**Carmen Fariña, Chancellor**

**ENROLLMENT, CAPACITY  
& UTILIZATION REPORT**

**BOOK TWO (HISTORICAL CALCULATION)**

**2013 – 2014 SCHOOL YEAR**

## **WHAT'S NEW?**

The 2013-2014 Enrollment, Capacity and Utilization Report has been simplified to adopt a new more user-friendly version under the advisement of the Blue Book Working Group. The Blue Book Working Group consists of representatives from parents, principals, Community Education Councils, the United Federation of Teachers, community groups and elected officials. As the Blue Book Working

Group continues to make progress, additional changes to any subsequent publications will likely be implemented. The purpose of the changes applied to the 2013-2014 Report is to make the document easier for the general public to navigate. The changes can be summarized into two types:

1. Organization of the Report
2. Transportable Classroom Unit (TCU) capacity

### **Organization of the Report**

The 2013-2014 Enrollment, Capacity and Utilization Report now includes two books and each book comprises two parts:

Book One: Target Calculation

Part 1.1: Organizational Report

Part 1.2: Building Report

Book Two: Historical Calculation

Part 2.1: Organizational Report

Part 2.2: Building Report

The Organizational Report is most helpful for someone looking for information about a specific school organization. All buildings where a specific school uses space are grouped together. A total for all the sites where a school has enrollment is provided. The Building Report is most helpful for someone looking for information about a certain school building. All organizations that use space in a particular building are listed together. Additionally, school organizations that occupy space in more than one location are shaded and buildings that house more than one school organization are bolded in the report. All buildings and organizations are organized and presented based on the geographic districts where they are located.

The Target calculation is the most widely used method of reporting. This calculation is used to inform various business processes within the Department. The data reflects aspirational goals for maximum classroom capacity. The Historical calculation is maintained to provide the basis for consistent comparison with previous years.

### **TCU Capacity**

The 2013-2014 Enrollment, Capacity and Utilization Report no longer reports capacity for the TCUs. Instead, only the enrollment of a TCU site will be listed if available. The main building utilization will reflect not only the number of students in the main building but also those who attend class in the TCUs. Capacity of the TCU's is not calculated. However, mini buildings and annexes are still listed separately.

NEW YORK CITY SCHOOL CONSTRUCTION AUTHORITY

## INTRODUCTION

The Enrollment, Capacity, and Utilization Report is published annually by the Department of Education. This report identifies the capacity numbers for all Department of Education buildings based on a set of assumptions uniformly applied, compared to actual enrollments, which together allow for a standard framework with which to assess the utilization of our buildings. The information provided in this report allows us to understand the conditions under which multiple schools share a single building; assists in making informed decisions about enrollment growth or placement of new schools or programs in under-utilized buildings; and plan for major capital projects (including new school buildings, school annexes and additions, and other upgrades that expand a building's capacity.

The capacity calculation is based on information provided by principals in the Principal Annual Space Survey conducted by the School Construction Authority (SCA). The survey verifies the usage and size of rooms within each building. For this information, we are grateful to over 1,700 principals who are asked to participate in the survey. While we have taken steps in recent years to reduce the time and effort of responding to the survey by making it web-based and ensuring that SCA facilities staff is available to assist when necessary, we realize that it requires time, effort and thought and we appreciate our principals' participation. We do site visits for a percentage of buildings each year to verify the information provided.

Once all the surveys are completed and we have information on the function of every room, we are able to calculate a school's capacity. This information is used to derive a building's capacity numbers, which is the total number of students the building should accommodate. While the method of calculating capacity differs by grade and by room size, it is important to note that instructional rooms equal to or greater than 240 SF are assigned a capacity. We then adjust that capacity based on the programmatic use of the rooms. For example, at the Elementary school level, dedicated cluster rooms are programmed differently than homerooms. At the secondary school level, we know that science labs are programmed differently than typical classrooms. The adjusted capacity of these rooms reflects these differences. Our programmatic assumptions are discussed in more detail in the pages that follow. Once a building's adjusted capacity is determined, we calculate utilization by dividing the building's official audited enrollment by the calculated capacity. Our formulas for determining utilization and capacity in particular are explained in greater detail on the pages that follow.

Over the past few years, we have expanded the Enrollment, Capacity, and Utilization Report to include two distinct but important measures of capacity and utilization. The first, the Historical Capacity and Utilization Rate uses our standard methodology and allows for the comparison of these metrics to past issuances of the report. The second, the Target Capacity and Utilization reflects aspirational goals for school buildings, making different assumptions about how classrooms are used. For example, one of our goals is for all Kindergarten through third grade classrooms to have a maximum of twenty students; we have built to that "target" capacity in the FY 2005-2009 Capital Plan. The Target Capacity and utilization will change as our goals change. For example, the goals of the 2010-2014 and 2015-2019 plans include a class size of 30 for all high school grades which is included in the target calculations. As a result, comparison of target capacities over time may not be valid. The report also now indicates Pre-Kindergarten capacity in the building and the number of cluster rooms allocated to Elementary schools – this designation is made according to school size. We have also added a column to indicate the actual number of specialty rooms that are in use.

To get a rough sense of the potential capacity for standard classrooms, one may reference the table below. The program efficiency ratio outlined below is an aggregation of all adjustment factors included in the capacity formulas. By applying the program efficiency ratio to the target capacity one can derive the potential capacity of a room if it is programmed for 100% use. This will allow most users to skip the formulas in the foregoing pages. However, if one wants to understand the capacity figures more precisely, then a review of the formulas is required.

