PROCEEDINGS OF THE PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT.

MONDAY, DECEMBER 23, 1907.

TRIBUNE BUILDING, 154 NASSAU STREET,
BOROUGH OF MANHATTAN, CITY OF NEW YORK.

Present—Chairman William R. Willcox, Commissioners William McCarroll, Edward M. Bassett, Milo R. Maltbie, John E. Eustis.

The Secretary presented a communication from the Secretary of the Public Service Commission for the Second District, stating that it had been decided, at a joint meeting of the two Commissions in Albany on December 18, to hold a public hearing at the rooms of the Commission for the First District in the matter of the complaint of the City of Yonkers as to vestibules on street railroads in Westchester County. The communication was ordered filed.

The Secretary presented the following communication from the Counsel to the Commission, which was ordered filed:

December 19, 1907.

TRAVIS H. WHITNEY, Esq., Secretary, Public Service Commission for the First District:

DEAR SIR—I transmit herewith two duplicate originals of the agreement dated 12th December, 1907, between the City, by the Commission, and John B. McDonald and Interborough Rapid Transit Company, modifying the provisions of the contract of 21st February, 1900, in respect to the arbitration provisions.

I think it proper that one of these duplicates be sent, in accordance with the usual custom, to the Comptroller of the City for his files.

Yours very truly,
(Signed) ABEL E. BLACKMAR,
Counsel to the Commission.

Commissioner Eustis presented the following report in regard to the inspection work in connection with subway construction, which was ordered filed:

In the matter of the application of Hildreth & Company, of August 22nd, to do the inspection work of this department in connection with subway construction, and which was referred to me for investigation, I beg to report:

That, after receiving the communication of Hildreth & Company in August last, I had two or three interviews with one of their men, but he was not able to make any definite estimate or statement as to what they would do, so the matter was deferred until Mr. Hildreth himself returned to the city.

During this time I obtained from George S. Rice, the chief engineer of this Commission at that time, a written report in which he strongly recommended continuing the present system of doing our inspection, and asserted that inspection could not be done by an outside concern for any less cost to the city than the present method afforded.

Early in this month, after an interview with Mr. Hildreth personally, I received a long statement as to his ability to make this inspection and as to the cost, which was based as to iron inspection at fifty cents per ton for each inspection, and a sliding scale for inspection of cement, varying according to the quantities inspected during the year.

Your Committee had also had a talk with Henry B. Seaman, our present chief engineer, and has asked for his opinion, and the result of such interview with Mr. Seaman and his report, which in substance is that he thinks we can do our own as thoroughly if not better than an outsider and at less cost.

I beg, therefore, to report that, in my opinion, we should continue the inspection of the material for a time at least with our own inspectors as heretofore. I submit herewith the various communications and papers referring to this subject.

The Secretary presented a communication, dated December 20, 1907, from Alfred A. Gardner, General Solicitor, requesting an extension of time until December 30, 1907, for the preparation of answers to Order No. 136 of the Commission, which had been served on various companies of which he was the legal representative. On motion, duly seconded, it was thereupon

Resolved, That the request of Alfred A. Gardner, General Solicitor, for an extension of time until December 30, 1907, to prepare answers to Order No. 136 for various companies on which it had been served, and which he was representing, be granted.

Ayes—Commissioners Willcox, McCarroll, Bassett, Maltbie, Eustis.
Nays—None.

HUDSON AND MANHATTAN RAILROAD COMPANY—EXTENSION OF TIME.

Commissioner Bassett, to whom the matter of the extension of time to the Hudson and Manhattan Railroad Company had been referred by the Committee of the Whole, presented the following matter and papers:

HUDSON AND MANHATTAN RAILROAD COMPANY,
111 BROADWAY,
NEW YORK, December 17, 1907.

Public Service Commission, 1st District, 154 Nassau Street, New York City:

GENTLEMEN—This Company is the successor, by consolidation, to all the rights of the New York and Jersey Railroad Company.

The Board of Rapid Transit Railroad Commissioners granted to said Company on the 10th day of July, 1902, the right to construct tunnels from the centre of the Hudson River to the corner of Christopher and Greenwich Streets. This line is indicated in red on the map hereto attached.

