All that section of the City between Eighty-first and Twelfth streets, and between Central Park West and the North River, will be affected by this shutoff, and the pressure in the mains will be materially reduced. (20) Commissioner Maltbie presented the following opinion on Order No. 436 regarding service on the Eighth Avenue line:

ORDER (No. 436).

In the Matter
of

The Hearing on the Motion of the Commission on the Question of Improvement in and Additions to the Service and Equipment of the New York City Railway Company and of Adrian H. Joline and Douglas Robinson, as Receivers of the New York City Railway Company.

Eighth Avenue Line.

OPINION.

Upon December 27th, 1907, the Public Service Commission adopted an order requiring the New York City Railway Company, or its receivers, to operate at least a certain number of cars during specified hours of the day, every day of the week, including Sunday. This order was issued after hearings had been held at which it appeared that the service upon the Eighth Avenue line was inadequate. The standard of adequacy stated in Order No. 171 was framed to meet ordinary conditions, and observations made after the adoption of the order showed that the number of cars required to be run was not excessive when the traffic was normal. But it also appeared that at certain times, particularly upon days when the weather was inclement, the number of cars required by the order provided a greater number of seats than there were passengers. The Receivers of the company also urged that a revised order should be adopted, which would allow greater leeway and more opportunity to provide such service as would meet the varying demands.

Accordingly, a hearing was ordered and duly held upon May 6th, at which time the evidence given by an assistant engineer of the Commission, who had charge of the observations, confirmed the earlier observations of the inspectors of the Commission and many statements made by the Receivers. The requirements of Order No. 171 were found not to be well suited to existing conditions, for while the number of cars specified was not too large under ordinary conditions, there were days frequently when the requirements of the order made obligatory the operation of a larger number of cars than necessary.

The standard of adequate service adopted for the 23rd Street line and several other surface lines in the Borough of Manhattan seems likely to be better suited to the traffic demands upon the Eighth Avenue line than the one now in force, and I have directed, therefore, that an order be prepared similar to those now in force upon the other surface lines. The standard thus provided—a 10% excess of seats over passengers in each 15 minute period or the operation of at least 25 cars above 13th Street and 12 below—will be elastic and will not require a greater number of cars to be run at any time than is required by the demands of the traffic. It will, however, if obeyed, provide seats for passengers under ordinary circumstances, and even during rush hours will do away with crowding and reduce the number of passengers standing to a minimum. It is perhaps unnecessary to add that the Commission has always been as willing to modify an order that has ceased to be reasonable or poorly suited to changing conditions as it was to issue the order in first instance.

FINAL ORDER (No. 489).

Thereupon, on motion of Commissioner Maltbie, duly seconded, a Final Order (No. 489) was adopted directing that the service of the New York City Railway Company and of Adrian H. Joline and Douglas Robinson, Receivers of the New York City Railway Company, on the Eighth Avenue Line, be supplemented and changed as follows:

(1) By operating daily including Sundays over every point on the Eighth Avenue Line between 13th Street and the northerly terminus of the line either

(a) a sufficient number of cars in each direction past any point of observation to provide during every fifteen minute period of the day and night a number of seats at least ten per cent. (10%) in excess of the number of passengers at that point; the number of cars passing any point to be, however, never less than six (6) per hour in each direction; or

(b) A minimum number of twenty-five (25) cars in one direction in each fifteen (15) minute period in which the provisions of subdivision (a) above are not complied with.

(2) By operating daily including Sundays over every point of the Eighth Avenue Line between 13th Street and the southerly terminus of the line either

(a) a sufficient number of cars in each direction past any point of observation to provide during every fifteen minute period of the day and night a number of seats at least ten per cent. (10%) in excess of the number of passengers at that point; or

(b) a minimum number of twelve (12) cars in one direction in each fifteen (15) minute period in which the provisions of subdivision (a) above are not complied with;

And directing that said order shall take effect on May 18th, 1908.

(21) Commissioner Bassett presented the following opinion regarding the opening of Hegeman avenue:

In the Matter
of

The Application of The City of New York relative to opening across the tracks of the Manhattan Beach Branch of the Long Island Railroad Company and the Brooklyn Union Elevated Railroad Company the following street, Hegeman Avenue, between East 98th Street and New Jersey Avenue in the Borough of Brooklyn, City of New York.

OPINION.

A hearing was held before me on an application by The City of New York to the Commission, under Section 61 of the Railroad Law, for determination whether the proposed extension of Hegeman Avenue between East 98th Street and New Jersey Avenue in the Borough of Brooklyn should pass over or under or at grade of the tracks of the Manhattan Beach Branch of the Long Island Railroad Company and the tracks of the Brooklyn Union Elevated Railroad Company, and for a determination of the manner and method of crossing and the grades thereof. The tracks of these two railroads at the point of their intersection with the proposed extension of Hegeman Avenue are over 100 feet apart, and for this reason two determinations by this Commission are necessary, one as to each railroad.

