manage and track facility use requests from both internal stakeholders and external organizations. The new platform will replace the current building permit module within the Custodial Payroll System (CPS) and streamline the scheduling, approval, and fee management process for extended use of school buildings.

Project Overview

NYCPS is exploring vendor solutions for a centralized building management system that will enable users to request space, manage associated permits and fees, and generate reports on facility utilization and financials. The selected solution will replace the existing extended use module in CPS and must meet operational, technical, and regulatory needs across all NYCPS facilities.

Scope of Work

The proposed platform should include, but is not limited to, the following core features:

- User Profile Management - Enable organizations to create and manage user profiles, upload required documents, and receive automated prompts based on permit type.

- Application Vetting and Compliance - Automatically flag organizations with outstanding balances, unresolved issues, or prior violations; support full digital application intake and tracking.
- Space Scheduling & Utilization - Provide real-time, interactive calendars and dashboards to manage space requests and usage across school sites.
- School-Level Approval Workflow - Empower school personnel to manage approvals, view conflict alerts, and maintain oversight of holiday or non-school day scheduling.
- Business Rule Automation - Incorporate document validation, automated workflows, compliance checkpoints, and financial tracking aligned with Chancellor's Regulation D-180.
- User Experience Enhancements - Include intuitive navigation, search/filter functions, customized permissions, and restrictions on short-notice requests.
- Advanced System Features - Offer built-in reporting tools, audit trails, status notifications, comment threads, and cost estimation tools.

Technical Requirements

The New York City (the "City") Department of Transportation ("DOT" or the "Department") is in the process of establishing a Minority and Women-Owned Business Enterprises (M/WBE) only pre-qualified list ("PQL") of engineering firms to provide Bridge Resident Engineering Inspection (REI) Services.

Please note that the selected prime consultant on future RFP solicitations will not be allowed to subcontract more than 30% of the total contract hours.

Please note that the Division of Bridges Request for Qualifications (RFQ) for Resident Engineering and Inspection (REI) Services has been revised. The minimum requirements have been updated by omitting item I in section XIX of the RFQ.

The revised RFQ is available on the NYC DOT webpage <https://www.nyc.gov/html/dot/html/about/doing-business.shtml#mwbebridges> under the M/WBE Pre-Qualified List for Bridge Projects section.

Notice of Proposed Amendment of Rules related to the implementation of a reimbursement program for qualifying nonpublic schools that procure certain security services.

NOTICE IS HEREBY GIVEN PURSUANT TO THE AUTHORITY VESTED IN the Commissioner of The Department of Citywide Administrative Services by Section 811 of the New York City Charter and sections 10-172(c) and 10-172(m) of the Administrative Code of the City of New York and in accordance with the requirements of Section 1043 of the New York City Charter, that the Department of Citywide Administrative Services hereby amends chapter 14 to title 55 of the Rules of the City of New York.

Statement of Basis and Purpose of Proposed Amendment to The Rules

On January 5, 2016, Local Law 2 of 2016 (“the Law”) was enacted. The Law empowers the Mayor of the City of New York (“the Mayor”) to authorize a program that will reimburse qualifying nonpublic schools for the cost of purchasing certain security services. In a letter dated March 30, 2016, the Mayor authorized this reimbursement program for the 2016-17 school year. The Law also authorizes the Mayor to designate an agency or agencies to administer the reimbursement program. In a letter dated March 10, 2016, the Mayor designated the Department of Citywide Administrative Services (“DCAS”) to administer the Law. Finally, the Law authorizes DCAS to promulgate rules for the administration of the reimbursement program. DCAS is now amending these rules in order to reflect changes in the city’s processing platforms and update per the amendments in Local Law 4 of 2025 to Local Law 2 of 2016.

The amendment to the rules:

- Adds definitions for Invoice Submission Portal, PASSPort, Qualifying Nonpublic School, and Reimbursement Period, deletes the definition for HHS Accelerator, and updates the definition for School Security Administrator;
- Replaces all references to HHS Accelerator;
- Adds HHS Accelerator Prequalification as a required step in PASSPort;
- Changes the student enrollment requirement from 300 to 150 students to increase the number of schools eligible for reimbursement;
- Changes the application requirement for schools to submit the prior year’s Basic Educational Data System (BEDS) or Student Information Repository System (SIRS) reports for the current school year;
- Allows a School with multiple locations under one BEDS Code to station a Security Guard in any of those locations that satisfies the minimum student enrollment requirements;
- Adds a required document to the application; and
- Removes the requirement for submission of the Budget Task

The proposed rule also includes some minor plain language edits.

