STATEMENT FROM MAYOR BILL DE BLASIO ON NET NEUTRALITY

“Access to a free and open internet is a fundamental right of every citizen. Repealing net neutrality would stifle opportunity for individuals, students and small businesses, while letting huge corporations profit at our expense. New York City stands with other cities against the repeal of Net Neutrality. We will do everything within our power to keep the internet open and accessible for all. New Yorkers, I call on you to not be silent. Contact your representatives and make your voice heard.”
