"The City of New York is committed to achieving excellence in the design and construction of its capital program, and building on the tradition of innovation in architecture and engineering that has contributed to the City's prestige as a global destination. The contracting opportunities for construction/construction services and construction-related services that appear in the individual agency listings below reflect that commitment to excellence."

#### **HHS ACCELERATOR**

To respond to human services Requests for Proposals (RFPs), in accordance with Section 3-16 of the Procurement Policy Board Rules of the City of New York ("PPB Rules"), vendors must first complete and submit an electronic prequalification application using the City's Health and Human Services (HHS) Accelerator System. The HHS Accelerator System is a web-based system maintained by the City of New York for use by its human services Agencies to manage procurement. The process removes redundancy by capturing information about boards, filings, policies, and general service experience centrally. As a result, specific proposals for funding are more focused on program design, scope, and budget.

Important information about the new method

- Prequalification applications are required every three years.
- Documents related to annual corporate filings must be submitted on an annual basis to remain eligible to compete.
- Prequalification applications will be reviewed to validate compliance with corporate filings, organizational capacity, and relevant service experience.
- Approved organizations will be eligible to compete and would submit electronic proposals through the system.

The Client and Community Service Catalog, which lists all Prequalification service categories and the NYC Procurement Roadmap, which lists all RFPs to be managed by HHS Accelerator may be viewed, at http://www.nyc.gov/html/hhsaccelerator/html/roadmap/roadmap.shtml. All current and prospective vendors should frequently review information listed on roadmap to take full advantage of upcoming opportunities for funding.

#### **Participating NYC Agencies**

HHS Accelerator, led by the Office of the Mayor, is governed by an Executive Steering Committee of Agency Heads who represent the following NYC Agencies:

Administration for Children's Services (ACS)

Department for the Aging (DFTA)

Pursuant to City Environmental Quality Review (CEQR), Mayoral Executive Order No. 91 of 1977, CEQR Rules of Procedure of 1991 and the regulations of Article 8 of the State Environmental Conservation Law, State Environmental Quality Review Act (SEQRA), as found in 6 NYCRR Part 617, a Final Environmental Impact Statement (FEIS), has been prepared, for the action described below. Copies of the FEIS are available, for public inspection, at the office of the undersigned, as well as online, at the Department of City Planning's website. The proposal

involves actions by the City Planning Commission and Council of the City of New York, pursuant to Uniform Land Use Review Procedure (ULURP). A public hearing on the Draft EIS (DEIS), was held on December 4, 2019, in conjunction with the City Planning Commission's Citywide public hearing, pursuant to ULURP. The public hearing also considered modifications, to the Proposed Actions (ULURP No. C200061(A) ZSM). Written comments on the DEIS were requested and received by the Lead Agency, until December 16, 2019. The FEIS incorporates responses to the public comments received on the DEIS and additional analysis conducted subsequent to the completion of the DEIS.

#### PROJECT IDENTIFICATION

The applicants, GO Broome LLC and The Chinatown Planning Council Housing Development Fund Company, Inc., are seeking the following discretionary actions, from the City Planning Commission:

- A zoning map amendment to change an R8 district, to an R9-1 district, with a C2-5 overlay;
- A zoning text amendment to Appendix F of the Zoning Resolution (Inclusionary Housing Designated Areas and Mandatory Inclusionary Housing Areas), to designate a Mandatory Inclusionary Housing Area, and to ZR Sections 23-011 (Quality Housing Program), 28-01 (Applicability of this Chapter), and 78-03 (Applicability of this Chapter), to allow the use of the Quality Housing Program;
- An authorization, pursuant to ZR Section 13-443 (Reduction in the number of required existing parking spaces), to eliminate 33 spaces of required accessory off-street parking on Block 346, Lot 75;
- A modification of the Seward Park Extension West Large-Scale Residential Development (the "LSRD"), to reflect changes to the zoning lots, and to update the site plan and zoning calculations of the LSRD, which includes the addition of Block 346, Lot 37 and an authorization and special permits, pursuant to ZR Section 78-311 (Authorizations by the City Planning Commission) and 78-312 (Special permits by the City Planning Commission).

Together, the proposed actions would facilitate the development of two buildings, to be located, on Block 346, Lots 37 and 75 ("Projected Development Site 1"). The proposed development would include a 30-story, 310-foot-tall mixed-use high-rise building, with frontage on Suffolk and Broome Streets, called the "Suffolk Building," and a 16-story, 165-foot-tall high-rise mixed-use building, with frontage on Norfolk and Broome Streets, called the "Norfolk Building." Independent of the proposed development, in the future with the proposed actions, it is anticipated that the owner of the existing 5-story mixed-use building located on Lot 95 of the project block ("Projected Development Site 2") would increase its commercial space by approximately 4,759 gross square feet (gsf).

