DEPARTMENT OF PARKS.

BOROUGHES OF MANHATTAN AND RICHMOND.

Report for the Quarter ending September 30, 1904.

The City of New York—Department of Parks,
The Arsenal, Central Park,
October 1, 1904.

Hon. GEORGE B. McCLELLAN, Mayor, The City of New York:

Sir—Pursuant to the provisions of section 1544 of the Greater New York Charter, I have the honor to submit the following report of the operations of the Department of Parks in the boroughs of Manhattan and Richmond for the quarter ending September 30, 1904.

Respectfully,

JOHN J. PALLAS,

Commissioner of Parks, Boroughs of Manhattan and Richmond.

REPORT OF OPERATIONS OF THE DEPARTMENT OF PARKS, BOROUGHES OF MANHATTAN AND RICHMOND, FOR QUARTER ENDING SEPTEMBER 30, 1904.

During the period covered by this report the erection of the New York Public Library Building on Bryant Park has been carried on, making considerable progress in the marble work, backing and the structural steel work of the building. Bids based upon revised specifications and plans have been received for the stack work and forwarded to the Board of Estimate and Apportionment for the award of the contract for that work.

At the American Museum of Natural History in Manhattan square the work of erecting a new power house, entrance hall, teachers' room, etc., has progressed steadily, and is nearing completion.

Good progress has also been made on the improvements in connection with the New York Aquarium in Battery Park. The construction of an underground reservoir and the piping in connection therewith will shortly be completed, and plans have been prepared for installing new filters, and also for underground conduits for drainage and water supply system for the pools and tanks. The architects have also been engaged in the study for a new and improved ventilating and heating plant for this institution.

The entomological work in connection with the vegetation of the parks has been considerable, and the force employed on this important work has been continually occupied with the power spraying machines, which are used with such good results in the destruction of noxious insects, of which several thousand species have to be contended with in the parks, and also in the destruction of parasitic fungi, which is very abundant.

Maintenance of the Parks.

The maintenance work, such as cleaning and caring for the drives, mowing lawns, cleaning walks, raking leaves and grass, cleaning out road and catch-basins, care and charge of comfort stations and all usual and necessary routine work, expected for the proper maintenance of parks in this Department, has been done.

Certain lawns of Central Park were open to the public and to the holders of permits for tennis, football, cricket and croquet, as mentioned in my last report. Tennis players receive on the ground the option or choice to select any period in which to play, on the order, however, of "first come first served." Each period accommodates 146 players and the day is divided into three periods.

The concerts throughout the parks having music assigned them, have been largely attended, proving the popularity and interest in this feature of entertainment.

Since my last report considerable progress has been made in the playgrounds under Department supervision. At East River Park a new pavilion and girls' swing have been

added. At Tompkins Square a new playground, constructed exclusively for girls, containing pavilion, 20 by 50 feet, and croquet ground, 28 swings for large girls, 20 baby swings and 2 covered sand boxes. There has been built at Hamilton Fish Park a pavilion for kindergarten work, 20 by 45 feet, two canvas covered swings, 54 by 20 feet, and one swing 75 by 20 feet. At Seward Park, in the girls' playground, there has been erected two canvas covered swings, each 55 by 20 feet. At Corlears Hook Park a canvas covered swing, 15 by 20 feet, and one 60 by 20 feet has been added, also a tennis court has been laid out, together with apparatus for basketball. Hudson Park will be considered during the present quarter and will have added thereto a number of new features.

On the opening day of Tompkins Square Playground, August 31, 1904, thousands of children were made happy in the full enjoyment and use of apparatus and games with which the playground had been equipped, and so in a like manner can it be said of all the Department playgrounds. The attendants are zealous and interested in their work, and the playgrounds, judging from past experiences, will be well patronized in all branches.

The mechanical force of the Department has been engaged in the general repairs required and in construction work, rolling stock, settees, signs, etc.

During the quarter the driving horses and rolling stock housed at the Eighty-fifth Street Stables have received careful attention.

At Riverside, in addition to the ordinary routine work, which has been carefully attended to, several of the washouts have been repaired, particularly at Eighty-first and Ninety-sixth streets. Here, as in Central Park, special attention has been paid to the cleaning of the road and walk basins.

The work at the Conservatory has consisted principally of propagation of 43,000 bedding plants of various kinds, 3,500 herbaceous plants; 6,118 bedding plants have been sent out for replanting of flower beds. Considerable work has been performed in connection with the care of the large ornamental flower beds on lawns around the Conservatory Building, and in the general care of the numerous rare and valuable ornamental plants inside the buildings.

At Mount Morris Park the regular routine work was performed, and the washouts on the hill repaired.

In Morningside Park, in addition to the routine work, repairs have been made to the asphalt walks. A new comfort station for men and women has been erected and is now open to the use of the public. The slopes and embankments were sodded and herbaceous plants set out around the walks, and an iron pipe fence has been put up, thereby giving a much better effect to the building and surrounding landscape.

Manhattan Square, which, for some time, has been in the hands of the contractors for the American Museum of Natural History, was turned over to this Department in the early part of the quarter, since which time it has been regularly cared for and the usual routine work performed. The land basins have been raised, and soil and sod restored where it had been washed out by the heavy rains of the season.

