**2010-13 COMMUNITY HEALTH ASSESSMENT
NYC Department of Health & Mental Hygiene**

CHA – Prevention Agenda Description and Priority Areas

This form provides a summary of the Prevention Agenda activities and priorities, which are described in more detail within the CHA document.

1. With whom did you partner to establish the 2 – 3 Prevention Agenda priority areas? Please check all that apply and where lines are provided, list partners:

*The NYC Department of Health and Mental Hygiene (DOHMH) first launched **Take Care New York (TCNY)** in 2004 as its comprehensive health policy to serve as the organizing principle for plans to help all New Yorkers live longer and healthier lives. TCNY identified 10 steps New Yorkers could take to improve their health, and set ambitious goals for 2008 in each of the 10 priority areas and progress has been measured annually. Since 2002, much progress was made, and by 2007, DOHMH had reached or surpassed 2008 goals in four areas. Take Care New York: Fourth Year Progress Report (December 2008)*

DOHMH launched the second iteration of this initiative, Take Care New York 2012, in September 2009 after a lengthy analysis of community health data and lessons learned during implementation of TCNY. TCNY 2012 builds upon progress made since 2004 and sets an action plan for individuals and families, health care providers, community organizations, businesses and government to make New York City healthier. New aspects of the TCNY 2012 plan focus on:

- *Ways for organizations and public policies to improve health, in addition to what can be done by individuals and medical providers.*
- *Children's health-because of children's unique and important health needs and our opportunity to promote life-long healthy behaviors.*
- *Neighborhood conditions that impact health-such as access to healthy, affordable foods and safe homes, aiming for all New Yorkers to live in healthy and safe places.*
- *Health disparities in among New Yorkers of different races, ethnicities and income levels, setting ambitious goals to reduce them by 2012.*

***Take Care New York 2012** establishes ambitious objectives to achieve the greatest improvements in the health of New Yorkers. Objectives and activities are categorized in three areas:*

- a. ***Policies:** Developing laws, regulations, and other policies that will improve environmental, economic, and social conditions impacting health.*
- b. ***Prevention, Quality and Access:** Improving the quality of health care, emphasizing preventive care, and expanding access to care.*
- c. ***Health Promotion:** Informing, educating, and engaging New Yorkers to improve their health and the health of their communities.*

2010-13 COMMUNITY HEALTH ASSESSMENT
NYC Department of Health & Mental Hygiene

Working together, New York City aims to:

1. *Promote Quality Health Care for All*
2. *Be Tobacco Free*
3. *Promote Physical Activity and Healthy Eating*
4. *Be Heart Healthy*
5. *Stop the Spread of HIV and Other Sexually Transmitted Infections*
6. *Recognize and Treat Depression*
7. *Reduce Risky Alcohol Use and Drug Dependence*
8. *Prevent and Detect Cancer*
9. *Raise Healthy Children*
10. *Make All Neighborhoods Healthy Places*

The New York City Department of Health & Mental Hygiene (DOHMH) worked with the Greater New York Hospital Association to partner with its members as they prepared their Community Service Plans in 2009 and 2010. Please see GNYHA's website for a full list of its membership: <http://www.gnyha.org/3424/Default.aspx>. It bears noting that there are 72 hospitals in the city, as well as hundreds of clinics, private healthcare practices, and community-based organizations working on behalf of their patients, neighbors, and residents. DOHMH has continued to work with its Take Care New York Partners, listed at http://www.nyc.gov/html/doh/html/tcny/tcny_partners4.shtml.

2. What are the 2 – 3 priority areas your collaborative has selected, please check:

- Access to Quality Health Care
- Tobacco Use
- Health Mothers/Babies/Children
- Physical Activity/Nutrition
- Unintentional Injury

- Healthy Environment
- Chronic Disease
- Infectious Disease
- Community Preparedness
- Mental Health/Substance Abuse

2010-13 COMMUNITY HEALTH ASSESSMENT
NYC Department of Health & Mental Hygiene

DOHMH requested that hospitals in New York select two of either the NYS DOH Prevention Agenda areas or two of the NYC TCNY areas.

3. Did your collaborative use the services of a contractor to assist you in the process you used to arrive at your priority areas?

No.

4. What was your collaborative process? Check all that apply:

Because there are 62 hospitals in New York City working within widely disparate communities, it was not feasible to meet with each one individually or to request all to collaborate on any subset of Prevention Agenda or TCNY areas. DOHMH formally met with GNYHA members on two separate occasions in February 2009 to provide an overview of TCNY and opportunities for collaboration with the City if a hospital was not already a TCNY Partner. At these meetings, DOHMH presented extensive resources for hospitals to use when completing their Community Service Plans, including most of the information provided in Section One of this CHA.

5. Please indicate the individuals from your agency who were involved in the process. Check all that apply.

Local Public Health Director/Commissioner

Nurses

Supervising

Line/program

Sanitarians/environmental engineers

Physicians/PAs

Community Planners

Health Educators

Others, please provide title: Deputy Commissioner for Health Care Access and Take Care New York staff.

6. Were any of the following individuals involved in the process?

Board of Health member(s) Y N

Member(s) of the county legislature Y N

County Executive/Administrator Y N

Introduction

The following summaries and references are provided as the New York City Department of Health & Mental Hygiene's 2010 – 2013 Community Health Assessment. Given the size and complexity of New York City's population, data about all of these topics are key to providing meaningful public health services to all of its residents. To this end, DOHMH employs hundreds of City Research Scientists to develop and implement methods to gather public health data, interpret the data to identify trends and community needs, work with DOHMH programs to create and/or improve current programs and initiative to address the public health issues identified, and then assess the Department's work to determine whether they are having a positive impact on health trends. In this manner, the community health assessment process is continual at DOHMH, as the City constantly changes and new issues emerge.

The following are among the primary methods used by DOHMH to gather public health information:

- ❖ DOHMH's **Office of Vital Statistics** is responsible for reporting, processing, and analyzing all vital events including births, deaths, and spontaneous and induced terminations of pregnancy in New York City under the [New York City Charter](#), Administrative Code and Health Code. The Office of Vital Records registers, archives, amends, and issues certified copies of birth and death certificates in New York City. The Office of Vital Statistics manages all data derived from these records. Data are cleaned, stored, analyzed, disclosed and reported for public health and government purposes.

Vital statistics are published annually in the Summary of Vital Statistics and can be downloaded from the Vital Statistics [website](#). New York City death and birth statistics are available on [EpiQuery](#) (EQ), the NYC Department of Health and Mental Hygiene's interactive and user-friendly health information system. Counts of births and deaths are based on certificates filed with the Department's Office of Vital Records.

Data are based on births and deaths in New York City of both residents and non-residents. Unless otherwise stated, the counts and rates presented in EpiQuery and the annual [Summary of Vital Statistics](#) include all events that occurred in New York City, regardless of residency. For public health purposes, demographic and medical information on birth and death certificates is coded in general agreement with standards developed by the [National Center for Health Statistics](#) (NCHS). For more information on DOHMH's Vital Statistics and EpiQuery, please see <http://www.nyc.gov/html/doh/html/vs/vs-epiquery.shtml>.

- ❖ The **New York City Community Health Survey (CHS)** is a telephone survey conducted annually since 2002 by DOHMH's Division of Epidemiology, Bureau of Epidemiology Services. CHS provides robust data on the health of New Yorkers, including neighborhood, borough and citywide estimates on a broad range of chronic diseases and behavioral risk factors. CHS is based upon the National Behavioral Risk Factor Surveillance System (BRFSS), conducted by the Centers for Disease Control and Prevention. The CHS is a cross-sectional survey that samples approximately 10,000 adults aged 18 and older from all five boroughs of New York City. A computer-assisted telephone interviewing (CATI) system is used to collect survey data, and interviews are conducted in a variety of different languages. All data collected are self-report. As part of the 2008 CHS, the DOHMH conducted a Cell Phone Pilot Survey to collect information from New Yorkers who could only be reached by cell phone, a population not captured by the landline telephone sample used by the CHS. Starting in 2009, the Health Department began including cell-only users in the CHS to ensure an inclusive and representative sample of adult New Yorkers. The survey results are analyzed and disseminated in order to influence health program decisions, to increase the understanding of the relationship between health behavior and health status, and to support health policy positions.
- ❖ The **NYC Youth Risk Behavior Survey (YRBS)** is conducted through an ongoing collaboration between the New York City Department of Health and Mental Health (DOHMH), the Department of Education (DOE), and the National Center for Disease Control and Prevention (CDC). The New York City's YRBS is part of the CDC's

National Youth Risk Behavior Surveillance System (YRBSS). Based on the protocol developed by CDC, the survey has been conducted in odd-numbered years since 1997 to monitor priority health risk behaviors that contribute to the leading causes of mortality, morbidity, and social problems among youth in New York City. In the spring of 2007, the survey was completed by 9,080 students in 87 public high schools. Students complete a self-administered, anonymous questionnaire that measures a variety of risk behaviors, including tobacco, alcohol and drug use, unintentional injury and violence, sexual behaviors, dietary behaviors, and physical activity. The results are representative of public high school students in grades 9 through 12. The NYC YRBS can provide prevalence data for the city as a whole, for each of the five boroughs, and (since 2005) for three high-risk neighborhoods - the South Bronx, North and Central Brooklyn, and East and Central Harlem in Manhattan - where the DOHMH has its District Public Health Offices.

In addition to the Annual Summary of Vital Statistics and the online data from EpiQuery, DOHMH issues the following types publications to keep the public, other government agencies, policy makers, and health care providers apprised of the information gathered as well as to share recommendations about policy and action:

Health Data

- ❖ Vital Signs: Brief reports on important and timely health topics in New York City
- ❖ Special Reports: Longer, in-depth publications combining multiple data sources on special health topics and NYC populations
- ❖ Community Health Profiles: Community-specific health reports for 42 NYC neighborhoods

Other Publications

- ❖ Regular Program Reports on STDs, HIV, tuberculosis, lead poisoning prevention, and others.
- ❖ City Health Information (CHI) Bulletins for NYC health care providers on timely public health topics of interest to the medical care community that include practice guidelines, resources, and more.

In addition, DOHMH maintains portals to access information about environmental public health topics as well as a GIS Center to map data for use by epidemiologists and policy makers. All of these reports are available online via links at <http://www.nyc.gov/html/doh/html/community/community.shtml>. The data sources listed below include links to the websites and documents referenced except for Community Health Profiles where the page number is provided after the initial citation for each of the 42 publications.

In addition to these data collection and analysis initiatives, performance reporting – and thereby assessment – is ongoing for DOHMH. Every DOHMH division meets with the Commissioner of Health regularly throughout the year for formal reviews of outcome/performance/process indicators, program highlights, major initiatives, and challenges faced. Citywide, each agency reports monthly to the Mayor's Office of Operations on similar indicators. These reports are published online in the Citywide Performance Reporting system, <http://www.nyc.gov/html/ops/cpr/html/home/home.shtml>, and DOHMH's data includes the following:

- % of public school children who have completed required immunizations
- Individuals tested for HIV
- New adult AIDS cases diagnosed
- Syphilis cases
- New tuberculosis cases
- New cases among children with blood lead levels ≥ 10 micrograms per deciliter
- % of food service establishments that fail initial inspection
- Pest control complaints received by DOHMH
- % of compliance inspections failed due to signs of active rats
- Hospitalization rate for asthma among children ages 0-14
- Infant mortality rate
- % of adults who smoke

As a result of this ongoing community health assessment process, not only DOHMH personnel, but all New Yorkers have access to key information about the public's health and the agency's performance.

Section One - Populations at Risk

A. Demographic and Health Status Information

1. Overall size

As of July 1, 2008, New York City's population was estimated at 8,363,710.
As of July 1, 2009, New York City's population was estimated at 8,391,881

2. New York City Demographics

a. Age

- 2008 Vital Statistics, pages 8-9; Population Estimates, 2008 by Age - https://a816-healthpsi.nyc.gov/epiquery/SASStoredProcess/guest?_PROGRAM=%2FEpiQuery%2FCensus%2FCensus01&year=2008&gis=city&pop=agegrp&row=none&byall=none

Age Group	2008 Population Estimate
0-1 yr	118,766
1-2 yrs	227,299
3-4 yrs	229,677
5-9 yrs	519,022
10-12 yrs	307,799
13-14 yrs	190,743
15-17 yrs	325,225
18-19 yrs	225,914
20-24 yrs	580,628
25-29 yrs	597,650
30-34 yrs	643,340
35-39 yrs	675,694
40-44 yrs	643,889
45-49 yrs	614,902
50-54 yrs	552,696
55-59 yrs	483,987
60-64 yrs	388,605
65-69 yrs	300,254
70-74 yrs	237,728
75-79 yrs	189,494
80-84 yrs	149,175
85+ yrs	161,223

- Community Profiles Data—See page 2

b. Sex

- 2008 Vital Statistics, page 9; Population Estimates, 2008 by Sex - https://a816-healthpsi.nyc.gov/epiquery/SASStoredProcess/guest?_PROGRAM=%2FEpiQuery%2FCensus%2Fcensus01&year=2008&gis=city&pop=sex&row=none&byall=none

Sex	2008 Population Estimate
Male	3,995,209
Female	4,368,501

c. Race

- 2008 Vital Statistics, page 8; Population Estimates, 2008 by Race/Ethnicity - https://a816-healthpsi.nyc.gov/epiquery/SASStoredProcess/guest?_PROGRAM=%2FEpiQuery%2FCensus%2Fcensus01&year=2008&gis=city&pop=race&row=none&byall=none

Race/Ethnicity	2008 Population Estimate
Asian, non-Hispanic	992,866
Black, non-Hispanic	1,965,085
Hispanic	2,313,399
American Indian, non-Hispanic	21,044
Native Hawaiian/Pacific Islander, non-Hispanic	5,732
Two or more races, non-Hispanic	106,126
White, non-Hispanic	2,959,458

Limited English Proficient Population in New York City

With more than 3 million foreign-born residents from more than 200 different countries, New York City is home to one of the most diverse populations in the world. New Yorkers come from every corner of the globe and speak over 200 different languages. Nearly one-half of all New Yorkers speak a language other than English at home, and almost 25%, or 1.8 million persons, are not English Proficient.

² Excluding population born at sea.

