POLICE DEPARTMENT.

Report for the Year Ending December 31, 1898.

POLICE DEPARTMENT OF THE CITY OF NEW YORK,
No. 300 MULBERRY STREET,
NEW YORK CITY, May 1, 1899.

Hon. ROBERT A. VAN WYCK, Mayor, City of New York:

SIR—The Police Board of the Police Department of The City of New York respectfully submit a report of the operations and transactions of the Department and Force, for the year ending December 31, 1898.

The Police Board, appointed on the 1st day of January, 1898, met at the Central Department on the same day and organized by the selection of Commissioner Bernard J. York as President, and Commissioner Thomas L. Hamilton as Treasurer. Subsequently the following Standing Committees were appointed:

Repairs and Supplies—Commissioners Sexton, Hamilton and the President.

Pensions—Commissioners Phillips, Hamilton and the President.

Elections—Commissioners Hamilton, Sexton and the President.

Rules and Discipline—The President, Commissioners Hamilton and Phillips.

On the 21st day of May, 1898, Commissioners Thomas L. Hamilton and William E. Phillips were removed from office, and on the same day, Jacob Hess was appointed Commissioner, in place of Commissioner Hamilton, and was selected as Treasurer of the Board. On June 30, 1898, Henry E. Abell was appointed Commissioner, in place of Commissioner Phillips, and on the same day the Standing Committees of the Board were appointed as follows:

Repairs and Supplies—Commissioners Sexton, Hess and the President.

Pensions—Commissioners Abell, Hess and the President.

Elections—Commissioners Abell, Sexton and the President.

Rules and Discipline—The President, Commissioners Sexton and Hess.

The Board has, during the year, prepared and had printed for distribution to the Force a new Manual of Rules and Regulations for the government and discipline of the Department and Force. Many of the rules are new and nearly all revised so as to conform to the Charter and the changed condition of the Force. The new rules are so condensed and brought together under appropriate captions and subjects that the number is reduced from 375 to 49.

New shields have been furnished to all officers and members of the Force. This was rendered necessary, owing to the difference in design of shields worn by the members of the Police Forces transferred to and becoming members of the consolidated Force, and to the fact that patrolmen in the Boroughs of Brooklyn, Queens and Richmond had numbers upon their shields identical with patrolmen of the Boroughs of Manhattan and The Bronx. The Police Force at this time is uniformed and equipped alike, according to rank, in all boroughs.

The system of requisitions for supplies and repairs, and of procuring the same for the Department, has been materially changed from that heretofore prevailing. All requisitions for supplies or repairs are now made in duplicate and referred to the Committee on Repairs and Supplies for approval. If the required repairs or new work exceed \$100 in approximate cost, estimates are invited from at least two reputable dealers to furnish the same, and the lowest bid of a responsible dealer, if less than \$200, is accepted. No purchase of supplies or doing of repairs where the cost exceeds \$200, is permitted without resolution of the Board. If supplies required are not in stock, the same rule applies. All persons furnishing supplies or repairs are required to enter into an agreement with the Police Board, and to furnish a bond for the faithful performance of the agreement.

For many years it has been the custom to permit parties to furnish articles of clothing and equipments of the Force, without other form than permission to have the articles sold for their account. This Board publicly invited proposals to furnish the various articles, and inspected samples of each. The award was made to the lowest bidder for approved goods, and an agreement entered into between the parties, under sufficient bond in each case. It is believed this system will result favorably in every particular as to uniformity, grade and quality of goods, and especially as to reducing the cost of uniform and equipment.

The large sums of money annually disbursed by the Police Board in the various items of appropriation, impelled the adoption of a more thorough system of audit and accounts. Duly qualified persons were appointed as auditors to examine all bills and to certify their correctness in all particulars. This bureau has relieved the Treasurer of many of the details of his office, and is found to be of great importance in the financial transactions of the Department.

Pursuant to the provisions of the Charter, the Police Board is authorized and directed to issue licenses for places of amusement, for concerts, with or without permission to sell ales, wines and liquors, for boarding-house runners, for emigrant boarding-houses, and to give exhibitions. The schedule hereto appended shows the number of each class of license granted, the number denied, and the amounts received for each class. These amounts have been paid over to the Comptroller as the law directs.

Early in the year the necessity of changing the boundaries of Precincts and to change the numbering throughout the system was considered. In the boroughs of Manhattan and The Bronx the boundaries were changed slightly, but the number was increased from thirty-eight to forty-two, the last named now being covered by the Harbor Police. In the Borough of Brooklyn it was necessary to give all the Precincts new numbers, though the boundaries remained nearly as they were before consolidation. Entirely new Precincts were established in Queens, together with several sub-precincts in the outlying towns and villages annexed under the Charter. The Borough of Richmond comprises the Eightieth Precinct, with three sub-precincts. The table hereto appended shows the number of old and new Precincts, and the location of station-houses, also the location of the several squads not included in the Police Force attached to Precincts.

No appointments were made to the Police Force during the year, for the reason that by the provisions of the Charter the maximum number of patrolmen was fixed at 6,382. The reinstatement ordered by the Courts, together with the persons whom the Board was obliged by law to recognize as members of the Force in the borough of Queens during the year, kept the number above the maximum fixed by the Charter. On the 31st day of December, 1897, there were 4,437 patrolmen in the then City of New York. On the 31st day of December, 1898, there were 4,702 patrolmen, an increase of 265, due to the transfer of 306 from the Central Park Force and 90 from the Brooklyn Bridge Force (the latter now enumerated in the Manhattan Force), making a total of 396 added to the old City of New York. Adding this 396 to the Patrol Force in December, 1897, we have a total of 4,833, indicating that the Force in Manhattan and Bronx, exclusive of Park and Bridge Force, has decreased 131. This decrease is just as marked in the Borough of Brooklyn, but the necessity of providing a Patrol Force in Queens necessitated the reduction in the three boroughs first named. In the Borough of Richmond the Force is practically the same as in 1897.

There is a pressing necessity for an increase in the number of patrolmen, the necessity for properly patrolling the Borough of Queens together with the increase in the population of all boroughs require that additional men should be provided; the patrol posts as divided in many precincts are so large in territory as to be almost impossible to expect the proper patrolling it by an officer; this will apply to many posts in the thickly settled parts of the boroughs of Manhattan and Brooklyn, as well as in the other boroughs.

The following comparative statement of the [relative strength of the Police Force to population in The City of New York, exhibits in the clearest manner the importance of giving this subject consideration with as little delay as practicable:

YEAR.	POPULATION.	PATROL FORCE.	POLICE TO POPULATION.
1876.....	1,075,532	2,261	1 to 475
1896.....	1,934,077	3,684	1 to 525
1899 (Greater City).....	3,553,953	6,396	1 to 555

The expenses for the year 1897 of maintaining the Police Departments, or their equivalent in the several cities, towns and villages consolidated into The City of New York (as shown in detailed schedule) with the exception of that portion of the Township of Hempstead which was annexed to the Greater City, the apportionment of the cost of which cannot as yet be ascertained, amounted to the sum of \$10,235,280.14.

The expense for the year 1898 of the Police Department of The City of New York (as also shown in detailed schedule) amounted to the sum of \$10,705,764.91; showing an excess of cost for the year 1898 over that of the year 1897 of \$470,484.77.

There are two items of expense included in the cost for the year 1898 which should not be considered as particularly chargeable to that year, to wit: There were reinstated in the year 1898, by order of the courts, 117 men. The salaries, costs, etc., paid in that year, on account of said reinstatements, amounted to \$116,032.04. In December, 1897, the salaries of the Detective-Sergeants, Sergeants, Roundsmen and Patrolmen of the Police Force of the late City of Brooklyn were each increased \$100 per annum; there being, on December 31, 1897, in the late City of Brooklyn 1711 men in the grades affected by this increase, which made an extra expense (estimated) for the year 1898 of \$171,100. Making a total extra expenditure in the year 1898 on these two items of \$287,132.04, showing that the net increase in expense of maintenance for the year 1898 (which includes the regular advancement in pay allowed by law), over that of the year 1897, amounted to the sum of \$183,352.73.

The reports of the Chief of Police and the several bureaus of the Department hereto appended, exhibit not only a valuable collection of miscellaneous statistics, but also the magnitude and importance of the public work demanded of this Department in the interest of the public peace and welfare.

Special attention is respectfully called to the report of the Chief of Police relative to the condition of station-houses, and the needs of the Department in this particular. The prompt and efficient performance of police duty depends in great measure upon the facilities afforded for such performance, and this Board desires to emphasize the fact that in many portions of the Greater City the Police Department is struggling with primitive appliances and insufficient accommodations. How much of the responsibility for this condition is attributable to former police administrations or other authorities, is not the province of this Board to determine; but, inasmuch as this Department is expected, and required by law, to see that all public work is performed in promptness, it is recommended that proper consideration be given to this matter.

The work of making the station-houses, particularly in the Borough of Queens, more complete and satisfactory, has been carried on as best could be done, and, so far as the funds in hand will permit, the work will be continued as expeditiously as possible.

The suggestions of the Chief of Police relative to better patrol-wagon service, and the establishment of a signal system over the entire Greater City, are worthy of serious consideration, in view of the fact that many other cities of the United States are proportionately better provided in these respects to perform the duties required of them.

The statistical tables attached show the number of arrests, offences, ages, and various other details of Police Duty.

The report of the Board of Surgeons, hereto attached, shows that 80,724 days' time were lost by the Police Force during the year, by sickness and other disabilities. From this report it will be seen that, notwithstanding the decrease of the force, herein above alluded to, there was a much larger number of men sick in December than in any other month during the year. The difference between the number of men reported sick in June and December is very striking.

The death-rate is found to be 1.38 of the entire force, a little less than 14 per thousand. The percentage is a slight increase over the figures given for the force of the old City of New York for 1897, but not significant.

Under the law, the Sanitary Company of Police is composed of the Boiler and Health Squads. The report of the former is an instructive exhibit of the work performed in connection with the examination of persons competent to manage steam boilers, and in testing boilers. The very few accidents resulting from inefficient management and imperfect test, as shown in the report of the Boiler Squad, amply testifies as to the thoroughness of examination and faithfulness of the officers detailed to these specific duties.

The Health Squad is composed of members of the force detailed to the service of the Health Department of the city. The value of the work performed by this squad, and its extent, are shown in the report hereto attached. In view of the health of this city and its comparatively low death-rate, and specially in view of the fact that this work should be performed by officers charged with the enforcement of law, the expense incurred in the payment of the salaries of these detailed men is fully justified.

The special work assigned to the Harbor Police, and the availability of naphtha launches for service in the busy harbor of this city, are shown in the report of the captain of the Forty-second precinct, hereto attached. The necessity for an improved launch for our harbor service is unquestionable, and the Police Board has no hesitation in urging a prompt consideration of this matter.

Attention is called to the report of the Property Clerk, as showing the large value of property annually handled by him.

The report of the Bureau of Clothing and Equipment evidences the variety and quantity of material entering into the uniform and equipment of members of the Force. These materials are sold in the Bureau of Clothing and Equipment at Central Department for account of the persons furnishing the same respectively, and amount in the aggregate to the large sum of \$182,954.11. Were it not for the establishment of this Bureau, and its systematic management, it is questionable whether the Police Force would or could be equipped uniformly, or present so good an appearance when called upon for service in large bodies.

The report of the Superintendent of Elections, hereto attached, shows in detail the transactions of the Bureau of Elections for the year, though the figures given can scarcely convey an idea of the vast amount of labor necessary to produce them.

POLICE DEPARTMENT OF THE CITY OF NEW YORK,

OFFICE OF THE CHIEF OF POLICE,

No. 300 MULBERRY STREET,

NEW YORK, January 15, 1899.

To the Honorable the Board of Police :

GENTLEMEN—I have the honor to submit herewith tables showing as follows, in the order named :

The Number of Persons Arrested (Male and Female), by the Police Force of this city, for all Offenses during the year 1898, Showing the Number of such Arrests made by each Precinct and Squad.

Offenses for which Arrests were Made.
Nativity of Persons Arrested.
Whether Persons Arrested were Married or Single.
Degree of Education of Persons Arrested.
Occupations of Persons Arrested.
Persons Aided by the Police.
Buildings Found Open and Secured by the Police.
Suicides.
Reports Made and Work Performed.
Distribution of Police Force, not including Chief, Deputy Chiefs, Inspectors, Surgeons and Telegraph Force.

Rank, and the Number in each Rank, in the Police Force on December 31, 1898.

Arrests for Gambling of all kinds during the year, Disposition of same, Fines Imposed and Cash Seized.

Changes in the Police Force during the year 1898, by Promotions, Deaths, Retirements, Dismissals, Resignations and Reinstatement by order of Courts.

In submitting the foregoing figures, which show, in part, the work of the Police Force of this city for the year 1898, I must remind your Honorable Board that on January 1, 1898, when consolidation took effect, the Police Force of The City of New York was composed of what was on the day preceding the Police Forces of the former cities of New York, Brooklyn and Long Island City, the County of Richmond and the various towns and villages of the County of Queens that were consolidated. In nearly every one of these there were different rules, in some practically none at all, different methods of transacting daily routine business, different uniforms, devices and insignia of office. In many cases the numbers of the precincts in different boroughs were duplicated, and in some cases there were four different precincts bearing the same number. The work of correcting this condition of things was promptly begun, and has continued uninterruptedly up to the present time. The entire 80 precincts in the city have been redistricted and numbered consecutively. In doing this the Twenty-seventh Precinct, or Central Park, was added to the Borough of Manhattan; two new precincts, the Thirty-ninth and the Forty-first, were created in the Borough of The Bronx, consisting of Bronx Park and parts of former precincts that were too large to be manageable; one new precinct, the Seventy-third, or Prospect Park, was added to the Borough of Brooklyn; four new precincts were created in the Borough of Queens, namely, the Seventy-sixth, or Flushing, with sub-stations at College Point and Whitestone; the Seventy-seventh, or Newtown, the Seventy-eighth, or Jamaica, with sub-station at Richmond Hill, and the Seventy-ninth, or Rockaway, with sub-station at Rockaway Beach, comprising among them all that part of the former County of Queens within The City of New York, exclusive of the former Long Island City, which was already divided into two precincts; and in the Borough of Richmond one precinct was established, with three sub-stations. At the same time the small parks throughout the city, the policing of which had been by the Charter made part of the work of this Department, were made portions of precincts and regularly patrolled as such.

The different customs and the varied methods of doing police duty in the several portions of the city were altered and abolished in order to compel regularity in the business conduct of the entire force, and necessary arrangements were made for uniforming the clothing, shields, devices and equipments of the men in all parts of the city and in all ranks. The result is that, while at the beginning of 1898 the Police Force of this city was working along different lines and hampered by different methods, traditions, appearance and other essentials, the beginning of the year 1899 finds a closely knit force of men, obviously belonging to the same organization, pursuing their duties with a singleness of method and purpose that constitutes as near perfection as it has been possible to get so far, but that will go straight along on these lines now in operation until the standard of perfection is attained.

A committee was appointed by your Board to revise the rules and regulations of the Department. This work was successfully accomplished. The rules, as revised, were approved by your Board, printed in pamphlet form, and each and every member of the Department has been supplied with a copy. This is a very important matter, because the absence of these uniform rules made it very difficult to maintain the discipline of the force at the standard desired. The rules of the former Brooklyn Police in many cases conflicted with those of the former New York City Police, and the rules of the various other municipalities embraced in the territory of the present city differed still more widely. In some cases there were practically no rules whatever to guide the Police. The making of a uniform set of rules was a prime necessity, and its accomplishment means the possibility of keeping the ranks of the force, in point of discipline and efficiency, at the highest possible standard.

Regular drills of the entire force have been conducted in the different boroughs under the supervision of Captain Anthony J. Allaire, of the Central Office Squad, Drill Master. A school of instruction has been established in the Borough of Queens, in charge of which Sergeant Michael Smith of the Central Office Squad has been placed, and those members of the Police Force who formerly belonged to the forces of the Borough of Queens have been attending this school for the purpose of being instructed in their duties as members of the Police Force of this city. Excellent results have been obtained from the drill instruction, as was to be seen on the occasion of the annual parade of the Police Force which took place on June 1, 1898, after but a few days of preparation, and which was reviewed by his Honor Mayor Robert A. Van Wyck, the members of your Honorable Board, and other distinguished citizens of this municipality. This was the first parade of the consolidated Police Forces brought into the Department by the Greater New York, and it was in every way creditable to the men participating. It is safe to say that there never was before, in any country, a police parade of so great a magnitude as this, composed as it was of nearly six thousand men of all ranks and grades. The line of march was from Battery place to Broadway, to Twenty-third street, to Madison avenue, to Fiftieth street, the column proceeding through Fiftieth street and down Fifth avenue. When the head of the column reached Thirtieth

street it broke into column of fours, and line was then formed, ranks opened, and his Honor the Mayor and the members of your Honorable Board passed in review. After being reviewed in line, column of companies was formed, and marched in review before his Honor the Mayor, the members of your Honorable Board and others, at Worth Monument, where the grand stand was located, and thereafter dismissed. I was in direct command of the parade, which was made up of five regiments, each commanded by a Deputy Chief, the regiments comprising each two battalions, commanded by Inspectors, while the ten companies into which each battalion was divided were headed by precinct commanders and Sergeants. Preceding each regiment was a military band, and I would in this connection make the suggestion that hereafter a band be secured for each battalion, thus making twice the number in the parade, which would furnish the volume of music absolutely necessary to produce the best results in the marching.

His Honor the Mayor, in his address from the reviewing stand, gave the Police great praise for the manner in which they acquitted themselves, and the praise was well merited, notwithstanding the fact that the difficulties of preparation had been great. When I was assigned by your Honorable Board to duty as the executive head of the Department, I found confronting me a previous resolution of your Board indefinitely postponing the parade. Upon my recommendation this order was rescinded, and the work of preparation for the parade was begun and completed within a few days.

The review of the parade by his Honor the Mayor and your Honorable Board was made the occasion of the bestowal of the Rhinelander medal for valor—for the first time—upon a member of this Department. This is a medal that is to be presented each year to the member of the force who has shown during the year preceding its bestowal especial and surpassing bravery, coupled with risk of deadly harm. To ascertain the one most worthy to receive this medal on its first bestowal, the records of the brave deeds done by members of the Department in all the boroughs were examined. After mature deliberation and consideration, it was agreed that the one to whom the medal should be given was Patrolman Frederick Stahl, of the Fifteenth Precinct, who, at the imminent risk of his life, had rescued twenty persons from a burning building, and in attempting to rescue another one received injuries which kept him in his home for weeks.

In a body of men whose most important duty is the protection of the lives of our citizens, bravery should receive from the head of the Department in charge of such body the highest possible recognition. Officer Stahl received from your Board the award of the Rhinelander medal and a certificate setting forth the history of his brave act and the resolutions of your Honorable Board concerning it. As an incentive to like duty on the part of other members of the force, I made Officer Stahl a Roundsman immediately at the close of the address of his Honor the Mayor. In this capacity he has since served with credit to himself and to the Department.

I desire to call your attention in a general way to some of the work that has been done by the Police Force during the past year. I might state that the year 1898, having been a "war year" and this city a centre or exchange for a considerable amount of military and naval operations, owing to its position and the magnitude of its importance as a seaport city and railway centre, an immense amount of work outside the lines of their routine duty has been required of the rank and file of the Department. Added to this is the fact that the year 1898 was the first of the corporate existence of the present City of New York, composed of a number of cities, towns, villages and hamlets, each of which, prior to 1898, had an entirely independent system of local government. Immediately upon the consolidation taking effect, on January 1, 1898, men were assigned to police service in the various portions of the territory comprised within the present city which were not adequately protected or totally unprotected, so that early in February there was in the Borough of Queens a force of Police sufficient to give systematic protection to the entire borough.

From early spring bodies of troops were constantly passing through this city on their way to the front, or, after hostilities had ceased, to their homes or to hospitals or camps. It was necessary to provide police escort for all these troops, so that they might not be unduly hindered or annoyed. In several instances the returning troops paraded through various prominent and busy streets, both in going to and in returning from their stations, and to see these parades such unprecedentedly large crowds flocked from all over the city and the surrounding country that the Police were severely put to the test to prevent disastrous disorder and confusion. That the Police succeeded in their object is evidenced by the fact that, notwithstanding the immense crowds that gathered to see the soldiers, and the excitement and enthusiasm attending on the various parades, no casualties resulted and no thefts occurred. The troops were not in any way embarrassed in their march, and the public were fully protected from pickpockets, thieves, etc.

When sick and injured soldiers began to arrive in this city on their way to points beyond, and it was necessary to furnish transportation for them between the different railway and steamboat terminuses, the patrol wagons of this Department, with their drivers, were freely placed at the disposal of the army and hospital authorities, and rendered very effective aid as improvised ambulances. Proper protection was also afforded at the points of embarkation and disembarkation for sick and wounded soldiers, in order that they might be as free from annoyance and discomfort as possible.

The commencement of the war, bringing as it did all sorts of conflicting rumors as to the whereabouts and the object of attack of some of the Spanish vessels, caused a feeling of uneasiness that might, under certain conditions, have precipitated a considerable exodus from the city and a certain amount of disorder on the part of lawbreakers, to whom unusual confusion throughout the city would have been of advantage. Arrangements were therefore made whereby the entire Police Force could be made available at almost an instant's notice. The men and their commanders were held in reserve and in close touch with headquarters by special and rigorous orders, and this vigilance and readiness were not relaxed for the usual methods of controlling the force until every vestige of necessity for their continuance had vanished. The seriousness of the situation is now a matter of opinion; but there can hardly be two opinions as to the proper course to pursue when there was the least indication of possible need for the prompt and most strenuous efforts of the whole Police Force.

A number of persons communicated with me expressing their fear that the easy access which could be had to the various parts of our water supply might form a temptation to some agents in the pay of Spain to contaminate or poison the water supply of this city, or cause such damage to the conduits that the supply would be partly or wholly cut off. To guard against any such act, all parts of the water system in all the boroughs of the city, which were so exposed as to make such damage possible, were guarded night and day by men specially assigned to this duty, and the work was kept up until a short time ago. Special supervision was also given to the Brooklyn Bridge to prevent the possible wrecking of that structure or damage to it of any kind.