### **SUMMARY OF CLASSROOM CAPACITIES BY GRADE LEVEL**

<b>Grade(s)</b>	<b>Target Capacity</b>	<b>Programming Efficiency</b>	<b>Standard Classroom Potential Capacity</b>
PK (Full-Day)	18	100.0%	18
K-3	20	75.0% - 90.0% *	15 - 18
4-5	28	75.0% - 90.0% *	21 - 25
6-8	28	87.5%	25
9-12	30	87.5%	26

\* Depending on the size of the school. Large schools are assumed to be able to use space more efficiently

As a result of over 80,000 new capacity seats, we have built or are in the process of building in the FY 2005 - FY 2009 and FY2010 – FY 2014 Capital Plans; we have made and will continue to make significant progress in alleviating overcrowding in our schools since the 2001/2002 school year as illustrated in the following table:

### **SCHOOL BUILDINGS THAT EXCEED CAPACITY \***

<b>Grade Level</b>	<b>FY 02</b>	<b>FY 12</b>
Elementary	43.7%	33.0%
Middle	37.6%	12.0%
High	63.7%	32.0%

\* Information from Mayoral Management Reports.

This year, the Enrollment, Capacity and Utilization report continues the methodology implemented in the 2006-2008 reports and includes further refinement. The modifications made during that period are summarized as following:

1. Target methodology

- a. The maximum capacity of classrooms is no longer affected by a school's Title 1 status in grades 4-8 and is uniformly set at 28 rather than the previous range of 28-31. This translates to an effective capacity of 21-25 for 4<sup>th</sup> and 5<sup>th</sup> grade classrooms (assumed programming efficiency between 75% and 90%) and 24.5 for grades 6-8 (assumed programming efficiency of 87.5%).

- b. Maximum classroom capacity for grades 9-12 has been decreased from 34 to 30.
  - c. Each elementary school receives a cluster room allocation regardless of the school's size. The number of allocated cluster rooms is based on the school's enrollment.
  - d. Assumptions about the programming of instructional rooms for middle schools, secondary schools and high schools are updated to reflect:
    - i. Typical classrooms are expected to be in use seven out of eight periods a day
    - ii. Specialty rooms – science labs, music classrooms, etc. – are expected to be in used five out of eight periods a day.
2. Capacity for rooms that are shared by multiple schools is distributed among the organizations by the usage percentage provided by principals.
  3. Incorporates enhancement from the Annual Facilities Survey such as the identification of CTT classes which have a maximum capacity of 25.
  4. Upon request by City Council, a City Council Edition which organizes the information by City Council District is being released.

The enhancements to our methodology were made to further reflect current instructional practices and reinforce our expectations for the use of instructional space. It is critical that all principals understand the expectations we have for programming efficiency and that efficient programming is a mechanism to achieve lower class sizes and to maximize the opportunities for personalization.

This year, we continue to include one additional column in all reports to identify the number of specialty classrooms used by each middle school, secondary school and high school. We will continue to include in a separate column, the number of cluster rooms reported for each elementary school and K-8 school in all reports. In addition, District 75 Special Education programs that either serve students in inclusionary classes only or include some students in inclusionary classes are identified by either a “#” or a “\*”.

To maintain consistency, we continue to produce Historical Capacity and Utilization which allows for comparison of data over time. However, the Target Capacity and Utilization information was used in developing recommendations for the proposed FY2015-2019 DOE Five Year Capital Plan.

We understand that the utilization rate of our schools and buildings garner much attention, and that one statistic cannot capture the full picture of the space situation in a building. That being said, it is critical that we as a Department have a standardized means of assessing the use of our buildings that evaluates all of our schools consistently. Our facility portfolio is a limited resource and it is our collective responsibility to ensure that this resource is being utilized effectively and efficiently to best meet the needs of the nearly 1.1 million City public school students. The changes that we are making to our capacity methodology go further in aligning instructional use and programming to physical capacity. We have done this so that the official capacity information for all of our buildings will more accurately reflect the actual use of the classrooms and other space.

# **PART I. EXPLANATION OF CAPACITY FORMULAS**

INFORMATION PREPARED BY:  
NEW YORK CITY SCHOOL CONSTRUCTION AUTHORITY  
CAPITAL PLAN MANAGEMENT DEPARTMENT

## **A. FORMULA FOR PRIMARY SCHOOLS**

The Department of Education uses separate formulas to determine capacities for Primary School, Middle School, Primary/Middle School, Middle/High School, High School and Special Education programs and by comparison with actual enrollments, the rate of utilization of schools and school buildings.

**Primary School Capacity Calculations:**

**1. The Unadjusted Maximum Capacity**

Determine the number of rooms in each building presently in use or that could potentially be used for instruction (Pk-5, Non-D75 Special Education classroom, D75 Special Education classroom). Libraries, offices, lunchrooms, auditoriums, gymnasiums and rooms less than 240 square feet are excluded from all calculations.

Rooms between 240 and 499 square feet used for non-instructional purposes are not counted for capacity and are assumed to be available for support/administrative use.

Each school is entitled to up to eight rooms equal to or greater than 500 square feet for room functions including: General Office, Principal's office, guidance, medical/nurse, storage, coach's office, Pre-Kindergarten family room and a duplicating room. Such rooms are not counted toward capacity. Rooms in excess of those specified above (greater than or equal to 500 square feet) used by the school for administrative or non-teaching purposes will be counted as having capacity.

Assign a maximum historical and target capacity to each instructional room in accordance with the chart below. If a room is used by an outside organization (not directly by the school), the room will be assigned a zero capacity.

