Report on implementation of Alternate Design Septic Program

January 31, 2013

*Prepared in accordance with Section 3.1 (concerning the **Alternate Design Septic Program**) of the July 2007 United States Environmental Protection Agency
Filtration Avoidance Determination*

Prepared by: New York City Department of Environmental Protection

3.1 Alternate Design and Other Septic Programs - Milestone/Reporting Requirements

Report on implementation of the Alternate Design and Other Septic Programs.

The Alternate Design Septic Program is a \$3 million program to pay for the importation of fill material and/or pumping apparatus for the construction of septic systems where required solely by DEP or its delegate in order to comply with the Watershed Regulations.

There was no program activity during the second half of 2012. Since the program's inception, the Catskill Watershed Corporation (CWC) has paid \$37,400 in eligible program costs. The CWC Board has authorized the transfer of \$1,999,000 in Alternate Design Program funding since 2001 to other, more active, watershed protection and partnership programs.