The consolidation of the various municipalities that comprise the present City of New York has vastly increased the area of waters in the rivers and bays that the Police must patrol. The protection of life and property therein demands that it be as adequately and effectively patrolled in proportion to its needs as the land embraced within the city limits. Among the tracts of water within the city limits that are not now patrolled are the Kill Von Kull, Sheepshead Bay, Bowery Bay, Flushing Bay, Gravesend Bay, Jamaica Bay, Far Rockaway Bay, and Little Neck Bay. To patrol these properly, as well as the waters within the jurisdiction of the former City of New York, and to render constantly efficient protection to the property on and adjacent to all the waters of the city, as well as to keep a proper surveillance over all crafts, especially at night time, it is necessary that there be secured for this service at least ten steam launches, to be of such size and build as to enable them to stand the roughest weather, to have a speed of from 13 to 15 miles an hour, and to carry each not less than a dozen men, for use in any emergency that might arise. There are at present a number of naphtha launches in use in this service. After a thorough trial these have been found to be impracticable for police service on the waters of this city. They are delicately constructed, and as continuous service is required of them the machinery frequently becomes displaced and out of order, thus rendering them almost useless when prompt action is imperative. On this account I would respectfully recommend that at the earliest opportunity at least ten steam launches of the kind heretofore referred to be procured by your Honorable Board for service in the waters of this city.

The very essence of proper police service on the rivers and on the bay requires a boat much larger than the present Steamer "Patrol," with a speed that would enable it to overtake anything in the shape of a boat that might come into these waters. I recommend that such a boat be procured as soon as possible.

In connection with this subject, I desire to call your attention to the very valuable service which the river Police performed during the year 1898. The force of the Forty-second Precinct, together with the steamer "Patrol" and all the available launches, were used in affording protection to the late Spanish Cruiser "Vizcaya," which arrived at this port four days after the explosion of the United States battleship "Maine," and which remained here from that date until February 28, 1898. This service was of the most arduous and exacting kind, and the fact that it was so successfully performed that not an accident of any kind happened, is the best indication of the faithful duty in this regard performed by the Police.

Other important duty was performed by the Harbor Squad during the year in establishing a guard of boats about the warships of the United States Navy, that were from time to time arriving in this port, co-operating with the Navy Department in guarding submarine mines in various parts of the harbor, protecting and guarding the various ships in this port that were being converted into auxiliary cruisers of the United States Navy, preventing unauthorized persons from visiting these vessels or interfering in any way with the work going on there.

Particular attention is directed to the work of this Squad in connection with the grand naval parade which took place on the waters of the bay and harbor of New York to welcome the return of the victorious fleet from Cuba. The steamer "Patrol," the fire steamers "Van Wyck" and "Zophar Mills," the police launches, and six large tugs hired for the occasion, each in command of an Inspector, the entire fleet being under my direct personal supervision, were used to preserve order and to protect life and property during this parade. This was the largest naval parade ever held in this country, and it is estimated that more than a million people viewed it from the shores and from a multitude of vessels participating on this occasion. No accident whatever, either on land or water, occurred as a result of the parade to mar the day.

From August 1 to August 29, during the stay of the fleet off Tompkinsville, Staten Island, the steamer "Patrol" and the launches of the Department were engaged in protecting the

vessels from unauthorized visitors; preserving order among the crowds that thronged the slips and filled every available sort of craft in the bay; preventing undue annoyance of the officers and crews of the warships, and holding themselves in readiness to act at a moment's notice in case of accident.

In a communication which I made to your Honorable Board under date of October 25, 1898, I stated, among other things, as follows:

The duties of the Police belonging to the Forty-second Precinct and those of the men detailed on the piers and similar places are of similar character; the interests they protect are the same; and they must deal with similar violations of law and come into contact with similar conditions, common to no other localities. It follows that, if grouped into a compact body, with one commander over all, the work of all these men would be much more effective. Scattered as the men on the piers are now, they receive directions from a multitude of heads and are responsible, individually, to a multitude of superior officers. It would seem advantageous to have them concentrated under one head, receive uniform instructions as to their duties, and, in general, hold themselves responsible to one head. Under the present isolated system, the men stationed on the piers cannot and do not give the co-operation that would be expected if they were all members of one body. There is little connection or sympathy between the work done by them and the totally different work done by the men on patrol duty in the various precincts. The concentration of these men into one body would, I am sure, prove of great practical value in the quality of the work.

A minor point, but one worthy of consideration, is that, as things are now constituted, reports and records concerning similar business are scattered throughout many precincts, wherein the bulk of the work done is totally at variance with the matters treated of in these reports and records. The grouping of these reports and records with the work of a single precinct in which the work is all of a kind, would be of value.

With one commanding officer over all these men a thorough and trustworthy estimate could be formed of each man's capacity, and it would be possible to form a correct judgment of the effectiveness of the men along the river-front as a whole, a thing which it is now impossible to do.

The men doing similar work could be given a chance to meet and exchange ideas and opinions, which could not fail to work to the advantage of each individual member.

In a word, the plan which I have recommended would concentrate, under the most favorable conditions, a large number of men who are to-day doing practically the same work and are yet totally disconnected from one another. Their work would produce the most favorable results, both for this Department and for the public.

In addition, I beg to state that, in interviews which I have had on this subject with the Supervisor of the Harbor of New York, he agrees with me that the proposed plan would not only be a benefit to the public having business in connection with the piers, but would also be of great assistance to him in the performance of his duties on the river-front adjacent to this city.

For the reasons above stated, I would recommend that the members of the Police Force now connected with the Forty-second Precinct and the members of the force assigned to duty on the piers and at ferries along the river-front, as well as the members of the force performing harbor duty in the Borough of Brooklyn, be consolidated under one command, to be known as Precinct No. 42, with one sub-station at the foot of East One Hundred and Twentieth street, and another at some place to be designated in Brooklyn.

In connection with the police service on the rivers and harbor, I would recommend that signal stations be established along the posts of the boats, so that in the event of the boats on the river being needed they can be signaled to. With the arrangement recommended for the consolidation of the Harbor and Dock Squads, this arrangement would be a simple one to perfect. Another improvement in the methods of the Harbor Police, and one which I would recommend, is the employment of rowboats acting in conjunction with the steam launches. These should be placed at intervals along the river-front to patrol regularly designated short posts, the crews being changed from time to time by the launches under command of a Roundsman. The advantages of this plan would be that the Roundsman could always keep effective watch over the members of his command, while at the same time the river-front would be doubly patrolled, both by the launch and by rowboats.

I call your attention herewith to a schedule showing the work done by the Bicycle Squad in the boroughs of Manhattan and The Bronx during the year 1898. Since I have had charge of the force this squad has been the object of a great deal of my time and attention. I have realized how important it is to the traveling public in the way of protecting life and property, compelling observance of the laws and ordinances and other general police duty. It has been increased from time to time until at present it numbers, in the boroughs of Manhattan and The Bronx, 1 Sergeant in command, 3 Desk Sergeants, 4 Roundsmen, 81 Patrolmen and 4 Doormen. The effectiveness of this squad can be best understood by reference to the subjoined table:

In the Borough of Brooklyn, while there were some few members of the force scattered here and there throughout the precincts, doing bicycle duty, there was prior to last year no regularly organized Bicycle Squad. On September 15, 1898, there was organized for that borough a squad of 25 men under the command of a Roundsman. These men are established in the Fifty-fifth Precinct, from which headquarters they cover the territory upon which the heaviest bicycle and other pleasure traffic has been carried on. The results of the establishment of this squad in the Borough of Brooklyn have been most excellent. The important bicycle thoroughfares have been adequately protected, and the ordinance violations by reckless bicycle riders and drivers have been reduced to a minimum. Care will be taken to extend as far as possible, during the coming year, the good results already obtained from this service.

I submit herewith, for your information, and as a part of this report, the following communications from the heads of the Detective Bureaus located, the one in the Borough of Manhattan and the other in the Borough of Brooklyn. The reports show the work accomplished and indicate that these bureaus are in thoroughly good condition, and are rendering to the citizens of our city the greatest possible protection against the depredations of thieves of all kinds.

POLICE DEPARTMENT OF THE CITY OF NEW YORK,
DETECTIVE BUREAU, NO. 300 MULBERRY STREET,
NEW YORK, January 1, 1899.

WILLIAM S. DEVERY, Esq., Chief of Police:

SIR—In submitting the report of the work of this Bureau for the year 1898, I desire to call attention to the services rendered in protecting the public from the operations of pickpockets and professional thieves in general at the many large gatherings, the most notable of which were:

The Commercial Travelers' Fair, held at Madison Square Garden.

The Military Tournament, held at Madison Square Garden.

The departure and home-coming of the various regiments, incidental to the Spanish-American War.

The large gatherings at the newspaper bulletin boards.
The naval parade.
The large crowds incidental to the election.
The Corbett-Sharkey sparring match, held at the Lenox Athletic Club.
The Horse Show, held at Madison Square Garden.

Induced by these large gatherings, criminals of all classes and from all parts of the country, and especially from the West, thronged to this city to ply their vocations, but the prompt action of this Bureau in arresting them in almost every instance upon their arrival precluded the possibility of any success in their operations. Investigations showed that a number of these thieves were fugitives from the justice of other States, and in the regular course were sent thereto to be tried for crimes committed by them.

The entire absence of certain classes of crime, i. e., safe burglaries, scuttle burglaries, and thefts committed by bogus plumbers and bogus gas-men, which were, prior to my administration, somewhat epidemic, I attribute to the arrest and conviction of the most noted thieves, who make the above classes of crime their specialties. Among the many most important arrests of the above character I would call special attention to the following:

Ernest McIntyre, alias George Edwards.
James Murray, alias Big Jim.
James McCann, alias John Cody.
William Mason, alias Wright, alias Big Bill.
Frank Spencer, alias Red Spencer.
Thomas Reilly.
James Coffey, alias James Murphy.
James Ryan.
John Kleischer.
Edward Dolan.
John Tobin, alias Ferguson.
James McCarthy, alias Babe McCarthy.

With the arrest and conviction of these men, crimes of the classes above referred to have entirely ceased.

I would also call your attention to the effective work of this Bureau among that class of thieves generally known as "commercial swindlers," men banded together for the purpose of defrauding merchants in this and adjacent cities. This class of swindlers operated so successfully for several years past that they obtained from merchants upon false or worthless paper and securities many thousands of dollars' worth of merchandise, and it was generally conceded that such operations were outside the pale of the criminal law, and the only redress for the victims was through civil procedure. This Bureau, however, has coped so successfully in arresting and convicting these swindlers that this class of crime has been reduced to a practical minimum.

Very respectfully,
(Signed) GEORGE W. MCCLUSKY, Captain, Detective Bureau.

Very respectfully,
(Signed) JAMES G. REYNOLDS,
Captain of Detective Bureau, Borough of Brooklyn.

The Bertillon system of identification and recording of criminals, which is an adjunct of the Detective Bureau, Borough of Manhattan, is most important and valuable. The aim is to secure a complete, accurate and indisputable record of the criminal classes brought under police notice. Not only has it proved of worth in this Bureau, but in many instances measurements and photographs produced according to its principles have been furnished to police departments of other cities, and have materially aided in the apprehension and conviction of noted criminals.

I would recommend in this connection that the Bertillon system of identifying criminals be extended to the Detective Bureau in the Borough of Brooklyn, so that the same identifying records of offenders could be made there as in this borough, and an interchange of such records between the two bureaus could be secured. For this purpose I would recommend that the Brooklyn Detective Bureau be furnished with the necessary apparatus for conducting the Bertillon system of photographing and measuring, and with cabinets for the proper display of the photographs so taken and those received from the Detective Bureau in the Borough of Manhattan. I would recommend in addition to this that a cabinet, similar to the one in use in the Detective Bureau of the Borough of Manhattan and that proposed to be used in the Borough of Brooklyn, be placed in localities convenient to serve the interests of the public and the Police Department in the Borough of Queens and in the northern end of the Borough of Manhattan. I would also recommend the building of a fireproof vault in the lower part of the Headquarters Building, Borough of Manhattan, for the preservation of negatives and records of subjects and photographs under this system.

The following figures show the amount of work done in the Bertillon Department of the Detective Bureau during the year 1898:

<i>Subjects Measured and Photographed.</i>	
Males.....	836
Females.....	53
Total.....	889

When replacing what was known as the "Rogues' Gallery" with the cabinet now used in the Detective Bureau, 398 pictures were removed for the following reasons:

Two hundred and forty pictures were over twenty years old, and of no value, as there was only a meagre description and no records of them.

Forty-five were duplicates of pictures recently taken.

Eleven were of persons arrested without a criminal record.

Ten were of persons reformed and now employed at legitimate occupations.

Ninety-two were of persons that had died during the past twenty years.

In their places were entered 398 surplus carte de visite pictures that had accumulated up to the time of the adoption of the Bertillon system, together with 3,702 new copies of pictures of the same class which had been mutilated and soiled by constant use during the past twenty years.

There were also entered in the galleries of the Detective Bureau 2,089 double pictures that were taken since the adoption of the Bertillon system.

These several amounts make a total of 6,089 pictures entered in the galleries of the Detective Bureau from January 1, 1898, to January 1, 1899.

The total number of pictures sent to thirty-six precincts to complete galleries was 14,338.

There have been arranged 6,089 photographs (a complete duplicate set of pictures in use in the office in the Borough of Manhattan) for use in the Detective Bureau of the Borough of Brooklyn.

There are 6,089 pictures selected and placed in a large safe in the Detective Bureau, with a view of preserving them in case of fire, the first time such a precaution has been taken.

The total number of photographs arranged and distributed during 1898 is 31,138.

In connection with the subject of the Detective Bureau, I would recommend that roomier quarters be provided for the Bureau in the Borough of Brooklyn.

In addition to the usual work of the Health Department performed by members of the Police Force, the Police have, as usual, assisted, when called upon, the various other Departments of the City Government in the work they have to do; for instance, relative to the dumping of snow from piers, to the enforcement of the various ordinances governing the gathering and separating of ashes, garbage, etc. The Police Force has especially assisted the Department of Street Cleaning in the crowded districts of the lower east side, where bicycle men have been assigned to duty for the purpose of preventing push-cart peddlers from throwing refuse into the streets from their carts. The excellence of the work in this particular regard has been frequently testified to by the Street Cleaning Commissioner. The various vacation schools and summer playgrounds carried on under the direction of the Board of Education were properly policed, and in addition to this work the Police have been active in co-operating with the Board of Education in its efforts toward gaining a knowledge of the boys of school age found in the streets during school hours, in order that truant officers might be enabled thereby to locate these boys and investigate their cases. The force has also been engaged for some time in assisting the Health Department in discovering persons who were responsible for burning soft coal within the city limits, and the Board of Health has frequently expressed its gratification at the work of the Police in this respect.

The various recreation piers and free swimming baths established along the river front during the summer were kept accessible to the public for several months during the warm weather. They were continuously frequented by large crowds of men, women and children. It was necessary to give these places special attention, and a sufficient number of men were assigned to each to preserve order and perform other necessary police work.

Free concerts were given in the parks in various parts of the city during the summer, scarcely a day passing that one of them was not given, and sometimes two or three on the same day in different precincts. These were all looked after carefully and thoroughly by the Police Force, and the large number of men, women and children who attended them were, through the services rendered by the Police, enabled to enjoy these concerts without being annoyed or interfered with.

The following figures show the number of horses in the Department at the beginning of the year 1898 and their distribution; the number at present in the city and their distribution, and give information concerning the number of patrol wagons in the Department and their distribution, etc., etc.:

The following Precincts have no prison or patrol wagons, namely: First, Second, Third, Fourth, Seventh, Eighth, Tenth, Eleventh, Thirteenth, Twenty-third, Thirty-ninth, Forty-first, Forty-second, Sixty-fifth, Sixty-eighth, Seventieth, Seventy-second, Seventy-third, Seventy-fourth, Seventy-seventh, Seventy-eighth and Seventy-ninth. I would respectfully recommend that the First, Second, Seventh, Eighth, Tenth, Eleventh, Thirteenth, Thirty-third, Thirty-fifth, Thirty-sixth and Thirty-seventh Precincts be furnished with double patrol wagons, and that the single patrol wagons now attached to the Thirty-third, Thirty-fifth, Thirty-sixth and Thirty-seventh Precincts be sent to the Thirty-ninth, Forty-first, Sixty-fifth and Seventy-second Precincts. I would also recommend that mounted squads be established in the Seventy-sixth, Seventy-seventh and Seventy-eighth Precincts, and that the mounted force in the Thirty-eighth, Thirty-ninth, Fortieth and Forty-first Precincts be increased. I would also respectfully recommend that a training stable and school and school of instruction for the mounted men and horses be established. I would also recommend that the patrol wagons attached to the following precincts be repaired and repainted, as well as renumbered, namely: Sixth, Twelfth, Fourteenth, Fifteenth, Sixteenth, Seventeenth, Eighteenth, Nineteenth, Twenty-first, Twenty-second, Twenty-fourth, Twenty-fifth, Twenty-sixth, Twenty-eighth, Twenty-ninth, Thirtieth, Thirty-first, Thirty-second, Thirty-third, Thirty-fourth, Thirty-fifth, Thirty-sixth, Thirty-seventh, Thirty-eighth, Fortieth, Forty-third, Forty-fifth, Forty-sixth, Forty-eighth, Fifty-first, Fifty-fourth, Fifty-seventh, Fifty-ninth, Sixtieth, Sixty-first, Sixty-second, Sixty-third, Sixty-seventh, Sixty-ninth and Seventy-fifth.

I would also recommend that new patrol wagon harness be furnished to all precincts in which there are patrol wagons, with the exception of the Ninth, Twenty-eighth, Thirty-second, Thirty-fifth, Forty-fifth, Forty-sixth and Seventy-first.

I would also recommend the purchase of 150 additional horses for mounted service in the various boroughs outside of the Borough of Manhattan.

A minor reform, but one which I am sure will especially commend itself to the public, has been made since I took command of the force. This is the providing of wooden horses in each station-house for the support of stretchers upon which corpses are brought to the station-houses, and the supplying of decent coverings for the same. The utility of this reform will be especially appreciated by those of the public who have had the misfortune to have had the bodies of any of their relatives or near friends brought to station-houses.

Apart from the protection of life, there is no more important duty the Police have to perform than that pertaining to elections. Honest, faithful and efficient work by the Police in this respect means an honest vote, an honest count and a correct record of the will of the people as expressed by them at the polls. From the first moment of my assuming, by the grace of your Board, charge of the Police Force as its executive head, I endeavored to impress upon the force, through its superior officers, the responsibility that lay upon them in the matter of elections. They were instructed again and again as to their duties upon this subject. The various enrollments and primary elections that took place, as well as the registration of voters on the four days of registration and the casting and counting of the vote on election day, received from the Police in their minutest details the greatest possible attention, to the end that the election law in all its parts might be thoroughly and impartially carried out and enforced; that those who had the right to vote should be permitted to vote; and that those who violated or attempted to violate the election law, either by illegal registration, illegal voting, or aiding or abetting the same, might be arrested and prosecuted as the law provides. The success that attended the efforts of the Police in this work can be expressed by the simple statement that never in any of the component parts of the present City of New York was there such a quiet, peaceful, honest election as that of the year 1898. In this election, as in every one that preceded it for many years, the Police Force demonstrated its ability and its inclination to protect all legal voters in their rights, and to prevent crimes against the franchise. It proved, too, to the people of the entire State of New York the utter uselessness of the expensive luxury saddled upon them at the extra session of the Legislature of 1898, in the shape of the Metropolitan Elections District Law.

As an instance of the uselessness of the Department created by this law, I might give the following: On October 20, 1898, I received from the State Superintendent of Elections for the Metropolitan Elections District a communication with which was submitted, to use the words of the said communication, "A list of houses and places in which" the said State Superintendent of Elections for the Metropolitan Elections District was "reliably informed that colonization had been practiced, and from which there is every reason to believe a horde of floaters and repeaters will be sent forth to the polling places of this city to register as voters." In the communication accompanying the said list the demand was made upon this force that proper aid and assistance be rendered to the said State Superintendent of Elections, looking to the prevention and punishment of crimes against the elective franchise. Thorough investigation showed that out of the 86 places enumerated on the said list, 22, or over 25 per cent. of them, were places from which, according

to the official records, no persons whatever were registered to vote. Of the remainder, 56 houses had a varying number of persons registered therefrom, and in each and every case it was found that the registration was regular and according to law, and the records thereof in the official pamphlet correct. In the balance of the cases, eight in number, the discrepancies in seven of them, when investigated, proved to be typographical errors, and a warrant was applied for in the only case in which false registration was found. This was refused by the magistrate, however, on the ground that a warrant had already been issued to the State Superintendent of Elections for this man.

At the various enrollments and primaries, on each of the four days of registration and on election day the Police manned the polling places in the Greater New York. There were 1,513 election districts in the entire city, which required on each of these occasions, except election day, one man at each, and on election day two men at each. Besides this attendance, over fifty of these polling places were steel polling booths, or empty stores, at which it was necessary to station a Patrolman daily for a month prior to election day, to watch the public copy of registry list suspended there. In order to cover these polling places when required, it was necessary to make assignments of Patrolmen from the more thickly populated portions of the city to the outlying portions, while at the same time the entire city had to be policed as usual.

It is worthy of note that, whereas in former years it had been necessary to employ 500 special officers to attend the polls in Brooklyn, the election of 1898 was carried on most successfully without the need of any officers outside of those belonging to the regular Police Force.

