Street Cleaning.

Communication from John O'Callahan, submitting a claim for \$31, was referred to the Committee on Street Cleaning.

Communication from August Karner and others, on condition of Pearl street, was referred to the Committee on Street Cleaning.

Communication from M. & H. Shrenkeisen, asking permit to dump ashes, was referred to the Committee on Street Cleaning.

A proposal (pamphlet) of "Cochrane," to make a mill pond, was referred to the Committee on Street Cleaning.

Resolved, That requisition be and is hereby made upon the Comptroller for the sum of \$7,343.54, to pay expenses incurred in removing ice and snow during the month of February, 1880.

Resolved, That the Chief Clerk be directed to advertise for sale, at public auction, City Scow No. 16, two machines, and one phaeton and harness, at the stables of the Bureau of Street Cleaning.

Resolved, That the rent of the Eighteenth Ward Market for month of February, 1880, amounting to \$250, be and is hereby ordered to be paid by the Treasurer—all voting aye.

Resolved, That the pay-rolls of the Bureau of Street Cleaning for the month of February, 1880, amounting to \$40,604.54, as per schedule, be and are hereby ordered to be paid by the Treasurer—all voting aye.

Resolved, That Peter McGuire be and is hereby appointed dump inspector, in place of Michael O'Conner, who declines to serve.

Whereas, At a meeting of the Assembly Committee on Cities, held in this city on the 28th ult., a communication was received from the Department of Docks recommending that "dumping boards should be so constructed as to admit of the scow being completely enclosed while being loaded," and "that such work can be done at comparatively little cost to the city;" therefore

Resolved, That the Department of Docks be respectfully requested to furnish to the Board of Police its estimate of the cost of constructing such addition to the several dumping boards.

Whereas, The vast increase of the tenement-house population in this city, as well as the additional number of paved streets, have caused a corresponding increase of the material to be removed by the Bureau of Street Cleaning; and

Whereas, The present dumping board facilities are inadequate to meet the requirements of the Bureau of Street Cleaning in the removal of such material; therefore

Resolved, That the Department of Docks be and is hereby respectfully requested to assign to the Bureau of Street Cleaning two additional dumps, one to be located on the North river, between the Battery and Laight street, and one on the East river, between the Battery and Market street.

Resolved, That for the purpose of relieving the present and immediate need of the Bureau of Street Cleaning, the Department of Docks be requested to extend the Market Street Dump sixty feet.

On recommendation of the Committee on Street Cleaning, it was

Resolved, That the following bills be and are hereby ordered to be paid by the Treasurer—all aye.

HEALTH DEPARTMENT

Milk Inspection.

HEALTH DEPARTMENT, NO. 301 MOTT STREET,
NEW YORK, February 1, 1880.

WALTER DEF. DAY, M.D., Sanitary Superintendent.

SIR—I have the honor to report that agreeably to directions from President Chandler, I have visited several of the largest and best-known dairies of New Haven and of Hartford Counties, Connecticut, in order to test the correctness of the specific gravity standard which has been adopted by the Board of Health of the City of New York and others, as representing the minimum gravity of milk obtained from healthy and well-fed cows, when unadulterated with water or any other abnormal ingredient, as well as to test the accuracy of the lactometer, which has been selected by the Board of Health of the City of New York for determining such specific gravities.

Expressed more briefly, an inspection was made to ascertain, so far as possible, the answers to the following questions:

1. Does any cow in ordinary flow secrete milk which, at a temperature of 60° Fahrenheit, exhibits a lower specific gravity than 1029?
2. Does any milk, at a temperature of 60° Fahrenheit, cause the lactometer to float below the 100th line of its scale?

Inasmuch as the fatty principles which are represented in part by the cream, are those principles of the milk whose specific gravity tends to lower the specific gravity of the milk as a whole, most of the physical analyses of milk contained in this report were made at Farmington Connecticut, where one of the oldest and most successful creameries or laboratories for making butter is situated, and about which are found the purest breeds of foreign stock, which have been imported with special reference to their butter-making capacity.

Farmington is also the place which others who have attempted to nullify the standards which have been adopted by your Board, have selected as calculated to verify their erroneous conclusions.

Specimens Nos. 11, 12, 13, and 14, taken from cows known as "Strippers," which are usually milked but once a day, were not examined, inasmuch as in some cases hardly enough milk was obtained to float the Lactometer; and because such samples cannot be considered as representing either the quantity or quality of milk which is obtained from milk cows at the time of the morning and evening milking.