**The maximum room capacities are:**

	<b><u>Historical Method</u></b>	<b><u>Target Method</u></b>
Pre-Kindergarten (Full-day)	18	18
Pre-Kindergarten (Half-day)	36 (18 A.M. & 18 P.M.)	36 (18 A.M. & 18 P.M.)
Kindergarten	25	20
Grade 1, 2, 3	25	20
Other Grades (Title I Schools)	29	28
Other Grades (Non-Title I Schools)	31	28
Special Education M.I.S. 1 thru 8 (Community School District)	12	12
Citywide Special Education	Based upon program	
Specialty Instructional Spaces (Title I Schools)	29	28
Specialty Instructional Spaces (Non-Title I Schools)	31	28

**2. The Unadjusted Potential Capacity**

Assign a potential capacity to each room. This is done by dividing the total square footage of the room by 35 for Pre-K and Kindergarten classrooms and 20 for Grades 1-8 classrooms and Non-D75 Special Education classroom. These represent the minimum square footage required per pupil according to the building code of the City of New York.

**3. The Total Unadjusted Capacity**

*A. Unadjusted Historical Capacity*

Compare the maximum historical and potential capacity for each room, and take the lower of the two numbers. This is the historical capacity of that individual room. The capacities of individual rooms are added to arrive at an unadjusted historical school capacity. The unadjusted historical capacity will change from year to year depending on the shifting usage of classrooms.

*B. Unadjusted Target Capacity*

Compare the maximum target and potential capacity for each room, and take the lower of the numbers. This is the target capacity of that individual room. The capacities of individual rooms are added to arrive at an unadjusted target school capacity. The unadjusted target capacity will change from year to year due to the shifting usage of classrooms.

**4. Adjustment for Cluster Support Services**

To calculate the historical and target capacities, the capacity of a specific number of cluster support rooms is subtracted from the unadjusted capacity and therefore not counted in capacity. The number subtracted is listed in the table below and varies depending on Title I status and/or the enrollment of the school based on the method. It is meant to reflect the need for support rooms (rooms used by cluster teachers beyond the homerooms) required for the teaching of art, music, science, computers, etc. These subjects are taught by specialized cluster teachers and often require separate specialized dedicated space.

*A. Historical Method*

**Cluster Adjustment - Title I Schools**

<b><u>ENROLLMENT</u></b>	<b><u>NUMBER OF CLASSROOMS SUBTRACTED FROM CAPACITY</u></b>
1,196 - 2,000	5
773 - 1,195	4
350 - 772	3
210 - 349	2
70 - 209	1
0 - 69	0

**Cluster Adjustment - Non-Title I Schools**

<b><u>ENROLLMENT</u></b>	<b><u>NUMBER OF CLASSROOMS SUBTRACTED FROM CAPACITY</u></b>
1,376 - 1,950	4
626 - 1,375	3
376 - 625	2
126 - 375	1
0 - 125	0

*B. Target Method*

<b><u>ENROLLMENT</u></b>	<b><u>NUMBER OF CLASSROOMS SUBTRACTED FROM CAPACITY</u></b>
1,251 and up	5
751 - 1,250	4
251 - 750	3
151 - 250	2
0 - 150	1

**5. Adjustment for Funded Support Services**

Federal and State funds are allocated to schools for pupil remediation. The number of students requiring remediation by school has been calculated by assuming a Citywide average of 35% of students reading below the State Reference Point as measured by the State reading test and multiplying that percentage by the enrollment of each organization.

One room is then assigned to funded programs for every 250 students requiring remediation. This is called the funded adjustment. The same funded room adjustment is used for both historical and target method.

<u>ENROLLMENT</u>	<u>FUNDED ROOMS TO BE DEDUCTED</u>
GE - 1,072	2
358 - 1,071	1
0 - 357	0

**6. Adjustment for Parent's and Teacher's Room**

Subtract capacity of a full-size classroom for use as parent's room and teacher's room.

**7. The Adjusted Historical/Target Capacity**

When a school uses space in several buildings, the deduction is derived based on the total enrollment of this school and then applied to each building that it occupies by the enrollment percentage of the school at each location.

Adjusted historical capacity is derived by subtracting a specific number of cluster support rooms, funded support rooms and one Parent's/Teacher's room from the unadjusted historical capacity.

Adjusted target capacity is derived by subtracting a specific number of cluster support rooms, funded support rooms and one Parent's/Teacher's room from the unadjusted target capacity.

**8. The Historical/Target Utilization:**

To determine the historical utilization percentage for an organization, divide current enrollment by the adjusted historical capacity for each organization in a building. To determine the target utilization percentage for an organization, divide current enrollment by the adjusted target capacity for each organization in a building.

To determine the historical utilization percentage for a building, aggregate enrollments and the adjusted historical capacities for all organizations in a building and divide the aggregated enrollment by the aggregated adjusted historical capacity. To determine the target utilization percentage for a building, aggregate enrollments and the adjusted target capacities for all organizations in a building and divide the aggregated enrollment by the aggregated adjusted target capacity.