Overall, the With Action condition would total approximately 466,901 gsf, with approximately 399,344 gsf for residential space, 23,547 gsf for commercial space (including 4,759 gsf of commercial space on Block 346, Lot 95), and 44,010 gsf for community facility space. There would be a total of approximately 488 dwelling units, with approximately 208 units designated as permanent affordable units in the proposed development on Projected Development Site 1. The proposed project would amend the site plan for the LSRD.

In addition, the applicant is expected to enter into a Restrictive Declaration to reflect the environmental mitigation conditions. The Restrictive Declaration for the project would provide the implementation of Project Components Related to the Environmental (PCREs) and those mitigation measures necessary to mitigate any significant adverse impacts. The proposed actions would also include recordation of an (E) Designation (E-548) related to hazardous materials, air quality, and noise, to commit future development of the rezoning area in accordance with any necessary conditions identified through the environmental review.

Since the issuance of the DEIS, the applicant has prepared and filed an amended zoning special permit application (ULURP No. C200061(A) ZSM) to modify the distance between buildings waiver. The amended application was analyzed in a technical memorandum issued on November 18, , 2019 and has been incorporated in the FEIS.

The FEIS assesses whether development resulting from the Proposed Actions could result in significant adverse environmental impacts. The FEIS identifies potential significant adverse impacts related to transportation (traffic, pedestrian) and construction (traffic and noise).

Transportation Analysis: A detailed analysis was conducted to assess whether the proposed developments would result in significant

 $<sup>1\,</sup>$  The current plan is to provide approximately 93 MIH units in the Suffolk Building and approximately 115 AIRS units in the Norfolk Building. The AIRS units are subject to City financing. If financing is unavailable, the Norfolk Building would be developed pursuant to MIH and include a set-aside of non-AIRS permanently affordable housing units.

adverse impacts to transportation within the study area. The proposed actions would result in significant adverse impacts related to traffic and pedestrians and would not result in significant adverse impacts for transit and parking.

Overall, the proposed project would generate a total of 51 vehicles per hour (vph) (15 "ins" and 36 "outs") during the weekday AM peak hour, 39 vph (20 "ins" and 19 "outs") in the weekday midday peak hour, 62 vph (35 "ins" and 27 "outs") in the weekday PM peak hour, and 50 vph (25 "ins" and 25 "outs") in the Saturday midday peak hour. Although the proposed project would generate a modest number of vehicle trips which would typically not necessitate traffic levels of service analyses, the Seward Park Mixed Use Development FEIS Technical Memorandum 3 (2015) had identified a number of unmitigated traffic impacts within the immediate proximity of the project block and as such, per consultation with New York City Department of City Planning (NYCDCP), six intersections were identified for analysis. Of the six intersections analyzed, the proposed project would result in significant adverse traffic impacts at two intersections during the weekday AM and Saturday midday peak hours, one intersection during the weekday PM peak hour.

These impacts would result despite the project's modest increase in vehicle trips because of existing congestion at area intersections and substantial increases in background vehicle traffic as a result of planned developments in the area. In addition, roadway capacity for vehicles has been reduced in the area because of background roadway improvements that have included bike lanes (i.e., bike lanes have been introduced in roadway area previously devoted to vehicular transport) and that prioritized pedestrian safety (i.e., sidewalks have been widened and/or bulb-outs have been implemented, again in areas of roadway previously devoted to vehicular transport).

Pedestrian analyses were performed for three sidewalk elements, eight crosswalk elements, and six corner elements for the weekday AM, midday, PM, and Saturday midday peak hours. Of the 17 pedestrian elements analyzed, the proposed project would result in significant adverse impacts at one pedestrian element during the weekday PM peak hour; no significant impacts would result during the weekday AM, midday, and Saturday midday peak hours.

Construction analysis: The proposed project would be subject to a number of government regulations and oversight requirements, including compliance with the requirements of the New York City Noise Control Code during the 30-month construction period.

The proposed actions would not result in significant adverse construction impacts related to air quality or other analysis categories for construction. The Proposed Actions would result in significant adverse construction impacts related to transportation and noise.

Construction activities would generate 38 construction worker auto trips and 22 construction truck trips during the AM construction peak hour, and 38 construction worker auto trips and four construction truck trips during the PM construction peak hour. Construction trucks would be required to use the New York City Department of Transportation (NYCDOT)-designated truck routes to get to the project area and would then use local streets to access the construction sites.