2008	892	28	1	13	114	28	249	113	114	4,675	1,065	10,453

Note: Figures for single years from 1941 to 1975 appear in the Annual Summaries for 2007 and earlier. Scarlet fever is no longer reportable in 2008 and it is taken out from this table.

* Includes cases of West Nile neuroinvasive disease and West Nile fever.

** Accurate diagnosis of Hepatitis A&B based on laboratory testing became available in 1977. Clinically defined cases of Hepatitis reported earlier appear in the 1950 Annual Summary and earlier. The method of counting Hepatitis B beginning 2003 was changed so that cases represent newly acquired cases of Hepatitis B. The numbers are probable or definite new cases. Data source: Bureau of Communicable Disease, Immunization, and Tuberculosis Control, New York City Department of Health and Mental Hygiene.

- Charts below are from the NYC Community Health Atlas 2008, pp. 3 – 4.
http://nyc.gov/html/doh/downloads/pdf/epi/nyc_commhealth_atlas08.pdf

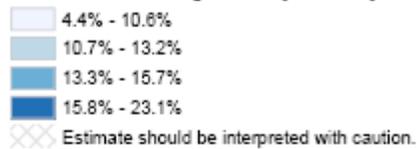

Lives more than a ten-minute walk from fresh produce

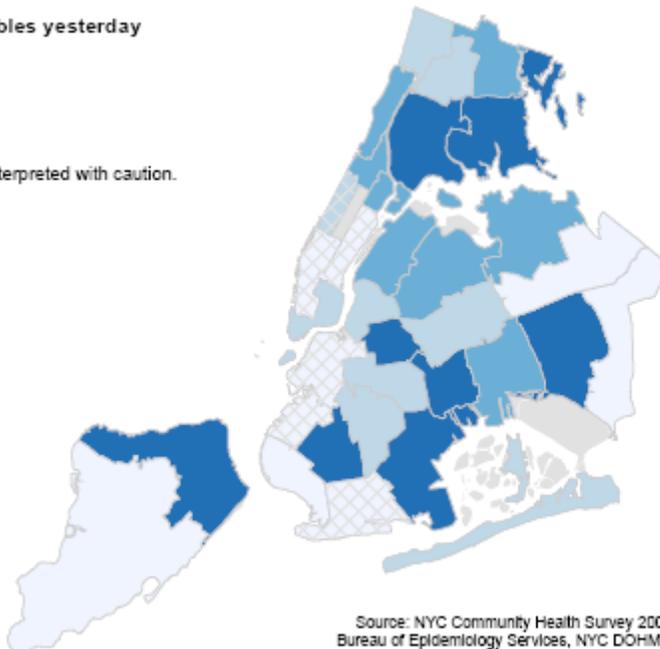

*Percentages are age adjusted.

Ate no fruits or vegetables yesterday

*Percentages are age adjusted.

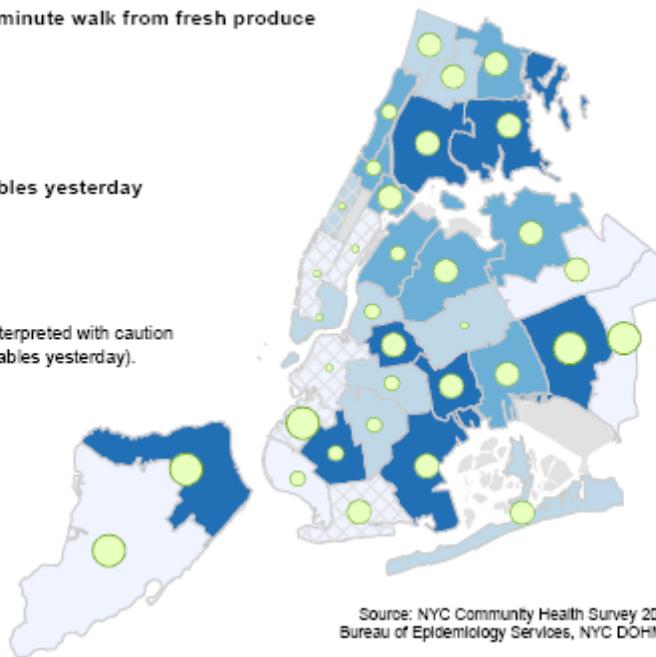

Lives more than a ten-minute walk from fresh produce

- 10.3% - 22.1%
- 22.2% - 33.5%
- 33.6% - 46.3%
- 46.4% - 67.2%

Ate no fruits or vegetables yesterday

- 4.4% - 10.6%
- 10.7% - 13.2%
- 13.3% - 15.7%
- 15.8% - 23.1%
- ▨ Estimate should be interpreted with caution (ate no fruits or vegetables yesterday).

*Percentages are age adjusted.

Obesity

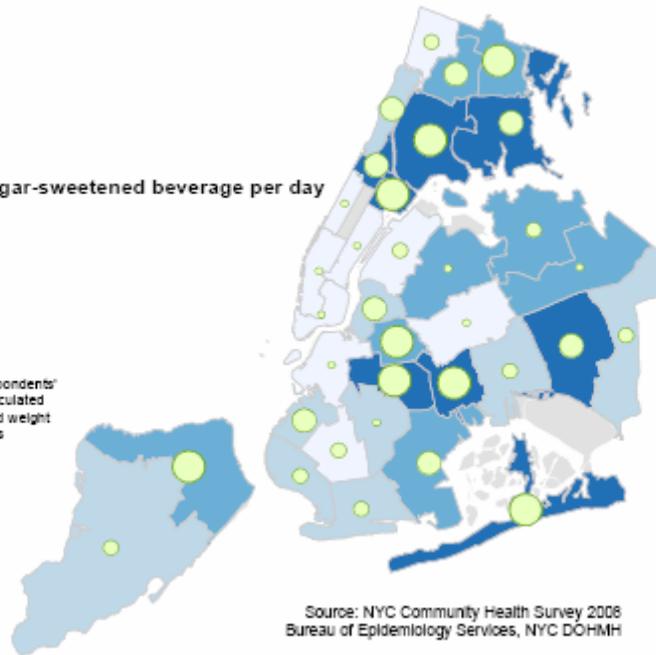

- 8.2% - 19.5%
- 19.6% - 24.5%
- 24.6% - 29.1%
- 29.2% - 44.2%

Drinks one or more sugar-sweetened beverage per day

- 15.0% - 24.9%
- 25.0% - 33.7%
- 33.8% - 39.8%
- 39.9% - 50.4%

*Percentages are age adjusted.

Obesity is determined by using respondents' Body Mass Index (BMI). BMI is calculated based on respondents' self-reported weight and height. A BMI of 30 or greater is classified as obese.

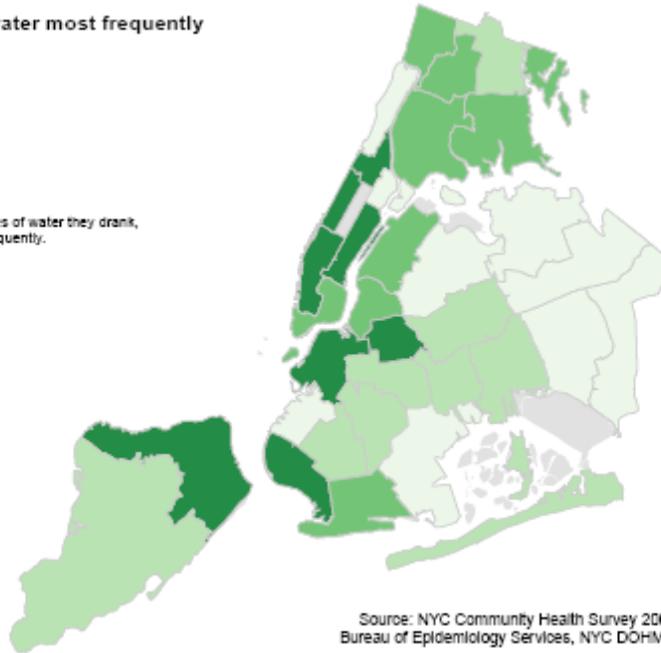

Drinks unfiltered tap water most frequently

- 16.5% - 19.3%
- 19.4% - 24.0%
- 24.1% - 27.8%
- 27.9% - 34.2%

*Percentages are age adjusted.

Respondents were asked what types of water they drank, and which type they drank most frequently.

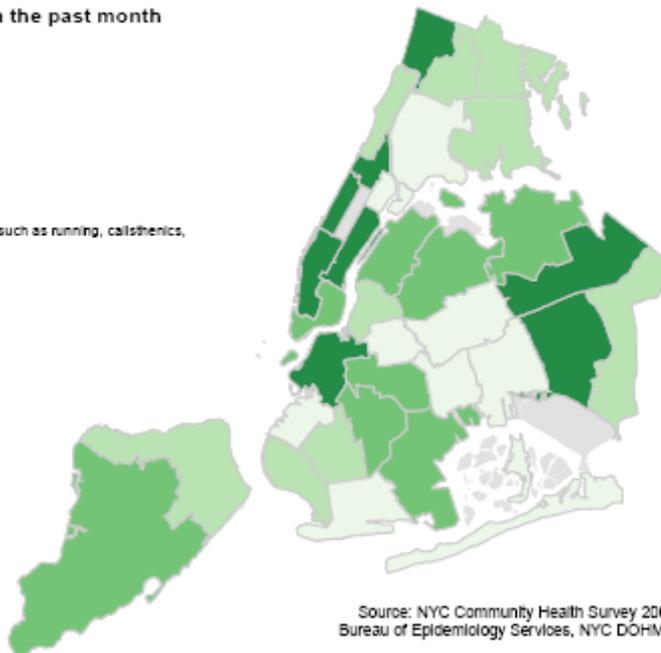

Source: NYC Community Health Survey 2008
Bureau of Epidemiology Services, NYC DOHMH

Any physical activity in the past month

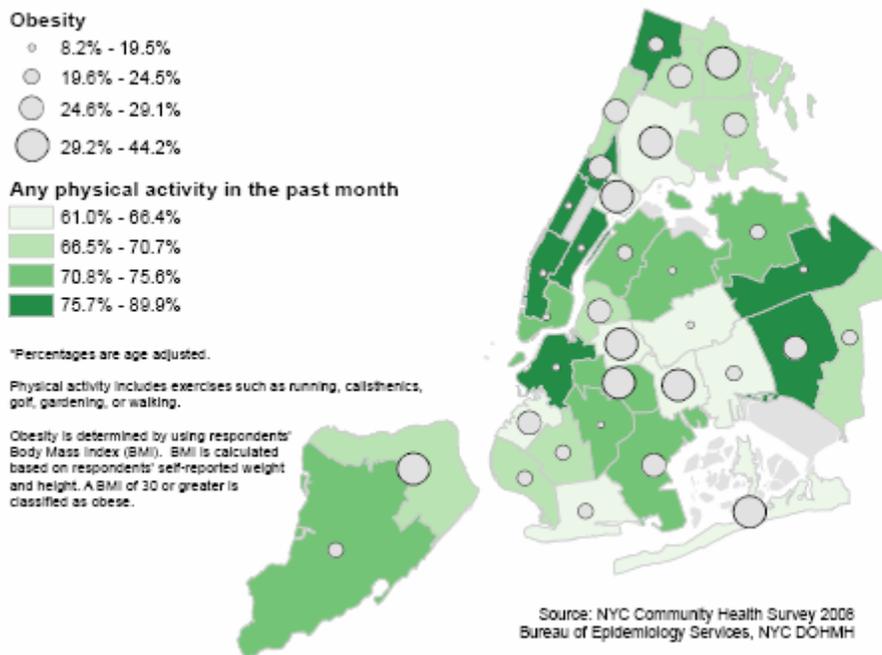

- 61.0% - 66.4%
- 66.5% - 70.7%
- 70.8% - 75.6%
- 75.7% - 89.9%

*Percentages are age adjusted.

Physical activity includes exercises such as running, calisthenics, golf, gardening, or walking.

- **Community Profiles Data – See pages 7, 12, & 13**
- Please see Nutrition section above as most of DOHMH's nutrition initiatives are geared toward reducing rates of chronic disease.

(ii) Diabetes

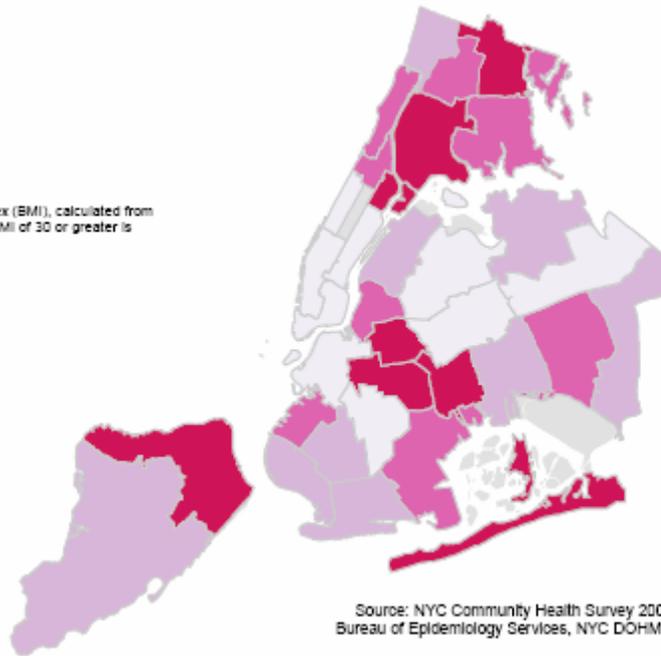

- Charts below are from NYC Community Health Atlas, page 2
http://nyc.gov/html/doh/downloads/pdf/epi/nyc_commhealth_atlas08.pdf

Obesity

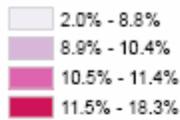

*Percentages are age adjusted.

Obesity is based on Body Mass Index (BMI), calculated from self-reported weight and height. A BMI of 30 or greater is classified as obese.