**DETERMINING PRIMARY SCHOOL CAPACITY**

<b><u>ROOM CAPACITIES</u></b>		<b><u>ROOM TYPE</u></b>	<b><u>* NO. OF SEATS</u></b>
Number of Rooms	X	Pre-Kindergarten (Full-day)	18
Number of Rooms	X	Pre-Kindergarten (Half-day)	36 (18 A.M. & 18 P.M.)
Number of Rooms	X	Kindergarten	25 <b>(20 for Target Method)</b>
Number of Rooms	X	Grade 1, 2, 3	25 <b>(20 for Target Method)</b>
Number of Rooms	X	Non-D75 Special Education classroom	12
Number of Rooms	X	All Other Grades (Title I Schools) ( <b>Non-Title I Schools</b> )	29 <b>(28 for Target Method)</b> 31 <b>(28 for Target Method)</b>
Number of Rooms	X	Other Classrooms (Title I Schools) ( <b>Non-Title I Schools</b> )	29 <b>(28 for Target Method)</b> 31 <b>(28 for Target Method)</b>
		<b>Outside Orgs with no Enrollment</b>	Zero Capacity

=====

TOTAL UNADJUSTED CAPACITY EQUALS SUM OF PRE-K through SPECIAL EDUCATION

=====

\* The lower of the maximum or potential capacity based upon the square footage of each of the rooms

## **B. FORMULA FOR MIDDLE SCHOOLS**

**Middle School Utilization Calculations:**

**1. The Unadjusted Maximum Capacity**

Determine the number of rooms in each building presently in use or that could potentially be used for instruction (6-8, Non-D75 Special Education classroom, D75 Special Education classroom). Libraries, offices, lunchrooms, auditoriums, gymnasiums and rooms less than 240 square feet are excluded from all calculations.

Rooms between 240 and 499 square feet used for non-instructional purposes are not counted for capacity and are assumed to be available for support/administrative use.

Each school is entitled to up to seven rooms equal to or greater than 500 square feet for room functions including: General Office, Principal's office , guidance, medical/nurse, storage, coach’s office, and duplicating room. Such rooms are not counted as capacity. Rooms in excess of those specified above (greater than or equal to 500 square feet) used by the school for administrative or non-teaching purposes will be counted as having capacity.

Assign a maximum historical and target capacity to each instructional room in accordance with chart below. If a room is used by an outside organization (not directly by the school), the room will be assigned a zero capacity.

**The maximum room capacities are:**

Special Education (Non-D75) -----	12
Citywide Special Education (D75)-----	Based upon program designation
Gymnasium (Title I Schools)-----	56 (56 for Target method)
(Non-Title I Schools)-----	60 (56 for Target method)
Grades 6,7, 8 Classrooms (Title I Schools)-----	28 (28 for Target method)
(Non-Title I Schools)-----	30 (28 for Target method)

**2. The Unadjusted Potential Capacity**

Assign a potential capacity to each room. This is done by dividing the total square footage of the room by 20. Twenty represents the minimum square footage required per pupil according to the building code of the City of New York.

### 3. **The Total Unadjusted Capacity**

#### A. *Unadjusted Historical Capacity*

Compare the maximum historical and potential capacity for each room, and take the lower of the two numbers. This is the historical capacity of that individual room. The capacities of individual rooms are added to arrive at an unadjusted historical school capacity.

#### B. *Unadjusted Target Capacity*

Compare the maximum target and potential capacity for each room, and take the lower of the two numbers. This is the target capacity of that individual room. The capacities of individual rooms are added to arrive at an unadjusted target school capacity.

### 4. **Adjustment to Capacity**

The capacity calculations are based on the premise that the school day should be no more than 8 periods long and that not all classrooms can be used for every period, every day. Adjustments are made to the unadjusted capacity. When a school uses spaces in several buildings, the deduction is derived based on the total enrollment of this school and then applied to each building that it occupies by the enrollment percentage of the school at each location.

#### A. ***Historical Method***

##### *Dedicated Classrooms*

It is assumed by the formula that the dedicated rooms are programmed 60% of the time. The dedicated rooms include shops, home economic rooms, gym, funded, art and computer classrooms. It is also assumed that 29% of all classrooms are dedicated rooms.

##### *Non-Dedicated Rooms*

It is assumed by the formula that the non-dedicated rooms are programmed and used all the time and 71% of all classrooms are non-dedicated rooms. The two program efficiency ratios and split of dedicated and non-dedicated rooms are translated into a program efficiency ratio of 81% for all classrooms in Middle School.

##### *Adjustments For Parent's And Teacher's Room*

Subtract 1/2 classroom for use as a parent's room and 1/2 classroom for use as a teacher's room.

**B. Target Method**

Regular Classrooms

It is assumed by the formula that with efficient programming, the regular classrooms can be used seven out of eight periods a day, that is, 87.5% of the time. The one period that all regular classrooms can not be programmed and used is the lunch period. Regular classrooms include 6<sup>th</sup> to 8<sup>th</sup> grade classrooms used for regular instruction.

Specialty Instructional Spaces

The U.F.T. contract stipulates that a teacher can not teach more than five periods a day. Because of the configuration of these Specialty Instructional Spaces, it is difficult to use them for other subjects. As a result, the formula assumes that Specialty Instructional Spaces can be used no more than five periods a day, that is, 67.5% of the time. Specialty Instructional Spaces include music room, art room, computer lab, science lab, weight room, dance studio and gym.

Adjustments For Parent's And Teacher's Room

Subtract 1/2 classroom for use as a parent's room and 1/2 classroom for use as a teacher's room.

**5. The Adjusted Historical/Target Capacity**

The adjusted historical capacity is derived by deducting capacity of one full-size room for Parent's and Teacher's room from the sum capacity of all classrooms first and then applying program efficiency ratio of 81%.

The adjusted target capacity is derived by deducting capacity of one full-size room for Parent's and Teacher's room from capacities of Regular Classrooms, and then applying programming efficiency ratio identified above, to capacities of regular and specialty instructional spaces respectively.

