**5. The number of covered persons identified in paragraph 4 of this subdivision who were subsequently arraigned on a new offense within the prior 6 months.**

*As required by LL 75, the data included in this section reflects all individuals included in section 4 of this report who were arraigned within the 6 month period preceding the reporting date, whether or not the population review initiative contributed to the individual's earlier release.*

628 unique individuals were released from jail during Q1 and Q2 2024. Each person was tracked for six months following their discharge from jail. For individuals released Q1-Q2 2024, 55% did not have a new arraignment in the six months following their release while 45% did.

There is a distinct difference in new prosecution rates when the released population is grouped by number of prior DOC admissions since 2020. Half of the people released had 2 or fewer DOC admissions since 2020—this group was much less likely to have a new prosecuted arrest in the six months following their release.