DCAS’s authority for these rules is found in sections 811 and 1043 of the New York City Charter and subdivisions (c) and (m) of section 10-172 of the Administrative Code of the City of New York.

New text is underlined.

Deleted text is [bracketed].

“Shall” and “must” denote mandatory requirements and may be used interchangeably in the rules of this department unless otherwise specified or unless the context clearly indicates otherwise.

SMALL BUSINESS SERVICES

■ NOTICE

Notice of Adoption of Rule

Pursuant to the authority vested in the New York City Department of Small Business Services ("DSBS") in accordance with sections 1043 and 1301 of the New York City Charter, DSBS is adopting a new chapter 19 of title 66 of the Rules of the City of New York to implement Gowanus Business Relocation Grant Program.

DSBS published a proposed version of this rule in the City Record on October 15, 2024. DSBS held a public hearing for the proposed rule on November 19, 2024. Testimony was provided at the hearing, and two written comments were received. The comments and testimony advocated for expanding eligibility for the Program to businesses with uses that conform to the rezoning and those in adjacent areas to the rezoning. When creating the eligibility criteria for the Program, DSBS relied on the Gowanus Points of Agreement ("POA"), dated November 10, 2021, directing DSBS to create a grant program to assist businesses "directly displaced" by the rezoning. DSBS also drew on its experience with prior neighborhood relocation grant programs for "directly displaced" businesses where eligibility was limited to businesses with non-conforming uses following the rezoning. Therefore, after reviewing and considering the thoughtful testimony and comments, DSBS determined to adopt the rule without making any changes to the proposed rule, and it now adopts such rule as indicated below.

Statement of Basis and Purpose

The Gowanus Business Relocation Grant Program ("Program") will help small businesses that were directly displaced by the City's rezoning of the Gowanus area in Brooklyn. See (ULURP number(s) N210178ZRK and C210177ZMK), adopted November 23, 2021 ("Gowanus Neighborhood Plan") and in accordance with the POA. The Gowanus Neighborhood Plan rezones the neighborhood by, among other things, expanding housing opportunities, particularly for low- to moderate-income residents in a relatively high-income neighborhood with good access to jobs, parks, and schools.

The purpose of the Program is to encourage retention of jobs within the City by providing grants to offset moving costs for small businesses that suffered business losses because of the rezoning and are relocating from designated sites under the Gowanus Neighborhood Plan to eligible move-in sites in the City. The rule includes an appendix indicating how each block and lot is affected by the rezoning to allow business owners to determine if their business is no longer permitted in the rezoned area.

The rule will set forth the application requirements, criteria and standards to determine eligibility, and the process for an Applicant to apply for a grant. Grants will not exceed \$50,000 and are dependent on available funding.

New material is underlined.
[Deleted material is in brackets.]

"Shall" and "must" denote mandatory requirements and may be used interchangeably in the rules of this department, unless otherwise specified or unless the context clearly indicates otherwise.

2. Look for the corresponding Block and Lot below in Chart A.
3. If the BBL is on Chart A, the property is affected by the Gowanus Neighborhood Plan. Then, look across the row that is labeled as "New Zoning District as of November 23, 2021" to identify the property's New Zoning District.
4. Next, to identify if the business use on the property is permitted in its New Zoning District, go to: <https://zr.planning.nyc.gov/appendix-index-uses>. This site lists the different types of uses or business activity permitted in BBL within the New Zoning District and the districts in which the use is permitted.

5. Find the use for the business on the property and identify if the use is permitted in its New Zoning District.
6. If the business' use is **not permitted** in its New Zoning District the Applicant may be eligible for a grant.

Further information about zoning is available from the Department of City Planning Zoning Help Desk: 212-720-3291. Further information about eligibility for the grant is available from DSBS.