Source: NYC Community Health Survey 2008
Bureau of Epidemiology Services, NYC DOHMH

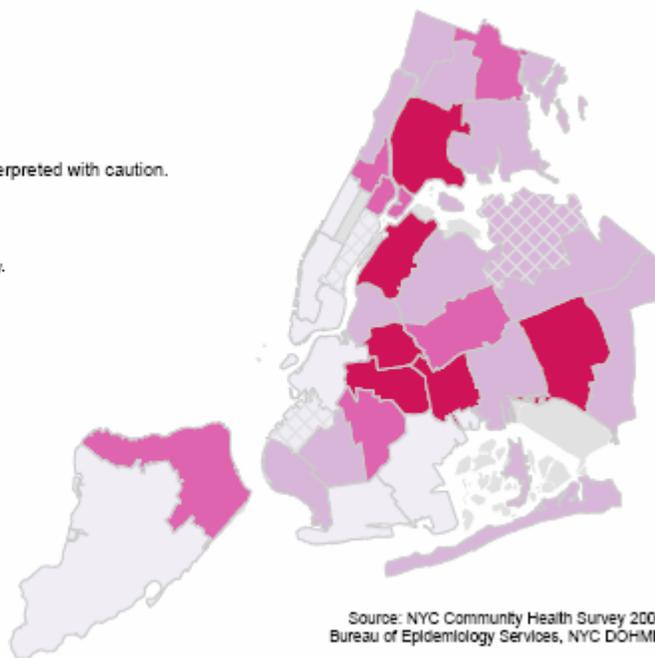

Diabetes ever

⊗ Estimate should be interpreted with caution.

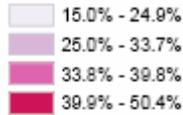

*Percentages are age adjusted.

Women who had diabetes only while pregnant are included in 'no' category.

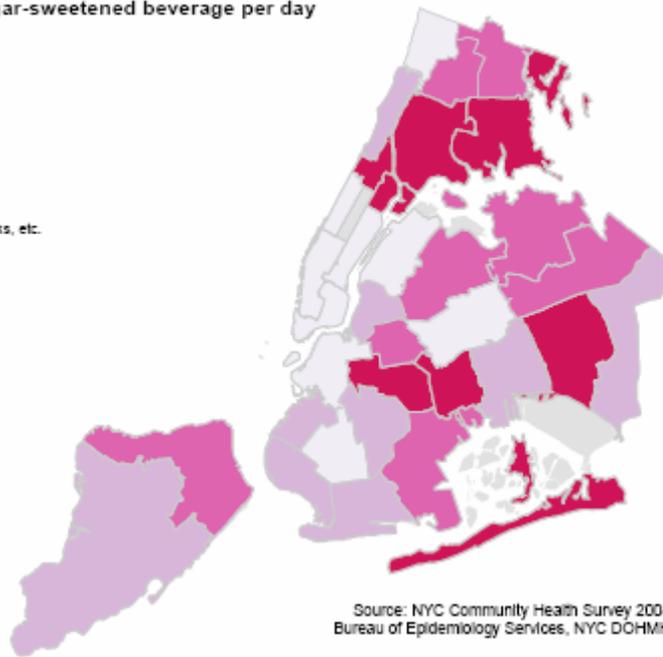

Source: NYC Community Health Survey 2008
Bureau of Epidemiology Services, NYC DOHMH

Drinks one or more sugar-sweetened beverage per day

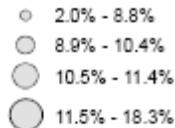

*Percentages are age adjusted.
Includes sodas, iced tea, sports drinks, etc.

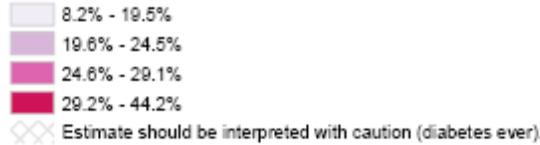

Source: NYC Community Health Survey 2008
Bureau of Epidemiology Services, NYC DOHMH

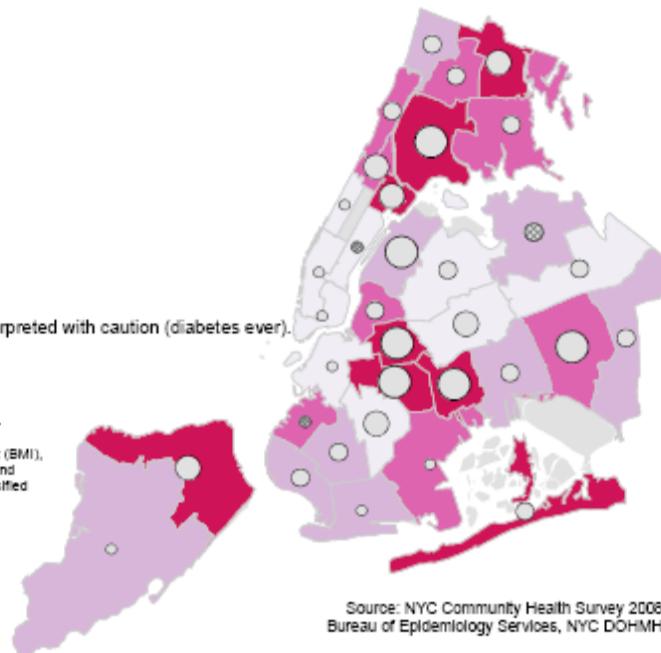

Diabetes ever

Obesity

*Percentages are age adjusted.
Women who had diabetes only while pregnant are included in 'no' category.
Obesity is based on Body Mass Index (BMI), calculated from self-reported weight and height. A BMI of 30 or greater is classified as obese.

B. Access to Care

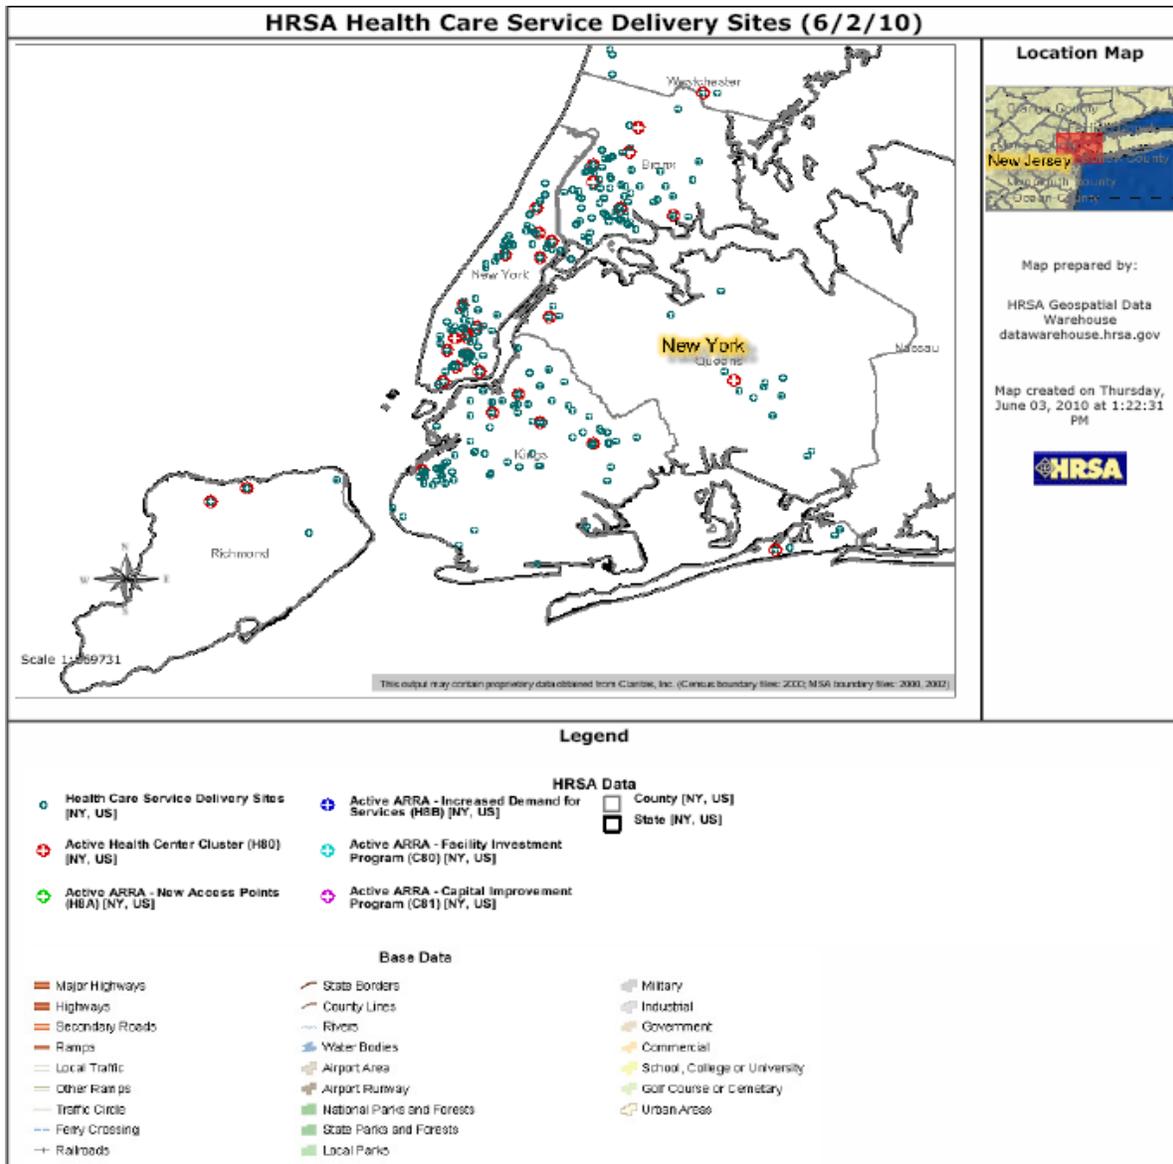

1. Availability of hospitals, clinics, private providers, & access to healthcare providers

- The New York City Health & Hospitals Corporation (HHC) is a \$6.7 billion healthcare delivery system, the largest municipal healthcare organization in the country. HHC serves as the “safety net” provider of health care services for all City residents, seeing 1.3 million New Yorkers every year, more than 450,000 of whom are uninsured. HHC provides medical, in-home, mental health and substance abuse services through its 11 acute care hospitals, four skilled nursing facilities, six large diagnostic and treatment centers and more than 80 community based clinics.

3. Commonly Identified Barriers to Care & Affected Subgroups

Please see Section I.A.7 above.

Also please note that DOHMH has launched a new series of publications on health disparities in New York City. The goals for this series are to inspire action by documenting current health disparities in the city, as well as changes over time, and identifying community- and policy-based solution to close the health gaps among New Yorkers. <http://www.nyc.gov/html/doh/html/episrv/disparities.shtml> The first publication of this series, "Health Disparities in Life Expectancy and Death," was issued in April 2010. <http://www.nyc.gov/html/doh/downloads/pdf/episrv/disparitiesone.pdf>

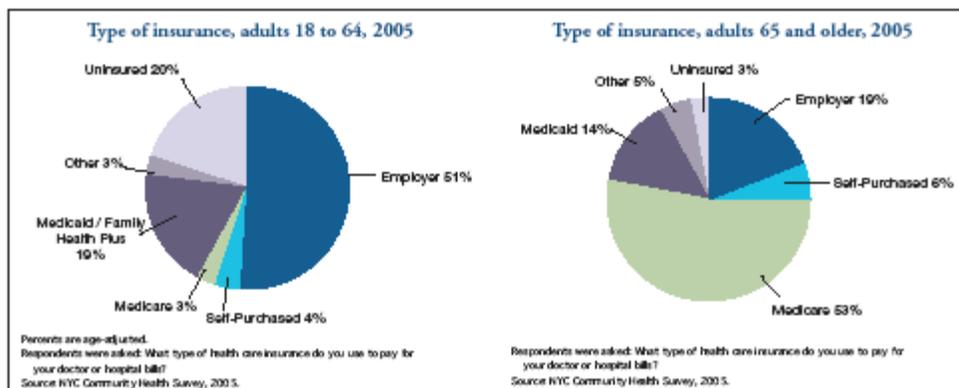

On the following pages are selections from DOHMH's report, Health Care Access Among Adults in New York City (May 2007) <http://www.nyc.gov/html/doh/downloads/pdf/hca/hca-nyc-adults.pdf>:

Overview of Insurance and Regular Care Provider Status

Approximately 80% of all New Yorkers ages 18 to 64 report having some type of health care insurance, half through their employer. About 1 in 5 are covered through public programs such as Medicaid and Medicare, and 4% have a self-purchased plan. The remaining 20% are uninsured.

Among adults 65 and older more than half report Medicare as their regular health care payment method; 3% have no medical coverage.

Based on these findings, about 1 in 6 adults, or more than 1 million people, currently lack health insurance.

Uninsured yet eligible?

An estimated 286,000 uninsured New Yorkers, or about 1 out of every 4 uninsured adults, have incomes below the federal poverty level. Depending on their immigration status, these adults may be eligible for coverage under public programs such as Medicaid. About 75% of these adults are foreign-born, and almost 100,000 reside in Queens.

More information on eligibility is available by calling 311.

Source: NYC Community Health Survey, 2005.

Adults Without Insurance

Certain groups of New Yorkers are more likely to be uninsured. Hispanics have the highest rates of being uninsured; 1 in 4 currently lack coverage. Men are more likely to be uninsured than women (21% vs. 13%), and non-whites are more likely to lack coverage than whites. Health care coverage is frequently tied to employment. Unemployed adults have a higher rate of being uninsured than employed persons (26% vs. 18%). However, more than two thirds (68%) of all uninsured adults are employed. The likelihood of being uninsured decreases with higher income. New Yorkers living below the federal poverty level are about 4 times as likely to be uninsured as those in the highest income bracket (26% vs. 7%). Being

uninsured also differs by age; those ages 18 to 24 are about twice as likely to lack coverage as 45- to 64-year-olds (27% vs. 15%), while almost all older adults have some form of coverage.

Nationwide, the profile of the uninsured looks quite similar, with a few notable exceptions. Hispanics are less likely to be uninsured in New York City than across the country (25% vs. 32%). Compared to the United States, employed adults in New York City are more likely, and unemployed adults less likely, to be uninsured. In addition, the gap between insurance rates for men and women is more than twice as large in New York City compared to the United States (8% vs. 3%).