On the 4th day of October, 1906, the Board of Rapid Transit Railroad Commissioners, by resolution, extended to January 7, 1908, the time within which the said line of the New York and Jersey Railroad should be completed and operated. This company is, therefore, under obligation to operate said line from the centre of the Hudson River to Christopher and Greenwich Streets on or before the 7th of January, 1908.

The Board of Rapid Transit Railroad Commissioners, on the 2nd of February, 1905, granted to the New York and Jersey Railroad Company the right to extend this line from the intersection of Greenwich and Christopher Streets to Sixth Avenue and 33rd Street, and from Sixth Avenue and 9th Street to Fourth Avenue and 9th Street. The time for the completion of this line expires on the 15th of June, 1910.

The green lines on the map, extending from Hoboken, N. J., to the centre of the Hudson River, indicate that portion of the tunnel lines in New Jersey now completed. The green line on the map, extending from Christopher and Greenwich Streets to 14th Street and Sixth Avenue, indicates that portion of the so-called Sixth Avenue extension which is now practically completed.

We are prepared to operate, as required by the franchise of the New York and Jersey Railroad Company, on or before the 7th day of January, 1908 that portion of

the line extending from the centre of the Hudson River to Christopher and Greenwich Streets, but we do not believe that such operation would be of advantage to the public. If the time for such operation be extended to the 7th day of March, 1908, we shall be prepared to operate a through line from Hoboken to 14th Street and Sixth Avenue. We believe that the interests of the public will be better conserved by an extension of the time for sixty days, enabling us to begin operation between Hoboken and 14th Street, rather than to begin to operate from the centre of the River to Greenwich and Christopher Streets on or before the 7th of January, 1908.

In this connection, we beg to assure you that at all times the work has been prosecuted in good faith and with all possible diligence. The completion has been delayed by unexpected obstacles and natural causes beyond our control. We feel that the interests of all concerned will be conserved by this short extension of time for operation. We therefore respectfully request your honorable body to extend the time for the completion and operation of such line from the 7th of January, 1908 to the 7th of March, 1908.

Very respectfully,
HUDSON AND MANHATTAN RAILROAD COMPANY,
By W. G. McAdoo, President.

23d December, 1907.

The Honorable EDWARD M. BASSETT, Commissioner, Public Service Commission for the First District:

DEAR SIR:—In response to your inquiry,—so far as this department is concerned, there appears to be no reason why the time for opening the McAdoo Tunnel should not be extended from January 7, 1908 to March 7, 1908, as proposed.

Very truly yours,
(Signed) HENRY B. SEAMAN, Chief Engineer.

December 20th, 1907.

Public Service Commission for the First District:

DEAR SIR:—I have examined the application of the Hudson and Manhattan Railroad Company of the 17th inst., for an extension of time to complete the construction and begin the operation of its railroad, extending from the centre line of the Hudson River to Christopher and Greenwich Streets, under the certificate granted by the Rapid Transit Board to the New York and Jersey Railroad Company on 10th July, 1902, and see no objection of a legal nature to such extension being granted.

In response to the Secretary's request, I therefore transmit herewith a form of resolution extending the time of the company to commence operation from January 7th, 1908, to March 7th, 1908, which, if the Commission so desires, may be adopted.

Yours very truly,
(Signed) ABEL E. BLACKMAR,
Counsel to the Commission.

The resolution mentioned in the Counsel's letter was as follows:

Whereas, Under the certificate heretofore and on or about the 10th day of July, 1902, granted to the New York and Jersey Railroad Company by the Board of Rapid Transit Railroad Commissioners for the City of New York, and an extension of time granted by said Board of Rapid Transit Railroad Commissioners on or about the 4th day of October, 1906, the said New York and Jersey Railroad Company is required to complete the construction of its railroad authorized by such certificate and will begin the operation thereof on or before the 7th day of January, 1908, said railroad extending from the centre line of the Hudson River between the States of New York and New Jersey to the bulkhead nearly opposite Morton Street, in the Borough of Manhattan, City, County and State, of New York, and thence across West Street, and thence from Morton Street to Greenwich Street, and thence northwardly under Greenwich Street to Christopher Street, all in the said Borough of Manhattan; and