**6. The Utilization Rate**

To determine the historical utilization percentage for an organization, divide current enrollment by the adjusted historical capacity for each organization in a building. To determine the target utilization percentage for an organization, divide current enrollment by the adjusted target capacity for each organization in a building.

To determine the historical utilization percentage for a building, aggregate enrollments and the adjusted historical capacities for all organizations in a building and divide the aggregated enrollment by the aggregated adjusted historical capacity. To determine the target utilization percentage for a building, aggregate enrollments and the adjusted target capacities for all organizations in a building and divide the aggregated enrollment by the aggregated adjusted target capacity.

**DETERMINING MIDDLE SCHOOL CAPACITY**

<b><u>ROOM CAPACITIES</u></b>		<b><u>ROOM TYPE</u></b>	<b><u>NO. OF SEATS *</u></b>
Number of Rooms	X	Non-D75 Special Education classroom	12
Number of Rooms	X	6 <sup>th</sup> – 8 <sup>th</sup> Classrooms (Title I Schools) ( <b>Non</b> -Title I Schools)	28 (28 for Target Method) 30 (28 for Target Method)
Number of Rooms	X	Other Classrooms (Title I Schools) ( <b>Non</b> -Title I Schools)	28 (28 for Target Method) 30 (28 for Target Method)
		<b>Outside Orgs with no Enrollment</b>	Zero Capacity

=====

**TOTAL UNADJUSTED CAPACITY EQUALS SUM OF THE ABOVE**

=====

\* The lower of the maximum or potential capacity based upon the square footage of each of the rooms.

## **C. FORMULA FOR PRIMARY/MIDDLE SCHOOLS**

**Primary/Middle Schools Utilization Calculations:**

**1. Historical Capacity Calculation**

**A. The Unadjusted Maximum Capacity**

Determine the number of rooms in each building presently in use or that could potentially be used for instruction (Pk-5, Non-D75 Special Education classroom, D75 Special Education classroom). Libraries, offices, lunchrooms, auditoriums, gymnasiums and rooms less than 240 square feet are excluded from all calculations.

Rooms between 240 and 499 square feet used for non-instructional purposes are not counted for capacity and are assumed to be available for support/administrative use.

Each school is entitled to up to eight rooms equal to or greater than 500 square feet for functions including: General Office, Principal’s Office, guidance, medical/nurse, storage, coach’s office, Pre-Kindergarten family room and duplicating use. Such rooms are not counted as capacity. Rooms in excess of those specified above (greater than or equal to 500 square feet) used by the school for administrative or non-teaching purposes will be counted as having capacity.

Assign a maximum historical and target capacity to each instructional room in accordance with chart below. If a room is used by an outside organization (not directly by the school), the room will be assigned a zero capacity.

**The maximum room capacities are:**

	<u>Historical Method</u>	<u>Target Method</u>
Pre-Kindergarten (Including Universal Pre-K) & 18 P.M.)	36 (18 A.M. & 18 P.M.)	36 (18 A.M.
Kindergarten	25	20
Grade 1, 2, 3	25	20
Grade 4 &5 (Title I Schools)	29	28
Grades 4 & 5 (Non-Title I Schools)	31	28
Grade 6, 7, 8 (Title I Schools)	28	28
Grades 6, 7, 8 (Non-Title I Schools)	30	28
Non-D75 Special Education Classroom	12	12
D75 Special Education Classroom	Based upon program	
Specialty Instructional Spaces (Title I Schools)	28	28
Specialty Instructional Spaces (Non-Title I Schools)	30	28

**B. The Unadjusted Potential Capacity**

Assign a potential capacity to each room. This is done by dividing the total square footage of the room by 35 for Pre-K and Kindergarten and 20 for Grades 1-8 and M.I.S. 1-8. These sizes represent the minimum square footage required per pupil according to the building code of the City of New York.

**C. The Total Unadjusted Capacity**

*a) Unadjusted Historical Capacity*

Compare the maximum historical and potential capacity for each room, and take the lower of the two numbers. This is the historical capacity of that individual room. The capacities of individual rooms are added to arrive at an unadjusted historical school capacity. The unadjusted historical capacity will change from year to year depending on the shifting usage of classrooms.

*b) Unadjusted Target Capacity*

Compare the maximum target and potential capacity for each room, and take the lower of the numbers. This is the target capacity of that individual room. The capacities of individual rooms are added to arrive at an unadjusted target school capacity. The unadjusted target capacity will change from year to year due to the shifting usage of classrooms.

**D. Adjustment to Unadjusted Capacity**

*a) Adjustment for Cluster Support Services and Funded Support Services*

The capacities of a specific number of cluster support and funded support rooms based upon the enrollment of primary grades of the organization are subtracted from the unadjusted historical capacity and therefore not counted in capacity. Subtraction is based on the same charts displayed in the Formula for Primary Schools section.

*b) Adjustment for Parent's and Teacher's Room*

Subtract capacity of a full-size classroom for use as parent's room and teacher's room.

*c) Program Efficiency Ratio*

The capacity calculations are based on the premise that the school day should be no more than 8 periods long and that not all classrooms can be used for every period, every day. It is assumed that instructional spaces can be used 90% of the time.

## **2. Target Capacity Calculation**

In target method, the capacity calculation of Primary/Middle schools follows the same target formula that is used for Primary school. Please refer to page P1 to P5 for details.

## **3. Historical/Target Utilization**

To determine the historical utilization percentage for an organization, divide current enrollment by the adjusted historical capacity for each organization in a building.