Adults Without a Regular Provider

While many New Yorkers are uninsured, lacking a regular provider is even more common. About 21% of adults, or 1.3 million New Yorkers, do not have a regular provider.

Uninsured adults are almost 4 times as likely to lack a regular provider as those with insurance (53% vs. 14%), but insured adults account for more than half of those without a regular provider. Many of the same groups that lack insurance also have high rates of being without a regular care provider. For example, Hispanics have the highest proportion of both being uninsured (25%) and not having a regular provider (31%). Men, people with low

income, and younger adults are also more likely to be without a regular provider.

Adults in the highest income group are about twice as likely to lack a regular provider as they are to lack insurance (13% vs. 7%). And although only 3% of adults over 65 are currently without insurance, 10% lack a regular provider.

Compared to the United States, the overall rate in New York City is similar; however, unemployed New Yorkers, adults 18 to 24, and Hispanics are less likely than their national counterparts to be without a regular provider.

Adults without a regular provider, New York City and nationwide, 2005

		% Without a regular provider, NYC	% Without a regular provider, U.S.	Population without a regular provider, NYC	Total Adult Population, NYC
Overall		21	21	1,259,000	6,068,000
Insurance Status	Insured	14	14	655,000	4,865,000
	Uninsured	53	51	579,000	1,030,000
Sex	Men	25	26	728,000	2,774,000
	Women	16	16	531,000	3,242,000
Race/Ethnicity	White	15	17	338,000	2,327,000
	Black	18	20	257,000	1,375,000
	Hispanic	31	36	483,000	1,476,000
	Asian/Pacific Islander	22	24	137,000	604,000
	Other	19	21	43,000	235,000
Employment Status	Employed	20	21	786,000	3,685,000
	Unemployed	27	33	152,000	510,000
	Not in Labor Force	22	19	302,000	1,742,000
Age Group	18-24 years	30	37	233,000	768,000
	25-44 years	25	27	666,000	2,617,000
	45-64 years	16	14	267,000	1,687,000
	65+ years	10	6	92,000	930,000
Income (% Poverty Level)	<100	32	*	359,000	1,108,000
	100-199	26	*	258,000	981,000
	200-399	16	*	153,000	951,000
	400-599	12	*	110,000	852,000
	≥600%	13	*	141,000	1,031,000

* US data are available only by annual income level, but show a similar pattern: 34% of those with incomes below \$15,000 do not have a regular provider, while 13% of those with incomes above \$50,000 do not have one.

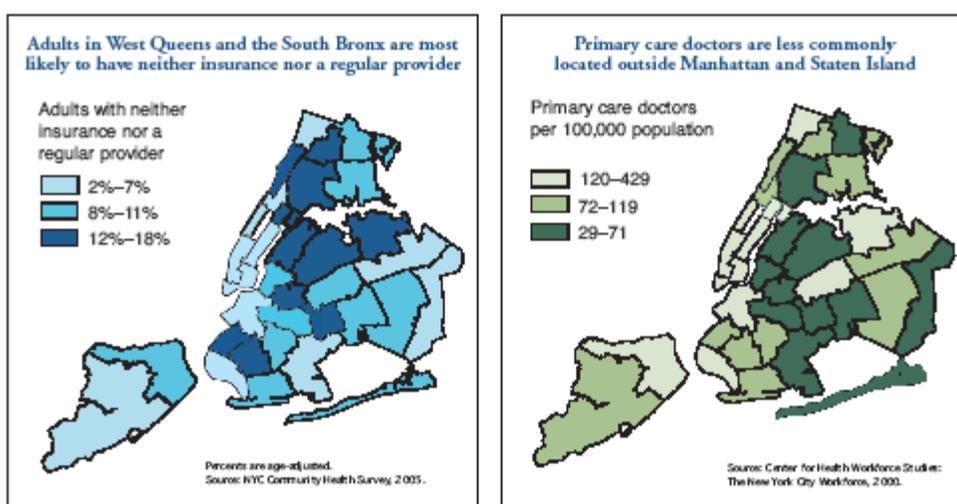

Percentages are age-adjusted, except for age group.
Subgroup totals may not sum to overall population due to rounding responses.
Respondents were asked: Do you have one person or more than one person you think of as your personal doctor or health care provider?
Sources: NYC Community Health Survey, 2005; Behavioral Risk Factor Surveillance System, 2005; Census 2000.

Adults With Neither Insurance Nor a Regular Care Provider

Adults lacking both medical coverage and a regular care provider are concentrated in neighborhoods with a large proportion of immigrants, such as West Queens, where more than half of adults are foreign-born, and in poorer parts of the city, such as the South Bronx, where more than 40% of residents live in poverty. In these neighborhoods, at least 1 in 7 adults have neither insurance nor a regular care provider.

The high rates of adults lacking both components of care may be related, in part, to the distribution of primary care doctors throughout the city. Primary care doctors are less common in the Bronx, Brooklyn and Queens than in Manhattan and Staten Island.

Adults with neither insurance nor a regular care provider, 2005

Who has insurance but no regular provider?

658,000 adults, or about 1 of every 10 New Yorkers, have some form of medical coverage but no regular provider. These individuals may not feel a need to seek health care, or their health coverage may be difficult to use; for example, providers who are convenient to access may not accept their type of insurance. Data suggest that insurance without a regular provider is more common among Medicaid recipients (18%), Hispanics (15%), adults younger than 45 (13%), and residents of Manhattan and the Bronx (13%).

Who has a regular provider but no insurance?

456,000 adults, or about 1 out of every 15 New Yorkers, state that they have a regular provider but are currently uninsured. This may be due to a recent change in their insurance status, or they may pay out of pocket for all medical services. Data suggest that having a regular provider without insurance is most likely among non-whites (9%), adults younger than 65 (9%), and residents of Queens (9%).

Percents are age-adjusted.

Source: NYC Community Health Survey, 2005.

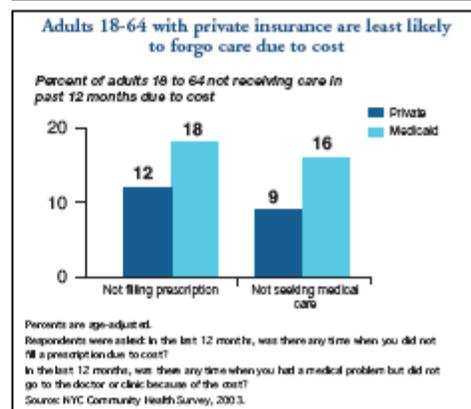

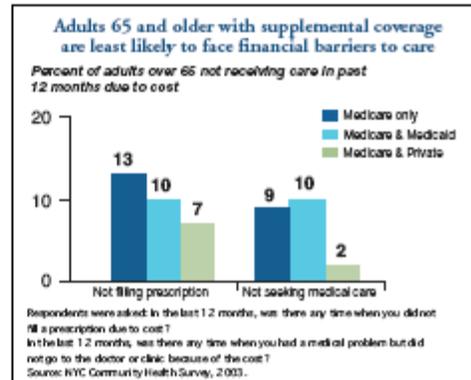

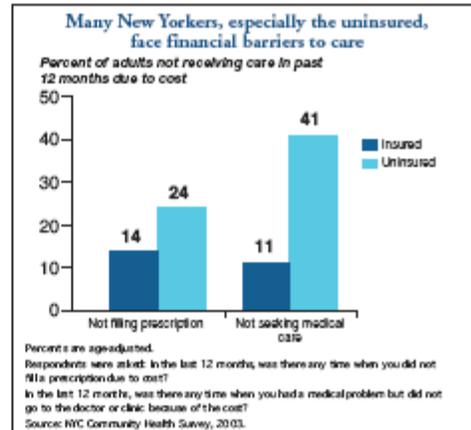

Health Care Access Among Adults in New York City

Financial Barriers

Financial barriers to care exist for both insured and uninsured New Yorkers. In 2003, more than 900,000 adults, or 15%, did not fill a prescription due to cost; the same proportion (15%) did not seek care due to cost. Uninsured adults were about twice as likely to skip prescriptions (24% vs. 14%). For medical care, the difference was even more dramatic: the uninsured were 4 times more likely to go without care as a result of financial constraints (41% vs. 11%).

While Medicare covers many critical services, it did not offer a prescription drug benefit until 2006. In 2003, among adults 65 years and older, 9% did not fill one or more prescriptions due to cost, and 7% did not seek treatment for the same reason. Those with Medicare as their only coverage were about twice as likely as those with supplemental private coverage to skip a medication (13% vs. 7%) and 5 times as likely to forgo medical care due to cost (9% vs. 2%).

Among adults under 65 years of age, 16% had not filled a prescription and 16% had not sought medical care due to cost in 2003. Those with Medicaid were about twice as likely as those with private insurance to skip medical care for financial reasons (18% vs. 9%). Since Medicaid is designed to provide medical and pharmacy services at nominal cost to beneficiaries, this may indicate either a need to provide more information to Medicaid enrollees about their coverage, or the presence of additional expenses beneficiaries have trouble meeting, such as transportation, child care or co-payments.

Health Care Access Among Adults in New York City

Regular Source of Care

Use of the emergency department for regular care may not allow for timely treatment from a consistent provider. Overall, 7% of New Yorkers use the emergency department as their usual source of care. Adults without a regular provider are about 4 times more likely to use the emergency department as their usual source of care than those with regular providers; this is true for both insured (13% vs. 3%) and uninsured (32% vs. 8%) adults.

Use of the emergency department for regular care also varies by race/ethnicity and is lowest among whites. In every racial/ethnic group, those without insurance are more likely to use the emergency department for regular care: black and Hispanic adults are more than 3 times as likely to do so if they are uninsured.

About 1 in 10 adults ages 40 and older, including 1 in 4 uninsured adults, has not had a checkup in the past 2 years, making preventive care and ongoing monitoring more difficult. Regardless of insurance status, individuals with a regular care provider are more likely to have received a routine checkup recently.

Type of Health Coverage Matters

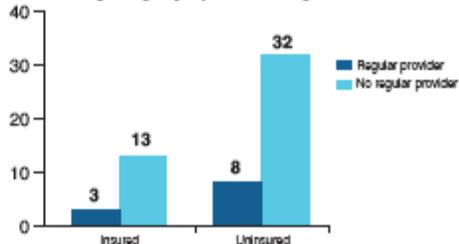

% of adults using the emergency department for regular care

Private plans	2
Medicaid	10

Percents are age-adjusted.

With or without health coverage, adults with a regular provider are more likely to have received a recent routine checkup

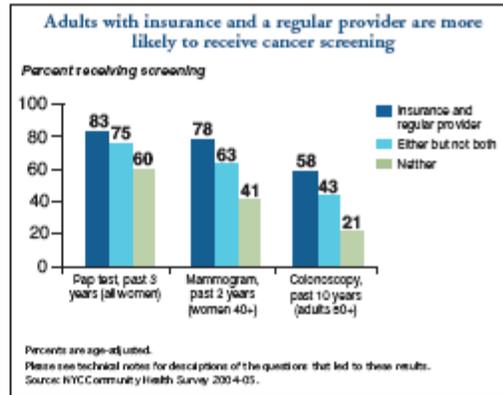

Percent of adults 40 and older having had a checkup within past 2 years

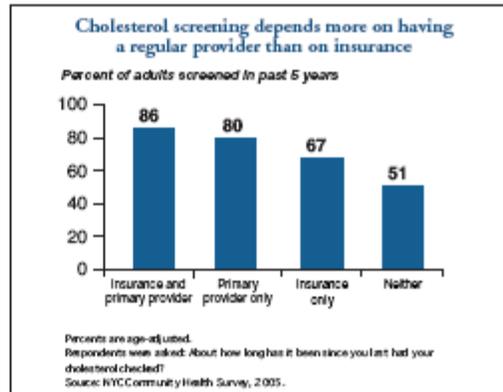

Percents are age-adjusted.
Respondents were asked: A routine checkup is a general physical exam, not an exam for a specific injury, illness, or condition. About how long has it been since you last visited a doctor or other health care provider for a routine checkup?
Source: NYC Community Health Survey, 2004.

Screenings, Immunizations, and Health Status

By monitoring and providing screenings throughout a patient's life, regular care providers can help to maximize health. While insurance and regular care providers improve the likelihood of receiving cancer screening, people who have both receive the most screenings. This is particularly true for colonoscopies; the screening rate among those with both insurance and a regular care provider is about 3 times higher than for those with neither (58% vs. 21%). However, rates of screening for all groups remain below the TCNY targets (85% for Pap tests and mammograms, 60% for colonoscopies).

Cholesterol screenings can be useful to alert providers and patients to the need to change diet, behavior, or treatment plans. While having a provider or insurance improves the likelihood of being screened, having a regular provider seems to have a stronger effect than insurance. Adults with a regular provider are 50% more likely than those without one to have had their cholesterol checked in the past 5 years.

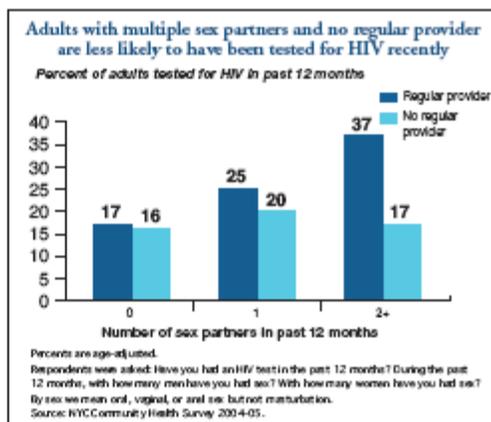

Race/Ethnicity Matters

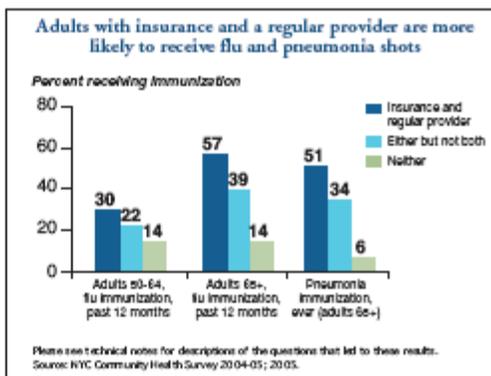

% of adult women having received a Pap test in the past 3 years		% of adults 50+ having received a flu immunization in the past 12 months	
Black	87	Asian	49
Hispanic	84	White	41
White	79	Hispanic	39
Asian	60	Black	35

Percentages are age-adjusted. Source: NYC Community Health Survey, 2004, 2004-05.