In spite of the fact that the election work performed by the Police in 1898 in all the boroughs, except those of Manhattan and The Bronx, was different from what it had been in previous years, the work of the Police in caring for, handling and distributing the election material, in manning the polling places, in preserving peace and order therein and in assisting in the transmission of the returns, was exceedingly well done in all quarters, and brought forth nothing but praise from newspaper men and others who came in contact with them in this work. Even the State Superintendent of Elections for the Metropolitan Elections District, on the day subsequent to election, spoke in the highest terms of praise of the work of the Police on Election Day.

The utmost care was taken in preventing and discovering violations of the law with regard to registration. Colonization was prevented by the most searching and sustained examinations as to the inmates of lodging-houses, Raines Law hotels, and other places where it might be supposed that colonization would be attempted. A thorough census was made of the inmates of these places, and the official registry lists were examined and compared with the information thus obtained, in order to effectually prevent any illegal voting that might be contemplated. Every complaint that the Election Law had been or was to be violated was rigidly investigated, no matter what its source, and, in short, nothing that lay in the power of the Police was left undone to make sure that intending voters were legally qualified to vote as registered. This work was so thoroughly done that on Election Day 220 arrests were made for violations of the Election Law, the particulars of each of which cases had been thoroughly investigated prior to Election Day. The number of warrants for various violations of the Election Law obtained by members of the force was 424, of which 221 were executed.

The State Superintendent of Elections forwarded to me, at different times, for execution by the members of the force, a total of 384 warrants, which he and his subordinates had obtained for the arrest of persons charged with violation of the Election Law. Of these, 204 were executed. The others, with five exceptions, were not executed for the reason that the persons named in them could not be found, and did not present themselves at the polls to vote. Of these five, two surrendered themselves in court, and the three others were entitled to vote, but, because of clerical errors, had been made to appear as wrongly registered. The State Superintendent of Elections also forwarded to this office lists of persons who were said to have removed from election districts after registering. Each and every name on these lists was thoroughly and carefully looked up, and such action taken with reference to each name thereon as the circumstances disclosed by the investigation warranted or required.

The demands made upon this Department for aid by the State Superintendent of Elections, pursuant to the law governing the matter, were, without exception, promptly and thoroughly attended to.

I beg to submit herewith figures showing the work performed by the Telegraph Bureau, both in the boroughs of Manhattan and The Bronx and the Borough of Brooklyn, as well as information concerning the general work done in connecting the various parts of the city by telephone, etc.

A considerable amount of work was done in the way of laying new trunk lines, conduits connecting stations, repairs to lines, signal-boxes and general electrical work. The offices of the Deputy Chief and the Inspector in the Borough of Queens have been connected with the Seventy-fourth Precinct Station-house, putting said officers in direct connection with the police telephone system in the several boroughs. The telephone lines used by the Police Department in the Borough of Queens are leased from the New York and New Jersey Telephone Company, and this has been the source of considerable delay and annoyance, as well as expense. The installing of private police lines in the said borough would be in the interests of efficiency, privacy and economy, and I would respectfully recommend that they be so installed. In many cases throughout the different boroughs precincts are connected on a single circuit, rendering private communication impossible. I would recommend that separate direct lines be provided for these precincts, and also that provision be made for placing the police wires in the Borough of Brooklyn underground. A submarine four-conductor cable was this year laid across the Narrows between Fort Hamilton and Fort Wadsworth, and land lines built in Brooklyn and Staten Island, connecting the Borough of Richmond with Police Headquarters in Manhattan and Brooklyn. The amount saved in tolls alone will in a short time pay for the entire work.

The best results from patrol work can be obtained only under a system that will allow inter-communication between the officers in the station-houses and the men on the various posts, and that such a condition may be brought about as soon as possible, I respectfully recommend to your Honorable Board the consideration of a project for providing the various precincts with a telephone system by which the Patrolmen on post can call up the officer in charge at the station-house, and that officer can in turn, when occasion requires, call the officer on post to give him instructions.

I call your attention to the following memorandum relative to the condition of the station-houses in the various precincts, and stating wherein repairs should be made, and recommend that the alterations therein required be made. In several instances it is stated in this memorandum that

certain station-houses are unfit for use as police stations, and in these cases I would respectfully recommend that proper station-houses be supplied. I would also recommend that where stables are attached to precincts they be located as near to the station-houses as possible, and that the latest modern appliances for quick hitching of the horses be supplied.

First Precinct—This station-house is clean, and in good sanitary condition. The steps leading from the first floor to Patrolmen's dormitory on second floor are badly worn and should be replaced with new material, or covered with metal safety treads. The building should be heated by steam. The steps of front stoop should be reset and pointed up.

Second Precinct—This station-house is in good condition. Front steps and sidewalk need repairing. Roof of station-house and prison need repairing and painting.

Third Precinct—This station is located in the basement of the City Hall, and is in fair condition. The repairs which were begun last spring have not as yet been completed, work having been suspended. I would recommend that the Department of Public Buildings, Lighting and Supplies be requested to open a "dead" window on the east side and make certain alterations in the arrangement of the office, and that the old doors be replaced with plate-glass windows. I would also recommend that the ceilings be calcimined, and that the woodwork in the main office be painted and grained.

Fourth Precinct—This station is located in the basement of No. 179 Washington street, Borough of Brooklyn. It consists of one main office used as an assembly room, and a small adjoining room used as an office for the Captain. There is no sleeping accommodation for officers or men. The place is dark, gloomy, non-sanitary, inadequate, and absolutely unfit for station-house purposes. A new office desk should be provided for the use of the Captain and Sergeants for the proper transaction of business at this station.

Fifth Precinct—This station-house is clean, but the plumbing both in the station-house and prison is in bad sanitary condition, and should be thoroughly overhauled and replaced. The flagging in cellar is sunken, which permits water to run under Patrolmen's water-closet and into the coal-bins. The cellar and yard should be concreted. An entire new house-drain is needed; also new water-closets and new urinals should be supplied for the Captain's, Sergeants' and Patrolmen's toilet. The station-house and prison should be heated by steam. The ceilings in rear basement and in Patrolmen's toilet-room and drying-room are broken and should be covered with metal ceilings. The water-closet off of the main office should be removed. When the door leading to said closet is left open, a full view of the closet seat may be had by persons standing in front of office desk. Blinds need repairing, and station-house needs repainting, interior and exterior. This station-house should be renumbered, and No. 5 substituted for No. 4, the former number.

Sixth Precinct—The following repairs are necessary: The plastering of sidewalls, ceilings and partitions of all rooms, halls and stairs on the first, second, third and fourth floors need repairing. New flooring required in main office, desk platform, sitting-room, Sergeants' hall and Captain's bedroom. The present stairs from basement to second floor to be removed and new stairway to be constructed in place of same. Stairs to be reversed. Handrails and balusters of stairs from second to fourth floor to be repaired; new stair treads and platforms on stairs from second to top floor; windows throughout the house to be repaired; new window sashes on the first, second, third and fourth floors; new toilet in Captain's room; shower bath to be put in cellar; room to be built in air-shaft of main office, to be used as telephone room; new gas fixtures throughout the house; hardware, locks, hinges, etc., throughout the house need repairing; fan-light on front of door to be altered; flag-staff and weather vane to be repaired and altered; painting, graining and calcimining throughout the house to meet the requirements of repairs; outside of station-house to be painted; new blinds on the outside of entire station-house; iron railings in front of station-house, front stoop, lamp-posts, iron gates of front basement, iron work of bridge between the station-house and prison, and stairs to prison and lodging-room need repairing and painting; new saddles for the front, vestibule and rear doors of station-house; sidewalks to be repaired.

Seventh Precinct—This station-house is in fair condition and clean. A number of blinds are broken and should be repaired. The exterior of said station-house, also public office, Captain's room and men's sitting-room should be painted. Three new urinals are necessary for Patrolmen's toilet, also one bell trap for area drain between station-house and prison. A new floor is required for main office, hall and sitting-room. The stairs leading to the dormitories and iron stairway leading from cellar to street should be repaired, also new rubber treads to stairways to dormitories should be supplied. New gas fixtures are required in the public office. The ceiling in sitting-room should be covered with metal.

Eighth Precinct—This station-house is in fair condition. The following repairs, however, are necessary, viz.: The front of this station-house, including iron railings, needs painting. Front vestibule needs painting and graining. The ceilings in main office and sitting-room need calcimining, the walls of same need painting, and the woodwork needs painting and graining. Roof of station-house and prison need painting; new treads are required on stairway leading from sitting-room to second floor; outside window blinds throughout house need repairing.

Ninth Precinct—This station-house is in good condition. The roof of this house and the doors of the bath-rooms need repairing, and the water-pipe leading to the tank on the roof needs to be covered.

Tenth Precinct—The following repairs are necessary at this station: The walls of Sergeants', Roundsmen's and Matrons' rooms, men's sitting-room and halls and stairways of this station need painting, and woodwork of same needs painting and graining. Sash cords in windows throughout the house need overhauling and repairing; woodwork in Captain's room and main office needs varnishing. I would recommend that the section room on second floor front be partitioned and fitted up for Sergeants' rooms, and that hot water connection be made from boiler to bath-room in Captain's room. Also, for the convenience of office work, a room could be made in air-shaft of main office for the use of Sergeants and telephone room.

Eleventh Precinct—The following repairs are necessary at this station, viz.: Side walls, ceilings and partitions of all rooms, halls and stairs on the first, second, third and fourth floors, and the fifth-floor hall to be repaired; new flooring in main office, desk platform, sitting-room and first-story hall; other flooring throughout the house to be repaired. Sash cords and window shades on the first, second, third and fourth floors to be renewed. Window frames and sashes throughout the house to be repaired. Doors and wainscoting throughout the entire station-house to be repaired. New saddles on all doors throughout the entire house, except the front and rear doors. New treads and platforms on all stairs from the cellar to the third floor, also on front stoop and front door sill. Fanlight of front door to be altered. Skylight of station-house to be altered. Lights of glass throughout the house required. New gas fixtures required throughout the house. Calcimining, painting and graining throughout the house to meet the requirements of repairs. Entire outside of station-house and roof to be painted. All iron railings of front area, lamp-posts, stoop railings, window guards and iron gates of front basement, iron work of stairs from sidewalk to basement and fire-escapes, to be painted. Flagstaff to be repaired and painted; ball of flagstaff to be regilded. Brick and stone work of entire front of station-house and the northerly and southerly light-shafts to be pointed up with cement. Sidewalk to be repaired. New blinds on the outside of station-house.

Twelfth Precinct—This station-house is in fair condition. The floor of the public office and Patrolmen's sitting-room is badly worn and should be replaced with new floor. The window blinds are badly broken and should be removed and replaced by new sliding inside blinds. The plumbing of basement is defective and non-sanitary, and should be removed and replaced with new material. A new ventilating skylight should be placed in front of station-house. The roof of station-house should be repaired and painted and a new galvanized-iron gutter put up to roof. The station-house needs painting inside and outside, with the exception of the Captain's room. A new bookcase for blanks, etc., a new desk and new gas fixtures are required for the public office.

Thirteenth Precinct—This station-house is being thoroughly overhauled and repaired.

Fourteenth Precinct—This station-house and prison is in fair condition. New floors are required in main office and sitting-room. Ceilings in the Captain's and Sergeants' toilet-rooms, Patrolmen's dormitories, in the Sergeants' hall, and in the public office of the station should be covered with metal, as they are cracked and in danger of falling. Alterations should be made to the plumbing in the Captain's and Sergeants' toilet-rooms. Also a new water-closet and wash-basin should be provided for the use of the matrons. The interior of the station-house should be painted. A strainer should be provided for sink on ground floor rear.

Fifteenth Precinct—This station-house is in fairly good condition. A new floor is required for the main office, Patrolmen's sitting-room and hallway leading thereto. The exterior and interior of station-house should be painted. Window blinds need repairing. New gas-fixtures should be supplied for the office desk. The steps leading from the office to Patrolmen's dormitories are badly worn, and should be replaced or covered with metal stair treads. A galvanized-iron sink should be placed in the prison corridor for the use of the Doorman. A new carpet should be supplied for the Sergeants' sleeping-rooms and hallway leading thereto.

Sixteenth Precinct—This station-house is in need of a thorough overhauling and painting. The gas fixtures are in a bad condition, and additional ones are needed in the office. The room used by the Matron is inadequate; I would suggest that the room formerly occupied by the female lodgers be refitted and used by the Matrons. Additional clothes closets are needed for the men in the second and third floors.

Seventeenth Precinct—This station-house is in bad condition. The house needs painting and overhauling throughout, and new flooring is needed in the men's sitting-room. The shutters on the rear of this house need repairing. The water-closets and entire plumbing-work at this station-house need overhauling.

Eighteenth Precinct—This station-house is in bad condition, both in appearance and sanitary arrangement. The wooden door of prison should be rehung and lock repaired; also outside bar of iron to be furnished for this door. An iron railing 18 feet high, with gate in centre, should be placed between prison walls and westerly side of station-house, to be constructed so as to make it secure. Plans and specifications for other repairs required are now on file in the office of the Chief

Clerk, and I recommend that such action be taken with regard thereto as will result in the least possible delay in the making of these repairs.

Nineteenth Precinct—This station-house is in good condition, excepting that a few minor repairs are needed to the doors and locks. Also the gas fixtures need some attention.

Twentieth Precinct—This station-house is in good condition, excepting that the gas fixtures and faucets in sitting-room and ceiling and drying-room need repairing.

Twenty-first Precinct—This station-house is in very poor condition. Needs painting throughout the house and the prison needs overhauling; the shutters on windows in front of building need repairing.

Twenty-second Precinct—This station-house needs a general overhauling. Painting and calcimining, both inside and outside, particularly in the air-shaft. The skylight and roof are in a dilapidated condition and are leaking. Shutters on windows need overhauling. Plumbing work of water-closets in cellar are in a defective and leaky condition.

Twenty-third Precinct—This station-house is in good condition. All repairs needed are attended to by the New York Central and Hudson River Railroad Company.

Twenty-fourth Precinct—This station-house is in good condition, but would recommend that ceiling in basement be repaired, and locks furnished for doors on office floor; also that three seats in the men's toilet be repaired.

Twenty-fifth Precinct—This station-house is in good condition, except the prison roof, which needs repairing; the coping-stone of station-house and upper part of rear wall, which is loose and in a dangerous condition, and which needs immediate attention; the men's toilet, which needs four new closets; and the bath-tub, which should be removed and replaced by a shower-bath.

Twenty-sixth Precinct—This station-house is in good condition, except that additional water-closets are needed for the use of the men, and the old ones need a thorough overhauling. A booth should be placed around the telephone at this station, to enable the Sergeants to have perfect hearing while using the telephone.

Twenty-seventh Precinct—This station-house is situated on the first floor of the Arsenal in the Central Park. Alterations, painting and renovating of the station-house office, the Captain's room and the Sergeant's room, and new water-closets for the Patrolmen's section room, are required. At the police stables (Sheepfold), the stable and desk room are in need of repairing and painting, the roof needs repairing, the stalls are in need of repairs, both iron and wooden; repairs to floors and water-pipes are necessary, and a new water-closet should be placed in this stable.

Twenty-eighth Precinct—This station-house is in good condition, with the following exceptions: The walls in basement need plastering and calcimining; the bridge in yard leading to prison, deadlights in front of prison and lock of iron gate of front basement, need repairing; one new water-cock should be furnished on urinal in basement; new locks should be placed on front door of station-house, door of men's sitting-room, west light shaft in basement and wooden door of prison (outside); and the roof of station-house needs repainting.

Twenty-ninth Precinct—The entire flooring of office, sitting-room and first floor hall at this station-house should be taken up and new flooring put down. The stairway leading from sitting-room to basement is also in need of immediate repairs, as several of the stairs are broken, thereby endangering the lives and limbs of the men going to and from the basement. The ceiling in the office, sitting-room and fourth floor needs calcimining.

Thirtieth Precinct—This station-house needs painting, calcimining and graining (with the exception of the Captain's room), inside and out. One of the stanchions supporting the stairs leading from the first floor to the yard is broken and should be repaired immediately. A partition dividing the main office from the hallway should be removed so as to give more floor area in said office, as the present space is inadequate to properly muster the men. The house needs a thorough renovating from top to bottom.

Thirty-first Precinct—The office, Sergeants' and men's sitting rooms at this station need to be overhauled, cleaned and repaired. Windows throughout the house need to be repaired. A new carpet for the Captain's room and a new telephone cabinet are also required.

Thirty-second Precinct—The interior of the station-house needs painting, as does also the outside. New floor in sitting-room, new stairway from cellar to top floor and new water-closet are required. Repairs are needed to locks throughout the building and new locks are needed on wardrobes throughout the house. The drain-pipe from water-closet to main sewer needs to be reset.

Thirty-third Precinct—General repairs are necessary in this station-house, which is in good condition. Ceilings and walls in interior of station-house should be calcimined and painted.

Thirty-fourth Precinct—This station-house is a three-story frame building, located at Sedgwick avenue and Depot place, on leased property. The building requires repairing and painting throughout the interior, except in main office. This building is entirely inadequate for the accommodation of the Patrolmen, ten of whom are obliged to sleep in room above stable, in annex. The four cells at this station are of wooden construction, and have outgrown their usefulness. I would recommend that a new site be selected and a station-house and stable built for this precinct.

Thirty-fifth Precinct—The first floor of this station-house, consisting of main office and men's sitting-room, requires painting, the balance of the house is in good condition.

There are no cells at this station-house, and prisoners arrested in this precinct during the hours the courts are not in session, are now sent to the Thirty-sixth Precinct for detention. I would recommend that a prison be constructed for the detention of prisoners.

Thirty-sixth Precinct—This station-house consists of two-story and brick building, with three-story brick annex used for a stable, with men's dormitories above. There is also a three-story frame building on the opposite side of the street, used for men's dormitories. These houses are small and in poor condition, and require repairs and painting throughout; the widening of Washington avenue which work is expected to begin soon will necessitate the cutting away a portion of the west side of the station-house and stable. I would recommend that a site be procured and a station-house and stable built for this precinct.

Thirty-seventh Precinct—This station-house is in a bad condition. The blasting of rock on adjoining property and the grading of the avenue in front of the building has cracked the walls and made it necessary to needle and pin up the building. I would recommend that a site be procured and a station-house and stable built as soon as practicable.

Thirty-eighth Precinct—This station house is in fair condition, with the following exceptions: The prison, consisting of two small cells located in the Twelfth District Civil Court Building opposite station-house, is in an unsanitary condition, having no light, air or proper ventilation and no sewer connection, making it necessary to furnish buckets for prisoners' use, and which in the hands of a vicious prisoner would be a dangerous weapon. I would recommend that a site be procured and a stable built for the horses attached to this station.

Thirty-ninth Sub-Precinct, Pelham Bay Park—This station-house is a three and attic stone building, known as the Hunter Mansion, situated near Baychester Railroad Station, in Pelham Bay Park, and owned by the Department of Public Parks. It is in an obscure locality, poor condition and inadequate for the purpose used, there being no water or sanitary arrangements therein. The stable is a one-story frame building with one-story stone carriage-house; both are in a fair condition. There is no water therein except cistern water, which is unwholesome. I would recommend that more suitable quarters (if such can be obtained), be provided for this sub-station.

Fortieth Sub-Precinct, City Island—This station-house is a two-story frame building, situated on Main street at about the centre of the Island, and is in bad condition. The house is small and inadequate for present use; being without a cellar it is unhealthy. There is no water connection with this house, and consequently the men are deprived of the proper facilities for washing themselves. I would recommend that a more suitable building be selected, and suggest that the unoccupied two-story frame school-house located on same street would, with slight alterations, be a desirable place.

Forty-first Precinct—This station-house is in poor condition, the office on the first floor is very small, dark and poorly ventilated; there are no sleeping accommodations for the Captain or Sergeants; the men's dormitories and sitting-room are on the second floor, under a peaked roof, and are very cold in winter and exceedingly warm in summer. The water-closet is located on the first floor, under the staircase, and drains into a cess-pool, which is located under the sidewalk, opposite the building, and very offensive in summer. The dormitory is very much crowded for space, as is also the Roundsmen's dormitory, which is a small room with three beds. I would recommend that a more suitable place, centrally located, be selected, and a new station and stable built for this precinct.

Forty-second Precinct—This station-house is in a clean condition, but inadequate for a station-house. The authorities are about to widen Broadway, which will cut off a portion of the building on the west end, and when this is done, it will leave the balance of the building too small for present use. I would recommend that a site be selected and a new station-house and stable be built for this precinct.

Forty-third Precinct—This station-house is situated in a stone building, known as Lorillard Mansion, in Bronx Park, and owned by the Department of Parks; contemplated alterations are now under consideration, which, when completed, will make it a suitable place for a station-house. I would recommend that arrangements to supply electric-lights, as there is no gas in the neighborhood. I would also recommend that a prison be erected at this station, and a single horse and patrol wagon assigned thereto.

Forty-fourth Precinct—This station-house is in a fair condition, with the exception of the following: Ceilings require calcimining, walls require painting; the woodwork in Captain's room, the Sergeants' sitting-room, main office, Patrolmen's dormitory and sitting-room require painting and graining.

Forty-fifth Precinct—The covers for urinal-drains in the stable of this precinct require repairing; also seven racks in the stalls need repairing.

Forty-sixth Precinct—The ceiling in the cellar of this station-house requires plastering, the holes there being eight in number and about five feet square. Also three water-closets in the cellar should be properly inclosed.

Forty-fifth Precinct—The ceilings in the first and third section room of this precinct require plastering. The water-tank over the cells leaks badly and should be repaired.

Forty-sixth Precinct—This station-house is an old building, but when changes now contemplated are completed it will be satisfactory.

Forty-seventh Precinct—This station-house requires the following repairs: New ceiling wanted in stable, two hinges wanted on manure pit, one faucet leaking in the cells, two flagging stones "flooring" in the cells, one sash cord in first floor wash-room; glass in the front of the building requires reputting; flooring in the stable in danger of falling in.

Forty-eighth Precinct—This station-house requires the following repairs: Archway in the stable needs repairing; two iron covers for horse-drains in stable; one hopper in the cells, out of order; one new hot water faucet in the cellar; gas-fixtures need repairing; station-house needs painting inside.