For the sake of determining the proportions of the proximate principles of milk which are contained in milk of known specific gravity, as shown by the Lactometer, I brought to the School of Mines of Columbia College, New York City, an average specimen of the milk supplied by Dairy No. 5, which was made up by taking from the total quantity given by each cow an equal amount of milk, and by a chemical analysis, I obtained the following result:

Water.....	85.40%
Fat.....	4.35%
Solids, not Fat.....	10.24%
Amount of Cream, as shown by Creamometer.....	19.00%

In the middle of the day, at about noon, a sample of milk measuring about half a pint was brought to me to be tested. It stood at 78° of the lactometer at 60° F.

This sample was said to have been milked from cow No. 5 of the previous table.

At my request another sample of about half a pint was milked from this cow in my presence, and I found it to stand at 80° of the lactometer at 60° F.

This is not surprising, as it is a well-known fact that if the first milk from a cow is tested by itself it will always be found to be heavier than the average of the milking, while the last milk drawn will be lighter.

This small quantity of milk taken from the cow at noon is simply a fraction of the milk which would come at a milking, and its specific gravity is of no consequence in considering the questions under discussion.

Commercial milk is either all of the milk at a morning's milking, or all of the milk at an evening's milking.

From the preceding premises the following deductions may be drawn:

1. That the specific gravity standard of 1.029, which has been adopted by the Health Department of the Board of Health of the City of New York, as the minimum for pure milk at a temperature of 60° Fahrenheit is nearly 10 per cent below the average standard of milk as obtained by these tests, and discriminates in favor of fraudulent dealers to this percentage extent.

2. No sample of milk tested caused the lactometer to float at a lower level than that indicated by the 100th line of its scale.

JOHN B. ISHAM, M. D.,

Assistant Sanitary Inspector Health Department, N. Y. City.

NEW YORK, January 22, 1880.

W. DE F. DAY, M. D., Sanitary Superintendent:

SIR—We have the honor to report that, in accordance with your directions, we have visited certain dairies in Westchester County for the purpose of testing the accuracy of the standard adopted by the Department for the lactometer.

Each cow being well milked, a portion, after thoroughly incorporating the contents of each pail, was removed for the purpose of testing, which was done by cooling said portion to 60° Fahr. and examining its specific gravity by means of the lactometer adopted by the Department, whose 0 point is 1.000 and 100° is 1.029 at 60° Fahr. The age of the cow, breed, number of calves, and time of birth of the last calf, were recorded at the same time. In many cases the data on these points could only be given approximately, as none of the farmers, whose cows were examined, keep a herd book in which such matters are recorded.

In no instance was the lactometer found to stand below 103 on its scale, equal to a specific gravity of 1.02987, the average of 100 samples being 109.3, or a specific gravity of 1.03169.

* Specimen of the Milk of Cow No. 2 was taken for analysis, the results of which were as follows:

Water.....	86.39	86.40
Butter.....	4.44	4.44
Sugar.....	3.78	3.74
Casein and Albumen.....	4.36	4.38
Salts.....	.69	.73

From this we conclude that the standard, adopted by the Board of Health on the lactometer for pure milk, is at least three degrees on its scale below the poorest milk from healthy cows, and that the average of a dairy is at least six degrees above said standard; and that brewers' grains, when fed properly to cows, that is, in a good condition, with proper admixture of meal, give good milk, as is shown by the above analysis of one of the poorer specimens.

MARCH 3, 1880.

Present—President Vincent C. King, Commissioners John J. Gorman and Cornelius Van Cott.

Trials.

Engineer of Steamer, Orlando M. Crane, of Engine Co. No. 40, charged with "neglect of duty." On motion second specification of charge was stricken out as being indefinite. Evidence taken; laid over.

Private George Cavanagh, of Engine Co. No. 7, charged with "neglect of duty." Evidence taken; laid over.

Private James Corrigan, of Engine Co. No. 7, charged with "neglect of duty," and "absence without leave." Evidence taken; laid over.

Minutes of meetings held 25th, 26th, and 28th ultimo, and 1st instant, were read and approved.

