FRANK J. BELL, Acting Secretary.

BOARD OF EXAMINERS.

February 27, 1906.

Present—Messrs. Warren A. Conover, Charles Buek, Lewis Harding, Charles G. Smith, Edward F. Croker, Henry R. Marshall and William J. Fryer, Chairman.

Meeting called to order at 2 p. m.

On motion, minutes approved as read.

Appeal No. 6, F. S. C. 1 of 1906, premises No. 85 Clinton street, Brooklyn; Brooklyn Heights Railroad Company, appellant.

Referred to Chief Croker at last meeting for examination and report with recommendation.

Laid Over.

Appeal No. 7, Alteration 93 of 1906, premises No. 52 Maiden lane, Manhattan; Clinton & Russell, architects and appellants.

No. 2. Entire building should be absolutely fireproof, in accordance with the requirements of section 105 of the Building Code.

No. 3. Bulkhead construction on roof unlawful; inclosure walls should be of brick.

No. 4. Parapet walls should extend above roof, in accordance with the requirements of section 43 of the Building Code.

No. 1. That the rules and regulations of the President of said Borough, or the provisions of law, or ordinances do not apply.

No. 2. That an equally good and more desirable form of construction can be employed.

No. 3. The amount involved by such decision exceeding the sum of one thousand dollars.

First—That as the highest point of the roof of the main building is within the 150-foot limit, and the only part of the building exceeding this height being the pent-house at the rear, that the requirement that the building be absolutely fireproof be waived.

Second—That we be allowed to build the bulkhead or pent-house as shown on the plans, the walls of which will be built of hollow tile covered on the outside with copper, K. I. sash and frames, and the floors to be of tile.

Third—The parapet walls in question are the parapet walls of the pent-house, we ask that we be allowed to build these as shown on the plans.

First—That the pent-house is the only part of the structure exceeding the 150-foot limit, and that this pent-house will be constructed absolutely fireproof and thoroughly isolated from the building; we shall erect a fireproof door shutting the pent-house off from the elevator hall, and that generally throughout the building will conform to the present building, having fireproof arches, and the elevators being thoroughly isolated from this part of the building, and fire line with hose is now located on this floor.

Second—That the building is entirely surrounded by low buildings and that the pent-house is to be built absolutely fireproof.

Mr. J. P. Fox appeared before the Board.

On motion, approved on condition that where the walls of the pent-house rest on brick walls they shall be carried up eight inches in thickness, of brickwork laid in cement mortar.

Appeal No. 8, New Building 1757 of 1905, premises No. 315 Fifth avenue, Manhattan; Messrs. Maynicke & Franke, architects and appellants.

No. 3. Wind bracing should be provided, proposed joint between columns and girders of insufficient strength to develop resisting movement required to care for wind pressure. Section of the columns should be increased to care for stresses developed by wind pressure.

The location of the building is practically in the centre of the city, where the full force of the wind will not be felt as much as in a more exposed location, besides which there are many tall buildings surrounding the same, as shown on plan filed herewith, which will break the force of the wind; besides which, the neighborhood is rapidly being improved with tall buildings. Also because the skeleton of the building is entirely of steel, riveted, and because an amendment, January 26, 1906, item No. 3, has been made, increasing considerably the size of the columns and the strength of the joint between the columns and girders.

It is requested that the requirements of the Building Code be waived as to special wind bracing, because special provision, against the force of a violent wind, does not apply to this building, considering that the location is not isolated and is surrounded by tall buildings.

Because of the above facts and that the provisions of the Building Code relating to structures exposed to the full force of violent winds, do not apply in this case, as the building, by reason of its position not being isolated and because of its being surrounded by tall buildings, is not exposed to any considerable wind pressure.

Mr. Julius Franke appeared before the Board.

On motion, laid over for one week.

Appeal No. 9, New Building 138 of 1906, premises southeast corner of Fifty-seventh street and Park avenue, Manhattan; Charles A. Rich, architect and appellant.

No. 5. Building exceeds twelve stories in height and should be made to conform to all the requirements of section 105 of the Building Code in regard to the fireproofing of buildings exceeding twelve stories in height.

While building is over twelve stories in height the twelfth story is the pent-house and is within the 150-foot limit.

Construction of Pent-house.

1. All walls surrounding the pent-house will be carried up to their proper height.
2. Floor will be made of cement.
3. Wireglass will be used wherever glass is necessary.
4. Proper skylights will be provided.
5. All woodwork for the window frames, sash, doors, trim and base of the pent-house will be thoroughly fireproof.
6. The highest point of the pent-house roof will not exceed 150 feet from the curb level.
7. All woodwork entering into the construction of the pent-house will be fireproofed by the process which is fully accepted and approved by the Bureau of Buildings.
8. The entire pent-house will be constructed entirely fireproof.
9. And that a standpipe with hose connection and outlet in the hall of the pent-house will be provided.
10. Pent-house will not cover more than 50 per cent. of the roof area.

Withdrawn by appellant.

Adjourned.

Resolved, That the Board of Estimate and Apportionment of The City of New York, in pursuance of the provisions of section 442 of the Greater New York Charter, as amended, deeming it for the public interest so to do, proposes to change the map or plan of The City of New York, by changing the lines of Castle Hill avenue at its intersection with Westchester avenue, in the Borough of The Bronx, City of New York, more particularly described as follows:

This change consists in changing the easterly line by joining a point on the easterly side of Castle Hill avenue, located 9.61 feet south of the first angle point south of Westchester avenue, with a point in the easterly line of Castle Hill avenue, which is distant 101.80 feet northerly of the first angle point in Castle Hill avenue north of Westchester avenue.

The western line of Castle Hill avenue south of Westchester avenue is made parallel to the new eastern line and distant 100 feet therefrom; the western line of Castle Hill avenue north of Westchester avenue consists in extending the western line of Castle Hill avenue north of the first angle point north of Westchester avenue, southerly to Westchester avenue.

This change is occasioned by the fact that certain portions of Lafayette avenue and Avenue C were not included within the lines of Castle Hill avenue, as formerly filed. This change causes them to be embraced in Castle Hill avenue, as changed.

PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 440 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application thereto at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