Forty-ninth Precinct—This station-house requires the following repairs: Three new wash-bowls and one new faucet in the sitting-room; one new wash-bowl in the wash-room on fifth floor; one light of glass third floor wash-room; six washers for plungers on water-closet; "Mott's Patent," one new urinal bowl on fifth floor; one new closet bowl for Captain's use; one new closet bowl for Matron's use.

Fiftieth Precinct—This station-house requires the following repairs: One sash-cord on first floor extension; one sash cord in the cells; one sash-cord on first floor landing; one new faucet on third floor wash-room; three sash cords, third floor wash-room; one new faucet on the fourth floor wash-room; one hopper in the cells to be repaired; one new water-closet bowl in the Sergeant's water-closet second floor; three sash-cord in Captain's room; ceiling to be plastered, on third floor landing; cornice to be plastered, on third floor; two sash-cords on fourth floor; one lock and four keys for Patrolmen's lockers, one lock and ten keys for Captain's, Sergeant's and Roundsmen's rooms.

The station-houses in the Eighth Inspection District are in good condition with one exception, viz.: The Fifty-eighth Precinct, which requires the following repairs: The interior of the house requires painting throughout; bath-room requires plastering.

Fifty-ninth Precinct—This station requires painting inside.

Sixtieth Precinct—This station requires painting inside.

Sixty-first Precinct—This station requires the following repairs: Interior of house to be painted; a storm-porch to be built over the front door; fifty loads of dirt to be removed from cellar and cellar to be concreted; a hydrant at the head of cellar stairs to be removed to the stable.

Sixty-second Precinct—This station requires painting inside.

Sixty-third Precinct—This station requires painting inside, and plumbing requires overhauling.

Sixty-fourth Precinct—The plumbing in this station requires repairing.

Sixty-fifth Precinct—This station is in a dilapidated condition and needs painting and calcmiming throughout.

Sixty-sixth Precinct—This station is in good condition.

Sixty-seventh Precinct—Drainage is imperfect; roof needs repairing; woodwork needs painting.

Sixty-eighth Precinct—This station is in good order with the exception of opaque window shades, which are required on all the windows.

Sixty-ninth Precinct—This station is in good condition.

Seventieth Precinct—This station is in good condition.

Seventy-first Precinct—This station requires painting.

Seventy-second Precinct—This station is in good condition.

Seventy-third Precinct—This station is in good condition.

Seventy-fourth Precinct—This station is in fair condition. The interior requires pointing up, painting and calcmiming; front door and vestibule requires painting and graining; inside blinds require repairing; ten new lights of glass are required; roof needs repairs; plumbing in basement requires a general overhauling; the heating apparatus is insufficient to heat the building; many of the doors and locks are out of order; the prison needs repairing; cell doors and locks are out of order.

Seventy-fifth Precinct—This station-house is in a bad condition, being unsafe, unsanitary, totally inadequate and unfit in every particular. There are no sleeping-rooms for the Captain, Sergeants or Roundsmen, and they are compelled to rent rooms at the expense of the city.

Seventy-sixth Precinct—This station is in a fairly good condition, but not a suitable station-house as it is at present.

Seventy-sixth Precinct, First Sub (College Point)—There are no cells in this station, and I would recommend that four iron cells be built; that iron bars be placed on all basement windows.

Seventy-sixth Precinct, Second Sub (Whitestone)—This station is in fairly good condition.

Seventy-seventh Precinct—This station is in good condition, but only a portion of it is used for police purposes.

Seventy-eighth Precinct—This station is in good condition but not adapted for police purposes.

Seventy-eighth Precinct, Sub (Richmond Hill)—This station is in good condition.

Seventy-ninth Precinct—This station is in good condition with the exception of the following repairs: Painting and calcmiming, heating basement floor where cells are located.

Seventy-ninth Sub-Precinct—This station requires repairs on inside of building.

Eightieth Precinct—This station is in good condition, with the exception of the following repairs: The ceilings throughout the house need calcmiming; the walls and woodwork throughout the house need painting and graining; the ceiling in prison and water-pipes in toilet on third floor need repairing.

Eightieth Precinct, First Sub—This station requiring the following repairs: The ceilings of second floor and main stairway need calcmiming; the sidewalls and woodwork of all the rooms on the second floor and main stairway require painting and graining; faucet in stand in toilet on first floor and leak in connection bowl and pipe need repairing; trap in water-closet on first floor, needs repairing; faucet in wash-bowl in sitting room on second floor needs repairing; front stoop needs repairing; roof of station-house needs repairing and painting; two storm sashes are required for office windows.

Eightieth Precinct, Second Sub—This station is provided with water for washing purposes but none for drinking. I would recommend that electric-light connections be made at this station.

Eightieth Precinct, Third Sub—This station-house is in a very bad condition and unfit for use. The cellar of this station is like a large mud puddle owing to the cellar walls being so loosely built that the water from the earth, in case of rain, oozes through very readily. There is no ceiling to the cellar and the beams of the floor above are worn and open. The hearth in the fireplace in the office has dropped out leaving an open space from the cellar into that room. A large patch of ceiling from the office has fallen, due probably from the moisture emanating from the cellar. The Acting Sergeant's room needs calcmiming and painting; the hall stairway and landing at the top of the stairs need painting. The dormitory of the west end of the house, second floor, with its five beds and low ceiling, is entirely unfit for men to sleep in in summer, and has not sufficient air space in winter; the other dormitories require repairs. The ceiling of front room (west), used as a sitting-room, and sidewalls need repairing; the toilet is in a very unsanitary condition. A new pit should be dug, walled up, and the building used as toilet be removed and placed thereon and the old place covered with earth. The well used for drinking purposes is dry a large portion of the year and only available during the wet season. The roof requires extensive repairs. Also the roof on the barn of the annex requires repairing. Also floor of sitting-room requires repairing. General repairs are needed at this station.

House of Detention—The station is in a good condition, with the exception of urinals in basement (south side), which are in need of repairs.

Tenement-house Squad—This squad is located at Criminal Court Building, Franklin and Centre streets, the accommodations being ample for such duties as they perform.

Bicycle Squad—This station is located at No. 1786 Broadway and is in good condition.

Central Department—This building requires a thorough and complete renovation. The brick walls of all open areas and roof of building should be painted. All yards to be concreted and the defective plumbing removed and replaced by sanitary work. Court-room requires to be altered and the interior (excepting several rooms) to be painted. It is absolutely necessary that the entire building should be steam-heated, as the present method of heating is obsolete.

Central Department, Borough of Queens—This building is too small and in no way adapted for police purposes, and cannot be altered in any way to meet the requirements of this Department. It is absolutely necessary that a proper and suitable building should be procured for a headquarters for this borough.

I respectfully call the attention of your Board to the fact that the repairs, etc., mentioned in the foregoing pages are absolutely and imperatively necessary for the proper housing of the members of the force, and for the proper conduct of the business of the Department in the precincts referred to. I would respectfully recommend that your Board take such measures as are necessary to have the repairs and alterations described made at the earliest possible moment.

I would respectfully suggest, in addition to the repairs specifically enumerated here, that in cases where station-houses have not been renumbered to correspond with the present numbers of precincts such renumbering be done at once.

There are a number of Patrolmen at present assigned to clerical duty in the office of the Chief Clerk of this Department, in the Bureau of Elections and in the Mechanics' Squad. These men were primarily appointed as Policemen to protect life and property, preserve peace and enforce the laws. I respectfully recommend that their places be filled by civilians, and that they be assigned to perform the work which they were appointed to perform.

As to the work of the Mechanics' Squad, I recommend that such work as needs to be done with regard to this Department be performed by outside mechanics and not by Patrolmen.

I call your attention to the fact that, on account of the large number of people coming into the city in the day time to do business, the population of the Borough of Manhattan during the day is one-third larger than at any other time, and that all important points of the city are extremely well protected by Police. For instance, by the Broadway men on the various crossings of that great thoroughfare; the men at other important crossings who are constantly engaged during the day and busy hours of traffic protecting the lives of pedestrians and rendering such other police service as required; the men at the different railway stations and steamboat landings. These, of course, are all in addition to the regular patrol system in daily use in each of the precincts.

I beg to call your attention to the fact that at the present time the number of Patrolmen on the force is 6,382, which is far too few for the immense amount of territory to be covered, and 1,000 additional Patrolmen are needed. I would, therefore, recommend that your Honorable Board take such steps as are necessary to provide that number of men by legislation.

I respectfully call your attention to the fact in the quarterly reports of Inspectors that are regularly submitted to this office are embodied recommendations for certain important alterations and repairs to station-houses. Although these have been repeated time and time again, no action has been taken with regard to them, and the conditions remain the same as before.

Experience has shown that the conditions of life under which Police live in the station-houses, with irregular hours for sleep, meals, etc., has a tendency to make many of them grow fat. In the case of many Policemen this condition is a serious hindrance to the proper performance of police service. The better the physical condition of the men, the better service will they render to the public. The athlete trains for the various feats in which he takes part, and the best trained almost invariably wins. The Policeman is liable to be called upon at a moment's notice for the performance of duty requiring strength and agility, and his physical condition should be such as to make him always ready to cope with any such conditions that might present themselves.

With a view to correcting this tendency to corpulency, and to put the members of the force in such condition that they could successfully accomplish what they might be called upon to do, I would suggest to your Honorable Board the consideration of some system of physical training for the force which could be carried on at regular intervals during reserve tours in station-houses, and which could be so arranged as not to interfere with the work or rest of the men.

I beg to recapitulate briefly herewith the recommendations which I have made in this report, as follows:

That hereafter, in arranging the annual parade of the Police Force, a band be secured for each battalion, instead of only for each regiment.

That ten steam launches of proper size and construction be procured for service in the waters of this city, in place of the naphtha launches at present in use.

That a larger boat than the present steamer "Patrol" be also secured for this service.

That the forces now performing duty on the waters of this city, and those performing duty on piers, docks, ferries, and along the water-front generally, be consolidated into one command, to be known as the Forty-second Precinct.

That signal stations be established along the posts of the men on duty on the waters of this city, and that rowboats be employed to supplement the work of the launches.

That the Bertillon system of identification of criminals be extended to the Borough of Brooklyn; that cabinets of the photographs taken under this system in this city be established in the Borough of Brooklyn, the Borough of Queens, and the northern part of the Borough of Manhattan; and that a fireproof vault be built at Police Headquarters for the preservation of the negatives and records of subjects and photographs under this system.

That roomier quarters be provided for the Detective Bureau of the Borough of Brooklyn.

That the furnishing of new patrol wagons and redistribution of others to various precincts, as well as necessary renumbering, etc., to same, all as heretofore given in detail, be effected.

That mounted squads be established in the Seventy-sixth, Seventy-seventh and Seventy-eighth Precincts, and that the squads of the Thirty-eighth, Thirty-ninth, Fortieth and Forty-first Precincts be increased in numbers.

That a training-stable and school of instruction for mounted men and horses be established.

That necessary patrol-wagon harness be supplied to precincts needing it, as heretofore specified.

That 150 additional horses be purchased for service in the various boroughs other than the Borough of Manhattan.

That private police telephone lines be established in the Borough of Queens, and that in all precincts separate direct telephone lines be provided.

That an adequate system for intercommunication between station-houses and men on post be established.

That in cases where station-houses are reported herein as not fit for police use, new station-houses be provided as speedily as may be, and that in cases where station-houses need repairs, these repairs, as heretofore specified, be made.

That where stables are attached to precincts, they be located as near to the station-houses as possible, and that the latest modern appliances for quick hitching of the horses be supplied.

That stables and prisons be built as heretofore recommended.

That station-houses be renumbered to correspond with the present numbers of precincts.

That some system of physical training for the members of the force in the station-houses be introduced.

I take this opportunity of calling to the attention of your Board a matter of the utmost importance in regard to one of the chief branches of the work of the Detective Bureau, namely, the protection of the traveling public at railway depots, steamboat landings, on surface and elevated cars, in public halls, theatres, churches and all other places in the city where crowds of people congregate, from the depredations of professional pickpockets and thieves of all kinds.

The increased and increasing growth of the city, with the consequent increase of travel on public conveyances of all kinds, calls for drastic measures to afford relief of the kind referred to, especially as under the existing conditions of law and procedure, it is almost impossible to obtain against that class of thieves a case upon which they can be held for trial by the Magistrates. The reason of this is that these professional thieves, as a rule, know the detectives, and whenever detectives are around on the cars or other places in which they may be plying their calling, they suspend operations and it is only when they are caught in the very act that they can be held. From July 1, 1898, up to the present time, among the arrests of professional thieves made by members of the Detective Bureau were 581 cases in which the prisoners were discharged immediately upon their arraignment in the City Magistrates' Courts; and yet these professional thieves were arrested in places and under circumstances which made it reasonably certain that they were there to steal; nevertheless, the Magistrates could not hold them under the laws as they at present exist. In one case, a well-known professional thief was arrested eleven times, and discharged eleven times, to go back again as before and prey upon the public.

There can be no doubt of the constant presence of such classes of thieves in this as in all other cities, and the fact that they have no visible means of support by honest work is ground for the assumption that they live by stealing. Under present conditions it is practically impossible either to get rid of them or to prevent their depredations. An arrest under present conditions usually means for them only an incarceration of twelve or twenty-four hours at the most, followed by discharge. This is a minor inconvenience that the thieves are very willing to risk for the chance of mixing in among the public at gatherings of all kinds, and stealing when the opportunity presents itself.

I do not desire to be understood as favoring anything in the way of legislation that would in the slightest degree interfere with the freedom or liberty of any person who does not deserve arrest, but I do desire to go on record most emphatically against a condition which permits a well-known professional thief, who cannot show that he is making his living by honest work, to go about the streets of this city stealing from the public, with practically no restraint upon him, and under conditions that render the Police almost powerless to prevent him from doing so.

The responsibility for the presence of this class of criminals in our city and for the carrying on of their thieving is upon the Police Department as a whole. As Chief of Police I recognize the importance of being able to cope effectively with this class, and I most earnestly request that your Honorable Board will at once give consideration to this matter and take such action as will result in having a bill passed by the present Legislature that will enable magistrates to commit to the Workhouse for ninety days all professional thieves found in any place in The City of New York under circumstances reasonably indicating that they are there for the purpose of plying their thieving vocations.

A law such as the one I refer to is now and has been for years in operation in several of the largest cities of this country, notably the cities of Boston, Philadelphia, etc., and in communications I have had with the police officials of several of these cities, I am informed that its operation

is very successful, and is a powerful factor in the work of the police in ridding these cities of the class of thieves in question.

All of which is respectfully submitted.

Very respectfully,

WILLIAM S. DEVERY, Chief of Police.

ARRESTS.

BOARD OF SURGEONS.

The following tables show the sick time of the force by precincts and squads during the year, together with other results of the labor of the Surgeons of the Department.

The first table shows the time lost by members of the force by reason of sickness, disability and injuries. The per cent. of sick to full time was about 2.96.

Members of the force are allowed half pay while sick. During the year allowances have been made for full time in many cases, and the extra amount paid by the Treasurer, by order of the Board, was \$5,374.14.

First Precinct—This station-house is in good repair and cleanly, but its location, in Old slip is so low that the very high tides that occasionally occur cause the water of the river to flow into the drain-pipes of the house, and thus forcing the sewer gas back into the building, and so seriously impairing its sanitary condition.

Second Precinct—Very good sanitary condition.

Third Precinct—The condition of this station-house is very good.

Fourth Precinct—This station is a basement floor in the Executive Building of the New York and Brooklyn Bridge, and is used only as a muster-room for the men in this command, all of whom sleep at home. The plumbing is in good condition.

Fifth Precinct—We would call attention to the plumbing, ventilation, and the condition of the flooring in the station-house and prison. The ventilation in all the dormitories, excepting those numbered 5 and 6, is by the doors and windows, direct upon the sleeping men; in those numbered 5 and 6 there is a ventilating flue in either end of both rooms, rendering the air more fit to breathe. The prison is also poorly ventilated; here the ventilation could be easily improved by windows and ventilators let into the wall at the side of the prison; this wall faces a wide court, and this improvement could be easily made. The flooring, flagging, etc., through both buildings has sunken and fallen away at various points, so that the drains are at the highest point, in the floor, thus rendering them inefficient. The plumbing is of the old type known as "closed plumbing," and very little of it is trapped aboveground; one trap serves for several closets; in the lower tier of the prison cells the pipes from the cells above run through the lower cells; they are of iron, and both rusty and leaky. In the Captain's room there is a closet so close to the bed that, owing to the old style of plumbing, it makes the sleeping-room offensive; there is a large air-shaft adjoining this room that could be utilized for placing a cleanly built and modern closet without the Captain's room. Large ventilators in the skylight covering the stairways, controlled by some device for opening and shutting, would greatly improve the ventilation throughout the house.

Sixth Precinct—The sanitary condition of this station is fair; the roof leaks. The wood-work forming closets under water fixtures should be removed. Unsanitary plumbing-work is now undergoing repair, and extensive alterations are now under consideration for the improvement of this house.

Seventh Precinct—Condition fair. Objectionable water-closet in Captain's room. Building old and unsuitable.

Eighth Precinct—Very bad.

Ninth Precinct—Excellent.

Tenth Precinct—Fair.

Eleventh Precinct—Good.

Twelfth Precinct—Good.

Thirteenth Precinct—The two things we would call attention to are ventilation and plumbing; there is no provision for ventilation in the sleeping-rooms other than by the doors and win-

dows. The plumbing throughout the house is of the old style known as "closed plumbing," thus rendering it difficult to clean.

Fourteenth Precinct—The sanitary condition of the station-house is fair; in the men's water-closet the vent-pipe openings are plugged and not connected with a proper vent-pipe; the drain-pipes from the floor of the prison frequently become obstructed, causing a bad odor, and the common trap for those pipes is covered by a concrete floor instead of a cover that could easily be removed to clean the trap. Woodwork forming closets under water fixtures should be removed.

Fifteenth Precinct—Sanitary condition of the Fifteenth Precinct station bad. This is an old house. The prison is in the cellar and underground, and after this is washed out it remains damp. The dormitories are crowded. Woodwork forming closets under fixtures should be removed.

Sixteenth Precinct—Dormitories overcrowded. Ventilation poor.

Seventeenth Precinct—Sanitary conditions are very bad. Ceiling unsafe. Dormitories are overcrowded. Building unfit for habitation.

Eighteenth Precinct—Station-house roof leaky, and three section-rooms wet by rains. Section-rooms not heated and men in winter suffer in health as well as in comfort.

Nineteenth Precinct—Good, but overcrowded.

Twentieth Precinct—Station-house in fair condition.

Twenty-first Precinct—This station-house, located at No. 160 East Thirty-fifth street, is in a very bad sanitary condition, largely by reason of its faulty construction. It is in bad repair, poorly ventilated, and wholly inadequate for the size of the force quartered there. A new station-house is much needed for this precinct.

Twenty-second Precinct—This house is old (more than forty years) and in very poor condition. The section-rooms are overcrowded, as eighteen to twenty-one men sleep in rooms intended to accommodate about sixteen. A new house is needed for this precinct.

Twenty-third Precinct—Good.

Twenty-fourth Precinct—Good.

Twenty-fifth Precinct—The condition of this station-house is good.

Twenty-sixth Precinct—This station-house was built in 1892, and is comparatively new; it is in good sanitary condition.

Twenty-seventh Precinct—Sanitary condition is poor, on account of bad condition of plumbing of water-closets, said water-closets requiring constant disinfection.

Twenty-eighth Precinct—The condition of this station-house is good.

Twenty-ninth Precinct—Good.

Thirtieth Precinct—This house, although an old one, is in fairly good sanitary condition.

Thirty-first Precinct—Building damp and inadequately heated.

Thirty-second Precinct—Complaints of smell of illuminating gas in sleeping-room of Matrons. Female prison in bad sanitary condition, because of lack of ventilation and insufficient light, otherwise both station-house and prison are in good sanitary condition.

Thirty-third Precinct—Both station-house and prison in good sanitary condition.

Thirty-fourth Precinct—Leased property; poorly adapted in every way for station-house purposes.

Thirty-fifth Precinct—Sanitary condition very good.

Thirty-sixth Precinct—Fair, excepting that dormitories are very cold in winter.

Thirty-seventh Precinct—Station-house old, and dormitories very cold in winter.

Thirty-eighth Precinct (Westchester Village)—Condition good.

Thirty-ninth Sub-Precinct (Pelham Bay Park)—In fair condition, but there is no water on premises except well water.

Fortieth Sub-Precinct (City Island)—No water on premises except that which stands under ground floor of the station-house.

Forty-first Precinct—Fair, except dormitory crowded.

Forty-second Precinct—Old frame house on low ground. Drainage imperfect. Cellar containing water at all times. Supply of water for flushing water-closet basins insufficient. Dormitories are cold in winter and very much crowded. Interior of house has been recently repainted, and many repairs made, making the house more comfortable and attractive.

Forty-third Precinct—Sanitary condition good, except that the dormitories are exceedingly cold in winter.

Forty-fourth Precinct (Pier A, North river)—In good condition.

Forty-fifth Precinct—The station-houses in these precincts are in good sanitary condition, with sewer connections, good plumbing, well ventilated, and ample quarters for the men.

Forty-sixth Precinct—This station-house is an old building, but when the changes now contemplated are completed it will be satisfactory.

Forty-seventh and Forty-eighth Precincts—Station-houses in good sanitary condition; good plumbing, sewer connections, well ventilated and ample quarters for the men.

Forty-ninth Precinct—Station-house has been recently renovated, excepting the plumbing; the closets, urinals and baths all need replacing by more modern patterns, being entirely unsatisfactory, owing to insufficient flushing from primitive and small tanks.

Fiftieth Precinct—The plumbing in this station-house needs repairing, and about the house more or less renovating is required.

Fifty-first Precinct—This station-house is comparatively new and is in good condition.

Fifty-second Precinct—Clean, well ventilated and in good sanitary condition.