To determine the target utilization percentage for an organization, divide current enrollment by the adjusted target capacity for each organization in a building.

To determine the historical utilization percentage for a building, aggregate enrollments and the adjusted historical capacities for all organizations in a building and divide the aggregated enrollment by the aggregated adjusted historical capacity.

To determine the target utilization percentage for a building, aggregate enrollments and the adjusted target capacities for all organizations in a building and divide the aggregated enrollment by the aggregated adjusted target capacity.

## **D. FORMULA FOR HIGH SCHOOLS**

**High Schools Utilization Calculations:**

**1. The Unadjusted Maximum Capacity**

Determine the number of rooms in each building presently in use for instruction (9-12, Non-D75 Special Education classroom, D75 Special Education classroom). Libraries, offices, lunchrooms, auditoriums, gymnasiums, (not divided with floor to ceiling partitions), science labs and less than 240 square feet rooms are excluded.

Rooms used for non-instructional purposes are not counted for capacity and are assumed to be available for support/administrative use.

Assign a maximum capacity to each instructional room based upon either the grade (9-12) or program (special education - C.S.D. or Citywide special education) occupying the room and may change to reflect new DOE policy initiatives. If a room is used by an outside organization (not directly by the school), the room will be assigned a zero capacity.

**The maximum room capacities are:**

	<u>Historical Room Capacity</u>	<u>Target Room Capacity</u>
Regular Instructional Space (full-size)	34	30
Other Instructional Space (half-size)	15	15
Computer Lab	15	30
Special Education M.I.S. 1 thru 8 (Community School District)	15	15
Citywide Special Education	Based upon program	
Gym	45	45
Shops	25	25
Science Demo Room	34	30
Science Lab	N/A	30
Dance Studio/Weight Room	34	30

Note: For Alternative High School Organizations and programs, the total number of full size rooms has been multiplied by 22 to determine the organization/program capacity except for Access GED and GED Plus programs whose capacity is calculated similarly to other regular high schools.

**2. The Unadjusted Potential Capacity**

Assign a potential capacity to each room. This is done by dividing the total square footage of the room by 20 for Grades 9-12 and Non-D75 Special Education. This represents the minimum square footage required per pupil according to the building code of the City of New York.

### **3. The Total Unadjusted Capacity**

Compare the maximum historical and potential capacity for each room, and take the lower of the two numbers. This is the historical capacity of that individual room. The capacities of individual rooms are added to arrive at an unadjusted historical school capacity.

Compare the maximum target and potential capacity for each room, and take the lower of the numbers. This is the target capacity of that individual room. The capacities of individual rooms are added to arrive at an unadjusted target school capacity.

### **4. The Adjusted Capacity**

#### *A. Historical Method*

It is assumed by the historical formula that on average all classrooms can be used 85% of the time during a standard eight-period day.

#### *B. Target Method*

##### Regular Classrooms

It is assumed by the formula that with efficient programming, the regular classrooms can be used seven out of eight periods a day. The one period that all regular classrooms can not be programmed and used is the lunch period. Regular classrooms include Pre-K to 12<sup>th</sup> grade classrooms used for regular instruction.

##### Specialty Instructional Spaces

The U.F.T. contract stipulates that a teacher can not teach more than five periods a day. Because of the configuration of these Specialty Instructional Spaces, it is difficult to use them for other subjects. As a result, the formula assumes that Specialty Instructional Spaces can be used no more than five periods a day. Specialty Instructional Spaces include music room, art room, computer lab, science lab, weight room, dance studio and gym.

The adjusted capacity is the sum of Regular Classrooms and Specialty Instructional Spaces after program efficiency ratios are applied respectively.

**8. The Utilization:**

To determine utilization percentage for an organization, divide current enrollment by the adjusted capacity for each organization in a building.

To determine the utilization percentage for a building, aggregate enrollments and the adjusted capacities for all organizations in a building and divide the aggregated enrollment by the aggregated adjusted capacity.

## **E. FORMULA FOR MIDDLE/HIGH SCHOOLS**

## **Middle/High Schools Utilization Calculations:**

### **1. Historical Capacity Calculation:**

#### ***A. The Unadjusted Capacity***

Determine the number of rooms in each building presently in use or that could potentially be used for instruction. Libraries, offices, lunchrooms, auditoriums, gymnasiums and rooms less than 240 square feet are excluded from all calculations.

Rooms between 240 and 499 square feet used for non-instructional purposes are not counted for capacity and are assumed to be available for support/administrative use.

Each school is entitled to up to seven rooms equal to or greater than 500 square feet for functions including: General Office, Principal's Office, guidance, medical/nurse, storage, coach's office and duplicating room. Such rooms are not counted as capacity. Rooms in excess of those specified above (greater than or equal to 500 square feet) used by the school for administrative or non-teaching purposes will be counted as having capacity.

#### ***a) Distribution of Rooms between Middle School Grades and High School Grades***

Use of full size and half size classrooms by Middle and High school grades is based on the enrollment percentage of Middle school and High school grades. To see details on how capacity is calculated for Middle school grades, see page M1-M4. For details on how capacity is calculated for High school grades, see page H1-H2.

#### ***b) The Unadjusted Capacity***

The sum of unadjusted capacity for Middle school and High school section is the total unadjusted capacity for the whole school.

#### ***B. The Adjusted Capacity***

Given that classrooms and other instructional spaces can't be used every period of the day, the unadjusted capacity for Middle school grades is multiplied by 0.81 to derive the adjusted capacity and the unadjusted capacity for High school grades is multiplied by 0.85 to derive the adjusted capacity. The sum of adjusted capacity for Middle school and High school section is the adjusted capacity for the school.

