Special Medical	289	718	22.6	40
Structural Family Therapy	71	166	11.0	82
Trauma Systems Therapy	49	123	8.1	6
<b>Total</b>	<b>9,122</b>	<b>21,241</b>	<b>10.1</b>	<b>4,669</b>

Number of families who received prevention services after a reunification discharge from foster care <sup>2</sup>	222
Number of children who received prevention services after a reunification discharge from foster care <sup>2</sup>	364

Number of families who received prevention services and were also served by ACS Family Service Unit (FSU)	1,721
---	-------

Number of families who received prevention services and were living in DHS homeless shelter	1,054
---	-------

**2. Children Who Entered Foster Care<sup>3</sup> October - December 2019  
Who Had Been Receiving Child Welfare Prevention Services <sup>4</sup>**

Children who were placed in foster care during prevention services	187
Children placed in foster care within 6 months after prevention services	71
Children placed in foster care 6-12 months after prevention services	26

**Data Notes:**

\*New ACS prevention services contracts will begin July 1, 2020. To thoughtfully and safely transition the prevention services system between contract periods, ACS has been gradually reducing caseloads and adjusting intake of programs that will close or reduce in size by June 30, 2020. This has been done carefully in phases to ensure continuous high quality support for children and families currently in services. The estimated slots available identified in this report does not account for these adjustments. Additionally, New York City began experiencing widespread community transmission of the novel coronavirus/COVID-19 in March 2020. Public health concerns, social distancing measures, and ACS and prevention providers' focus on emergency response may have contributed to fewer enrollments during the last weeks of the quarter.

\* \*The data in Table 1 are point-in-time and are reported as of the last day of the reporting quarter for comparison and consistency purposes. This is necessary because some families may have participated in more than one program during a given quarter, and data about families served by FSU or families living in DHS shelter are available only as point-in-time.

<sup>1</sup> Estimated available slots = program contract capacity minus active cases, and minus referrals pending for less than 14 days. "Advocates" cases during initial engagement phase may not be captured in the system of record nor fully accounted for in these data.

<sup>2</sup> Includes families and children who were reunified when preventive services were active or for who whom a new preventive case was opened within 60 days after reunification.

<sup>3</sup> Excludes Close to Home placements.

<sup>4</sup> Table 2 includes data for the full 3-month period and is not a subset of Table 1.

Data sources: PROMIS, Connections, DHS CARES data match with ACS.