Fifty-third Precinct—Clean, well ventilated and in good sanitary condition.

Fifty-fourth Precinct—Clean, well ventilated and in good sanitary condition.

Fifty-fifth Precinct—Clean, well ventilated and in good sanitary condition.

Fifty-sixth, Fifty-seventh and Fifty-eighth Precincts—The houses of these precincts are in reasonably good condition, and would be very much improved by a more frequent application of paint to the cells.

Fifty-ninth, Sixtieth and Sixty-first Precincts—These station-houses are being improved by alterations in plumbing, and in minor repairs, which, the Surgeon believes, will put them in good sanitary condition.

Sixty-second Precinct—Station-house is kept clean, is well ventilated and in good sanitary condition.

Sixty-third Precinct—This station-house is an old building with many defects and inadequately supplied with water-closets; the existing water-closets are much worn and in bad sanitary condition. The plumbing is also very defective.

Sixty-fourth Precinct—Station-house is kept clean, is well ventilated and in good sanitary condition.

Sixty-fifth Precinct—Station-house is kept clean, is well ventilated and in good sanitary condition.

Sixty-sixth Precinct—This command housed in a building erected for another purpose and prepared for temporary occupation by the Police. It is kept clean, well ventilated and in as good sanitary condition as circumstances will permit.

Sixty-seventh Precinct—This station-house is a good building, but possesses one very serious defect, in that after a heavy rain the water from the sewer is dammed back and floods the cellar, rendering it uncomfortable and dangerous to the health of the Force.

Sixty-eighth Precinct—This house is not at all adapted to the requirements of a station-house, composed as it is of the union of two old-fashioned frame houses, and is entirely out of repair, the dormitories and cell floor needing urgent attention.

Sixty-ninth Precinct—This is practically a new station-house and is in good condition.

Seventieth Precinct—Good sanitary condition of station-house; good plumbing, sewer connections, well ventilated and ample quarters for the men.

Seventy-first Precinct—This station-house is a large frame building, heated with stoves, which, in moderately mild weather, keep the rooms too warm, and, as a consequence, the windows are frequently opened, subjecting the men to draughts, from which sickness has resulted. In extremely cold weather the stoves are inadequate to properly heat the house. The worst feature of the building is that it is not, and cannot be, connected with a sewer; everything from the closets and urinals empties into a cesspool. The Surgeon recommends that the cesspool be cleaned at least once every three months. The general health of the men in this district has been good; no epidemic of any kind having appeared.

Seventy-second Precinct—This station-house is an old structure, without heat in the third floor; the roof leaks; the house is in an unsanitary condition and in every particular unfit for a station-house.

Seventy-third Precinct—This station-house is believed to be entirely satisfactory.

Seventy-fourth Precinct—Sanitary condition of the Seventy-fourth Precinct station bad. The heating apparatus is in such bad order that the heat cannot be turned off in the dormitories, and the men become so overheated in bed that when they turn out for night duty they take cold; the water-closets and urinals in the cellar are in an unsanitary condition. The top floor, now used by the Bureau of Elections, will be needed as a dormitory if more men are added to the present force. In the prison the water-closets are inclosed by woodwork, which should be torn out, and a running-water pipe should be placed over each closet to flush it out.

Seventy-fifth Precinct—The station-house of Long Island City is in an unsanitary and dilapidated condition; the sleeping apartments are crowded with beds, and there is no accommodation for sleeping in the house for the commanding officers. The plumbing is in a bad condition, particularly in the prison cells.

Seventy-sixth and Seventy-seventh Precincts—The condition of these station-houses is good.

Seventy-eighth Precinct—Same as Sixty-sixth Precinct.

Seventy-ninth Precinct—Same as Sixty-sixth Precinct.

Eightieth Precinct—The Third Sub-station of the Eightieth Precinct is about as unsanitary as it is possible for it to be; the others are in good condition.

Bicycle Squad—The men of this squad do not sleep in the squad-house; it is in good sanitary condition.

Central Office Squad—Rooms in good sanitary condition.

Criminal Court Squad—Located in a building not controlled by this Department.

REPORT OF THE STEAM-BOILER INSPECTION AND ENGINEER'S BUREAU, SANITARY COMPANY, FOR THE YEAR ENDING DECEMBER 31, 1898.

POLICE DEPARTMENT OF THE CITY OF NEW YORK,
SANITARY COMPANY,
NEW YORK, January 1, 1899.

To the Board of Police:

In conformity with the rules of the Department, I herewith submit a report of the service of this Bureau for the year ending December 31, 1898.

The report contains the number of steam-boilers examined, tested hydrostatically, and their condition, together with the number of applicants examined as to their qualifications as engineers to take charge of and operate stationary and portable steam-boilers and engines in The City of New York; also the amount of money paid to the Treasurer of the Police Pension Fund, collected from owners of steam-boilers for certificates of inspection, as provided by chapter VIII. of chapter 378 of Laws of 1897. (Charter.)

Respectfully submitted,

FRANK MANGIN, JR.,

Sergeant in Command, Sanitary Company.

ENGINEERS.

For the year ending December 31, 1898, there have been 11,734 applicants examined for engineers' certificates to take charge of and operate stationary and portable steam-boilers and engines. Each applicant has been examined as to his experience, qualifications and knowledge of steam-boilers and engines. Of this number 11,174 passed a satisfactory examination and have been granted certificates and 560 have been rejected.

STEAM BOILER CASUALTIES, 1898.

There were no boiler explosions in this city during the past year.

The following casualties occurred:

January 9—A water-glass on boiler burst at Ferrier & Napier, No. 21 West Fourth street, scalding Michael O'Brien, the fireman. No other damage.

January 10—A steam-pipe burst at Nos. 21 and 23 West Fourth street, scalding the wrists and fracturing the skull of Michael Gallagher, the engineer. Cause, a defective steam-pipe. No other damage.

January 13—A steam-pipe burst at No. 100 Vandam street, scalding both hands of John Lambert, the fireman. Cause, a defective steam-pipe. No other damage.

April 7—A steam-pipe burst at the Mt. Morris Electric-light Company, No. 96 Vandam street, severely scalding the arms and head of Andrew Rickey, the fireman. Cause, a defective steam-pipe. No other damage.

April 30—A steam-pipe burst at Nos. 504 to 520 Grand street, R. Hoe & Co., severely scalding Jacob Faith and Edward Douglas, steam-fitters. Cause, a defective steam-pipe. No other damage.

May 15—A valve, at the plant of the Produce Exchange, Broadway and Beaver street, burst, scalding Owen Scram, the engineer, on both arms. Cause, a defective casting. No other damage.

June 26—A steam-pipe burst at No. 61 East Seventy-third street, an apartment house, scalding the face and arms of William Murphy, the engineer. Cause, a defective pipe. No other damage.

September 1—A steam-pipe in the engine-room of McKenzie's Lumber Mill, at No. 493 Southern Boulevard, burst, severely scalding Charles Karlson, the engineer, about the face and body. Caused by shutting off the valve of a hot-water heater. No other damage.

September 24—The cylinder of a hot-air pump exploded in the flat at No. 1496 Lexington avenue, owned by Cohen & Eisler. Cause, incompetency of the janitress to operate the pump. No other damage.

November 4—A tube burst in a Heine patent water-tube boiler at the Chelsea Jute Mills, Manhattan avenue and Java street, Borough of Brooklyn, severely burning H. A. Griffin, the superintendent; Charles W. Shackford, the assistant superintendent, and Howard D. Halstead, the chief engineer. Caused by the water-tubes becoming fused from incrustation. No other damage.

December 9—A steam radiator at the Imperial Hotel, Broadway and Thirty-second street, burst while being tested by George J. Goeble, who was severely scalded about the abdomen. No other damage.

HEALTH SQUAD.

The squad, consisting of 3 Roundsmen and 47 Patrolmen, is detailed to the service of the Health Department of the city. They are paid by a special annual appropriation, though numbered among the regular uniformed Police Force. The following schedule sets forth a portion of the work of the squad. They are not exempted from the performance of police duty when required in an emergency.

HARBOR POLICE.

The following will show the special work of the Harbor Police during the year:

On the morning of February, 19, 1898, the first-class Spanish cruiser "Vizcaya" arrived at this port and anchored off Tompkinsville, Staten Island. Owing to the excited state of mind of the public, incidental to the destruction of the United States battleship "Maine" in the harbor of Havana, it was deemed wise to place a guard around the Spanish cruiser during her stay in this harbor. The Harbor Police were directed to co-operate with the naval authorities in the matter, and the "Patrol" and launches assigned to that duty. A guard of men was also assigned to the naval tugs "Nina" and "Narkeeta," in order that they might be used in case of necessity by the naval authorities for arrests, etc. A line was established around the "Vizcaya," and no person or vessel was permitted within this line without permission from the Spanish Consul or the Commander of the ship. This service continued night and day, in all kinds of weather, until February 29, 1898, when the "Vizcaya" departed from this port.

At the time the "Vizcaya" was in this port a rumor was circulated to the effect that persons were endeavoring to take or gain possession of the Holland sub-marine boat, at Elizabethport, N. J., for the purpose of destroying the "Vizcaya." By direction of the Chief of Police, a guard and launch were promptly dispatched to this place to observe and watch her movements, and to continue with her at all times during the stay of the "Vizcaya," which was accomplished without difficulty, and nothing occurred to mar the regular order which prevailed.

Shortly after, a number of war-ships of the United States Navy arrived at this port, and owing to the number of persons and boats constantly visiting them, it became necessary to establish a guard of boats around these vessels, to prevent any annoyance to the officers and crews of the ships, and also to be in readiness in case any accident should occur to the small boats visiting the ships.

During the month of April, the "Patrol" and launches were engaged, by request of the Navy Department, in guarding the sub-marine mines, between Fort Schuyler and Willett's Point entrance to the Sound, being aided in this work by the New York Naval Reserves. This was continued until relief by the Mosquito Fleet.

During the month of May, launches and crews were dispatched to Pier 14, North river (the American Line Pier), to protect and guard the various ships there being converted into auxiliary cruisers for the United States Navy, preventing any unauthorized persons from visiting these vessels or interfering in any way with the promptness of the work. This was continued at intervals, during the war, on the arrival and departure of the ships of this line assigned to duty in the Navy.

On August 21, 1898, a grand naval parade was given on the waters of the Bay and Harbor of New York, to welcome the return of the victorious fleet from Santiago de Cuba. The "Patrol," fire steamers "Van Wyck," "Zophar Mills" and police launches, and various other vessels hired for the occasion, and a command of 60 men, were assigned to this station for duty, the whole under the personal command of the Chief of Police, who laid out the plan of movements of the flotilla and for the preservation of order, life and property during the parade. Instructions were given by him to render every assistance in our power in case of accident. This was the largest naval demonstration ever given in this country, and it was estimated that over a million of people were afloat on the various vessels participating in this reception. No accident of any nature occurred during the day to vessels or persons, except to the Chief of Police, who was slightly injured in the line of duty, but remained in command until the fleet dispersed.

From August 21 to 29, during the stay of the fleet off Tompkinsville, Staten Island, the "Patrol" and launches were engaged in protecting the vessels from visitors and others, who were constantly thronging around the ships, preserving order, preventing any annoyance to the

officers or crews, or any unauthorized persons going on board of the various vessels, and the Harbor Police prepared to act at a moment's notice in case of any accident. Launches and crews were also assigned to duty in the vicinity of the Long Island Railroad Depot, on the reception and departure of various regiments during the war, also on the return of the Naval Reserves.

During the period of the war, the Harbor Police were very active, and, by direction of the Board of Police, extended every courtesy and rendered all assistance in their power to the naval authorities.

Launches.

The naphtha launches now in use in the Harbor Service have been given a thorough trial and found to be impractical and nearly useless, for this reason: the naphtha motive-power renders it impossible to stop the engines, remain at rest, without extinguishing the fires, rendering the boat for a few minutes absolutely helpless. The machinery is of delicate construction, being intended for a far different service, that of pleasure on smooth waters, where they are not compelled to stop, back or keep out of the way of passing vessels. They are, therefore, not only impracticable, but dangerous to be used in the service of this Department. There should be provided good, staunch, substantial steam-launches, capable of steaming 13 to 15 miles an hour, and able to withstand any kind of use or weather, and in cases of emergency to transport men to various points in and about the harbor. Owing to the delicate construction of the naphtha launches, never intended to run over 3 or 4 hours at a time, the machinery becomes disabled and the expense and cost of repair is very much greater than steam launches would be.

It is also recommended that rowboats be employed in the service on the rivers, to act in conjunction with the steam-launches, and to be placed at intervals on regular designated posts and to remain there, the crews being put in and taken out by the launches, under the charge of the Roundsman, who would then patrol the waters, observing the movements of the boats and other matters that might come under his jurisdiction. This would be a more efficient protection to life and property.

After an experience of a number of years in command of the Harbor Force, I find that the Harbor Police service is yet incomplete. The Dock Squad, which is now operated without apparent concentration, is somewhat in opposition to the Harbor Police, neither force acting in conjunction with the other. The result is that the Harbor Force is often in ignorance of very important matters which come under the observation of the men stationed on the docks, and which do not reach the Harbor Police until too late to take effective action. The same might be said in regard to the Harbor Police. In order to overcome this difficulty and friction the squads should be consolidated, thereby rendering it an efficient and valuable arm of the service; and until this is accomplished the Harbor Police service will never be complete or satisfactory.

Respectfully submitted,
(Signed) ELBERT O. SMITH, Captain, Forty-second Precinct.

Total number of recorded messages.....	146,192
Total number of general alarm messages.....	398,668
Dead animals messages.....	56,242
Grand total.....	601,102

The number of messages sent and received during the year exceeds the number handled during the year 1897; it being the greatest number ever sent over the police lines in this borough. The telephone work transacted over the private police lines has also greatly increased since consolidation, owing to the number of connections made daily between the officials of this and other departments, the public at large, and the precincts, and squads of the several boroughs. By means of these connections messages are transmitted direct from one station to another, and officials of the Department are thereby placed in direct telephonic communication with any station connected with the police telephone system. It was also necessary to increase the number of trunk lines connected with the telephone exchanges; there are now six trunk lines connecting Police Headquarters; five to Spring street and one to Cortlandt street.

To attend to this service, together with the regular police telephone work, with the necessary promptitude, five operators are employed during the day tours of duty, from 8 A. M. to 6 P. M.; three each evening tour, 6 P. M. to 12 midnight; and 2 midnight to 8 A. M. each day.

Underground System.

A conduit was laid from northeast corner of Sixty-fifth street and Fifth avenue to Twenty-seventh Precinct Station, Central Park, and said station connected with police underground cable on Fifth avenue.

Conduit laid from the top of Highbridge down to Speedway, carrying cable connecting telephone booth, located on Speedway, at One Hundred and Seventy-sixth street, with police cable, One Hundred and Seventy-sixth street and Amsterdam avenue, placing Speedway in direct communication with Thirty-third Precinct and with Police Headquarters.

Underground cable, Broadway and Morris street, repaired.

Construction and Reconstruction Work.

Rebuilt stable lines connecting Fifteenth, Nineteenth, Twentieth and Twenty-sixth Precincts. Rebuilt line between Twenty-ninth Precinct and Eighth Regiment Armory (Police Pistol Practice Squad).

Renewed guard-wire on aerial cable on Boulevard, from One Hundred and Thirtieth street to Kingsbridge.

Repaired sub-marine cable, Harlem river, Second avenue.

Rebuilt line connecting Deaf and Dumb Asylum, setting four (4) new poles.

Electric-bell wiring renewed and additional bells placed in the Third, Ninth, Nineteenth and Twenty-third Precincts.

Metallic circuit telephone line built from White Plains road to Forty-first Precinct Station-house, Bronx Park.

Metallic circuit line built from Van Cortlandt and Jerome avenue to Two Hundred and Thirty-eighth street and Verio avenue.

Transferred telephone lines to new poles, Pelham avenue to City Island.

Metallic circuit line built, One Hundred and Thirty-eighth street and Alexander avenue to Mott avenue, connecting Bureau of Elections (Bronx) by police telephone with Headquarters.

Metallic circuit line built connecting sub-station, Pelham Bay Park, with Thirty-eighth Precinct, Westchester.

Rebuilt lines between Oak Point and Hunt's Point.

Metallic circuit line built, Thirty-seventh Precinct to stable on Washington avenue.

Transferred lines from old to new poles on Morris avenue.

Re-wired Forty-ninth Precinct Station-house (Borough of Brooklyn) for twelve electric-bells.

Banks and Exchanges.

The lines and instruments connecting the banks and exchanges with police stations have been inspected regularly during the year, and they have worked satisfactorily.

Electric Light and Power.

The electric plant at Headquarters, used for elevator and lighting, also on board the police boat "Patrol," have received considerable attention during the year. They are in good order.

Several additional offices at Headquarters have been supplied with electric-light.

Signal-box System.

Total number of signals sent over the signal-box lines during the year 1898 was as follows:

Thirty-third Precinct.....	21,429
Thirty-fourth Precinct.....	15,951
Thirty-fifth Precinct.....	22,128
Thirty-sixth Precinct.....	18,624
Thirty-seventh Precinct.....	23,715
Fortieth Precinct.....	19,758
Total.....	121,605

In the large territory of The Bronx the necessity for more signal-boxes is very apparent. The posts in many cases are large and no available means at hand for the Patrolmen on post to communicate with their stations, except the few signal-boxes now scattered throughout the borough, and, in view of the rapidly increasing population, the establishment of additional signal-box lines in this district is very essential.

BOROUGH OF BROOKLYN.

The Total Number of Recorded Messages Sent and Received at this Office for the past Year was as follows:

Various City departments.....	3,845
Department of Fire.....	1,899
Coroner.....	2,568
Ambulances.....	10,974
Lost children.....	1,554
Missing persons.....	2,004

The Number of Orders and Reports Sent and Received from these Signal Boxes during the Year were as follows:

Hourly reports from men on post.....	1,944,160
Wagon calls for prisoners.....	14,599
Ambulance calls.....	2,094
Orders sent to men on post.....	10,139

Considerable attention has been given to the signal box lines, instruments and station-house equipments. In some cases the lines are very old and should be renewed, owing to the fact that in many cases the wires are carried on electric-light poles. They should be kept well insulated, and maintained in good order, so as to secure good service; also several of the station-house signal equipments are in a very bad state, and they should be replaced as soon as possible.

In the Fifty-fifth and Sixty-fourth Precincts there is in use an electrical automatic stable equipment of recent design for transmitting calls for wagons and unhitching and starting horses from stall. This device is giving entire satisfaction and is a great saving of time.

The location of the boxes and other places to which the police in the Seventy-third Precinct have access within the boundaries of the precinct are as follows:

1. Gate-box, Union street and Flatbush, entrance to Park.
2. Gate-box, Flatbush and Ocean avenue, entrance to Park.
3. Gate-box, Fort Hamilton and Ocean avenue, entrance to Park.
4. Gate-box, Coney Island and Fort Hamilton avenue, entrance to Park.
5. Gate-box, Coney Island and Fifteenth street, entrance to Park.
6. Fifteenth street and Ninth avenue, entrance to Park.

Farm house in the centre of the Park, flower garden shelter 500 feet from Ocean avenue on what would be Lincoln road if it was extended; park stable office Ninth avenue and Seventh street, and a switchboard in the mansion at Ninth avenue and Fifth street.

The Department now has 573 miles of wire in use as follows:

	Miles.
Strung on poles.....	412
Underground.....	7
Elevated railroad.....	154

On account of the scarcity of funds during the past few years, the following precincts have been connected on a single circuit, viz.: Sixty-seventh, Sixty-eighth, Sixty-ninth and Seventy-seventh; the Forty-fourth with the Seventieth, the Forty-third with the Seventy-first and Eightieth; the Fifty-second with the Sixty-sixth; the Fifty-third with the Sixty-fifth, Sixtieth with the Fifty-ninth.

Separate direct lines should be provided for these precincts, as in their present condition private communication is impossible.

During the year eight and one-half miles of two conductor twisted wire and eight miles of single conductor have been used for renewals and extensions in this borough; extensions aggregating four miles of single conductors. Many miles of double twisted wire on the elevated railroads have been in use for the past nine years, and is in very bad shape and should be replaced with new wire without delay. The same condition exists in the outlying districts and in many precincts where the single wire has been in use for ten years or more. It should be renewed immediately as the heavy weather of the past three months has demonstrated that the wire is badly rusted and unreliable, breaking constantly, thus greatly interfering with the service.

The wire running to the Sixty-ninth Precinct (Coney Island) is overloaded on account of its being the wire used by the Sixty-eighth Precinct (Sheepshead), and the Sixty-seventh and Seventy-second Precincts, four in all. This circuit should be divided without delay and separate wires given to Sixty-seventh and Sixty-ninth Precincts at least. The wire to the Seventieth Precinct (Bath Beach) should be extended to Coney Island so as to give that important seaside resort connection with borough headquarters over separate lines.

During the year we have received numerous requests from the Department of Buildings, Lighting and Supplies, to remove the Police wires from the pole lines so as to allow the said Department to order the companies owning such poles to remove them from the streets. This we could not do, as there was no money appropriated for the purpose. We hope that during the coming year to obtain an appropriation to place the Police wires in this borough underground, or at least a sufficient amount to start the important work.

The underground wire system which has proven so reliable in Manhattan Borough and other cities, is greatly needed in this borough, particularly in that portion west of Bedford avenue and north of Union street.

The patrol signal system should also be extended to precincts in this borough not already equipped. It is especially required in the Forty-third, Forty-seventh, Fifty-third, Fifty-seventh, Fifty-eighth and Sixty-second Precincts.

BOROUGH OF QUEENS.

The officers of Deputy Chief and Inspector, Long Island City, was connected with Second Precinct Station-house switches placed therein, putting said offices in direct connection with Police telephone system of the several boroughs.

Electric-bells placed in Seventy-ninth and Seventy-ninth Sub-stations connecting offices, dormitories, etc.