### ***C. The Utilization Rate***

To determine the utilization percentage for an organization, divide current enrollment by the adjusted capacity for each organization in a building. To determine building utilization, aggregate enrollments and adjusted capacities for all organizations in a building and divide the aggregated enrollment by the aggregated adjusted capacity.

## **2. Target Method**

### ***A. The Unadjusted Capacity***

Determine the number of rooms in each building presently in use or that could potentially be used for instruction. Libraries, offices, lunchrooms, auditoriums, gymnasiums and rooms less than 240 square feet are excluded from all calculations.

Determine a weighted average maximum room capacity using the maximum room capacity for Middle and High school grades as well as the enrollment percentage of Middle school grades and High school grades. Compare the weighted average maximum capacity with the potential capacity that is derived by dividing the total square footage of the room by 20. The lower of the two will be the capacity for that room. The unadjusted capacity is the sum of the room capacities.

### ***B. The Adjusted Capacity***

#### ***a) Regular Classrooms***

It is assumed by the formula that with efficient programming, the regular classrooms can be used seven out of eight periods a day. The one period that not all regular classrooms can be programmed and used is the lunch period. Regular classrooms include Pre-K to 12<sup>th</sup> grade classrooms used for regular instruction.

#### ***b) Specialty Instructional Spaces***

The U.F.T. contract stipulates that a teacher can not teach more than five periods a day. Because of the configuration of these Specialty Instructional Spaces, it is difficult to use them for other subjects. As a result, the formula assumes that Specialty Instructional Spaces can be used no more than five periods a day. Specialty Instructional Spaces include music room, art room, computer lab, science lab, weight room, dance studio and gym.

The adjusted capacity is the sum of Regular Classrooms and Specialty Instructional Spaces after program efficiency ratios are applied respectively .

### ***C. The Utilization Rate***

To determine the utilization percentage for an organization, divide current enrollment by the adjusted capacity for each organization in a building. To determine building utilization, aggregate enrollments and adjusted capacities for all organizations in a building and divide the aggregated enrollment by the aggregated adjusted capacity.

**F. FORMULA FOR SPECIAL EDUCATION SCHOOLS**

The Department of Education uses separate formulas to determine Citywide Special Education capacities and by comparison with actual school enrollments, the rate of utilization of Special Education school buildings.

A detailed explanation of the Special Education formula is provided in the material that follows:

**1. The Unadjusted Capacity of Special Education (District 75) Schools**

The following steps are to be taken to calculate the unadjusted capacity:

Determine the number of rooms that are over 240 square feet in each building which can potentially be used as classrooms or instructional support rooms. Administrative rooms, cafeterias, and auditorium are excluded

Using the register file provided by Citywide Special Education which makes available information on the number of classes for each program category, a capacity is assigned to each room based on the type of handicapping condition as indicated in the table below assuming that each room is not serving more students than the maximum classroom capacity allowed by the program category. Sum of the room capacity is the unadjusted capacity of the school.

<u>S.I.E. CATEGORY/DESIGNATION</u>	<u>MAXIMUM CLASSROOM CAPACITY</u>
D75 SPED PreK	8
D75 SPED 3R	12
D75 SPED 4R	8
D75 SPED 5R	6
D75 SPED 6R	12
D75 SPED SL	Various
D75 SPED WI	Various

<u>M.I.S. CATEGORY</u>	<u>MAXIMUM CLASSROOM CAPACITY</u>
Non-D75 SPED(Prek – 8 <sup>th</sup> Grade)	12
Non-D75 SPED(9 <sup>th</sup> – 12 <sup>th</sup> Grade)	15

**2. The Adjusted Capacity**

Citywide programs require significant amounts of space for instructional support services such as: speech, occupational and physical therapy, crisis intervention etc. Depending on the program category, there are different needs for various instructional support spaces.

The chart below summarizes the type of instructional support spaces that are needed for each type of program category.

<u><b>PROGRAM</b></u>	<u><b>SUPPORT SERVICES</b></u>
<b>PreK and 6R</b>	Unit Coordinator & Speech Nurse & Occupational Therapy/Physical Therapy Adaptive Physical Education Activities for Daily Living (with kitchen facility) Guidance & Hearing and Vision Teachers
<b>3R and 4R</b>	Unit Coordinator - SBST Speech & Guidance Adaptive Physical Education Nurse & Occupational Therapy/Physical Therapy Activities for Daily Living (Adol. only) Crisis Intervention
<b>5R</b>	Unit Coordinator & SBST Speech & Guidance Adaptive Physical Education Activities for Daily Living

Depending on the number of classes held in each program category, determination is made based on the space allocation chart below on how much instructional spaces is needed to support the students. Deduct capacity of the instructional support rooms that are deemed necessary to support the programs from the total unadjusted capacity to get adjusted capacity.

<u><b>PROGRAM</b></u>	<u><b>2-6 CLASSES</b></u>	<u><b>7 CLASSES AND UP</b></u>
3R	1 room per class	0.8 room per class
4R	1 room per class	0.8 room per class
5R	0.75 room per class	0.5 room per class
6R	1 room per class	0.6 room per class
PreK	1 room per class	0.6 room per class

**A. The Utilization Rate:**

Total enrollment is divided by the adjusted capacity to get utilization rate.