The following preambles and resolution, offered by Commissioner Van Cott, were adopted:

Whereas, It appears that the falling of the floors and roof of the buildings Nos. 384 and 386 Broadway within half an hour after the discovery of the fire on the 20th ultimo, which resulted in the loss of the lives of two firemen of this Department and the total destruction of the building, is attributable to the fact that the supports of the central girder were granite piers in the sub-cellar, and iron columns in the basement, both of which, as experience has shown, are in such locations where the heat of fires is intensified by confinement, very quickly affected to such an extent as to make them practically valueless as supports; and

Whereas, It is believed that similar serious defects exist in other buildings in this city; therefore be it

Resolved, That the Chief of Department cause a careful inspection to be made by the respective Company Commanders of their respective districts, under the supervision of the Chiefs of Battalion, with directions to report all buildings found to be inadequately or improperly supported in any part of the same (including girders and exterior as well as interior walls), by piers of granite or columns of iron, or other objectionable material, below the level of the first floor.

Communications.

The following resolutions were adopted.

Whereas, The Department of Public Parks is desirous of prosecuting the work of laying new and repairing the old Neuchâtel, asphalt, cement and other pavements in the Central and other Parks, some of which are claimed to be patented, and in the laying of which patented processes are required,

Resolved, That the Board of Estimate and Apportionment be respectfully requested to adopt such resolutions as are, in the opinion of the Counsel to the Corporation, necessary to enable the Department of Public Parks to proceed with the work of laying new and repairing old walks in the Central and other Parks as provided for by the appropriations for this Department for the year 1880.

Resolved, That the three similar maps or plans entitled "Plan of streets, roads and avenues and public parks or places in the 'West Farms District' of the Twenty-fourth Ward of the City of New York, within that part of the Twenty-fourth Ward of the City of New York bounded on the west by Fordham avenue, Hoffmann street and the New York and Harlem Railroad, on the north and east by the Bronx river, and on the south by part of Pelham avenue, Wendover avenue, Boston road and a line about 1,100 feet north of the Twenty-third Ward line, and parallel to it, as laid out, classified, discontinued and closed by the Commissioners of the Department of Public Parks of the City of New York in pursuance of the provisions of chapter 604 of the Laws of 1874, and chapter 436 of the Laws of 1876," dated "New York, August 6, 1879," and signed "Julius Munckwitz, Superintending Architect," and "E. B. Van Winkle, Topographical Engineer," directed to be prepared by a resolution passed at a meeting of this Board held on the 6th day of August, 1879, be and the same are hereby approved and ordered filed, and that James F. Wenman, the President and one of the Board of Commissioners of the Department of Public Parks be and he is hereby designated and directed to certify and file said maps as provided by law.

Resolved, That the Superintending Architect be directed to report to this Board a site for the erection of a base for the bust of Bryant, now in the possession of this Department.

Resolved, That the Treasurer be authorized to purchase for the use of this Department eight work horses and exchange, in part payment of the same, the eight old horses now at the Central Park.

Resolved, That the President be authorized to execute on behalf of this Department an agreement with Prof. Wm. McClellan for the privilege of mooring a bath at East River Park, during the years 1880 and 1881, at an annual rental of \$250.

Resolved, That the office of Engineer of Construction be and the same is hereby abolished.

Resolved, That Eugene E. McLean be placed in charge of the works of construction of sewers and regulating and grading of streets, etc., in the Twenty-third and Twenty-fourth Wards.

RAPID TRANSIT COMMISSION.

COMMISSIONERS OF RAPID TRANSIT,
CITY OF NEW YORK, 54 EXCHANGE PLACE,
March 1, 1880.

BY DIRECTION OF THE BOARD OF COMMISSIONERS appointed by the Mayor of the City of New York, August 30, 1879, under and in pursuance of the provisions of Chapter 605 of the Laws of 1875, public notice is hereby given that the said Commissioners will cause a book of subscription to the capital stock of the company to be incorporated and organized under the provisions of said Act, and to be known as the Harlem River and Portchester Rapid Transit Company, to be opened on Saturday, March 6, 1880, at 10 o'clock A. M., at the banking offices of the Central Trust Company of the City of New York, at No. 15 Nassau street, New York City.

The amount of said capital stock is fixed at two hundred thousand dollars, divided into two thousand shares of the par value of one hundred dollars each, subject to the right to increase the capital stock from time to time as is by said act provided. The whole capital stock is to be subscribed by not less than twenty-five persons, and on subscribing each subscriber is required to pay in cash five per centum of the par value of the number of shares subscribed by him.

The Commissioners reserve to themselves the right to reject any subscriber to the capital stock, and any and all subscriptions thereto which are not in compliance with the conditions to the granting of said franchise.