At the hearing there appeared the two railroad companies, the City of New York, the Brooklyn Grade Crossing Commission and several property owners. All agreed that owing to the present grades of the railroads, Hegeman Avenue must pass under the tracks of both railroads. It appeared also that the Brooklyn Grade Crossing Commission, by virtue of special legislation, had fixed the grade of the Long Island Railroad Company at this point. It was found also that the established grades of Hegeman Avenue would carry that street beneath the tracks of the Long Island Railroad Company, leaving ample headroom, and I therefore recommend as to the Long Island Railroad that the grade of the tracks remain as fixed by the Brooklyn Grade Crossing Commission and that the grades of the approaches to the crossing under the tracks of the railroad be those already established as the official grade of Hegeman Avenue. I recommend also that the abutments of the bridge carrying the railroad over Hegeman Avenue be the same width as the proposed extension of Hegeman Avenue.

Nelson P. Lewis, Esq., Chief Engineer of the Board of Estimate and Apportionment, had prepared and kindly furnished to the Commission a summary statement of the grades which he believed should be adopted in order to carry Hegeman Avenue beneath these two sets of tracks, and his suggestions, which appear to be in accord with the ideas of the representatives of the two railroad companies, have been embodied in the order which I submit herewith.

In respect to the Canarsie Branch of the Brooklyn Union Elevated Railroad Company, I believe that it is necessary to establish the grade of the street four feet below the grade heretofore legally established at this point, the grade or approaches to be uniform grades from the present legally established grade of Snediker Avenue, the bridge carrying the railroad tracks over the street to be 70 feet in length, that being the full width of Hegeman Avenue.

The determination recommended gives a clearance between the bottom of the bridge and the established grade of the street of 12.64 feet in the case of the Brooklyn Union Elevated Railroad Company and of 14 feet in the case of the Long Island Railroad Company.

FINAL ORDER (No. 490).

Thereupon, on motion of Commissioner Bassett, duly seconded, a Final Order (No. 490) was adopted determining:

(1) As to the Long Island Railroad Company, that
(a) When Hegeman Avenue shall hereafter be constructed across the Manhattan Beach Branch of the Long Island Railroad Company, it shall be constructed under said railroad;

(b) The grade of the street beneath the tracks shall be at an elevation of 15.8 feet above mean high tide, that being the legally established grade of Hegeman Avenue;

(c) The elevation of top of rail of the railroad tracks to be 33.68 feet above mean high tide, this being the grade for the railroad as fixed by the Brooklyn Grade Crossing Commission in its plan for the Bay Ridge Improvement.

(d) The grades of the approaches to said crossing to be those already established as the official grade of Hegeman Avenue.

(e) The clearance between the bottom of the bridge carrying the railroad tracks and the established grade of the street to be not less than 14 feet.

(f) The abutments carrying the bridge to be placed on the building line and to be seventy feet distant from each other, measured at right angles.

(g) When the span measured along the track does not exceed 70 feet, then there shall be no intermediate support, but when the span so measured exceeds 70 feet, supporting columns may be placed at the curb line.

(2) As to the Canarsie Branch of the Brooklyn Union Elevated Railroad Company, that

(a) When Hegeman Avenue shall hereafter be constructed across the Brooklyn Union Elevated Railroad, it shall be constructed below the grade of the railroad.

(b) The grade of the street beneath the tracks shall be at an elevation of 12.24 feet above mean high tide, or four feet below the grade of the street heretofore legally established at this point.

(c) The elevation of the top of rail of the railroad tracks to be 27.8 feet above mean high tide.

(d) The grades of the approaches at Hegeman Avenue to be uniform grades from the elevation above given at the crossing of the Long Island Railroad Company's tracks, namely, 15.8 feet, and from the present legally established grade of Snediker Avenue, namely, 15 feet above mean high tide.

(e) The clearance between the bottom of the bridge carrying the railroad tracks and the established grade of the street shall not be less than 12.64 feet.

(f) The abutments carrying the bridge to be placed on the building line and to be 70 feet distant from each other, measured at right angles.

(g) When the span measured along the track does not exceed 70 feet, then there shall be no intermediate support, but when the span so measured exceeds 70 feet, supporting columns may be placed at the curb line.

And directing that before the construction of the bridges is commenced, detailed plans and specifications approved by the Chief Engineer of the Railroad Company and by the Chief Engineer of the Board of Estimate and Apportionment, and an estimate of the expense of the proposed changes shall be submitted to the Public Service Commission for the First District for their approval.

(22) The Secretary presented a report by Commissioner Bassett in reference to the presentment of the Grand Jury of the County of Queens dated May 2, 1908, with regard to the poor transportation facilities existing at present in the Borough of Queens. The report was ordered filed.

(23) The Secretary presented a communication dated May 8th, 1908, from Edward Hartung, Secretary of the Citizens Association of Bay Ridge and Fort Hamilton, stating that that Association had passed a resolution endorsing the extension of the Fourth Avenue Subway under the Narrows into the Borough of Richmond, which was ordered filed.