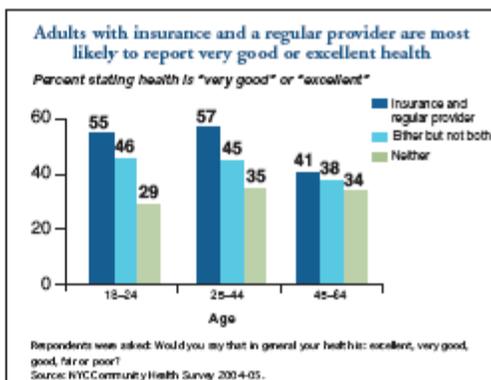

Knowing one's HIV status is another priority area of TCNY. Speaking to a provider about sexual and drug use history and the need for testing can help prevent HIV and other sexually transmitted infections. Early detection can also lead to more effective treatment. Adults who have had multiple partners are at elevated risk; among those with 2 or more sex partners in the past year, those without a regular provider are less likely to have been tested recently (17% vs. 37%).

Immunizations are also important for adult health, and having insurance and a regular provider facilitate and promote their receipt. Adults ages 65 and older, a population particularly susceptible to complications from influenza, are about 4 times more likely to have obtained a flu shot in the past year if they have medical coverage and a regular provider (57% vs. 14%). However, even among those with both insurance and a regular provider, the immunization rate is far below the TCNY target of 80%. Adults age 65 and older are also more than 8 times more likely to have received a pneumonia shot if they have coverage and a regular provider (51% vs. 6%).

Having both insurance and a regular care provider is associated with better perceived health for adults under age 45. Adults in this age group are about 60% more likely to rate their health as very good or excellent if they have both insurance and a regular provider. While this finding does not necessarily indicate that poor health is caused by lack of insurance and a regular provider, it does suggest that people without these essential health care components may have greater health care problems.

d. Laws & Regulations

(i) *New York City Charter Provisions*

Below are relevant

§ 551. Department; commissioner.

- a. There shall be a department of health and mental hygiene, the head of which shall be the commissioner of health and mental hygiene who shall be appointed by the mayor. The department shall have and exercise all powers of a local health department set forth in law. [. . .]
- b. The commissioner shall be a doctor of medicine and:
 - (1) hold a degree of master of public health or a degree of master of business administration with concentration in the health field or a degree of master of public administration with concentration in the health field or the equivalent of any one of the specified foregoing degrees received from a college or university and have had at least five years' experience in college or university public health teaching, or
 - (2) have had at least five years' experience in public health administration.

§ 552. **Deputy commissioners.** The commissioner may appoint deputy commissioners, one of whom shall have the same qualifications as the commissioner. There shall be at least two executive deputy commissioners, one of whom shall have the qualifications established pursuant to the mental hygiene law for a director of community services of a local governmental unit, and shall be the director within the department of the division of mental hygiene services. Such division shall be and shall exercise the powers of a local governmental unit for purposes of the mental hygiene law, and the executive deputy commissioner heading such division shall have the powers of a director of community services of a local governmental unit as set forth in or pursuant to such law, and shall report directly to the commissioner. In the exercise of such powers, such executive deputy commissioner shall coordinate the fiscal and programmatic administration of contracts awarded by the department for mental health, mental retardation, and alcoholism services.

§ 556. **Functions, powers and duties of the department.** Except as otherwise provided by law, the department shall have jurisdiction to regulate all matters affecting health in the city of New York and to perform all those functions and operations performed by the city that relate to the health of the people of the city, including but not limited to the mental health, mental retardation, alcoholism and substance abuse-related needs of the people of the city. The jurisdiction of the department shall include but not be limited to the following:

- a. General functions.
 - (1) Enforce all provisions of law applicable in the area under the jurisdiction of the department for the preservation of human life, for the care, promotion and protection of health and relative to

the necessary health supervision of the purity and wholesomeness of the water supply and the sources thereof;

- (2) maintain an office in each borough and maintain, furnish and operate in each borough office health centers and health stations or other facilities which may be required from time to time for the preservation of health or the care of the sick;
 - (3) exercise its functions, powers and duties in the area extending over the city, and over the waters adjacent thereto, within the jurisdiction of the city and within the quarantine limits as established by law;
 - (4) receive and expend funds made available for public health purposes pursuant to law; and
 - (5) arrange, with the approval of the mayor, for the rendition of services and operation of facilities by other agencies of the city.
- b. Review of public health services and general public health planning.
- (1) Develop and submit to the mayor and council a program for the delivery of services for the mentally disabled, including construction and operation of facilities;
 - (2) determine the needs of the mentally disabled in the city, which determination shall include the review and evaluation of all mental hygiene services and facilities within the department's jurisdiction;
 - (3) engage in short-range, intermediate-range and long-range mental hygiene planning that reflects the entire array of city needs in the areas of mental health, mental retardation and developmental disabilities and alcoholism and substance abuse services within the department's jurisdiction;
 - (4) implement and administer an inclusive citywide planning process for the delivery of services for people with mental disabilities; and design and incorporate within that planning process, consistent with applicable law, standards and procedures for community participation and communication with the commissioner at the borough and local community level;
 - (5) establish coordination and cooperation among all providers of services for the mentally disabled, coordinate the department's program with the program of the state department of mental hygiene so that there is a continuity of care among all providers of services, and seek to cooperate by mutual agreement with the state department of mental hygiene and its representatives and with institutions in such department and their representatives in pre-admission screening and in post-hospital care of persons suffering from mental disability;
 - (6) receive and expend funds made available for the purposes of providing mental health, mental retardation and developmental disability and alcoholism and substance abuse related services;
 - (7) administer, within the division of mental hygiene, the unit responsible for early intervention services pursuant to the public health law; and
 - (8) in accordance with section five hundred fifty-five of this chapter, determine the public health needs of the city and prepare plans and programs addressing such needs.
- c. Supervision of matters affecting public health.
- (1) supervise and control the registration of births, fetal deaths and deaths;
 - (2) supervise the reporting and control of communicable and chronic diseases and conditions hazardous to life and health; exercise control over and supervise the abatement of nuisances affecting or likely to affect the public health;
 - (3) make policy and plan for, monitor, evaluate and exercise general supervision over all services and facilities for the mentally disabled within the department's jurisdiction; and exercise general supervisory authority, through the promulgation of appropriate standards consistent with accepted professional practices for the care and treatment of patients within such services and facilities for the mentally disabled within the department's jurisdiction;
 - (4) except as otherwise provided by law, analyze and monitor hospitals, clinics, nursing homes, and homes for the aged, and analyze, evaluate, supervise and regulate clinical laboratories, blood banks, and related facilities providing medical and health services and services ancillary thereto;

- (5) to the extent necessary to carry out the provisions of this chapter, the mental hygiene law and other applicable laws and when not inconsistent with any other law, arrange for the visitation, inspection and investigation of all providers of services for the mentally disabled, by the department or otherwise;
- (6) conduct such inquiries into services and facilities for the mentally disabled as may be useful in performing the functions of the department, including investigations into individual patient care, and for such purpose the department may exercise the powers set forth in section five hundred fifty-five of this chapter and shall, consistent with the provisions of the mental hygiene law, have access to otherwise confidential patient records, provided such information is requested pursuant to the functions, powers and duties conferred upon the department by law;
- (7) supervise and regulate the public health aspects of water supply and sewage disposal and water pollution;
- (8) supervise and regulate the public health aspects of the production, processing and distribution of milk, cream and milk products, except for such inspection, regulation and supervision of the sanitary quality of milk and cream distributed, consumed or sold within the city as performed by the New York department of agriculture and markets pursuant to section seventy-one-I of the agriculture and markets;
- (9) supervise and regulate the food and drug supply of the city and other businesses and activities affecting public health in the city, and ensure that such businesses and activities are conducted in a manner consistent with the public interest and by persons with good character, honesty and integrity;
- (10) supervise and regulate the removal, transportation and disposal of human remains;
- (11) supervise and regulate the public health aspects of ionizing radiation, the handling and disposal of radioactive wastes, and the activities within the city affecting radioactive materials, excluding special nuclear materials in quantities sufficient to form a critical mass; and
- (12) in furtherance of the purposes of this chapter and the mental hygiene law, make rules and regulations covering the provision of services by providers of services for the mentally disabled.

d. Promotion or provision of public health services.

- (1) Maintain and operate public health centers and clinics as shall be established in the department;
- (2) engage in or promote health research for the purpose of improving the quality of medical and health care; in conducting such research, the department shall have the authority to conduct medical audits, to receive reports on forms prepared or prescribed by the department; such information when received by the department shall be kept confidential and used solely for the purpose of medical or scientific research or the improvement of the quality of medical care;
- (3) produce, standardize and distribute certain diagnostic, preventive and therapeutic products and conduct laboratory examinations for the diagnosis, prevention and control of disease;
- (4) promote or provide for public education on mental disability and the prevention and control of disease;
- (5) promote or provide for programs for the prevention and control of disease and for the prevention, diagnosis, care, treatment, social and vocational rehabilitation, special education and training of the mentally disabled;
- (6) promote or provide diagnostic and therapeutic services for maternity and child health, family planning, communicable disease, medical rehabilitation and other diseases and conditions affecting public health;
- (7) promote or provide medical and health services for school children and the ambulant sick and needy persons of the city;
- (8) promote or provide medical and health services for the inmates of prisons maintained and operated by the city;
- (9) within the amounts appropriated therefor, enter into contracts for the rendition or operation of services and facilities for the mentally disabled on a per capita basis or otherwise, including contracts executed pursuant to subdivision e of section 41.19 of the mental hygiene law;

- (10) within the amounts appropriated therefor, execute such programs and maintain such facilities for the mentally disabled as may be authorized under such appropriations; and
- (11) use the services and facilities of public or private voluntary institutions whenever practical, and encourage all providers of services to cooperate with or participate in the program of services for the mentally disabled, whether by contract or otherwise.
- e. Other functions.
- (1) Prior to the sale, closing, abandonment of a city hospital or transfer of a city hospital to any other hospital or facility, hold a public hearing with reference to such proposed sale, closing, abandonment or transfer; publish notice of such public hearing in the City Record and in such daily newspaper or newspapers published in the city of New York as shall be selected by the commissioner, such publication to take place not less than ten days nor more than thirty days prior to the date fixed for the hearing; and adjourn such hearing from time to time, if necessary, in order to allow persons interested to attend or express their views;
 - (2) submit all materials required by the mental hygiene law for purposes of state reimbursement;
 - (3) provide for membership on such state or federally authorized committees as may be appropriate to the discharge of the department's functions, powers and duties; and
 - (4) perform such other acts as may be necessary and proper to carry out the provisions of this chapter and the purposes of the mental hygiene law.

(ii) Recent Board of Health Actions

Pursuant to NYC Charter § 558, the New York City Board of Health is empowered to add, alter, amend, and/or repeal any section of the New York City Health Code, which has the force and effect of law. Below are selected recent actions of the NYC Board of Health in this regard:

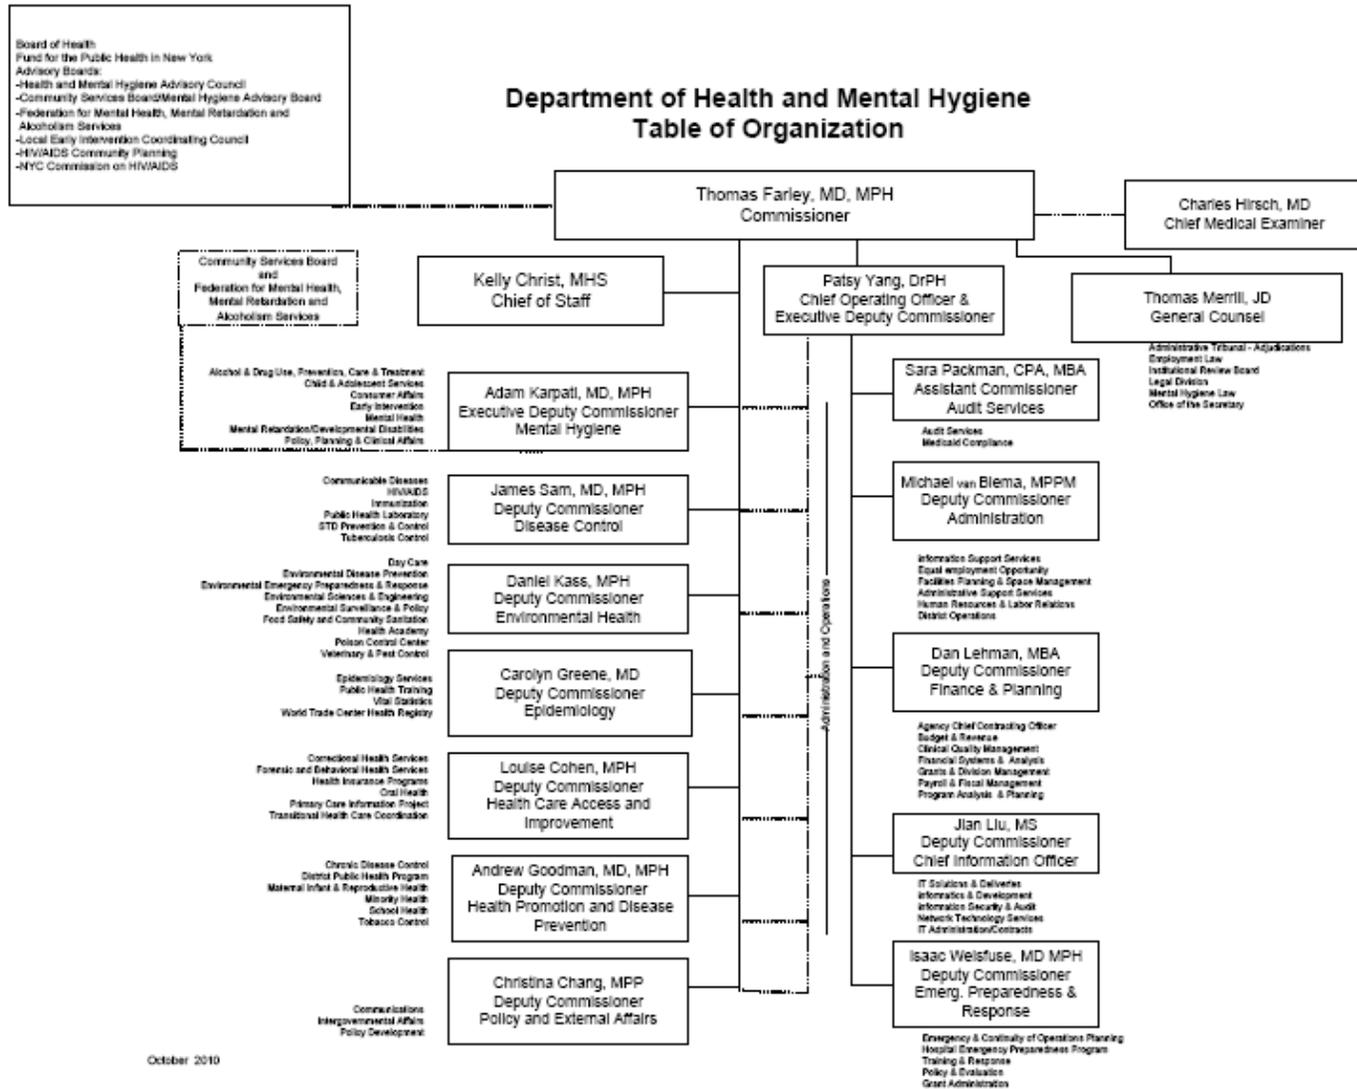

- Notice Of Adoption Of A New Chapter 28 ("Restriction On The Sale Of Certain Flavored Tobacco Products") In Title 24 Of The Rules Of The City Of New York
<http://www.nyc.gov/html/doh/downloads/pdf/notice/2010/notice-chapter-28-adopt-itle-24.pdf>
- Notice of Adoption of Amendments to Article 11 of the NYC Health Code (6/15/10) - TB
<http://www.nyc.gov/html/doh/downloads/pdf/notice/2010/notice-adoption-chapter11.pdf>
- Notice of Adoption of Amendments to Article 161 of the NYC Health Code (3/16/10) - Animals
<http://www.nyc.gov/html/doh/downloads/pdf/notice/2010/ament-article-161.pdf>
- Notice of Adoption of Amendments to Article 81 of the NYC Health Code (3/16/10) – Restaurant Letter Grading <http://www.nyc.gov/html/doh/downloads/pdf/notice/2010/Article-81.pdf>
- Notice of Adoption of Amendments to Article 181 of the NYC Health Code – Point of Sale Health Warnings About Tobacco Smoke (9/22/09)
<http://www.nyc.gov/html/doh/downloads/pdf/notice/Article-181-amend.pdf>
- Notice of Adoption of Amendments to Article 81 of the NYC Health Code (12/5/06) – Trans Fat Ban <http://home2.nyc.gov/html/doh/downloads/pdf/public/notice-adoption-hc-art81-o8.pdf>
- Notice of Adoption of Amendments to Article 81 of the NYC Health Code (1/22/08) – Calorie Labeling <http://home2.nyc.gov/html/doh/downloads/pdf/public/notice-adoption-hc-art81-50-01o8.pdf>

II. DOHMH Capacity Profile

A. Organization Chart

B. DOHMH Funding by Division

- Funding data provided in this report are current as of August 25, 2010.
- Personnel/staffing data are current as of August 23, 2010, and are DOHMH employees unless otherwise noted.

C. Offices of the Commissioner & the Chief Operating Officer/Executive Deputy Commissioner

Pursuant to New York City Charter Chapter 22, the DOHMH Commissioner is appointed by the Mayor and has responsibility to administer the agency in accordance with the Charter and any other relevant laws. The Chief Operating Officer/Executive Deputy Commissioner oversees agency operations, focusing on improving operational quality and efficiency, human and physical infrastructure, and policy development. Directly oversees Finance and Planning, Informatics and Information Technology, Administrative Services, the Agency Chief Contracting Officer, Communications, Intergovernmental Affairs and Audit Services. Staffing³ for the Commissioner of Health and Chief Operating Officer's Office as of August 2010 is:

Managerial Titles	
ADM STAFF ANALYST	1.00
AGENCY MEDICAL DIRECTOR	2.00
COMMISSIONER OF HEALTH	1.00
DEPUTY COMMISSIONER	1.00
HLTH SVC MGR	3.00
Total for Managerial Titles	8.00

Non-Managerial Titles

Total for Non-Managerial Titles	13.00

COH/COO PS Budget =	\$ 1,463,427
COH/COO OTPS Budget =	\$ 372,968
Total COH/COO Budget =	\$ 1,836,395

³ Staffing figures are provided terms of full-time equivalents (FTEs) and include both full- and part-time positions. In addition the figure include positions that:

- Are filled with personnel on board,
- Are unfilled as of yet because the candidate is pending in the City personnel system and/or has been named but is not yet pending,
- Have been posted but a candidate has not yet been named,
- Are unposted (vacant),
- Have personnel on short- or long-term leave.

1. Bureau of Audit Services & Medicaid Compliance

Facilitates prompt and accurate agency response to audits conducted by city, state and federal oversight agencies; ensures adherence to federal, State, and local Medicaid requirements. The bureau also conducts internal audits of DOHMH programs and facilitates fiscal audits of vendors providing services for the agency. Staffing for the bureau as of August 2010 is:

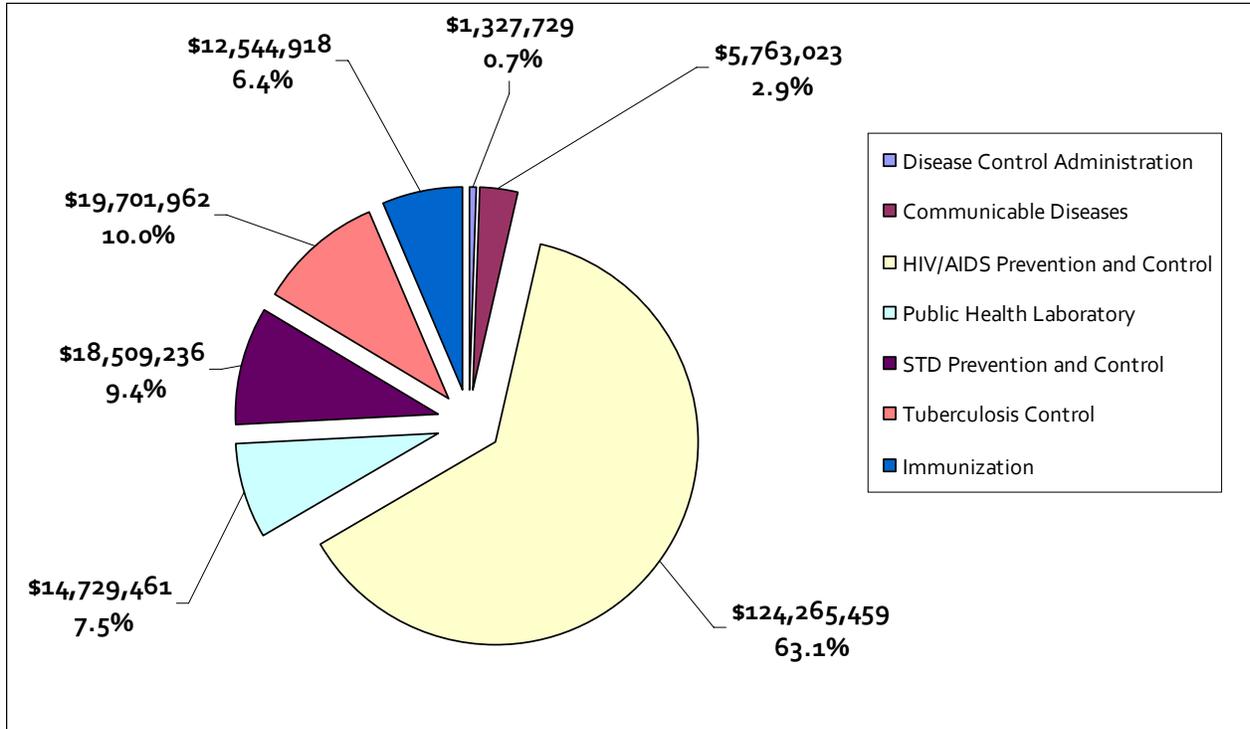

Managerial Titles	
ADM STAFF ANALYST	1.00
ADMIN ACCNTANT	1.00
ADMINISTRATIVE MANAGEMENT AUDITOR	3.00
Total for Managerial Titles	5.00

Non-Managerial Titles	
ACCOUNTANT	2.00
ASSISTANT SYSTEMS ANALYST (FINANCE)	1.00
ASSOCIATE STAFF ANALYST	5.00
MANAGEMENT AUDITOR (09761)	4.00
PRINCIPAL ADMINISTRATIVE ASSOCIATE	1.00
SECRETARY	1.00
COLLEGE AIDE FRSH SOPH (P/T)	1.00
Total for Non-Managerial Titles	15.00

Audit PS Budget =	\$ 1,150,777
Audit OTPS Budget =	\$ 1,389,645
Total Audit Budget =	\$ 2,540,422

D. Division of Disease Control

1. Funding of Bureaus as Percentage of Division

Total Division PS Budget =	\$70,579,992
Total Division OTPS Budget =	\$1,261,794
Total Division Budget =	\$196,841,786

2. Division Administration

Identifies, monitors, treats and prevents infectious diseases. The division also protects the health of New Yorkers by responding to outbreaks and preparing the city for emergency events. Staffing for the divisional office as of August 2011 is:

Managerial Titles	
ADM STAFF ANALYST	1.00
DEPUTY COMMISSIONER	1.00
HLTH SVC MGR	1.00
Total for Managerial Titles	3.00

Non-Managerial Titles	
ASSOCIATE STAFF ANALYST	1.00
CITY RESEARCH SCIENTIST	4.20

3. Bureau of Chronic Disease Prevention & Control

Seeks to reduce the burden of chronic diseases such as heart disease, stroke, cancer, diabetes and respiratory diseases. The bureau's approach is three-pronged:

- (1) prevent the development of chronic diseases by addressing the major risk factors, such as physical inactivity, poor diet, high blood pressure and elevated cholesterol;
- (2) prevent chronic illnesses through screening, education and early detection; and
- (3) improve quality of life for people with chronic illnesses by strengthening their self-management skills and working with health care providers to improve care.

3. Bureau of Epidemiology Services

BES is a multidisciplinary bureau that helps monitor and improve the health of New Yorkers through research, as well as consultation and training within the division, around the agency, and to outside partners. The bureau systematically collects, analyzes and disseminates data on health issues citywide and among special populations to inform decision-making, and provides training and support for specialized analyses and targeted studies. Findings from this bureau are regularly disseminated through requests, reports, peer-reviewed manuscripts, presentations and publicly available datasets and analyses. Staffing for the bureau as of August 2010 is:

5. Bureau of Public Health Training

BPHT improves the public health knowledge and skills of DOHMH staff and of students and trainees who will enter the public health workforce in the future through in-person and e-learning courses, and internships. The bureau also provides support for manuscript development to DOHMH staff through literature searches, editing services and interactive workshops.

Within the BPHT, the Provider Education Program actively engages healthcare providers in New York City to improve public health knowledge and skills in this population by providing published materials, such as City Health Information (CHI) bulletins and Dear Colleague letters, as well as rotations for medical students and clinical residents interested in public health and an accredited public health/preventive medicine residency for physicians. Additionally, PEP is responsible for coordinating regular meetings of the Graduate Medical Education Advisory Board and conducting periodic surveys to understand and improve health department outreach to NYC physicians.

M. Office of Emergency Preparedness & Response

Previously administered in a bureau within the Division of Disease Control, the Office of Emergency Preparedness (EPR) has been elevated to directly report to the Chief Operating Officer. Its functions include:

- Emergency & Continuity of Operations Planning
- Hospital Emergency Preparedness Program
- Training & Response
- Policy & Evaluation
- Grant Administration

DOHMH has direct grants for Bioterrorism Preparedness, H1N1, Urban Area Security Initiative, and Hospital Preparedness. These grants, along with City Tax Levy monies, fund EPR's activities as well as personnel and OTPS costs for various personnel throughout the agency.¹¹ Staffing in EPR as of August 2010 is:¹²

¹¹ Pursuant to the relevant statutes and regulations, DOHMH does not seek Article 6 funding for expenses related to grant-funded activities.

¹² Also please see Section II.Q.1 for additional resources provided by the Fund for the Public Health in New York.

N. Office of General Counsel

DOHMH's Office of the General Counsel for Health provides legal advice and assistance to the Department as a whole. It is nationally recognized as a leader in public health law and is comprised of the following units:

1. Legal Division

The Legal Division's attorneys are DOHMH's in-house counsel. Its tasks range from drafting and negotiating complex contracts to providing advice to and overseeing the operation of the **New York City Board of Health**.

2. Institutional Review Board

DOHMH's Internal Review Board (IRB) protects the rights and welfare of human research subjects recruited to participate in research activities conducted by the Department, research involving individuals attending Department clinics, or research involving Department records.

3. Administrative Tribunal - Adjudications Unit

The Administrative Tribunal-Adjudications Unit hears and adjudicates New York City Health Code violations as well as violations of numerous other City and State health laws and regulations. Annually, the Tribunal adjudicates approximately 35,000 cases. The Tribunal is an integral part of the Department's overall enforcement strategies.

4. Employment Law Unit (ELU)

The ELU investigates and prosecutes DOHMH employee disciplinary matters. The ELU also advises and trains supervisory personnel on disciplinary matters and acts as liaison with the NYC Conflicts of Interest Board. ELU handles numerous questions regarding potential conflicts of interest or appearances of impropriety on the part of employees.