Whereas, A further certificate bearing date the 2nd day of February, 1905, and permitting an extension of the line of the said railroad company under certain streets in the Borough of Manhattan to a terminus at or near the intersection of 6th Avenue and West 33rd Street, in the said Borough of Manhattan, was executed and delivered by the said Board of Rapid Transit Railroad Commissioners; and

Whereas, The Hudson and Manhattan Railroad, as the successor to the New York and Jersey Railroad Company, has advised the Commission that it is prepared to operate the portion of its line extending from the centre line of the Hudson River to Christopher and Greenwich Streets on or before the time fixed for beginning such operation, to wit, the 7th day of January, 1908, and that it will be prepared to operate the portion of the extension of its line to 6th Avenue and West 14th Street on or before the 7th day of March, 1908, and requested the Commission to grant a further extension of time within which to begin the operation of the first named portion of its line until the 7th day of March, 1908, in order that when such operation is begun trains can be operated from West 14th Street and 6th Avenue instead of Greenwich and Christopher Streets; and

Whereas, The Commission deems it reasonable and proper that such extension be granted;

It is therefore

Resolved, That the time for the beginning of the operation of the portion of the route of the railroad company extending from the centre of the Hudson River to the corner of Christopher and Greenwich Streets, Borough of Manhattan, be and the same hereby is extended to and including the 7th day of March, 1908.

It was thereupon moved and duly seconded that the foregoing resolution be adopted by the Commission.

Ayes—Commissioners Willcox, McCarroll, Bassett, Maltbie, Eustis.
Nays—None.
Carried.

The matter was referred to Commissioner Bassett.

O-143

The Secretary presented a communication, dated December 20, 1907, from the Coney Island and Brooklyn Railroad Company, answering Order No. 143, in the matter of the complaint of Robert E. reasons for making these suggestions. The matter was referred to Commissioner Eustis.

The Secretary presented a communication from the Counsel to the Commission in the matter of the claim made by the Raymond Concrete Pile Company that the method used in constructing piles under the Battery tunnel was an infringement of their patent. The Counsel stated in his letter that the work on these piles had been done by the contractor on his own initiative at his own expense and without the approval of the City, and that the City could hardly therefore be held responsible for any such infringement. The Counsel further suggested that it would be advisable to send a copy of the letter of the claimant's attorneys in the matter to the contractor, the Rapid Transit Subway Construction Company, and on motion, duly seconded, the Secretary was directed to send the following letter:

December 1, 1907.

BROOKLYN BRIDGE—ELEVATED TRAINS, OPERATION IN RUSH HOURS.

O-168

The Secretary presented the following report of Commissioner Bassett with regard to the operation of elevated trains across the Brooklyn Bridge during rush hours:

The undersigned has held a number of hearings in accordance with Order No. 80 made upon the complaint of Robert E. Anthony against the Brooklyn Heights Railroad Company touching the operation of elevated trains across the Brooklyn Bridge in rush hours. The evidence shows that the system of changing from through trains to bridge trains and back again is very nearly perfect, and that when it operates without accidents the public are carried about as rapidly and conveniently as the circumstances of an over-crowded structure will permit. Break-downs have been too frequent due to poor equipment on the bridge cars. These cars are owned by the city and operated by the Brooklyn Union Elevated Railroad Company. As their use is soon to be discontinued they have not been kept in perfect condition with the result that draw-bars pull out and other accidents frequently happen. This Commission has issued orders in these respects which have been complied with. On the recommendation of our experts minor changes have been made during the rush hours that have resulted in an improvement. These have to do with the prompt starting of trains, better policing, more intelligent management of the crowds and the lessening of intervals between trains while changing from the bridge local cars to the through service. On the whole the investigation based upon this order has been beneficial, but it is impossible or unjust to direct the specific fulfillment of any of the items of the complainant's complaint. On this account I recommend that the complaint be dismissed.

FINAL ORDER (No. 168).

Thereupon, on motion made and duly seconded, a Final Order (No. 168) was adopted, dismissing complaint of Robert E. Anthony against the Brooklyn Union Elevated Railroad Company, in the matter of service on Brooklyn Bridge.

O-171

NEW YORK CITY RAILWAY CO.—SERVICE ON EIGHTH AVENUE LINE.