The telephone lines used by the Police Department in this borough are leased from the New York and New Jersey Telephone Company. The necessity for private police lines for the Department has been clearly shown. The delay occasioned by having to wait for telephone exchange connections is very annoying and detrimental to the service, and has been the cause of frequent complaint during the year. It is hoped that the Department will have private police lines in operation in this borough before the expiration of the year 1899. Not only as a matter of economy, but the possession of lines owned and controlled by the Department is absolutely essential to secure efficient police service.

BOROUGH OF RICHMOND.

A sub-marine 4-conductor cable was laid this year across the Narrows, between Fort Hamilton and Fort Wadsworth, and land lines built on Brooklyn and Staten Island, connecting the Borough of Richmond (Eightieth Precinct, Stapleton) with Police Headquarters, Manhattan and Brooklyn, thereby the police of this borough have a direct means of communicating with headquarters and with all the precincts in the several boroughs. The amount saved annually from tolls alone will in a short time pay for the entire work.

As to the matter of furnishing a signal and telephone system for the boroughs of Manhattan and The Bronx, I can only state that for the past several years in reports made to the Board of Police and to the Chiefs of Police, I have strongly urged the introduction of such a system, and I again wish to impress upon your Honorable Board the importance of the adoption of an adequate system for patrol service, especially in the important territory of Manhattan as well as in the boroughs of Bronx, Richmond and Queens, and in that portion of the Borough of Brooklyn not already supplied.

Since consolidation of the departments, January 1, 1898, rules and regulations were prepared in which provision was made for the government of the consolidated forces, placing them on the same tours of duty, also regulating the clerical "blotter" entries so that the business of the consolidated Telegraph Bureau is now conducted with uniformity.

Respectfully submitted,

M. R. BRENNAN, Superintendent of Telegraph.

HOUSE OF DETENTION FOR WITNESSES.

The number of persons committed to, detained in and discharged from the House of Detention for Witnesses, during the year 1898, will be found in the following table. The average time of confinement was about twelve and three-fifths days. The average cost of maintenance (meals only) was \$9.43. The names of the persons detained and other details were published in the quarterly reports of this Department.

The force attached to the Third Precinct and the force attached to the License Squad, in the Borough of Brooklyn, are engaged in the investigation of applications for licenses issued under the direction of the Mayor and other proper authorities.

The regulation of hacks and carriages in their approach to and departure from places of amusement and public assemblages form a portion of the duties of the force of the Third Precinct.

During the year the following investigations were made:

POLICE DEPARTMENT OF THE CITY OF NEW YORK,
GENERAL BUREAU OF ELECTIONS, NO. 300 MULBERRY STREET,
NEW YORK, December 31, 1898.

Col. WILLIAM H. KIPP, Chief Clerk of the Police Department:

SIR—In accordance with section 365, chapter 378 of the Laws of 1897 (the Greater New York Charter), I have the honor to submit the following statement of the operations and expenses of the General Bureau of Elections and the branches thereof, with certain recommendations. "An estimate of the expenses thereof for the ensuing year" has already been submitted under date of August 26, 1898.

In compliance with resolution of the Police Board, January 28, 1898, I caused an inspection to be made of the election material and records on hand in all the boroughs, and on February 3, 1898, reported the result. The report upon the offices and personnel of the General Bureau and its branches were established, as follows:

Manhattan, General Bureau—Superintendent of Elections, T. F. Rodenbough; Chief Clerk, William Plimley; Assistant Clerk, A. C. Allen, together with a temporary clerical force of twelve (12) Patrolmen. Office, No. 300 Mulberry street.

Brooklyn, Branch Bureau—Chief, George Russell; Chief Clerk, John K. Neal; Assistant Clerks, Calvin W. Withey and George Sandhusen; and Clerks, William A. Halloran, Harry W. Taylor, J. W. Hamer, Charles Spicer and Horatio Balderson. Office, No. 19 Smith street, Brooklyn.

The Bronx, Branch Bureau—Chief, C. A. Bunner, Jr. Office, Solingen Building, One Hundred and Thirty-eighth street and Mott avenue.

Queens, Branch Bureau—Chief, James R. Rodman; Chief Clerk, Carl Vogel. Office, Police Station-house, Astoria, L. I.

Richmond, Branch Bureau—Chief, Charles A. Jones; Chief Clerk, Alexander M. Ross. Office, Police Station-house, Stapleton, S. I. (Since removed to Staten Island Savings Bank Building, Beach and Water streets, Stapleton, S. I.).

By means of the telephone system of the Police Department and the co-operation of the Police Force, direct control of the election work has been maintained from this office; the duties imposed by one general and two primary elections, together with a special and supplemental enrollment, have been performed as well as could be expected under the new conditions, and with unusual freedom from outside complaint.

An effort has been made to reduce the expense of storage of election material, by concentrating it into fewer places of storage, as far as possible utilizing the available space in police station-houses. In this connection attention is called to accompanying reports of Chiefs of Bureaus in Brooklyn, Queens and Richmond.

By resolution of the Police Board the principal political parties were this year permitted to recommend polling places, subject to their examination for fitness under direction of this Bureau; the odd numbered election Districts going to the Republicans and the even numbered Districts to the Democrats.

The system of accountability for expenditures against the election appropriation which prevailed in the old Bureau of Elections has been successfully applied to all branches of the new Bureau. The amount appropriated for general election expenses for the current year was \$497,100; total expenditure (so far as audited in this office) is \$454,746.06. The amount appropriated for same period to carry out the Primary Election Law was \$207,986; total expenditure, \$223,282.50. A transfer was made by the Board of Estimate and Apportionment of \$10,000 to the Police Fund, July 1, 1898, and \$25,000 to the Primary Fund, December 9, 1898. A copy of each voucher audited is on file in this office.

Under the Charter it is made the duty of the Superintendent of Elections "to make such recommendations in reference to the election law * * * and as to elections" as to him may seem advisable.

The marked defect in the General Election Law is the provision as to the clerical qualifications of an election officer. In 1895, and for many years before, the clerical qualifications of an election officer were defined in the law as "able to read, write and speak the English language

understandingly." In 1897 this clause was amended to read, "able to read and speak the English language understandingly, and to write it legibly." In both cases provisions were made that "all persons so proposed for appointment may be examined as to their qualifications." Under the Penal Code (section 41k) it is a misdemeanor for any person to act as an inspector of election, poll clerk or ballot clerk, without being able to read and write the English language "or without being otherwise qualified to hold such office." Prior to 1895, the scope of our examination was limited to character, and ability to read, write and speak the English language; the quality of the election officers passed under such conditions was shown by the bad condition of the registers and returns filed in the Bureau of Elections in 1894, so that I was unable to certify that 1,916 election officers serving had "fully performed their duties," and their names were not placed on the pay-rolls. In the following year a new form of examination was authorized by the Police Board, including (in addition to handwriting) an opportunity to answer a few simple questions upon the election law, with a copy of which each applicant had been previously supplied. By this method the delinquent list was reduced from 21 per cent. in 1894 to 13 per cent. in 1895 and 1.10 per cent. in 1896. In 1898 the Legislature further amended the law so that the examination is strictly limited to "the qualifications required by section 11 of the Election Law," or simply their ability to speak, read and write the English language. This practically relegates the test of fitness to the comparatively slight scrutiny exercised prior to 1895, and the evidence of unfitness of many election inspectors indicated by the condition of the enrollment books used on registration days this year shows the bad effect of such limitation.

To remedy this in conformity to the language of the section of the Penal Code above quoted, section 11 of the General Election Law should contain an additional qualification—"and of reasonable clerical ability."

Section 32, subdivision 3, should be amended so that the "list of persons enrolled" (commonly called "List of Voters Registered") should be made out by the Board of Election Inspectors at the close of each day, instead of "immediately after the close of the last day of registration," as now provided; this is important in The City of New York in the interest of prompt publication.

There should be but one method prescribed for marking "split ballots," instead of two, as now provided for, the law, as it exists in this respect, tending to confuse the voter and the canvasser. (Secs. 105 and 110, Election Law.)

The first year's operation of the Primary Election Law reveals certain defects, as follows: (1) The number of enrollments and elections; (2) The method of enrollment on days of registration; (3) The excessive clerical work devolved upon the custodian of primary records in making transcripts and copies of the enrollment books for the political parties.

To remedy these defects I would recommend that the Primary Election Law be amended, as follows:

I. That but one Primary Election be held in each year for the purpose of selecting members of conventions, committees, etc.; thus doing away with the additional Official Primary in the year when a Governor is elected; also, that the May "supplemental" enrollment be dispensed with, and all transfers and additions, by becoming of age since last preceding registration, be made by the Custodian of Primary Records at any time between the first day of February and thirty days before the Primary Election in each year.

II. The method of enrollment on days of registration (prescribed by section 3, subdivision 2), impairs the secrecy of the enrollment, and practically limits the number who would otherwise record their party affiliation at that time. This might be avoided by eliminating the requirement of the elaborate "declaration" and permitting electors to enroll orally (as now provided) or by filing with the Election Inspector a card containing his name, address and party affiliation; such card after being copied in all the enrollment books, to be inclosed and filed with the sealed envelope.

III. Section 3, subdivision 1, should be amended so that four enrollment books (instead of two) should be provided for each election district by the Custodian of Primary Records; two to be known as original enrollment books, and two to be copies for the use of the principal political parties, and to be "entered up" by the Election Inspectors on days of registration. For the use of all other political parties, subject to the provisions of section 15, blank enrollment books to be furnished upon application to the Custodian of Primary Records. Section 8, subdivision 4, should be amended so that the time fixed for the completion of the canvass by the Custodian of Primary Records should read "six secular days" instead of "seventy-two hours."

It is estimated that the amendments recommended would not only produce better results as to enrollment but would effect a material reduction in the cost of operation; probable a saving of fifty per cent. of the appropriation.

The result of the first year of consolidation upon the cost of a General Election within Greater New York boundaries is encouraging. In the items of salaries, storage, cartage, and ballots alone there will result a saving of twenty-five per cent. as compared with the cost of 1897. This is an approximate estimate only.

In conducting the operations of the General Bureau I have had the prompt and intelligent support of all subordinate officers.

Respectfully,
T. F. RODENBOUGH, Superintendent of Elections.

BRANCH BUREAU OF ELECTIONS, BOROUGH OF BROOKLYN,
No. 19 SMITH STREET,
BROOKLYN, December 31, 1898.

Gen. T. F. RODENBOUGH, Superintendent of Elections:

DEAR SIR—We beg leave to submit a brief report of the work of this Bureau for the year 1898. The year just closing was one of unusual activity in this Department, the New Primary Law adding very much to the usual duties of the regular force of clerks. The work in this connection was entirely new, and the limited time in which it was required to be done placed our force at a decided disadvantage. The situation was quickly understood, each man working with tireless energy, giving no thought to hours of service each day, and the task was completed with commendable promptitude and in a highly satisfactory manner.

Under the old system the polling-place fixings were stored in warehouses, the contract for them running up to November, 1898. They were taken from the various storehouses for use on Election Day, and from there taken to the various precinct station-houses, so that at present everything relating to this branch of the work is in the custody of the Police Department, and a saving of more than \$500 per year is effected in storage charges.

The lease for the premises now occupied by this Bureau will terminate in June, 1899, and we presume that some arrangements for the future will have to be made.

The total number of election officials in this borough was 4,128, equally divided as to party, and recommended in the first instance by the Chairmen of the Executive Committees of the Democratic and Republican parties. Of the total number nominated, about twenty-five per cent., from various causes, failed to qualify, and the parties made other recommendations, and wherever vacancies occurred, up to the last day, they were filled by the recognized representatives of the parties wherein such vacancies occurred. So that the absolute bi-partisan character was everywhere preserved. The election officials, as a whole, discharged their duties in a satisfactory manner. After the election, in accordance with the practice of your office, pay cards were issued to the election officials which directed them to apply at this office on or after November 22, when, if the officials were found to have served faithfully, the card was certified to by the Chief of the Bureau.

The total registration in this borough was 201,816, and the total vote was 189,478, the percentage of the vote to the registration being 93.39.

Respectfully,
(Signed) GEORGE RUSSELL, Chief of Bureau.

(Signed) Per JOHN K. NEAL, Chief Clerk.

POLICE DEPARTMENT OF THE CITY OF NEW YORK,
BUREAU OF ELECTIONS, BOROUGH OF QUEENS,
ASTORIA, N. Y., December 28, 1898.

Gen. T. F. RODENBOUGH, Superintendent of Elections:

SIR—When this Bureau took possession of the election property, shortly after January 1, 1898, we found that some of the former towns stored booths, etc., with individuals, and that portable houses were erected permanently on ground leased yearly.

At your suggestion, we secured the lowest possible terms for storage of election booths in the several places, also ground rent for storage of portable and permanent voting booths, and have submitted the terms agreed upon to you during the months of February and March, 1898.

The following statement will show the bills contracted for:

Storage.	
John Reidy, Whitestone	\$10 00
Fred. Koch, College Point	14 00
Herman Haak, Bayside	5 00
D. L. Van Nostrand, Little Neck	5 00
\$34 00	
Ground Rent.	
Herman Veick, Corona, 1 lot	\$10 00
J. H. Jebens & Bro., Newtown, 2 lots	22 00
Gus Polack, East Williamsburgh, 1 lot	10 00
Patrick Shelly, Jamaica, 1 lot	14 00
L. H. Lamberson, Springfield, 1 lot	14 00
70 00	
Total	\$104 00

We have now taken all the booths which were stored with different people and placed them in the station-houses of this borough, so hereafter there will be no more charge or expense for storing election property, the only expenses will be for ground rent where portable and permanent voting booths are located.

Inclosed please find some of the bills for the above-named expenses. We have asked all the parties to render bills for amounts due them and will forward to you as soon as received. We also inclose bills for carpenter work for constructing portable houses which were blown down.

Respectfully,
(Signed) JAMES R. RODMAN, Chief, Bureau of Elections, Borough of Queens.

POLICE DEPARTMENT OF THE CITY OF NEW YORK,
BUREAU OF ELECTIONS, BOROUGH OF RICHMOND,
STAPLETON, S. I., December 19, 1898.

Gen. T. F. RODENBOUGH, Superintendent of Elections:

SIR—Acting under your instructions, the following is a list of storage places for election material, names of owners of premises, with location and amount of material stored:

Stored with John W. Lisk, Richmond avenue, Bull's Head, S. I., 60 booths, 30 guard rails, 27 tables, 54 wood horses, 60 shelves	\$125 00
Stored with Mrs. Pendexter, Amboy road, Tottenville, S. I., 34 booths, 11 guard rails, 3 wood horses, 10 shelves	30 00
Stored in Orlando Hall (St. John's M. E. Church), Shore road, Rossville, S. I., 6 booths. Stored with Fred. Wilkins, Eltingville, S. I., 6 booths, 6 shelves, 4 wood horses, 2 guard rails	15 00
Stored with Amicitia Association, Pleasant Plains, S. I., 8 booths, 2 wood horses, 8 shelves	15 90
Stored with John Androvett, Kreischerville, S. I., 6 booths	15 00
Stored with James D. Keeley, New York avenue, Clifton, S. I., 64 booths, 37 shelves, 16 wood horses, 8 guard rails	60 00
Stored with James R. McMullen, No. 59 Osgood avenue, Stapleton, S. I., 73 booths, 11 wood horses, 13 guard rails, 15 shelves	50 00

Captain Daniel Blake, Precinct Commander, informs me that there is not sufficient space in the various station-houses for the storage of election material. At the present time election material is stored at an expense of \$325 per year in eight different places. I would suggest that we secure a proper storage place, centrally located in each of the five wards. At present all election material used in the First Ward is stored temporarily in the First Sub-precinct Station-house, Richmond terrace, West New Brighton.

There are fifteen Myers ballot machines stored in the various places in the Third and Fifth Wards, at a cost of \$15 each, for which the owners of said premises expect payment. I understand that a payment of \$1,000 is due March, 1899, on the six machines in the Fifth Ward. Five machines are stored in engine houses, the companies of which receive appropriations from the Municipal Government.

Respectfully,
(Signed) CHAS. A. JONES, Chief, Bureau of Elections.

Exterior Street, Acquiring Title, between Cromwell's Creek and One Hundred and Fiftieth Street.

Petition of William Waldorf Astor and others was read, as was also the following:

JUNE 7, 1899.

JOSEPH P. HENNESSY, Esq., Secretary of the President of the Borough of The Bronx, Municipal Building, Crotona Park, New York City:

DEAR SIR—In confirmation of our communication with your office over the telephone to-day, we write to say that Messrs. William Waldorf Astor, James R. Roosevelt, Henry B. Ely and Douglas Robinson, as Trustees under the will of William Astor, deceased, for the benefit of John Jacob Astor and remaindermen and Henry Lewis Morris, the petitioners for the opening of Exterior street, from Cromwell's creek to One Hundred and Fiftieth street, desire and request that the matter of their application be not taken up to-morrow and that their petition be not presented to the Local Board to-morrow, Thursday, June 8, 1899, 2 P. M., in accordance with the notice that it will be so presented, received from Joseph P. Hennessy, Secretary, and that the matter be postponed for one month, as we are advised by your office, over the telephone, that such postponement would be had without the attendance of anyone, the parties will not be represented to-morrow, and we shall feel obliged to you if you will kindly send us word of the time and place, about a month hence, when the matter will be taken up by the Local Board.

Yours very truly,

EVARTS, CHOATE & BEAMAN.

The matter was laid over for one month.

Closing Portions of Mucomb's Dam Road.

Councilman Hottenroth, to whom this matter was referred, reported that he had written to counsel for further information, but had not received a reply. The President said that it would be desirable to have a report at the next meeting.

Belmont Avenue Extension, from One Hundred and Seventy-fifth Street to Crotona Park, North.

Action deferred until next meeting.

West Two Hundred and Thirtieth Street, Regulating, Grading, etc., between Broadway and the New York Central and Hudson River Railroad Company's Tracks at Riverdale Avenue.

The following communication was read:

BOARD OF PUBLIC IMPROVEMENTS, No. 21 PARK ROW, }
June 2, 1899.

Hon. LOUIS F. HAFEN, President, Borough of The Bronx:

DEAR SIR—I inclose herewith copy of a report from the Chief Topographical Engineer in regard to the recommendation of the Local Board, Twenty-first District, that West Two Hundred and Thirtieth street be regulated and graded, etc., between Broadway and the New York Central and Hudson River Railroad Company's tracks, which report was submitted to the Board at the meeting held May 24.

In his report the Chief Topographical Engineer suggests that Riverdale avenue, west of the tracks, be taken into consideration, and the matter was referred back to you for the further consideration of the Local Board.

Respectfully,

JOHN H. MOONEY, Secretary.

The report of the Chief Topographical Engineer was as follows:

CITY OF NEW YORK,
PRESIDENT OF BOARD OF PUBLIC IMPROVEMENTS,
TOPOGRAPHICAL BUREAU,

ONE HUNDRED AND SEVENTY-SEVENTH STREET AND THIRD AVENUE, }
May 23, 1899.

Mr. JOHN H. MOONEY, Secretary, Board of Public Improvements:

SIR—In reply to the action taken by the Board of Public Improvements, referring, for report, communication from the President of the Borough of The Bronx, recommending the regulating, grading, etc., of West Two Hundred and Thirtieth street, between Broadway and the New York Central and Hudson River Railroad Company's tracks at Riverdale avenue, in the Borough of The Bronx, I have to state that the Final Maps and Profiles of the Twenty-third and Twenty-fourth Wards show an over-grade crossing over the tracks of the New York Central and Hudson River Railroad at an elevation of 18 feet above the tracks. In order to carry out this improvement the Riverdale west of the tracks must be taken into consideration, and I recommend, therefore, that the resolution be returned to the Local Board to amend the pending resolution.

The regulating, grading, etc., of West Two Hundred and Thirtieth street to the tracks only would simply prevent connection between said street and Riverdale avenue, and could not be used. The papers in this matter are herein returned.

Respectfully,

LOUIS A. RISSE, Chief Topographical Engineer.

On motion of Councilman Hottenroth, the following preamble and resolution were adopted: Whereas, The Local Board of the Twenty-first District recommended on March 30, 1899, regulating, grading, etc., of West Two Hundred and Thirtieth street, between Broadway and the New York Central and Hudson River Railroad tracks at Riverdale avenue, and

Whereas, This Board, in making such recommendation, took into consideration the necessity of a bridge over the railroad tracks; but, understanding that the cost of such a structure under existing laws would be a charge of one-half against the City and one-half against the railroad company, this Board deemed it proper to leave the consideration of the construction of the bridge wholly to the Board of Public Improvements, and therefore it hereby readopts its recommendation of March 30, that West Two Hundred and Thirtieth street, between Broadway and the New York Central and Hudson River Railroad tracks at Riverdale, be regulated and graded, curbstones set and sidewalks flagged a space four feet wide through the centre thereof and crosswalks laid where necessary.

One Hundred and Sixty-sixth Street, Laying out, from Stebbins Avenue to Southern Boulevard.

Councilman Hottenroth said that he would call up the petition for opening this street at the next meeting.

Dock Facilities, Twenty-third Ward River Front.

Councilman Murray reintroduced the subject of more dock facilities along the Twenty-third Ward river front. President Haffen appointed Councilman Murray and Alderman McGrath to make report at the next meeting.

Adjourned.

JOSEPH P. HENNESSY, Secretary.

BOARD OF LOCAL IMPROVEMENTS.

TWENTY-SECOND DISTRICT, BOROUGH OF THE BRONX.

Pursuant to call by President Haffen, the Local Board, Twenty-second District met at 3 P. M., June 8, 1899, at the office of the President of the Borough of The Bronx, Municipal Building, Crotona Park.

Present—President Haffen and Alderman Gass.

Second Street, Williamsbridge, Fencing.

The following communication was read:

BOARD OF PUBLIC IMPROVEMENTS, No. 21 PARK ROW, }
June 2, 1899.

