Re: Statement of Debt Affordability

Ladies and Gentlemen:

Pursuant to Chapter 16 of the Laws of 1997 of the State of New York, which includes the New York City Transitional Finance Authority Act (the "Act"), I am providing the annual statement of debt affordability. This statement does not constitute the annual declaration of need provided for pursuant to Section 2799-ff of the Act, which will be prepared following adoption of the City of New York's (the "City's") fiscal year 2014 Budget by the City Council.

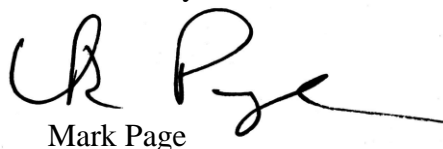

In order to finance projects within its Capital Budget, the City currently has a capital financing need of up to \$5.6 billion, \$5.6 billion, \$4.9 billion and \$4.3 billion, in fiscal years 2014 through 2017, respectively. To the extent that General Obligation Bonds are issued to finance such projects, the capital financing need to be met by the New York City Transitional Finance Authority (“TFA”) would be reduced accordingly. The City currently expects to issue General Obligation bonds to provide funding for approximately half of such four year financing program. In addition to these amounts, the City has a capital financing need of \$1.8 billion, \$1.035 billion, \$942 million and \$898 million in fiscal years 2014 through 2017, respectively, for those projects within the City’s Five Year Educational Facilities Capital Plan, expected to be met with proceeds of TFA Building Aid Revenue Bonds.

There is no reserve or surplus fund held by TFA as of the date of this statement and there was none as of the end of the most recently completed fiscal year.

Schedule A shows the City’s and TFA’s debt-incurring power. Schedule B presents the sources of financing for the City’s four-year capital program. Schedule C specifies amounts of debt service payable on City General Obligation bonds and TFA bonds, amounts expected to be outstanding in each of the Financial Plan years for General Obligation and TFA bonds, and various debt service and debt ratios as required by the Act. Schedule C provides a framework for assessing the affordability to the City of the debt to be issued as described on Schedule B.

In my opinion, debt affordability is a judgment made by balancing the City’s need for essential capital improvements and the costs of delaying or not implementing such improvements against the impact of debt service costs arising from the financing of those capital needs on the other competing City priorities funded through the City’s operating budget. The judgment is reflected in the City’s Financial Plan and in its operating budget and Capital Plan as proposed by the Mayor, which has the result, in fiscal year 2017, of debt service (including the TFA and lease (conduit) debt service) requiring 10.0 percent of total revenues and 14.9 percent of total tax revenues.

Yours truly,