The Secretary presented the following report and order of Commissioner Maltbie, relative to the improvement of service on the "Eighth Avenue Line":

Upon November 27th the Commission adopted an order directing that an inquiry be held upon December 11th, to determine the adequacy of the service and equipment of the New York City Railway Company upon the line currently called the "Eighth Avenue Line." The Company being in the hands of a receiver, a notice of the hearing was served upon Mr. Adrian H. Joline and Mr. Douglas Robinson, receivers for the Company, appointed by Judge Lacombe of the United States Circuit Court, as well as upon the Secretary of the New York City Railway Company. The receipt of this notice was duly acknowledged by the receivers and by the Secretary of the Company.

Upon December 11th the hearing was held and evidence taken, but no one representing the Company, or the receivers, appeared or offered to present any evidence to show that it would not be just, reasonable, proper and adequate to direct that the service of said New York City Railway Company, and the receivers of said Company aforesaid, be increased and supplemented at the points and times and in the particulars prescribed in the order for the hearing.

The "Eighth Avenue Line" has two northern terminals—one at Eighth Avenue and 159th Street, the other at McComb's Lane and 154th Street. From these two terminals the line runs south along McComb's Lane, Eighth Avenue and Central Park West to about 12th Street; thence down Hudson Street to Canal Street; through Canal Street to West Broadway; down West Broadway, Greenwich, Fulton, Church, Trinity Place, Battery Place and State Street to South Ferry. The cars going north run through Whitehall Street and Battery Place to Greenwich Street, and from thence follow the route just given, except that they go through Barclay Street from West Broadway to Church Street, instead of through Fulton Street. There is also a short branch of line extending from Greenwich Street, through Dey Street, Washington Street and Cortlandt Street to the Cortlandt Street Ferry, returning through Cortlandt Street to Greenwich Street. Ordinarily, all of the cars used upon this line pass over the section between 13th and 19th Streets, but occasionally a few are switched back at 117th Street and 50th Street.

No cars from other lines run over the tracks used by the Eighth Avenue cars north of Canal Street. The section on Canal Street is used by certain cross-town cars. The portion between Canal Street and Battery Place is used by the Sixth and Amsterdam Avenue cars, and a short section at the Battery is used as well by certain cars going down Broadway.

The only section of this line which is congested by vehicular and street car traffic is that on West Broadway, between Canal Street and Cortlandt Street; but as the present service is adequate upon this section of the route, and as it is not proposed to recommend that more cars be run below 13th Street, the fact of congestion upon West Broadway does not interfere with the proposed increase of service above 13th Street. In other words, there is no congestion of traffic upon any portion of the line which will interfere with the execution of the order recommended in this report (See pages 15-17 of Evidence).

The evidence taken at the hearing was given by Mr. M. H. Ryan of the Engineering staff of the Commission, who had made a careful and thorough investigation of the service and equipment of the line. The observations taken covered ten days in November and December, and were made by Mr. Ryan and seventeen assistants, all employees of the Commission. The Counsel also presented as a part of the evidence certain information prepared by Mr. Oren Root, General Manager under the receivers, at my request.

Summarizing the evidence presented, the following facts clearly appear (See especially Exhibits 2-5):

- (1) The service upon the portion of the line south of 13th Street is adequate.
- (2) During the hours between midnight and six in the morning, the operating schedule of the Company calls for a 20-minute headway most of the time. Although this schedule has been sufficient to give every passenger a seat, in my opinion such a service is not adequate for the district above 13th Street. Persons ought not to be required to wait 20 minutes upon a street corner, especially during the winter, for a car to take them home. If there were stations or some sort of structures to protect persons from the inclemency of the weather, it might be inadvisable to require more cars to be run, but in view of the present circumstances, I have recommended that at least six cars an hour be run, reducing the headway from 20 to 10 minutes, above 13th Street. Below 13th Street the district is almost wholly a business district and the traffic is so very light during the night that it does not seem reasonable to require an increased service even though the present schedule calls for a 20-minute headway.
- (3) Upon Sundays the service north of 13th Street is more or less inadequate from 10 A. M. to 11 P. M., and there seems to be no reason, except in occasional instances which cannot be foreseen, why a sufficient number of cars should not be run to provide seats for all passengers.
- (4) The south-bound service upon week days is inadequate during the morning rush hours and in the early part of the evening, when persons are going to the theatres or making social calls. The order recommended for adoption calls for certain reasonable increases in the number of cars run between 7 and 10 A. M. and between 6:30 and 8:30 P. M.
- (5) The north-bound service is inadequate between 4:30 and 6:30 P. M.—the evening rush hours—and between 10:30 and 11:30 P. M. when persons are returning from the theatres. The increased service required in the order is not large in either of these cases, but will be sufficient to reduce the number of passengers standing to an inconsiderable amount.