Hon. LOUIS F. HAFEN, President of the Borough of The Bronx:

DEAR SIR—On December 3, 1898, the Department of Highways recommended to this Board that the lots known as Nos. 102 and 104 Second street, Williamsbridge, be fenced. This matter was laid over at the meeting of the Board held December 7, 1899; but as it does not appear to have

ever been before the Local Board, it was referred to you by action of this Board taken at the meeting held on the 24th instant, for the action of the Local Board.

Will you kindly bring the matter up before the proper Local Board for its consideration?
Respectfully yours,

JOHN H. MOONEY, Secretary.

On motion of Alderman Gass, it was

Resolved, That this Board hereby recommends to the Board of Public Improvements that the lots known as Nos. 102 and 104 Second street, Williamsbridge, be fenced, in accordance with section 403 of the Charter.

Opening of a Street from Boston Post Road to Baychester Station.

President Haffen said that he believed that the petition of George P. Shirmer and others (received June 8, 1899) was in the interest of the property-owners and the people generally, and, on motion of Alderman Gass, the following was adopted:

Resolved, That this Board hereby recommends to the Board of Public Improvements the completion, as soon as possible, of that section of the map of the Borough of The Bronx east of the Bronx river, embracing the proposed highway from Boston road to Baychester Station, so that title might be acquired and construction proceeded with as soon as possible.

Becker Avenue, Gas-mains, from White Plains Road to Marion Street.

Petition of Phillip Hauser and others was read.

On motion of Alderman Gass, the matter was recommended to the Commissioner of Public Buildings, Lighting and Supplies.
Adjourned.

JOSEPH P. HENNESSY, Secretary.

The President directed the Clerk to read the call for the special meeting, which is as follows:

No. 2946.

CITY OF NEW YORK—BOARD OF ALDERMEN,
OFFICE OF THE PRESIDENT,
June 10, 1899.

MICHAEL F. BLAKE, Esq., Clerk of the Board of Aldermen, New York City:

SIR—You are hereby authorized and directed to call a special meeting of the Board of Aldermen to be held in the Aldermanic Chamber, City Hall, Borough of Manhattan, on Monday, June 12, 1899, at 1 o'clock P. M., for the purpose of taking action on the death of Hon. Henry Siefke, Alderman for the Ninth Assembly District, New York County, Borough of Manhattan.

Respectfully,

THOMAS F. WOODS, President, Board of Aldermen.

Alderman John T. McCall then arose and presented the following preamble and resolutions:

No. 2947.

Whereas, Death again has visited the Board of Aldermen of The City of New York by removing, in the prime and vigor of manhood, our beloved associate and colleague, Hon. Henry Siefke, Alderman for the Ninth Assembly District, New York County, Borough of Manhattan; and

Whereas, Alderman Henry Siefke during his service for a year and a half as member of the Board of Aldermen, won for himself, by his sterling attributes, the respect, affection and warm friendship of every member, and also left behind him a record of clean, unsullied integrity; therefore be it

Resolved, That we, the members of the Board of Aldermen of The City of New York, deeply deplore the untimely death of the said Hon. Henry Siefke, and offer to his family our sincere condolence in this the hour of their sad bereavement;

Resolved, further, That the Chamber of the Board of Aldermen and the desk and chair occupied by our deceased member be draped in mourning for a period of thirty days, and that the members of the Board attend the funeral in a body; be it further

Resolved, That a copy of these resolutions, suitably engrossed and duly authenticated, be transmitted to the family of the deceased; and be it

Resolved, further, That a special committee of ten, of which the President shall be ex-officio a member, be appointed by the Chair to carry these resolutions into effect.

Resolved, That, as an additional mark of our respect, this Board do now adjourn.

In moving the adoption of the preamble and resolutions, Alderman John T. McCall touched feelingly upon the career of his colleague, followed by Aldermen Goodman, Glick and Bridges, who in like manner, speaking briefly, seconded the same.

The President then put the question whether the Board would agree with said preamble and resolutions.

Which was decided in the affirmative by a rising vote.

The President then appointed Aldermen John T. McCall, John L. Burleigh, Charles Metzger, Elias Goodman, Robert Muh, Francis P. Kenney, Vice-President William H. Gledhill, John J. Vaughan, Jr., Lawrence W. McGrath and Joseph Geiser a committee to carry these resolutions into effect.

And the President declared that the Board stood adjourned until Tuesday, June 13, 1899, at 1 o'clock P. M.

MICHAEL F. BLAKE, Clerk of the Board of Aldermen.

If the goods are not delivered in ten days, the Commissioner reserves the right to purchase in open market and charge the difference, if any, to the contractor.
Bidders are requested to foot up their bids.
Awards will be made on the lowest terms.
Goods will be received in one delivery.
No empty packages are to be returned to bidders or contractors.
The person or persons making any bid or estimate shall furnish the same in a sealed envelope, indorsed "Bid or estimate for Materials for the Manufacturing Bureau, for the Kings County Penitentiary," with his or her name or names, and the date of presentation, to the head of said Department, at the said office, on or before the date and hour above named, at which time and place the bids or estimates received will be publicly opened by the Commissioner of Correction, or his duly authorized agent, and read.
THE COMMISSIONER OF CORRECTION RESERVES THE RIGHT TO REJECT ALL BIDS OR ESTIMATES IF DEEMED TO BE FOR THE PUBLIC INTEREST, AS PROVIDED IN SECTION 64, CHAPTER 410, LAWS OF 1882.
No bid or estimate will be accepted from, or contract awarded to, any person who is in arrears to the Corporation upon debt or contract, or who is a defaulter as surety or otherwise, upon any obligation to the Corporation.
The award of the contract will be made as soon as practicable after the opening of the bids.
Any bidder for this contract must be known to be engaged in and well prepared for the business, and must have satisfactory testimonials to that effect, and the person or persons to whom the contract may be awarded will be required to give security for the performance of the contract, by his or their bond, with two sufficient sureties, each in the penal amount of fifty (50) per cent. of the bid for each article.
Each bid or estimate shall contain and state the name and place of residence of each of the persons making the same, the names of all persons interested with him or them therein, and if no other person be so interested it shall distinctly state that fact; also that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Municipal Assembly, head of a department, chief of a bureau, deputy thereof or clerk therein, or other officer of the Corporation, is directly or indirectly interested therein, or in the supplies or work to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate, that the several matters stated therein are in all respects true. Where more than one person is interested it is requisite that the verification be made and subscribed by all the parties interested.
Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders, in The City of New York, with their respective places of business or residence, to the effect that if the contract be awarded to the person making the estimate, they will, on its being so awarded, become bound as his sureties for its faithful performance, and that if he shall omit or refuse to execute the same they shall pay to the Corporation any difference between the sum to which he would be entitled on its completion and that which the Corporation may be obliged to pay to the person or persons to whom the contract may be awarded at any subsequent letting; the amount in each case to be calculated upon the estimated amount of the work by which the bids are tested. The consent above mentioned shall be accompanied by the oath or affirmation, in writing, of each of the persons signing the same, that he is a householder or freeholder in The City of New York, and is worth the amount of the security required for the completion of this contract over and above all his debts of every nature, and over and above his liabilities as bail, surety or otherwise, and that he has offered himself as a surety in good faith and with the intention to execute the bond required by section 12 of chapter 7 of the Revised Ordinances of The City of New York, if the contract shall be awarded to the person or persons for whom he consents to become surety. The adequacy and sufficiency of the security offered to be approved by the Comptroller of The City of New York.
No bid or estimate will be considered unless accompanied by either a certified check upon one

will, on its being so awarded, become bound as his sureties for its faithful performance; and that if he shall omit or refuse to execute the same, they will pay to the Corporation any difference between the sum to which he would be entitled upon its completion and that which the Corporation may be obliged to pay to the person or persons to whom the contract may be awarded at any subsequent letting, the amount in each case to be calculated upon the estimated amount of the work by which the bids are tested. The consent above mentioned shall be accompanied by the oath or affirmation, in writing, of each of the persons signing the same, that he is a householder or freeholder in The City of New York, and is worth the amount of the security required for the completion of this contract over and above all his debts of every nature, and over and above his liabilities as bail, surety or otherwise, and that he has offered himself as a surety in good faith, and with the intention to execute the bond required by section 12 of chapter 7 of the Revised Ordinances of The City of New York, if the contract shall be awarded to the person or persons for whom he consents to become surety. The adequacy and sufficiency of the security offered to be approved by the Comptroller of The City of New York.

No bid or estimate will be considered unless accompanied by either a certified check upon one of the National or State Banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the security required for the faithful performance of the contract. Such check or money must not be inclosed in the sealed envelope containing the estimate, but must be handed to the officer or clerk of the Department who has charge of the estimate-box; and no estimate can be deposited in said box until such check or money has been examined by said officer or clerk and found to be correct. All such deposits, except that of the successful bidder, will be returned to the persons making the same within three days after the contract is awarded. If the successful bidder shall refuse or neglect, within five days after notice that the contract has been awarded to him, to execute the same, the amount of the deposit made by him shall be forfeited and retained by The City of New York as liquidated damages for such neglect or refusal; but if he shall execute the contract within the time aforesaid the amount of his deposit will be returned to him.

Should the person or persons to whom the contract may be awarded neglect or refuse to accept the contract within five days after written notice that the same has been awarded to his or their bid or proposal, or if he or they accept but do not execute the contract and give the proper security, he or they shall be considered as having abandoned it and as in default to the Corporation, and the contract will be readvertised and relet as provided by law.

The quality of the articles, supplies, goods, wares and merchandise must conform in every respect to the samples of the same on exhibition at the Kings County Penitentiary, or in the absence of samples, to the specifications. Bidders are cautioned to examine the specifications for particulars of the articles, etc., required before making their estimates.

Bidders will state the price for each article, by which the bids will be tested.

Bidders will write out the amount of their estimates in addition to inserting the same in figures.

Payment will be made by a requisition on the Comptroller, in accordance with the terms of the contract, or from time to time, as the Commissioner may determine.

The form of the contract, including specifications, and showing the manner of payment, will be furnished at the office of the Department, No. 148 East Twentieth street, or James J. Kirwin, Deputy Commissioner, No. 5 City Hall, Borough of Brooklyn, and bidders are cautioned to examine each and all of its provisions carefully, as the Commissioner will insist upon its absolute enforcement in every particular.

FRANCIS J. LANTRY,
Commissioner of Correction.

No bonds or deposit required on bids under One Thousand Dollars. Awards will be made on the lowest terms.

THE COMMISSIONER OF CORRECTION RESERVES THE RIGHT TO REJECT ALL BIDS OR ESTIMATES IF DEEMED TO BE FOR THE PUBLIC INTEREST, AS PROVIDED IN SECTION 419, CHAPTER 378, LAWS OF 1897.

No bid or estimate will be accepted from, or contract awarded to, any person who is in arrears to the Corporation upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the Corporation.

The award of the contract will be made as soon as practicable after the opening of the bids.

Delivery will be required to be made from time to time, and in such quantities as may be directed by the said Commissioner.

Any bidder for this contract must be known to be engaged in and well prepared for the business, and must have satisfactory testimonials to that effect, and the person or persons to whom the contract may be awarded will be required to give security for the performance of the contract, by his or their bond, with two sufficient sureties, each in the penal amount of fifty (50) per cent. of the bid for each article.

Each bid or estimate shall contain and state the name and place of residence of each of the persons making the same, the names of all persons interested with him or them therein, and if no other person be so interested it shall distinctly state that fact; also that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Municipal Assembly, head of a department, chief of a bureau, deputy thereof or clerk therein, or other officer of the Corporation, is directly or indirectly interested therein, or in the supplies or work to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate, that the several matters stated therein are in all respects true. Where more than one person is interested it is requisite that the verification be made and subscribed by all the parties interested.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders, in The City of New York, with their respective places of business or residence, to the effect that if the contract be awarded to the person making the estimate, they will, on its being so awarded, become bound as his sureties for its faithful performance, and that if he shall omit or refuse to execute the same they shall pay to the Corporation any difference between the sum to which he would be entitled on its completion and that which the Corporation may be obliged to pay to the person or persons to whom the contract may be awarded at any subsequent letting; the amount in each case to be calculated upon the estimated amount of the work by which the bids are tested. The consent above mentioned shall be accompanied by the oath or affirmation, in writing, of each of the persons signing the same, that he is a householder or freeholder in The City of New York, and is worth the amount of the security required for the completion of this contract over and above all his debts of every nature, and over and above his liabilities as bail, surety or otherwise, and that he has offered himself as a surety in good faith and with the intention to execute the bond required by section 12 of chapter 7 of the Revised Ordinances of The City of New York, if the contract shall be awarded to the person or persons for whom he consents to become surety. The adequacy and sufficiency of the security offered to be approved by the Comptroller of The City of New York.

No bid or estimate will be considered unless accompanied by either a certified check upon one

of the State or National Banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the security required for the faithful performance of the contract. Such check or money must not be inclosed in the sealed envelope containing the estimate, but must be handed to the officer or clerk of the Department who has charge of the estimate box, and no estimate can be deposited in said box until such check or money has been examined by said officer or clerk and found to be correct. All such deposits, except that of the successful bidder, will be returned to the persons making the same within three days after the contract is awarded. If the successful bidder shall refuse or neglect, within five days after notice that the contract has been awarded to him, to execute the same, the amount of the deposit made by him shall be forfeited and retained by the City of New York as liquidated damages for such neglect or refusal; but if he shall execute the contract within the time aforesaid, the amount of his deposit will be returned to him.

Should the person or persons to whom the contract may be awarded neglect or refuse to accept the contract within five days after written notice that the same has been awarded to him or their bid or proposal, or if he or they accept but do not execute the contract and give the proper security, he or they shall be considered as

having abandoned it and as in default to the Corporation, and the contract will be readvertised and relet, as provided by law.

Bidders will state the price for each article, by which the bids will be tested.

The quality of the articles, supplies, goods, wares and merchandise must conform in every respect to the samples of the same on exhibition at the office of the said Department, No. 148 East Twentieth street, New York City, or, in the absence of samples, to the printed specifications. Bidders are cautioned to examine the specifications for particulars of the articles, etc., required before making their estimates.

Bidders will write out the amount of their estimates in addition to inserting the same in figures.

Payment will be made by a requisition on the Comptroller, in accordance with the terms of the contract, or from time to time, as the Commissioner may determine.

The form of the contract, including specifications, and showing the manner of payment and other details, will be furnished at the office of the Department, No. 148 East Twentieth street, New York City, and bidders are cautioned to examine each and all of its provisions carefully, as the Commissioner will insist upon its absolute enforcement in every particular.

FRANCIS J. LANTRY,
Commissioner of Correction.

DEPARTMENT OF FINANCE.

NOTICE TO TAXPAYERS IN THE FIRST, THIRD, FOURTH AND FIFTH WARDS, BOROUGH OF QUEENS, FORMERLY KNOWN AS LONG ISLAND CITY, TOWNS OF FLUSHING, JAMAICA AND PART OF THE TOWN OF HEMPSTEAD, RESPECTIVELY.

DEPARTMENT OF FINANCE,
BUREAU FOR THE COLLECTION OF ASSESSMENTS
AND ARREARS,
CITY OF NEW YORK, June 10, 1899.

UNDER THE PROVISIONS OF CHAPTER 635, Laws of 1899, public notice is hereby given that, "Any tax heretofore, and before the first day of January, eighteen hundred and ninety-eight, levied for ward, city, town, county or State purposes, and all water rates or rents in arrears at the time of the passage of this act, in that part of The City of New York which heretofore and before the first day of January, eighteen hundred and ninety-eight, formed and constituted the city of Long Island City, and the towns of Flushing, Jamaica, and that part of the Town of Hempstead now within the boundaries of The City of New York, in the County of Queens, may be paid and discharged of record at any time before the thirtieth (30th) day of September, nineteen hundred, with interest thereon at the rate of two (2) per centum per annum."

Also, that "Any lot, piece or parcel of land within the boundaries of that part of The City of New York, constituting the City of Long Island City, and that part of the Town of Flushing, Jamaica and that part of the Town of Hempstead now within the boundaries of The City of New York, in the County of Queens, prior to the first day of January, eighteen hundred and ninety-eight, which has been heretofore sold for unpaid taxes, water rates or rents, for ward, city, town, county or State purposes, where the same was bid in in the name of said City of Long Island City, town of Flushing, town of Jamaica, or town of Hempstead, and where the certificates of sale have not been assigned at the date of the passage of this act, may be redeemed from such sale and sales on or before the thirty-first (31st) day of December, nineteen hundred, by the payment of the face of the tax or taxes and water rates or rents for which the same were sold, with interest thereon at two (2) per centum per annum, and such taxes and water rates or rents shall be thereby satisfied and discharged of record; provided such payment be made on or prior to the date last aforesaid."

On and after Monday, June 12, 1899, payments may be made under the provisions of this act, to the undersigned, at his office, in the Borough of Queens, Hackett Building, corner of Jackson Avenue and Fifth Street, First Ward (formerly Long Island City), between the hours of 9 A. M. and 2 P. M.; Saturdays, 9 to 12 M.

The above-described stock is free and exempt from all taxation in the State of New York, except for State purposes, pursuant to the provision of section 169 of chapter 378 of the Laws of 1897.

The principal of and interest on said stock are payable in gold coin of the United States of America, of the present standard of weight and fineness, pursuant to a resolution of the Commissioners of the Sinking Fund, adopted June 9, 1898.

CONDITIONS OF SALE.

No proposal for stock shall be accepted for less than the par value of the same. Proposals containing conditions other than those herein set forth will not be received or considered. Every bidder, as a condition precedent to the reception or consideration of his proposal, shall deposit with the Comptroller in money, or by a certified check drawn to the order of said Comptroller upon one of the State or National Banks of the said city, two per cent. of the par value of the stock bid for in said proposal. No proposal will be received or considered which is not accompanied by such deposit. All such deposits shall be returned by the Comptroller to the persons making the same within three days after the decision has been rendered as to who is or are the highest bidder or bidders, except the deposit made by the highest bidder or bidders.

If said highest bidder or bidders shall refuse or neglect, within five days after service of written notice of the award to him or them, to pay to the City Chamberlain the amount of the stock awarded to him or them at its par value, together with the premium thereon, less the amount deposited by him or them, the amount or amounts of deposit thus made shall be forfeited and retained by said City as liquidated damages for such neglect or refusal, and shall thereafter be paid into the Sinking Fund of The City of New York for the Redemption of the City Debt.

Upon the payment into the City Treasury of the amounts due by the persons whose bids are accepted, respectively, certificates thereof shall be issued to them as authorized by law.

The proposals, together with the security deposits, should be inclosed in a sealed envelope, indorsed "Proposals for Bonds of the Corporation of the City of New York," and then inclosed in a sealed envelope, addressed to the Comptroller of The City of New York.

BIRD S. COLER, Comptroller.

COMPTROLLER'S OFFICE, May 24, 1899.

NOTICE OF SALE OF LANDS AND TENEMENTS WITHIN THAT PART OF THE CITY OF NEW YORK NOW KNOWN AS THE BOROUGH OF MANHATTAN AND THE BRONX FOR UNPAID ASSESSMENTS.

CITY OF NEW YORK,
DEPARTMENT OF FINANCE,
BUREAU FOR THE COLLECTION OF ASSESSMENTS
AND ARREARS OF TAXES,
ASSESSMENTS AND WATER RENTS,
STEWART BUILDING, NO. 280 BROADWAY,
May 6, 1899.

UNDER THE DIRECTION OF BIRD S. COLER, Comptroller of The City of New York, the undersigned hereby gives public notice, pursuant to the provisions of section 1027 of the Greater New York Charter:

That the respective owners of the lands and tenements within that part of the City of New York now known as the boroughs of Manhattan and The Bronx, on which assessments for local improvements, including those confirmed by a Court of Record, have been laid and confirmed according to law, now remaining unpaid, and which were confirmed during the year 1895, and prior thereto, are required to pay the amount of the assessment or assessments so due and remaining unpaid to the Collector of Assessments and Arrears, at his office in the Department of Finance, Room No. 35, Stewart Building, No. 280 Broadway, together with the interest thereon, at the rate of seven per centum per annum, to the time of payment, with the charges of this notice and the advertisement.

And if default shall be made in such payment, such lands and tenements will be sold at public auction, at the County Court-house, in the City Hall Park, in The City of New York, on Wednesday, the 6th day of September, 1899, at 1 o'clock P. M., for the lowest term of years for which any person shall offer to take the same, in consideration of advancing the amount of the assessment so due and unpaid and the interest and charges thereon as aforesaid, and all other costs and charges that may have accrued thereon; and such sale shall be continued from time to time until all the lands and tenements as advertised for sale shall be sold.

And notice is hereby further given that a detailed statement of the assessments, the ownership of the property assessed, and on which the assessments are due and unpaid, is published in a pamphlet, and that copies of the pamphlet are deposited in the office of the Collector of Assessments and Arrears in the Department of Finance, and will be delivered to any person applying for the same.

EDWARD GILON,

SEALED BIDS OR ESTIMATES FOR THE above-mentioned work, in conformity with plans and specifications, will be received at the office of the Department of Public Charities, foot of East Twenty-sixth street, in The City of New York, until 12 o'clock M.,

MONDAY, JUNE 19, 1899.

The person or persons making any bid or estimate shall furnish the same in a sealed envelope, indorsed "Bid or Estimate for the Materials and Work required for New Tile Sewers to be laid in the Grounds at Bellevue Hospital," with his or their name or names and the date of presentation to the head of said Department, at the said office, on or before the day and hour above named, at which time and place the bids or estimates received will be publicly opened by the President of said Department, or his duly authorized agent, and read.

THE BOARD OF PUBLIC CHARITIES RESERVES THE RIGHT TO REJECT ALL BIDS OR ESTIMATES IF DEEMED TO BE FOR THE PUBLIC INTEREST, AS PROVIDED IN SECTION 419, CHAPTER 378, LAWS OF 1897.

No bid or estimate will be accepted from, or contract awarded to, any person who is in arrears to the Corporation upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the Corporation.

The award of the contract will be made as soon as practicable after the opening of the bids.