The Commissioners also reserve to themselves the right to distribute to any subscriber a number of shares less than the number by him subscribed for.

When the whole of the capital stock is subscribed the book will be closed.

WILLIAM G. TULLER,
Secretary.

—or any part thereof, will be received at the office of the Department of Public Charities and Correction, in the City of New York, until 9 o'clock A. M. of Thursday, the 18th day of March, 1880. The person or persons making any bid or estimate shall furnish the same in a sealed envelope, indorsed "Bid or Estimate for Lumber, Hardware, Fittings, etc.," and with his or their name or names, and the date of presentation, to the head of said Department, at the said office, on or before the day and hour above named, at which time and place the bids or estimates received will be publicly opened by the head of said Department and read.

The Department of Public Charities and Correction reserves the right to decline any and all bids or estimates if deemed to be for the public interest, and to accept any bid or estimate as a whole, or for any one or more articles included therein. No bid or estimate will be accepted from, or a contract awarded to, any person who is in arrears to the Corporation upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the Corporation.

The award of the contract will be made as soon as practicable after the opening of the bids.

Delivery will be required to be made from time to time, at such times and in such quantities as may be directed by the said Department, but the entire quantity will be required to be delivered on or before thirty (30) days after the date of the contract.

Any bidder for this contract must be known to be engaged in and well prepared for the business, and must have satisfactory testimonials to that effect; and the person or persons to whom the contract may be awarded will be required to give security for the performance of the contract by his or their bond, with two sufficient sureties, in the penal amount of fifty (50) per cent. of the estimated amount of the contract.

Each bid or estimate shall contain and state the name and place of residence of each of the persons making the same; the names of all persons interested with him or them therein; and if no other person be so interested, it shall distinctly state that fact; that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud; and that no member of the Common Council, Head of a Department, Chief of a Bureau, Deputy thereof or Clerk therein, or other officer of the Corporation, is directly or indirectly interested therein, or in the supplies or work to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate, that the several matters stated therein are in all respects true. Where more than one person is interested, it is requisite that the verification be made and subscribed by all the parties interested.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in the City of New York, with their respective places of business or residence, to the effect, that if the contract be awarded to the person making the estimate, they will, on its being so awarded, become bound as his sureties for its faithful performance; and that if he shall omit or refuse to execute the same, they shall pay to the Corporation any difference between the sum to which he would be entitled on its completion, and that which the Corporation may be obliged to pay to the person or persons to whom the contract may be awarded at any subsequent letting; the amount in each case to be calculated upon the estimated amount of the work by which the bids are tested. The consent above mentioned shall be accompanied by the oath or affirmation, in writing, of each of the persons signing the same that he is a householder or freeholder in the City of New York, and is worth the amount of the security required for the completion of this contract, over and above all his debts of every nature, and over and above his liabilities, as bail, surety, and otherwise; and that he has offered himself as a surety in good faith and with the intention to execute the bond required by section 27 of chapter 8 of the Revised Ordinances of the City of New York, if the contract shall be awarded to the person or persons for whom he consents to become surety. The adequacy and sufficiency of the security offered to be approved by the Comptroller of the City of New York.

Should the person or persons to whom the contract may be awarded neglect or refuse to accept to contract within forty-eight (48) hours after written notice that the same has been awarded to his or their bid or proposal, or if he or they accept but do not execute the contract and give the proper security, he or they shall be considered as having abandoned it and as in default to the Corporation, and the contract will be re-advertised and re-let as provided by law.

The quality of the articles, supplies, goods, wares, and merchandise must conform in every respect to the samples of the same respectively at the office of the said Department. Bidders are cautioned to examine the specifications for particulars of the articles, etc., required, before making their estimates.

Bidders will state the price for each article by which the bids will be tested.

Bidders will write out the amount of their estimate in addition to inserting the same in figures.

Payment will be made by a requisition on the Comptroller, issued on the completion of the contract, or from time to time, as the Commissioners may determine.

Bidders are informed that no deviation from the specifications will be allowed, unless under the written instruction of the Commissioners of Public Charities and Correction.

The Department of Public Charities and Correction reserves the right to decline any and all bids or estimates if deemed to be for the public interest, and to accept any bid or estimate as a whole, or for any one or more articles included therein. No bid or estimate will be accepted from, or a contract awarded to, any person who is in arrears to the Corporation upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the Corporation.

The form of the agreement, including specifications, and showing the manner of payment, can be obtained at the office of the Department.

Dated New York, March 5, 1880.