The order submitted herewith for adoption differs somewhat from the order upon which the hearing was held, but in each case the increases in service called for in the order submitted herewith, are less than those in the order for the hearing. It would be unwise to require unnecessary increases in the service and in my opinion the increases now recommended will be sufficient, provided the Company carefully distributes the additional number of cars required so as to provide the additional facilities at the times when most needed. However, if the increases recommended shall prove not to be sufficient, another order may be issued at any time.

FINAL ORDER (No. 171).

On motion made and duly seconded, a Final Order (No. 171) was adopted, directing that the service of the New York City Railway Company and of Douglas Robinson and of Adrian H. Joline, Receivers of the New York City Railway Company, on its Eighth Avenue line, be supplemented and changed as follows:

- (1) By running south from 149th Street daily except Sundays cars as follows:
Between 7 A. M. and 10 A. M. not less than one hundred and ten (110) cars to run at least as far south as 13th Street.
Between 6:30 P. M. and 8:30 P. M. not less than seventy (70) cars, to run at least as far south as 13th Street.
- (2) By running north from 13th Street, daily except on Sunday, cars as follows:
Between 4:30 P. M. and 6:30 P. M. not less than one hundred and thirty (130) cars, to run at least as far north as 149th Street.
Between 10 P. M. and 11:30 P. M. not less than fifty (50) cars, to run at least as far north as 149th Street.
- (3) By running on Sundays, south from 149th Street, cars as follows:
Between 10 A. M. and 11:30 P. M. not less than six hundred (600) cars to run at least as far south as 13th Street.

C-175

(4) By running not less than six (6) cars in each hour of the night and morning, daily and Sundays, from 13th Street north to 140th Street, and from 140th Street south at least to 13th Street, the cars to be as evenly distributed as possible, in each hour.

Pursuant to a resolution of the Public Service Commission for the First District adopted on August 3rd, 1908, the sale of the above described buildings will be held by the said Commission on September 1, 1908, at 10:30 o'clock A. M., in the premises, upon the following terms and conditions:

The buildings and appurtenances thereto will be sold to the highest bidder, who must pay immediately cash or a certified check drawn to the order of the Comptroller of the City of New York, and must also, at the time of the sale, give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of Fifty Dollars the sum of fifty dollars shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City of New York to the cost of completing any other work required under the contract, but unfinished at the expiration of the contract period.

All the materials of the buildings, sheds, walks, structures and cellars of whatsoever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the sidewalk and curb in front of said buildings extending within the described area and down to the level of the cellar bottom, shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises except old mortar or plaster only which may be left, but not higher at any point than two feet below the curb opposite that point; also the foundation walls of all classes shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed; but this provision shall not apply where portions only of buildings are removed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street, and the opening of the main sewer in street shall be properly closed in compliance with the direction of the Bureau of Sewers, Borough of Manhattan, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed; but this provision shall not apply where portions only of buildings are removed.

The permits for all openings in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances, or any portion thereof within sixty days from the day of the sale, will work forfeiture of ownership of such buildings, appurtenances or portion as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidders' assent to the above conditions being understood to be implied by the act of bidding, and the City of New York will, without notice to the purchaser, cause the same to be removed and the costs and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike

manner and must be completed within sixty days from the day of sale, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless the City of New York, its officers, agents and servants and each of them, against any and all suits and actions, claims and demands of every name and description, brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them may be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of the said buildings.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furnishings, plaster, chimneys, projecting brick, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beam-holes, etc., ripped up, and the walls pointed and made to exclude wind and rain and present a clean exterior. The roofs of the adjacent buildings shall be properly flashed and painted and made water tight where they have been disturbed by the operation of the contractor.

The Public Service Commission for the First District reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and must be completed within sixty days from the day of sale, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.