Considerable work was performed at St. Nicholas Park in grading of ground, relaying of sidewalk on St. Nicholas avenue and terrace and on One Hundred and Forty-first street, undermined by the frequent rainstorms; removal of poison ivy and repair of washouts. At Jasper Oval, in connection with the repairs to the fence by the carpenters, it was necessary to dig a trench from One Hundred and Thirty-eighth street and St. Nicholas terrace to the grand stand on Convent avenue, to rebuild the entrances on One Hundred and Thirty-seventh street, regrade washouts on ball ground, remove old building and regrade site, finishing with clean earth filling.

The sidewalks at Colonial Park have been repaired by raising the flagging and filling in the sunken places underneath.

At East River and John Jay Parks the ordinary routine work was attended to, as was the case at Washington Bridge Park, Fort Washington Park, High Bridge Park, park at One Hundred and Fifty-fifth street and Edgecombe avenue, and the grounds around Jumel Mansion.

The gardening force during this quarter was actually employed in the care and cultivation of the several flower and herbaceous beds in Central and City Parks, south and north of Fifty-ninth street, keeping them watered, weeded and thinned out; preparing ground for laying 175,000 square feet of sod, together with the care of nurseries.

The arboriculturist force have been vigorously engaged in the planting of trees and shrubs, the care of all park trees, watering when required, and pruning and thinning out of dead, broken and overhanging branches, chopping down dead trees and shrubs where found necessary, the total number of dead trees removed during this quarter being 240. Trees were also removed from the streets and avenues in cases where the trees were reported dangerous.

This force also removed the top soil from about 28 trees on the East Green, replacing it with 300 loads of mould and manure for the purpose of producing and giving a more vigorous and healthy appearance to the trees, which up to the time of this treatment presented a sickly condition.

The drives before resurfacing were very thoroughly scraped and all worn and dead material removed. The roadbed received from six to eight inches of Roa Hook gravel, spread over the surface, which, with the necessary labor, has established a fine unyielding roadbed with a smooth, hard and even surface, graded to obtain good drainage and symmetrical lines.

The change of grade on these drives occasioned an alteration along the turf borders which has in itself added to the betterment and appearance of the drives along the line indicated.

In conjunction with this work the gutters from Eighty-sixth street to cross drive on the west side were backed up with gravel on account of substitution of asphalt for stone gutters. This work required considerable gravel and labor, including sod, mould, etc.

The drives recently resurfaced were the East drive, from Scholars' Gate to the Marble Arch; Centre drive, from Bronze Eagles to Webster statue, including approaches to horse-drinking fountain; West drive, from Fifty-ninth street entrance to Eighty-first street, and from Circle, near One Hundredth street, to One Hundred and Tenth street and Eighth avenue.

These portions of the drives in Central Park were for some time in a very unsatisfactory condition, and for the want of proper drainage presented a sticky and undesirable surface. To proceed with the work of properly regrading and making good roadbed usually requires the closing of the drives to the public and a consequent inconvenience to them. During the progress of this work it was decided to keep the drives open, which was done without any accident and with very satisfactory results.

The boundary between the East and West drives, Ninety-seventh Street Transverse road south to bridge path, has undergone considerable change in landscape feature and useful convenience. The reconstruction of the walks has added much to the general advantage, as also the placing of a drinking fountain within easy access to the West drive. The slopes and embankments were completely out of grade, and in order to re-establish and restore them it was found necessary to spread four thousand cubic yards of mould. Along the banks on the westerly portion of the north walk was placed a wire fence to inclose and protect the recently laid four-foot sod border, and to keep the public from the newly seeded grounds. North of the bridge path it was found necessary to remove the old drain pipe, which had become useless, and establish a proper drainage, which was carried out successfully, but at considerable expense. Opposite the old tennis building and south of this location a rustic well was built for the accommodation of visitors to the tennis grounds. This well is supplied with water through a six-inch iron pipe, with overflow discharged into and connecting with the reservoir blow-off, and by reason thereof prevents any back wash, as might occur if connected with the sewer. The water supplied to the well comes from a leak in the large pipes of the reservoir and is filtered to the pipe above named and which will now supply well.

Harlem River Driveway.

The principal features of work done during the quarter on the Speedway were the resurfacing of the macadam approach from One Hundred and Fifty-fifth street to One Hundred and Sixty-fifth street with over 500 cubic yards of limestone screenings and

the reconstruction of the hill road leading from One Hundred and Seventy-fifth street and Amsterdam avenue to the driveway. This road washes away to a dangerous extent during any severe storm and needs constant attention. During the quarter just ended some 300 cubic yards of clinker ashes were hauled and packed on the roadway. It is worthy of note that the material was obtained without expense to the Department.

The keeping of the driveway proper and the sidewalks in good form has, of course, occupied much time and attention, it being necessary many times to fill in with fresh loam holes and spots that are apparently caused by the tides washing away the fill in where the cribwork foundations exist. The driveway from end to end has been maintained in excellent condition and many fast records have been equalled, if not surpassed, on both the upper and lower stretches.

The lawns have been kept trimmed. A number of needed repairs and improvements have been made, and in fact the entire driveway is in as good condition as it is possible to maintain it.

The attendance of visitors for the quarter has been exceedingly large.