Any bidder for this contract must be known to be engaged in and well prepared for the business, and must have satisfactory testimonials to that effect, and the person or persons to whom the contract may be awarded will be required to give security for the performance of the contract by his or their bond, with two sufficient sureties, each in the penal amount of Seven Hundred (700) Dollars.

Each bid or estimate shall contain and state the name and place of residence of each of the persons making the same, the names of all persons interested with him or them therein, and if no other person be so interested it shall distinctly state that fact; also that it is made without any connection with any other person making an

estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Municipal Assembly, head of a department, chief of a bureau, deputy thereof or clerk therein, or other officer of the Corporation, is directly or indirectly interested therein, or in the supplies or work to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated therein are in all respects true. When more than one person is interested, it is requisite that the verification be made and subscribed by all the parties interested.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, with their respective places of business or residence, to the effect that if the contract be awarded to the person making the estimate, they will, on its being so awarded, become bound as his sureties for its faithful performance, and that if he shall omit or refuse to execute the same they will pay to the Corporation any difference between the sum to which he would be entitled upon its completion and that which the Corporation may be obliged to pay to the person or persons to whom the contract may be awarded at any subsequent letting; the amount in each case to be calculated upon the estimated amount of the work by which the bids are tested. The consent above mentioned shall be accompanied by the oath or affirmation, in writing, of each of the persons signing the same that he is a householder or freeholder in The City of New York, and is worth the amount of the security required for the completion of this contract over and above all his debts of every nature and over and above his liabilities as bail, surety or otherwise, and that he has offered himself as a surety in good faith and with the intention to execute the bond required by section 12 of chapter 7 of the Revised Ordinances of The City of New York, if the contract shall be awarded to the person or persons for whom he consents to become surety. The adequacy and sufficiency of the security offered to be approved by the Comptroller of The City of New York.

No bid or estimate will be considered unless accompanied by either a certified check upon one of the National or State banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the security required for the faithful performance of the contract. Such check or money must not be inclosed in the sealed envelope containing the estimate, but must be handed to the officer or clerk of the Department who has charge of the estimate box, and no estimate can be deposited in said box until such check or money has been examined by said officer or clerk and found to be correct. All such deposits, except that of the successful bidder, will be returned to the persons making the same within three days after the contract is awarded. If the successful bidder shall refuse or neglect, within five days after notice that the contract has been awarded to him, to execute the same, the amount of the deposit made by him shall be forfeited to and retained by The City of New York as liquidated damages for such neglect or refusal; but if he shall execute the contract within the time aforesaid, the amount of his deposit will be returned to him.

Should the person or persons to whom the contract may be awarded neglect or refuse to accept the contract within five days after written notice that the same has been awarded to his or their bid or proposal, or if he or they accept but do not execute the contract and give the proper security, he or they shall be considered as having abandoned it and as in default to the Corporation, and the contract will be readvertised and relet, as provided by law.

Bidders are cautioned to examine the plans and specifications for particulars of the work, etc., required before making their estimates, and are cautioned against referring to any specifications other than those furnished by the Department. Such references are cause for rejecting bids whereon they are written, and will in no case govern the action of the Department officers in passing upon tenders.

Bidders will write out the amount of their estimates in addition to inserting the same in figures.

Payment will be made by a requisition on the Comptroller, in accordance with the terms of the contract.

The form of the contract, including specifications, and showing the manner of payment, can be obtained and plans seen at the office of Horgan & Slattery, architects, No. 1 Madison avenue, New York City, and bidders are cautioned to examine each and all of its provisions carefully, as the Board of Public Charities will insist upon its absolute enforcement in every particular.

Bidders must satisfy themselves, by personal examination, and by such other means as they may prefer, as to the nature and extent of the work or materials, and shall not, any time after the submission of an estimate, dispute or complain of such statement, nor assert that there is any misunderstanding in regard to the nature or amount of the work to be done or materials to be furnished.

Each bid or estimate shall contain and state the name and place of residence of each of the persons making the same, the names of all persons interested with him or them therein, and if no other person be so interested it shall distinctly state that fact; that it is made without any connection with any other person making an estimate for the same purpose and is in all respects fair and without collusion or fraud, and that no member of the Municipal Assembly, head of a department, chief of a bureau, deputy thereof, or clerk therein or other officer of the Corporation, is directly or indirectly interested therein, or in the supplies or work to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated therein are in all respects true. Where more than one person is interested it is requisite that the verification be made and subscribed by all the parties interested.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, with their respective places of business or residence, to the effect that if the contract be awarded to the person making the estimate, they will, on its being so awarded, become bound as his sureties for its faithful performance, and that if he shall omit or refuse to execute the same they will pay to the Corporation any difference between the sum to which he would be entitled on its completion and that which the Corporation may be obliged to pay to the person or persons to whom the contract may be awarded at any subsequent letting, the amount in each case to be calculated upon the estimated amount of the work by which the bids are tested. The consent above mentioned shall be accompanied by the oath or affirmation, in writing, of each of the persons signing the same that he is a householder or freeholder in The City of New York, and is worth the amount of the security required for the completion of this contract, over and above all his debts of every nature and over and above his liabilities as bail, surety or otherwise, and that he has offered himself as a surety in good faith and with the intention to execute the bond required by section 27 of chapter 8 of the Revised Ordinances of The City of New York, if the contract shall be awarded to the person or persons for whom he consents to become surety; the adequacy and sufficiency of the security offered to be approved by the Comptroller of The City of New York.

No bid or estimate will be received or considered unless accompanied by either a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the security required for the faithful performance of the contract. Such check or money must not be inclosed in the sealed envelope containing the estimate, but must be handed to the officer or clerk of the Department who has charge of the estimate-box, and no estimate can be deposited in said box until such check or money has been examined by said officer or clerk and found to be correct. All such deposits, except that of the successful

ful bidder, will be returned to the persons making the same within three days after the contract is awarded. If the successful bidder shall refuse or neglect, within five days after notice that the contract has been awarded to him, to execute the same, the amount of the deposit made by him shall be forfeited and retained by The City of New York as liquidated damages for such neglect or refusal; but if he shall execute the contract within the time aforesaid the amount of his deposit will be returned to him.

N. B.—The prices must be written in the estimate and also stated in figures, and all estimates will be considered as informal which do not contain bids for all items for which bids are herein called, or which contain bids for items for which bids are not herein called for. Permission will not be given for the withdrawal of any bid or estimate. No bid will be accepted from or contract awarded to, any person who is in arrears to the Corporation upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the Corporation.

The Park Board reserves the right to reject any or all the bids received in response to this advertisement if it should deem it for the interest of the City so to do.

Specifications and blank forms for proposals for the contract and information relative thereto can be had at the office of the Park Board, Arsenal, Central Park.

PLANS AND SPECIFICATIONS

may be seen, and blank proposals obtained, at the Annex of the Hall of the Board of Education, Estimating Room, Nos. 419 and 421 Broome street, Borough of Manhattan.

The attention of bidders is expressly called to the time stated in the contract within which the work must be completed. They are expressly notified that the successful bidder will be held strictly to completion within said time.

The Committee reserves the right to reject any or all of the proposals submitted.

The party submitting a proposal, and the parties proposing to become sureties, must each write his name and place of residence on said proposal.

Two responsible and approved sureties, residents of this city, are required when the amount of the bid is less than two thousand dollars. Whenever the bid exceeds two thousand dollars the surety for the performance of the contract shall be a fidelity or surety company authorized to transact business by the laws of the State of New York, and authorized to become surety on such contract by a resolution of its Board of Directors.

No proposal will be considered from persons whose character and antecedent dealings with the Board of Education render their responsibility doubtful.

It is required, as a condition precedent to the reception or consideration of any proposals, that a certified check upon or a certificate of deposit of one of the State or National Banks or Trust Companies of The City of New York, drawn to the order of the President of the Board of Education, shall accompany the proposal to an amount of not less than three per cent. of such proposal when said proposal is for or exceeds ten thousand dollars, and to an amount of not less than five per cent. of such proposal when such proposal is for an amount under ten thousand dollars; that on demand, within one day after the awarding of the contract by the Committee, the President of the said Board will return all the deposits of checks and certificates of deposit made to the persons making the same, except that made by the person or persons whose bid has been accepted; and that if the person or persons whose bid has been so accepted shall refuse or neglect, within five days after due notice has been given that the contract is ready for execution, to execute the same, the amount of the deposit or of the check or certificate of deposit made by him or them shall be forfeited and retained by this Board, not as a penalty, but as liquidated damages for such neglect or refusal, and shall be paid into the City Treasury to the credit of the Sinking Fund of The City of New York; but if the said person or persons whose bid has been so accepted shall execute the contract within the time aforesaid, the amount of his or their deposit of check or certificate of deposit shall be returned to him or them.

SEALED PROPOSALS WILL BE RECEIVED BY the Committee on Buildings of the Board of Education of The City of New York, at the Annex to the Hall of the Board, No. 585 Broadway, eleventh floor, Borough of Manhattan, until 3 o'clock P. M. on

MONDAY, JUNE 26, 1899,

DEPARTMENT OF SEWERS.

DEPARTMENT OF SEWERS—COMMISSIONER'S OFFICE,
Nos. 13 to 21 PARK ROW,
NEW YORK, June 8, 1899.

TO CONTRACTORS.

BIDS OR ESTIMATES, INCLOSED IN A sealed envelope, with the title of the work and the name of the bidder indorsed thereon, will be received at this office until

WEDNESDAY, JUNE 21, 1899,

at 12 o'clock M., at which hour they will be publicly opened by the head of the Department, and read, for the following works:

No. 1. SEWER IN ONE HUNDRED AND EIGHTY-EIGHT STREET, between Amsterdam and Audubon avenues.

No. 2. SEWER IN ONE HUNDRED AND EIGHTY-EIGHT STREET, between Eleventh and Audubon avenues.

No. 3. SEWERS IN NINTH AVENUE, between Eighteenth and Twenty-third streets.

No. 4. ALTERATION AND IMPROVEMENT TO SEWER IN LAWRENCE STREET, between Amsterdam avenue and One Hundred and Twenty-sixth street, WITH EXTENSION IN ONE HUNDRED AND TWENTY-SIXTH STREET.

No. 5. SEWER IN NAEGLE AVENUE, between Academy and Dyckman streets.

No. 6. SEWERS IN AUDUBON AVENUE, between One Hundred and Sixty-ninth and One Hundred and Seventy-second streets.

—all in the Borough of Manhattan.

Each bid or estimate shall contain and state the name and place of residence of each of the persons making the same, the names of all persons interested with him therein, and if no other person be so interested it shall distinctly state that fact; that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Municipal Assembly, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of the Corporation, is directly or indirectly interested therein, or in the supplies or in the work to which it relates, or in any portion of the profits thereof.

Each estimate must be verified by the oath, in writing, of the party making the same, that the several matters therein stated are true, and must be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, to the effect that if the contract is awarded to the person making the estimate, they will, upon its being so awarded, become bound as his sureties for its faithful performance, and that if he shall refuse or neglect to execute the same they will pay to the Corporation any difference between the sum to which he would be entitled upon its completion and that which the Corporation may be obliged to pay to the person to whom the contract shall be awarded at any subsequent letting, the amount to be calculated upon the estimated amount of the work by which the bids are tested.

The consent last above mentioned must be accompanied by the oath or affirmation, in writing, of each of the persons signing the same, that he is a householder or freeholder in The City of New York, and is worth the amount of the security required for the completion of the contract, over and above his liabilities as bail, surety, or otherwise, and that he has offered himself as surety in good faith, with the intention to execute the bond required by law.

No estimate will be considered unless accompanied by either a certified check upon one of the State or National Banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the security required for the faithful performance of the contract. Such check or money must not be inclosed in a sealed envelope containing the estimate, but must be handed to the officer or clerk of the Department who has charge of the estimate box, and no estimate can be deposited in said box until such check or money has been examined by said officer or clerk and found to be correct. All such deposits, except that of the successful bidder, will be returned to the persons making the same within three days after the contract is awarded. If the successful bidder shall refuse or neglect, within five days after notice that the contract has been awarded to him, to execute the same, the amount of the deposit made by him shall be forfeited and retained by The City of New York as liquidated damages for such neglect or refusal, but if he shall execute the contract within the time aforesaid the amount of the deposit will be returned to him.

THE COMMISSIONER OF SEWERS RESERVES THE RIGHT TO REJECT ALL BIDS RECEIVED, IF HE DEEMS IT FOR THE BEST INTERESTS OF THE CITY.

Blank forms of bids or estimates, the proper envelope in which to inclose the same, and any further information desired, can be obtained at the office of the Commissioner of Sewers, Nos. 13 to 21 Park Row.

JAS. KANE,
Commissioner of Sewers.

SUPREME COURT.

FIRST DEPARTMENT.

In matter of the application of The City of New York relative to acquiring title, wherever the same has not been heretofore acquired, to CRAVEN STREET (although not yet named by proper authority), from Leggett avenue to the Southern Boulevard, in the Twenty-third Ward, Borough of The Bronx of The City of New York.

NOTICE IS HEREBY GIVEN THAT WE, the undersigned, were appointed by an order of the Supreme Court, bearing date the 15th day of Sep-

tember, 1898, and duly entered in the office of the Clerk of the County of New York, at his office in the Borough of Manhattan in The City of New York, on the 8th day of May, 1899, a copy of which order was duly filed in the office of the Register of the County of New York, and indexed in the Index of Conveyances, Section 10, Blocks 2701, 2707, 2708 and 2720, Commissioners of Estimate and Assessment, for the purpose of making a just and equitable estimate and assessment of the loss and damage, if any, or of the benefit and advantage, if any, as the case may be, to the respective owners, lessees, parties and persons respectively entitled unto or interested in the lands, tenements, hereditaments and premises required for the purpose by and in consequence of opening the above-mentioned street or avenue, the same being particularly set forth and described in the petition of The City of New York, and also in the notice of the application for the said order thereto attached, filed herein in the office of the Clerk of the County of New York on the 8th day of May, 1899; and a just and equitable estimate and assessment of the value of the benefit and advantage of said street or avenue so to be opened or laid out and formed, to the respective owners, lessees, parties and persons respectively entitled unto or interested in the said respective lands, tenements, hereditaments and premises required for the purpose of opening, laying out and forming the same, but benefited thereby, and of ascertaining and defining the extent and boundaries of the respective tracts or parcels of land to be taken or to be assessed therefor, and of performing the trusts and duties required of us by chapter 17, title 4 of the Greater New York Charter, and the acts or parts of acts supplementary thereto or amendatory thereof.

All parties and persons interested in the real estate taken or to be taken for the purpose of opening the said street or avenue, or affected thereby, and having any claim or demand on account thereof, are hereby required to present the same, duly verified, to us, the undersigned Commissioners of Estimate and Assessment, at our office, ninth floor, Nos. 90 and 92 West Broadway, Borough of Manhattan, in The City of New York, with such affidavits or other proofs as the said owners or claimants may desire, within twenty days after the date of this notice.

And we, the said Commissioners, will be in attendance at our said office on the 7th day of July, 1899, at 11 o'clock in the forenoon of that day, to hear the said parties and persons in relation thereto. And at such time and place, and at such further or other time and place as we may appoint, we will hear such owners in relation thereto and examine the proofs of such claimant or claimants, or such additional proofs and allegations as may then be offered by such owner, or on behalf of The City of New York.

Dated Borough of Manhattan, NEW YORK CITY, June 12, 1899.

PATRICK H. LOFTUS, Chairman,
PETER F. BOYER,
JAMES J. DOOLING,

Commissioners.

JOHN P. DUNN,
Clerk.

FIRST DEPARTMENT.

In matter of the application of The City of New York, relative to acquiring title, wherever the same has not been heretofore acquired, to EAST ONE HUNDRED AND SEVENTY-SECOND STREET (although not yet named by proper authority), from Morris avenue to Claremont Park, in the Twenty-fourth Ward, Borough of The Bronx of The City of New York.

NOTICE IS HEREBY GIVEN THAT WE, the undersigned, were appointed by an order of the Supreme Court, bearing date the 15th day of September, 1898, and duly entered in the office of the Clerk of the County of New York, at his office in the Borough of Manhattan in The City of New York, on the 8th day of May, 1899, a copy of which order was duly filed in the office of the Register of the County of New York, and indexed in the Index of Conveyances, Section 11, Block Nos. 2787, 2788 and 2784, Commissioners of Estimate and Assessment for the purpose of making a just and equitable estimate and assessment of the loss and damage, if any, or of the benefit and advantage, if any, as the case may be, to the respective owners, lessees, parties and persons respectively entitled unto or interested in the lands, tenements, hereditaments and premises required for the purpose by and in consequence of opening the above-mentioned street or avenue, the same being particularly set forth and described in the petition of The City of New York, and also in the notice of the application for the said order thereto attached, filed herein in the office of the Clerk of the County of New York on the 8th day of May, 1899; and a just and equitable estimate and assessment of the value of the benefit and advantage of said street or avenue so to be opened or laid out and formed, to the respective owners, lessees, parties and persons respectively entitled unto or interested in the said respective lands, tenements, hereditaments and premises required for the purpose of opening, laying out and forming the same, but benefited thereby, and of ascertaining and defining the extent and boundaries of the respective tracts or parcels of land to be taken or to be assessed therefor, and of performing the trusts and duties required of us by chapter 17, title 4 of the Greater New York Charter, and the acts or parts of acts supplementary thereto or amendatory thereof.

All parties and persons interested in the real estate taken or to be taken for the purpose of opening the said street or avenue, or affected thereby, and having any claim or demand on account thereof, are hereby required to present the same, duly verified, to us, the undersigned Commissioners of Estimate and Assessment, at our office, ninth floor, Nos. 90 and 92 West Broadway, Borough of Manhattan, in The City of New York, with such affidavits or other proofs as the said owners or claimants may desire, within twenty days after the date of this notice.

NOTICE IS HEREBY GIVEN THAT WE, THE undersigned, were appointed by an order of the Supreme Court, bearing date the 26th day of January, 1899, Commissioners of Estimate and Assessment for the purpose of making a just and equitable estimate and assessment of the loss and damage, if any, or of the benefit and advantage, if any, as the case may be, to the respective owners, lessees, parties and persons respectively entitled unto or interested in the lands, tenements, hereditaments and premises required for the purpose by and in consequence of opening the above-mentioned street or avenue, the same being particularly set forth and described in the petition of The City of New York, and also in the notice of the application for the said order thereto attached, filed herein in the office of the Clerk of the County of Kings on the 26th day of January, 1899, and a just and equitable estimate and assessment of the value of the benefit and advantage of said street or avenue so to be opened or laid out and formed, to the respective owners, lessees, parties and persons respectively entitled unto or interested in the said respective lands, tenements, hereditaments and premises not required for the purpose of opening, laying-out and forming the same, but benefited thereby, and of ascertaining and defining the extent and boundaries of the respective tracts or parcels of land to be taken or to be assessed therefor, and of performing the trusts and duties required of us by law.

All parties and persons interested in the real estate taken or to be taken for the purpose of opening the said street or avenue, or affected thereby, and having any claim or demand on account thereof, are hereby required to present the same, duly verified, to us, the undersigned Commissioners of Estimate and Assessment, at our office in the office of the Law Department, Room 20, Borough Hall, Borough of Brooklyn, City of New York, with such affidavits or other proofs as the said owners

or claimants may desire, within twenty days after the date of this notice.

And we, the said Commissioners, will be in attendance at our said office on the 28th day of June, 1899, at 11 o'clock in the forenoon of that day, to hear the said parties and persons in relation thereto, and at such time and place, and at such further or other time and place as we may appoint, we will hear such owners in relation thereto and examine the proofs of such claimant or claimants, or such additional proofs and allegations as may then be offered by such owner, or on behalf of The City of New York.

Dated June 2, 1899.

FRANK E. McELROY,
JOHN LYNCH,
WILLIAM H. DOWNES,
Commissioners.

M. E. FINNIGAN, Clerk.

SECOND DEPARTMENT.

In the matter of the application of The City of New York relative to acquiring title to that portion of HOWARD AVENUE extending from Eastern Parkway Extension to Pitkin avenue, in the Twenty-sixth Ward, Borough of Brooklyn, City of New York, as the same has been heretofore duly laid out.

PURSUANT TO THE STATUTES IN SUCH cases made and provided notice is hereby given that an application will be made to the Supreme Court of the State of New York, at a Special Term of said Court, to be held for the hearing of motions, in the County Court-house, in the Borough of Brooklyn, in The City of New York, on Thursday, the 15th day of June, 1899, at the opening of the Court on that day, or as soon thereafter as counsel can be heard thereon, for the appointment of Commissioners of Estimate and Assessment in the above-entitled matter. The nature and extent of the improvement hereby intended is the acquisition of title by The City of New York, for the use of the public, to all the lands and premises, and the appurtenances thereto belonging required for the opening of a certain street or avenue, known as that portion of Howard avenue, extending from Eastern Parkway Extension to Pitkin avenue, in the Twenty-sixth Ward, Borough of Brooklyn, City of New York, being the following-described lots, pieces or parcels of land, viz.:

Beginning at a point at the intersection of the western line of Howard avenue with the northern line of Eastern Parkway (or Pitkin avenue) as the same are laid down on the Commissioners' Map of the Town of New Lots; thence easterly along the northern line of Eastern Parkway (or Pitkin avenue) for seventy (70) feet, thence northerly deflecting ninety (90) degrees to the left for three hundred and twenty-seven and seventy-seven hundredths (327.77) feet to the southern line of Eastern Parkway Extension; thence westerly along the southern line of Eastern Parkway Extension for eighty-two and ninety-seven hundredths (82.97) feet, thence southerly for two hundred and eighty-three and twenty-three hundredths (283.23) feet to the point of beginning.

Said avenue was duly laid out on the Map or Plan of the Town Survey Commissioners for laying out avenues, streets, piers and bulkheads in the towns of New Utrecht, Flatbush, Gravesend, Flatlands and New Lots, which was duly filed in the office of the Register of the County of Kings on the seventeenth day of June, 1874.