Three key intersections were analyzed for potentially significant traffic impacts during the peak construction traffic hours. During the AM construction peak hour, westbound through movement at the intersection of Delancey Street and Clinton Street would be significantly impacted and could be mitigated with a one second shift in signal timing. During the PM construction peak hour, northbound approach at the intersection of Grand Street and Clinton Street would be significantly impacted and could not be mitigated.

Construction on both Projected Development Site 1 and 2 would involve standard construction activities and practices for buildings in New York City. Demolition, excavation and foundation, and superstructure phases of construction are when noisiest activities occur; at both projected development sites, demolition would not be required.

The excavation and foundation phase of both the Norfolk and Suffolk Buildings (Projected Development Site 1) would overlap and the overall duration is anticipated to be 8 months. The superstructure phases of both buildings would overlap, and the overall duration is anticipated to be 10 months. For Projected Development Site 2, the overall construction period is expected to be well under 24 months as only 4,759 gsf of floor area would be developed. Further, excavation would be limited to a small footprint. Therefore, since the overall construction period of Projected Development Site 1 would exceed 24 months and there is the potential for construction noise to exceed the screening criteria at nearby receptors, a detailed construction noise analysis of construction at Projected Development Site 1 was conducted.

Based on the analysis, construction sound levels would increase by 15 dBA or more at the north facade of the Hong Ning building, 384 Grand Street, and the south façade of the podium building of 202 Broome Street during excavation/foundation and superstructure phases of construction, which would extend for more than 12 months, and there would be a significant adverse noise impact prior to mitigation

measures. Construction sound levels would increase by 20 dBA or more for 3 months or longer at these same locations and the east façade of the Hong Ning building and would increase by 15 dBA or more for 3 months or longer at the base building of 145 Clinton Street and the east façade of 202 Broome Street during the excavation/foundation phase prior to mitigation. Exterior sound levels would be up to 83 dBA at the north and east facades of the Hong Ning building and 384 Grand Street and up to 84 dBA at the south façade of the base building at 202 Broome Street where there will be offices.

Maximum interior sound levels would be up to 58 dBA at the north and east facades of the Hong Ning building, up to 63 dBA at 384 Grand Street, and up to 54 dBA at 202 Broome Street. Interior noise levels would exceed the interior noise criteria of 45 dBA for residential spaces at Hong Ning by up to 13 dBA and at 384 Grand Street by up to 18 dBA. Interior noise levels would exceed the interior noise criteria of 50 dBA for office uses at the base building of 202 Broome Street by up to 4 dBA.

With the adherence to existing construction noise regulations, the implementation of a Construction Noise Mitigation Plan, as required by the New York City Noise Code, as well as the use of a 12-foot construction noise barrier, construction noise would be reduced but would still exceed the thresholds for significant adverse noise impact prior to mitigation. Between publication of the Draft and Final EIS, additional construction noise analysis has been undertaken to further determine the precise magnitude and duration of the elevated noise level from construction. This analysis determined that noise from the tower crane would be generated at height of the tower boom and is approximately 5 dBA or more quieter than a hydraulic crane. In addition, additional mitigation measures, as feasible, to avoid potential significant adverse noise impacts were explored between the Draft and Final EIS in consultation with DCP. These mitigation measures consist of the use of enclosures around compressors and generators and acoustic shrouds around pile drivers. If these mitigation measures are implemented, construction noise levels would be below the threshold for significant adverse noise impact.

These path control measures would be used if practical and feasible. However, since their implementation is subject to potential safety risks and construction operation conditions, their use is not guaranteed. If these mitigation measures are not able to be implemented because they are not feasible and practicable, there would be significant adverse construction noise impact that would remain unmitigated.

The DEIS considers three alternatives. As summarized below, neither the No-Action Alternative, nor the No Unmitigated Significant Adverse Impacts Alternative, nor the Lot 95 Exemption Alternative would meet the project goals to the same extent as would the proposed project.

In the No-Action Alternative, both Projected Development Sites 1 and 2 would remain in their existing condition, and with no development at either site, the significant adverse impacts related to transportation and construction traffic and noise would not occur under the No-Action Alternative

In the No Unmitigated Significant Adverse Impacts Alternative, the project would have to be developed with no significant adverse traffic or pedestrian impacts or construction impacts. The degree to which the project would need to be reduced would compromise the applicant's ability to achieve the project goals and objectives of providing new housing, including affordable housing, and space for the Chinese-American Planning Council and BHH.

In this alternative, Block 346, Lot 95 would be subdivided from the zoning lot but would not be included in the Large-Scale Residential District. Therefore, the approximately 15,000 square feet of development rights from Lot 95 would not be transferred to Projected Development Site 1, and the additional approximately 27 units of housing projected to be developed on Projected Development Site 1 from this transfer of floor area would not be created.