**G. NOTES**

## **NOTES:**

- The information contained in the following footnotes is not reflected in the utilization profile.
- Where relevant, building capacity includes rooms that are used by GED programs during the school day.
- A zero capacity is indicated for District 75 inclusionary programs. The District 75 students integrated within general education classes. The main organization's capacity therefore reflects the inclusion of the District 75 students.

### **MANHATTAN**

- M430 – The Equity Project Charter School only uses space at the TCUs located at George Washington HS campus. The target capacity for the TCUs is 680.
- M457 – George Washington H.S. Young Adult Borough Center – enrollment of 287 students. Classes are held after 3:00 P.M.
- M473 – Washington Irving H.S. Young Adult Borough Center – enrollment of 355 students. Classes are held after 3:00 P.M.
- M575 – Manhattan Comprehensive Night and Day H.S. – daytime enrollment of 450 does NOT include 351 students attending evening classes. Total enrollment including both day and night is 801 students.
- M645 – School for Co-operative Technical Education - enrollment is counted on students' home registers.
- M973 – Restart Program – Total enrollment of 425 students. 373 students are housed in non-DOE facilities.

### **BRONX**

- X321 – The Crotona Academy only used space at the TCUs located at 639 St. Ann's Avenue. The target capacity for the TCUs is 203.
- X428 - Learning to work YABC at Monroe HS – enrollments of 223. Classes are held after 3:00 P.M.
- X455 – Truman H.S. – capacity does not include 1 room used by M645 – School for Co-operative Technical Education where students are counted on their home register
- X503 – Walton H.S. Young Adult Borough Center – enrollments of 304 students. Classes are held after 3:00 P.M.
- X695 – Horizons H.S. and Crossroads H.S. have 252 students at non-DOE sites. A total register of 378 students.
- X994 – This Alternative Learning Center only uses spaces in the TCUs located at 1000 E. Tremont Ave. The target capacity for the TCUs is 166.
- X996 – This Alternative Learning Center only uses spaces in the TCUs located at 1980 Lafayette Ave. The target capacity for the TCUs is 79.

### **BROOKLYN**

- K411 – Abraham Lincoln H.S. Young Adult Borough Center – enrollment of 264 students. Classes are held after 3:00 P.M.

- K467 – Erasmus Young Adult Borough Center – enrollment of 230 students. Classes are held after 3:00 P. M.
- K655 – Sarah J. Hale H.S. – capacity includes K656, the old Sarah J. Hale Annex.
- K657 – Downtown Brooklyn Young Adult Borough Center – enrollment of 283 students. Classes are held after 3:00 P. M.
- K922 –South Shore Educational Complex Young Adult Borough Center – enrollment of 282 students. Classes are held after 3:00 P. M
- K923 – Automotive High School Young Adult Borough Center – enrollment of 246 students. Classes are held after 3:00 P. M
- K951 – Brooklyn Adult Learning Center - no DIIT enrollment. The Center is used for the purpose of educating adult students.

## **QUEENS**

- Enrollment, capacity, and utilization for Renaissance Charter H.S. (Q675) has been reported this year under Queens High Schools although its enrollment is not part of the audited register.
- Q457 - High School for Arts and Business Young Adult Borough Center - enrollment of 282 students. Classes are held after 3:00 P.M.
- Q467 - Flushing H.S. Young Adult Borough Center - enrollment of 331 students. Classes are held after 3:00 P.M.
- Q487 - John Adams H.S. Young Adult Borough Center - enrollment of 287 students. Classes are held after 3:00 P.M.
- Q950 – GED Plus – enrollment of 1,164 students at non-DOE facilities, trade classes, and evening centers citywide.
- Q344 - New Riker’s Island School - total enrollment 1,039 students

## **STATEN ISLAND**

- R607 – Staten Island Young Adult Borough Center - enrollment of 127 students. Classes are held after 3:00 P.M.

**H. TERMS AND EXPLANATIONS**

## **TERMS AND EXPLANATIONS**

The following is an explanation of the column headings in the Utilization Profile report.  
(By building and by organization)

### **BORO -**

The Borough where the school is located.

M = Manhattan

B = Bronx

K = Brooklyn

Q = Queens

R = Staten Island

### **DIST. -**

The district having jurisdiction over the school.

### **BLDG. I.D. -**

A discrete four-character code for each building.

### **BLDG. NO. / NAME -**

The present name of the building.

### **BLDG. ENROLLMENT -**

Enrollment for the building. It is derived by summing the enrollment for the organizations housed in the building.

### **BLDG. CAPACITY -**

It is derived by multiplying each room in the building by the number of students it accommodates.

### **BLDG. UTIL. % -**

Percentage of capacity used. Building utilization is calculated by dividing building enrollment by building capacity.

**ORG. I.D. -**

A discrete four-character code for each organization.

**ORG. NAME -**

The name or number of an organization.

**ORG. ENROLLMENT -**

Enrollment for each organization. Building enrollment is derived by adding the organization enrollments.

**ORG. CAPACITY -**

It is derived by multiplying each room used by the organization by the number of students it accommodates.

**ORG. UTIL. % -**

It is calculated by dividing org. enrollment by org. capacity.

A ZERO CAPACITY IS INDICATED FOR DISTRICT 75 INCLUSIONARY PROGRAMS. THE DISTRICT 75 STUDENTS ARE INTEGRATED WITHIN GENERAL EDUCATION CLASSES. THE MAIN ORGANIZATION'S CAPACITY THEREFORE REFLECTS THE INCLUSION OF THE DISTRICT 75 STUDENTS.

## **PART II. REPORTS BASED ON HISTORICAL CALCULATION**