Gumbleton, Secretary of the Local Boards of the Borough of The Bronx, transmitting the following resolution adopted by the Local Board of Crotona, Twenty-fourth District, on April 30th, 1908, which was referred to Commissioner Eustis:

The Secretary presented the following communication dated May 8th, 1908 from Westinghouse, Church, Kerr & Co., which was referred to the Chief Engineer:

May 8, 1908.

To the Public Service Commission for the First District, Acting for The City of New York:

GENTLEMEN—In response to your invitation to Contractors for the construction of the Fourth Avenue Subway, Brooklyn, we have submitted a proposition for your consideration, believing that it offers superior advantages to the City in the production of this work at minimum cost.

The essential features of this plan are not novel, having been largely used in various forms of agreement during the past ten years or more, in the construction of the largest classes of work. This mode of performance has by long experience been so adjusted to the economies and best interests of large undertakings as to have become common usage with many large railroad, manufacturing, and other corporations. It is therefore here proposed with a view to its introduction in this public work, providing it should meet your favor.

As a contract defining relationship rather than specifying performance, it is of the "Master and Servant" type, in which a superior control continually resides in the "master," thereby enabling broad discretion in the direction of the performance of the skilled servant.

We submit that this type of agreement is better adapted to the performance of large undertakings over long periods of time than the conventional performance contract, the administration of which is exceedingly difficult, departures from which are made necessarily profound by the constant interference of conditions, and in which the opportunity for excess cost becomes maximum through extras and unforeseen contingencies, and whose variability largely exceeds the fixity of the type of performance contract which they attend.

We further submit that this method is one with which we have had much experience and under which we have done work of the largest, most difficult, and complicated character, with results so satisfactory as to cause a continual increase of use in work of the largest magnitude.

Its form may be varied to any degree necessary to cover the conditions of any given undertaking, providing its essentials are retained and that its spirit and general mode of administration are preserved. This elasticity has often been favorably remarked—its merits remaining intact throughout a broad scope of activity and variation of the elements to which it relates.

We especially suggest as a matter of fact and experience that no intermediate or compromise form between this "master and servant" type and a lump sum contract is admissible, since thereby will be obtained the defects of both with the virtues of neither.

We call especial attention to the fact that this is not a percentage contract, since a percentage contract is—like any other performance contract—essentially and legitimately a selfish operation, in which the performer is working primarily for his own interests. Under such conditions, whatever defects are inherent in the type are multiplied by a percentage compensation, and especially is the incentive to keep down costs adversely affected.

In a relationship agreement as usually drawn, even though compensation is based on percentage of cost, the motive of those trained by experience in such work is the unselfish spirit of service, which has been amply proven to be a sufficient influence in realizing lowest costs—especially as this factor is the greatest and almost only influence in securing additional work.

In this instance we have especially provided a further element whereby the compensation is fixed upon quantities only, irrespective of the cost of such quantities, and we have added premium and penalty features to further enhance the inducement to economize.

Although agreements of this character, establishing a "master and servant" relationship, have so far as we know never been attended by a bond for faithful performance, it may be deemed necessary or advisable that such bond be given in public work of this character, in which case we would have no objection to giving such bond in a sum commensurate with the obligation to be covered,—such bond to be of character and form to be mutually determined.

It will give us pleasure to confer with you to any extent that you may desire, with a view to assisting your consideration of this method of performing construction work.

Very truly yours,

(Signed) WALTER C. KERR, President.

The Chief Engineer reported as follows:

"A map, entitled 'Map or Plan showing the change of grades of Spuyten Duyvil road, at the two crossings of the New York Central and Hudson River Railroad, in the Twenty-fourth Ward, Borough of The Bronx, City of New York,' was on for a hearing before the Board of Estimate and Apportionment November 11, 1904, and was referred to Chief Engineer Lewis, of the Board of Estimate and Apportionment, and Chief Engineer Briggs, of the Borough of The Bronx, in order to confer with the railroad company. This map shows a proposed elevation of the bridge over the easterly crossing of 26.74 feet above mean high water datum, while the sketch attached to the petition proposed to make the same 25 feet above mean high water datum. Later on, when the New York Central and Hudson River Railroad Company submitted a map for straightening the line near the Johnson property, a different grade was proposed again, and I beg to recommend, therefore, that no action be taken until the matter of elevation of railroad bridges over Johnson avenue has been definitely settled."

Under date of March 26, 1908, the Deputy Commissioner of Water Supply, Gas and Electricity reported that the Superintendent of Distribution of the Northern Union Gas Company, in addressing the Chief Engineer of Street Lighting, reports that the company does not contemplate extending its service pipes in this street, as the revenue which would be derived would not warrant the expense of this work.

On motion of Alderman Hochdorffer, it was

Resolved, That this matter be referred to the Corporation Counsel for an opinion and advice as to what could be done to compel the company to lay the necessary main and light a sufficient number of street lamps.

Lighting of One Hundred and Seventy-first street, between Third avenue and Webster avenue.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, or the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