2. Office of the Executive Deputy Commissioner for Mental Hygiene

The Division of Mental Hygiene is responsible for administering, planning, contracting, monitoring, and evaluating early intervention services for children under three years old who have a developmental delay or disability, and community mental health, mental retardation, and chemical dependency services within the City of New York. In addition, DMH plans and collaborates with other City agencies to provide a variety of uniquely targeted programs, including those for individuals who are homeless or who have co-occurring disorders. Staffing for the Office of the EDC for Mental Hygiene as of August 2010 is:

¹³ Most activities of the Division of Mental Hygiene are not eligible for Article 6 State Aid. Because the Bureau of Early Intervention and the Opioid Overdose Prevention Program (within the Bureau of Alcohol and Substance Abuse Prevention, Care & Treatment) are eligible, however, an overview of the entire division is provided.

3. Pathology

Investigates all deaths of persons in New York City occurring from criminal violence, by accident, by suicide, suddenly when in apparent health, or in any unusual or suspicious manner. Unusual deaths include, but are not limited to, those by unidentified or novel diseases or conditions. The Chief Medical Examiner is responsible for establishing the cause of death and maintaining records on all deaths investigated. The staffing for this Department as of August 2010 is:

Q. Other Resources

DOHMH works with the Fund for Public Health in New York (FPHNY) and Public Health Solutions (PHS) to maximize funding available for public health activities and initiatives. In some instances, these entities manage large grants for DOHMH which hires personnel itself, in some instances these entities actually hire the personnel who are then seconded to DOHMH, and in others it is a mix of DOHMH and FPHNY/PHS personnel. While these activities and initiatives are not eligible for Article 6 State Aid because they are grant-funded, inclusion of information about them provides fuller view of DOHMH's resources and priorities.

1. Centers for Disease Control & Prevention

The federal Centers for Disease Control and Prevention has seconded the following personnel to DOHMH:

Office Title	#	Division	Bureau
Clerical	1	FIN	Bureau of Budget & Revenues
Support Staff	1	EHS	Bureau of Childcare
Medical Subspecialist	1	DIS	Bureau Of Communicable Diseases
Public Health Epidemiologist	1	DIS	Bureau Of Communicable Diseases
Agency Staff Nurse	1	HCA	Bureau of Correctional Health Services
Community Assistant	1	HPD	Bureau of District Public Health Office
Consultant	1	HPD	Bureau of District Public Health Office
Consultant	1	EHS	Bureau of Environmental Disease Prevention
Senior Epidemiologist	1	EPI	Bureau of Epidemiology Services
CDC Fellow	1	DIS	Bureau of HIV/AIDS Prevention & Control
CDC/CSTE Applied Epidemiology Fellow	1	DIS	Bureau of HIV/AIDS Prevention & Control
Prevention Specialist	1	DIS	Bureau of HIV/AIDS Prevention & Control

Microbiologist	3	DIS	Bureau of the Public Health Laboratory
CDC EIS Officer	1	EPI	Epidemiology Administration
Director of Operations	1	EPR	Office of Emergency Preparedness & Response

2. Fund for the Public Health in New York

FPHNY is dedicated to the advancement of the health and well-being of all New York City residents. Towards this aim, FPHNY implements programs in partnership with DOHMH to address pressing public health needs. FPHNY and DOHMH work together to build public/private partnerships to launch and expand programs that promote public health in New York City. FPHNY was established in 2002 and is currently partnering with DOHMH in the management of over \$90 million across 52 grants for 36 programs. To date, FPHNY has raised and managed over \$190 million.

CURRENT GRANTS

Program: Healthcare Emergency Preparedness Program
Funder: Office of the Assistant Secretary for Preparedness and Response (OASPR)
Current Yr: \$12,738,995; Total Amt: \$96,146,218 (9 Years)

A federally funded multi-year grant program to improve the capacity of hospitals and primary care providers to respond to public health emergencies. Core preparedness activities taking place in virtually every acute care hospital in NYC include the training of key response personnel, development of emergency preparedness plans, and drilling to test capabilities. The program is in its eighth year. Staff seconded to DOHMH as of August 2010 is:

Administrative Assistant	1
Administrative Manager	1
Project Manager	1
Total HEPP	3

Program: Primary Care Information Project
Funder: Office of the National Coordinator for Health Information Technology (ONCHIT), Robin Hood Foundation, Technical Assistance Fund, Pfizer, Island Peer Review Organization (IPRO), Center for Health Care Strategies, Engelberg Foundation, Verizon Foundation
Current Yr: \$30,099,544; Total Amt: \$32,384,963

One of the largest initiatives in the country extending electronic health records (EHRs) to the neediest neighborhoods to improve the quality of health care. Under the American Recovery and Reinvestment Act, the Office of the National Coordinator of Health Information Technology within the US Department of Health and Human Services granted funds to help PCIP establish the NYC Regional Electronic Adoption Center for Health (NYC REACH), one of 32 federally designated extension centers around the country. REACH will expand on PCIP's current services and help providers select EHR vendors, redesign workflows, implement software and new systems, and reach meaningful use of EHRs. Robin Hood Foundation funding is expanding EHRs to underserved neighborhoods and enabling the testing of incentives that will encourage greater focus on utilizing EHRs to strengthen preventive measures. The technical assistance fund is comprised of contributions from physician practices that support services to providers as they "go-live" on EHRs. Funding from Pfizer and an Anonymous donor is supporting a study on the impact of panel managers on patient overall health. IPRO is providing support to medical practices in the process of going live on electronic health records and in building the most high quality prevention services into their new EHR-enabled practice workflows. A subcontract with the Center for Health Care Strategies is allowing PCIP to evaluate its efforts in helping small

primary care practices achieve patient centered medical home certification. Engelberg Foundation funding is supporting a cost-benefit analysis of EHR adoption. Verizon Foundation is supporting the piloting of text messages from physician practices to patients to promote greater preventive health. A subcontract with Columbia University is supporting the development of curriculum for health information technology (HIT) professionals in community colleges. PCIP staff seconded to DOHMH as of August 2010:

Reporting Program Specialist	1
CHC Billing Specialist	1
Director PCIP Finance & Bsns Devel	1
Director, Policy & Compliance. PCIP	1
EHR Specialist PCIP	2
EMR Consultant PCIP	2
EMR Supervisor Consultant	1

Total PCIP	46

Program: Tobacco Control
Funder: Centers for Disease Control: Communities Putting Prevention to Work
Current Yr: \$8,130,360; Total Amt: \$15,554,629 (2 Years)

A two year program to expand on existing and create new policy, system and environmental change activities in community and school settings, decreasing smoking prevalence, smoking initiation, and exposure to secondhand smoke. CPPW Tobacco Control staff seconded to DOHMH as of August 2010 is:

Borough Organizer (Queens)	1
Borough Organizer (Staten Island)	1
Borough Organizer (Bronx)	1
Borough Organizer (Manhattan)	1
Citywide Advocacy Coordinator	1
Citywide Contracts Manager	1
Director of Special Projects	1
Grant Administrator	1

Total CPPW - Tob Control	10

Program: Obesity
Funder: Centers for Disease Control: Communities Putting Prevention to Work
Current Yr: \$7,766,267; Total Amt: \$15,531,115 (2 Years)

A two year program to expand on existing and create new policy, system and environmental change activities to increase levels of physical activity, improve nutrition, and decrease overweight/obesity prevalence in community and school settings. CPPW Obesity Prevention staff seconded to DOHMH as of August 2010 is:

CPPW Administrator	1
Culinary Technician	1
Manager, Community Engagement	1
Active Design Guidelines Training Coordinator	1
Active Design Guidelines Evaluator	1
Borough Organizer (Brooklyn)	1
Accountability Measure Coordinator	1
Active Design Guidelines Policy Developer Designer Analyst	1
Breastfeeding Data Manager	1
Breastfeeding Project Director	1
Breastfeeding Site Coordinator	2
CPPW Evaluator	1
Community Engagement Specialist	1
CPPW Administrative Assistant	2
Data Manager	1
Farmers Market Outreach Coordinator	1
Food Procurement Nutritionist	1
Healthy Bodegas Outreach Coordinator	1
New Healthy Bodegas Coordinator	1
Physical Activity Coordinator	1
Physical Activity and Nutrition (PAN) Coordinator	1
Physical Activity and Nutrition (PAN) Special Projects	1
Policy Legal Specialist	1
Project Manager	1
Stair Facilities Improvement Coordinator	1
Research Coordinator	1
Food Policy Analyst	1

Special Evaluation Data Analyst	1
City Agency Food Procurement Nutritionist	1
School Wellness Specialist #2	3
Strategic Relations Coordinator	1
Supermarket Technical Assistance Coordinator	2
Total CPPW - Obesity Prevention	37

Program: Healthy Start Brooklyn
Funder: Health Resources and Services Administration (HRSA)
Current Yr: \$1,350,000; **Total Amt:** \$10,883,506 (8 Years)

A collaborative community-based effort to reduce infant mortality and improve the health status of women and infants in North Central Brooklyn. The project builds on existing State, City and community initiatives to enhance perinatal services employing two rigorously tested case management models for service delivery. The program is in its second four-year grant period. Healthy Start Brooklyn staff seconded to DOHMH as of August 2010 is:

Data Manager	1
HSB Program Director	1
Intern, Breastfeeding Program	1
Program Associate	1
Total Health Start Brooklyn	4

Program: School-Based Health Center Reproductive Health Project
Funder: Anonymous
Current Yr: \$2,907,538; **Total Amt:** \$8,035,334 (3 Years)

A multi-year program to reduce rates of teen pregnancy by increasing adolescents' access to high quality sexual and reproductive health care in NYC public high school health centers. The program is in its third year. SBHC staff seconded to DOHMH as of August 2010 is:

Data Manager	1
Director SBHC Initiative	1
Evaluator	1
Program Assistant SBHC	1
Research Assistant SBHC	1
Total SBHC	5

Program: NYC Strategic Alliance for Health
Funder: Centers for Disease Control and Prevention (CDC)
Current Yr: \$600,000; **Total Amt:** \$ 2,625,319 (5 Years)

This project is a partnership between the East and Central Harlem and Bronx District Public Health Offices and the New York Academy of Medicine to strengthen efforts to improve nutrition, physical activity, and reduce tobacco use. The major goals are to increase access to space, facilities and opportunities for physical education; to increase access to healthier foods; and to reduce access and

promotion of unhealthy foods and tobacco. This project is in year two of five and the following staff were seconded to DOHMH for the project as of August 2010.

Strategic Alliance Director	1
Community Coordinator	1
Program Assistant	1
Total CDC Stat Alliance	3

Program: Nurse-Family Partnership (NFP)
Funders: Robin Hood Foundation, Altman Foundation, Starr Foundation
Current Yr: \$1,125,000

An evidence-based nurse home visiting program for low-income, first-time high-risk mothers beginning in pregnancy and working with them over the first two years of their child’s life. To date, the program has served over 4,500 families. The Robin Hood Foundation is funding the expansion of the Targeted Citywide Initiative (TCI) team, which works with the most vulnerable populations: teens in foster care, women in shelters, and women on Rikers Island. Altman Foundation funding is supporting the creation of a clinical rotation program to increase the number of nursing students interested in working for NFP. Funding from the Starr Foundation is supporting efforts to engage and retain clients and nurses. The following staff have been seconded to DOHMH for NFP as of August 2010:

Community Outreach Coordinator NFP	1
Nurse Supervisor	1
Mental Health Clinician	1
Nurse Home Visitor	3
Data/Administrative Assistant	1
Total NFP	7

Program: Substance Abuse, HIV, and Hepatitis Prevention for Minority Populations and Minority Reentry Populations in Communities of Color
Funder: Substance Abuse and Mental Health Services Administration (SAMHSA)
Current Yr: \$254,320; Total Amt: \$1,271,600 (5 Years)

A case management intervention targeting minority re-entrants and minority sex workers in the South and Central Bronx and providing referrals to substance abuse, HIV, and/or hepatitis C prevention intervention. Each client enrolled in the program is offered a free rapid HIV test, hepatitis C test, and a free Hepatitis A & B vaccine. The project is in its fifth year.

Program: Community Stressors and Susceptibility to Air Pollution in Urban Asthma
Funder: National Center for Environmental Research Science to Achieve Results (STAR)
Current Yr: \$312,500; Total Amt: \$1,250,000 (4 Years)

A four year project to study the distribution of community stressors and air pollution in New York City and to examine their effects on childhood asthma. The project is in its first year.

Program: Sodium Reduction Initiative
Funder: New York State Health Foundation, Robert Wood Johnson Foundation, W.K. Kellogg Foundation, National Association of County and City Health Officials
Total Amt: \$1,248,784

This project initiated work with the food industry to voluntarily reduce the amount of salt in processed, packaged and restaurant foods. This collaboration will result in salt reduction targets that are substantive, achievable, gradual, measurable, and voluntary. Foundation funding is supporting purchases of databases that contain information on sodium levels in manufactured foods as well as a study of population sodium intake which will inform target setting. As of August 2010, one Intern was seconded to DOHMH for this initiative.

Program: Building Capacity to Address the Public Health Impacts of Climate Change in New York City
Funder: Centers for Disease Control
Current Yr: \$237,529; **Total Amt:** \$733,463 (3 Years)

A three year project to build capacity to implement climate change programs and adaptations in NYC. The project has four goals: 1. Assess climate change health impacts on NYC residents; 2. Develop a public health action plan to prepare for and respond to the health impacts of climate change; 3. Enhance local public health infrastructure to climate change impacts; and 4. Enhance community resilience to climate change impacts.

Program: Comprehensive School Health Policies for Tobacco, Physical Activity, and Nutrition
Funder: NYSDOH/Division of Chronic Disease and Injury Prevention
Total Amt: \$267,750 (21 months)

Project to work with schools in Kings County to develop and implement comprehensive school policies to improve tobacco control, physical activity, and nutrition and expand schools' role as model centers for health promotion. A Program Assistant has been seconded to DOHMH for this project.

Program: HIV Refusal Reversal Project in Jails
Funder: Elton John AIDS Foundation, MAC AIDS Fund, Robin Hood Foundation
Total Amt: \$350,000

The program is testing a new approach to identifying cases of HIV in Rikers Island jails by offering HIV testing to inmates who refused HIV testing upon prison entry. Public health advisors are providing inmates with group educational sessions with information on HIV, other sexually transmitted diseases, and hepatitis. Each inmate will then be seen individually in a confidential area by a staff member who will offer HIV rapid testing and provide appropriate pre- and post-test counseling including harm reduction and other appropriate health education. Four Health Educator/HIV Counselors were seconded to DOHMH as of August 2010 for this program.

Program: Regional Perinatal Forum Coordinator
Funder: New York State Department of Health
Current Yr: \$35,722; **Total Amt:** \$288,252 (8 Years)

A multi-year program to promote implementation of best practices across a number of organizations to improve perinatal outcomes. The program was renewed for five years in April 2009.

Program: NYC Health Equity Project (3 Years)
Funder: Kellogg Foundation (subcontract from Ingham County Health Department)
Current Yr: \$143,013; **Total Amt:** \$281,093

This project is expanding the work of the District Public Health Offices by engaging more directly with community residents and social advocacy/organizing agencies and will evaluate the work of the DPHOs in addressing health disparities. The program is in its third year and one Nutrition Data Analyst has been seconded to DOHMH for it as of August 2010.

Program: Evaluating Integration of Self Blood Pressure Monitoring into Urban Primary Care Practices to Improve Ethnic/Racial Disparities in Hypertension
Funder: Robert Wood Johnson Foundation
Total Amt: \$258,443

A two-year study to evaluate the effectiveness of a DOHMH pilot project to improve the management of high blood pressure (hypertension). The project provides home blood pressure monitors to largely low income and minority patients with uncontrolled hypertension through clinics serving neighborhoods with a high prevalence of the condition. One Evaluation Coordinator was seconded to DOHMH for this study as of August 2010.

Program: Epi Scholars
Funder: de Beaumont Foundation
Total Amt: \$257,664

This program draws promising epidemiology students from underrepresented communities to the field of epidemiology and provides a mentored internship focused on conducting original epidemiological research on health disparities. This grant continues the program, which was started with funds from the Josiah Macy, Jr. Foundation, and supports the program's expansion to another city in 2011. A Program Coordinator and a Training and Education Coordinator are seconded to DOHMH for this program.

Program: Weather, Air Pollution, and Health Outcome Indicators in New York City
Funder: Environmental Protection Agency (Subcontract from NYU)
Current Yr: \$89,987; **Total Amt:** \$249,482 (3 Years)

A collaborative research initiative between the NYC Department of Health and the New York University School of Medicine to assess and analyze NYC air quality and the impact of coarse particulate matter on the health of New Yorkers. This project is in its third year and on Researcher is seconded to DOHMH for this initiative.

Program: Big Cities Health Coalition
Funders: de Beaumont Foundation
Current Yr: \$145,000; **Total Amt:** \$245,000

The Big Cities Health Coalition allows leaders of the largest municipal health departments in the U.S. to exchange best practices and discuss the issues affecting big urban populations through conference calls. Grant funding enabled New York City to host a meeting of the Coalition in May 2009 with the goal of building a stronger coalition around large urban health issues. Over 30 officials representing 15 health departments attended the meeting, and one report on the meeting and its discussions was developed by the Milbank Memorial Fund. Funding was renewed to establish a collaborative internet workspace for Coalition members and one Coalition Coordinator who is seconded to DOHMH as of August 2010.

Program: Depression Screening and Management in Primary Care
Funder: Forest Laboratories
Total Amt: \$196,560

A project to increase depression screening and care management at Lutheran Medical Center using a coordinated team approach with a trained primary care clinician, a psychiatrist and a care manager.

Program: Integrating Colorectal Screening within Other Chronic Disease Programs
Funder: New York State Department of Health/ Health Research, Inc
Total Amt: \$196,560

A project to increase colorectal cancer screening by training providers using electronic health records to incorporate colorectal cancer screening as part of their clinical routine and by producing a media campaign targeting communities that have the lowest colorectal cancer screening rates.

Program: Health Ministries in Faith-Based Organizations
Funder: Bristol-Myers Squibb
Total Amt: \$150,000

A project to explore and demonstrate the effectiveness of Faith Based Organizations as health promotion “ministries” and to improve health outcomes for the members of ten Faith Based Organizations in Brooklyn. Trained “health ministers” are raising awareness about the importance of timely health screenings and appropriate health behaviors as well as motivating, referring and counseling their members on how and when to seek health services where appropriate.

Program: Take Care Staten Island
Funder: Staten Island Foundation
Total Amt: \$150,000

A three-year project to develop, launch, and implement a cohesive plan to adapt the Take Care New York 2012 initiative to address the specific health issues of Staten Islanders and set goals to measure success.

Program: Investigational Study for the Prototype OraQuick® Rapid HCV Antibody Test in Populations at Risk for HCV Infection
Funder: OraSure Technologies, Inc.
Total Amt: \$118,000

An investigational study of a rapid test for Hepatitis C at community-based organizations throughout New York City over one year. The Office of Viral Hepatitis Coordination HCV testing program relies on laboratory testing of blood specimens, which may take up to four weeks before results are returned to the client. OraSure Technologies has developed a device that is currently awaiting FDA approval which will increase the rapidity with which New Yorkers can be notified of their status and expand the number and type of settings in which testing can be conducted to reach high risk populations. The study found the test to be highly accurate and was determined to be the most appropriate, effective, and preferred test by research staff members.

Program: Enhanced Salmonella Surveillance
Funder: Association of Public Health Laboratories, Inc.
Total Amt: \$95,000

A one-year program to conduct enhanced Salmonella surveillance using graduate student interns to ensure rapid, coordinated detection and response to multi-state outbreaks of enteric diseases. As of August 2010, two Interns were seconded to DOHMH for this project.

Program: Green Cart Outreach Coordination Project
Funder: Mayor's Fund to Advance the City of New York
Total Amt: \$76,680

A one-year project to connect community residents to their neighborhood Green Cart in order to encourage healthier diets and ensure sustainability of Green Cart vendors. An Educational Outreach Coordinator has been seconded to DOHMH for this project as of August 2010.

Program: Evaluation of Active Design Guidelines
Funder: Robert Wood Johnson Foundation: *Active Living Research*
Total Amt: \$48,876

A project to produce a set of evidence-based guidelines encompassed within a broadly-used and widely-disseminated document that will address the issues of building, site, and urban design features that will promote physical activity and active living in NYC.

Program: Breastfeeding Initiative in Staten Island
Funder: United Hospital Fund
Current Yr: \$33,000; **Total Amt:** \$66,000

The first year of funding was to establish a breastfeeding friendly environment at Richmond University Hospital and Staten Island University Medical Center. The second year of funding was to provide oversight and technical assistance to the newly created breastfeeding programs at both hospitals.

Program: Text4Baby
Funder: Aetna Foundation
Total Amt: \$40,000

Text4Baby is a national initiative that provides free evidence-based text messages focused on a variety of topics critical to maternal and child health to underserved populations. DOHMH is managing the initiative in New York City and one Intern is seconded to DOHMH for it.

Program: Cribs for Kids
Funder: Private Individuals
Total Amt: \$30,022

Funding is providing portable cribs and safe sleep education to families with the highest risk of infant suffocation deaths that result from unsafe sleeping environments for newborns.

Program: Alcohol Tax Research
Funder: Milbank Memorial Fund
Current Yr: \$10,000

Funding is to support research to assess the projected impact of an alcohol tax on consumption behaviors.

3. Public Health Solutions

Public Health Solutions (PHS) is a nonprofit organization that develops, implements and advocates to prevent disease and improve community health. PHL conducts comprehensive research providing insight on public health issues, create and manage community health programs, and provide services to organizations to address public health challenges. PHS was founded in 1957 under the name Medical and Health Research Association of New York City to enable the NYC Department of Health and other organizations to conduct health research to inform their work. Today, Public Health Solutions uses research to help illuminate critical public health issues and to design, implement and assess effective methods for preventing disease and improving health in New York City and beyond.

PHS personnel seconded to DOHMH are as follows:

- Division of Emergency Preparedness and Response: 2 Administrative Managers
- Bureau of STD Surveillance and Control: 1 Program Manager, 1 Program Assistant
- Bureau of Vital Statistics: 1 Associate Staff Analyst, 1 Project Manager, 1 Research Assistant, 1 Production Coordinator, 1 Research Scientist, 1 Sr. Research Scientist, 2 College Aides, 1 Administrative Assistant II, 1 Supervising Nosologist, 1 Office Aide II.

Section Three – Problems & Issues in the Community

Please see Section One for a discussion of problems and issues in New York City related to public health, as well as a full listing of community resources. Take Care New York's community partners list is available online at http://www.nyc.gov/html/doh/html/tcny/tcny_partners4.shtml.

Section Four – Local Health Priorities Section Five – Opportunities for Action

Below are documents that describe the New York City Department of Health & Mental Hygiene's analysis and response to public health issues in the community, our local health priorities, and opportunities for action.

A. DOHMH Methodology

- Frieden TR, Bassett MT, Thorpe LE, Farley TA. [Public health in New York City, 2002-2007: confronting epidemics of the modern era](#). *Int J Epidemiol*. 2008 Oct;37(5):966-77.
- Frieden TR, Mostashari F. [Health care as if health mattered. \[Commentary\]](#). *JAMA*. 2008 Feb 27;299(8):950-2.

B. Take Care New York

- Summers C, Cohen L, Havusha A, Sliger F, Farley T. *Take Care New York 2012: A Policy for a Healthier New York City*. New York City Department of Health and Mental Hygiene, 2009, accessible online at <http://www.nyc.gov/html/doh/downloads/pdf/tcny/tcny-2012.pdf>.
- TCNY Ideas for Action, accessible online at: <http://www.nyc.gov/html/doh/html/tcny/tcny-ideas-for-action.shtml>

C. Environmental Health

- PlaNYC: A Greener, Greater New York: Air Chapter: <http://www.nyc.gov/html/planyc2030/html/plan/air.shtml>
- NYC Community Air Survey: DOHMH and Queens College of the City University of New York (QC-CUNY) are conducting the *New York City Community Air Survey*, or NYCCAS, a program to monitor air quality across New York City. This program studies how pollution from traffic, buildings, and other sources varies among NYC's diverse neighborhoods. NYCCAS monitors pollutants that cause health problems and come from motor vehicles and other sources like boilers or furnaces in buildings. These pollutants include fine particles, nitrogen oxides, elemental carbon, sulfur dioxide and ozone. As part of the Mayor's blueprint for long-term

planning and sustainability, PlaNYC, NYCCAS will help DOHMH better understand the relationship between air pollution problem and health in specific NYC communities. Reports detailing the results of NYCCAS can be downloaded from <http://www.nyc.gov/health/nyccas>.

D. Collecting & Using Health Data: The Primary Care Information Project

1. Background

The current U.S. healthcare system is not designed to deliver quality care or minimize costs. Paper systems are error-ridden: among Medicare patients in ambulatory care, there are an estimated 530,000 annual preventable serious medication errors, with an estimated cost of \$887 million nationally. Individuals in the U.S. receive only about half of recommended preventive services. Government intervention is necessary to address this market failure in the healthcare system.

New York City rose to this policy challenge. In 2005, Mayor Bloomberg announced a new priority initiative under DOHMH to improve population health in disadvantaged communities through the use of innovative health information technology. To fill this mandate, the city convened the Primary Care Information Project (PCIP), a taskforce of top practitioners charged with closing the technology gap while improving quality of care for low-income New Yorkers. In four years, the taskforce has grown into a 60-person Bureau with a cumulative budget of \$60 million in city, state, federal and private funds.

Recognizing that EHR adoption alone would not improve quality, PCIP elected to work with a vendor to improve quality. In March 2007, following a rigorous and competitive procurement, DOHMH selected eClinicalWorks (eCW) to develop a state-of-the-art prevention-oriented system to offer to primary care providers in underserved communities. During the development process, PCIP identified 34 prevention-oriented clinical process- and outcome- measures based on Take Care New York (TCNY), the City's health policy agenda. TCNY represents the top ten health areas that present New Yorkers with the greatest disease burden and are amenable to intervention. These areas include smoking cessation; cardiovascular health, including diabetes; HIV prevention; cancer screening; depression screening, and treatment for drug abuse.

The result of PCIP's collaboration with eCW is the TCNY EHR, an innovative system that includes features designed to improve population health. These features include: a Clinical Decision Support System, which issues preventive care reminders and helps practices adhere to clinical guidelines; a Registry function, which allows providers to rapidly identify cases of interest and track their performance in managing patients with specific conditions; and an automated system for creating Quality Measure Reports, which offer a practice-wide snapshot of patient performance on the TCNY measures.

From the start, PCIP recognized that many practices would not adopt high-quality EHRs, however innovative, without substantial help. To facilitate adoption, PCIP began to offer eligible practices a package of software and services including licenses, training, data interfaces, and two years of maintenance and support for free. In return, a practice has to contribute \$4,000 to a quality improvement fund and bear the costs of hardware, IT installation and support, internet connectivity, and productivity loss. For the neediest practices, PCIP has been able to leverage economies of scale to subsidize hardware and infrastructure.

2. Support

The PCIP Bureau is located in DOHMH's Division of Healthcare Access and Improvement. In addition to city funds, these foundation and corporate sponsors have provided support for hardware, software or technical assistance directly or indirectly to providers:

- [Wellpoint Foundation](#)
- [Robin Hood Foundation](#)
- [Interboro Regional Health Information Organization](#)
- [Emblem Health](#)
- [Dell](#)

In 2010, PCIP was awarded a federal grant to establish the Regional Extension Center for New York City. This new organization, known as [NYC REACH](#), will help over 4,500 providers across the five boroughs achieve "Meaningful Use" of an EHR, as defined by the federal government. NYC REACH has selected three Preferred EHR vendors - eClinicalWorks, Greenway, and MDLand, and will support implementation services for providers using these systems.

EHRs are critical both to improving American health care and to enabling more rational payment structures. But unless we take great care to implement our programs in such a way that improved health is the primary outcome, we run the risk of investing federal HIT dollars without seeing any improvement in the quality, safety, or efficiency of health care.

3. 2010 Goals

- Extend the TCNY EHR to 2,500 providers, reaching 2 million patients.
- Provide a million patients with self-management tools including patient portals
- Support EHR-enabled primary care providers in standardized health information exchange
- Implement a quality improvement collaborative tied to the "Patient-Centered Medical Home"
- Provide participating practices with clinical quality scorecards for evidence-based best practice
- Pilot a reward and recognition program for high-performing providers
