BOROUGH OF BROOKLYN.

POSTPONED MEETING—LOCAL BOARD—THE HEIGHTS DISTRICT.

Meeting in Borough Hall, Thursday, March 1, 1906, at 4.00 p. m.

The roll was called, and the following members answered to their names:

Hon. Bird S. Coler, President of the Borough (presiding); Alderman Downing, Forty-fifth Aldermanic District; Alderman Wafer, Forty-seventh Aldermanic District.

The Secretary presented the following:

No. 15.

For the purpose of formulating plans whereby traffic conditions at the Brooklyn Bridge might be relieved, the President of the Borough had the matter looked into by the Engineer in his office, who recommended a change of grade on Washington street, between Sands and Tillary streets; and also to strike from the map or plan of The City of New York, Sands street, between Washington street and the Bridge Plaza.

The Secretary read the following reports:

"February 23, 1906.

"Hon. Desmond Dunne, Commissioner of Public Works:

"Dear Sir—I beg to submit herewith a plan for ameliorating the congested traffic conditions on lower Fulton street and other streets forming approaches to the Brooklyn Bridge. A study of present conditions demonstrates the existence of three points where cars interfere with each other's progress to such an extent as to become the controlling influence which limit the number of cars which can be operated in a given time. If these three points can be materially improved and certain other minor changes made, it is certain more surface cars can be moved over the bridge than has heretofore been possible. These points of prohibitive interference are:

"1. Boerum place and Fulton street.

"2. Fulton street and Myrtle avenue.

"3. Sands street at entrance to bridge.

"Supplementary to these, congestion is aggravated by the at present necessary occupation of Fulton street, between Court street and Sands street, by a prohibitive number of cars during rush hours.

"The object of this report is to suggest changes which would remedy, to a large extent, these defects in the surface railroad layout.

"The problem is, I believe, much simplified by the suggestion to lay rails on Liberty street, Tillary street and Livingston street. Taking up the points of congestion in their reverse order, it is found that serious delay to all traffic at Sands street entrance to the bridge is caused by

"(a) Cars and vehicles arriving from Manhattan crossing in front of those proceeding across the bridge.

"(b) Mixup of cars and vehicles trying to enter the bridge due to sharp curves in tracks, restricted space and presence of objectionable columns supporting "L" structure, as clearly shown on accompanying photograph.

"The obvious remedy for these conditions is that no cars or vehicles should be permitted to cross the entrance to the bridge on Sands street; that no cars should approach the bridge on Sands street, and that all of the cars crossing the bridge should approach it on the westerly side of Washington street, close to the bridge station and should take the bridge tracks in as nearly a straight line as possible, leaving an open and unrestricted approach for vehicles to the bridge roadway.

"Cars coming from Manhattan, instead of swinging west to Fulton street, east through Sands street or east through Prospect street, should proceed across the Plaza close to the bridge station to Liberty street; certain lines of cars turning east through High and Concord street, and others proceeding up Liberty street to Fulton street, and through Fulton street to Court street, where certain lines would proceed via Court street and Livingston street, and the remainder directly up Fulton street.

"The most effective way of carrying out this plan would be to have the High street and Concord street tracks cross Washington street in subway so as not to interfere with or be obstructed by the cars proceeding to Manhattan. For the purpose of this report the simpler grade crossing plan is presented, it being kept in mind that the subway plan is more desirable if the City has the power and is financially able to construct them. Its adoption need involve no other changes in this plan than approaches through city property under bridge structure, as shown on the supplementary map. If surface crossings be adopted, it will be necessary to lower the grade of Washington street, between Sands street and Tillary street, there being at the present time insufficient headroom under the bridge structure on High and Concord streets for the passage of trolley cars at grade. This would be a desirable improvement since the street has never been properly regulated and was much injured by the depressions on the west side acquired to give headroom under the elevated approach to the bridge. If the grade be changed a better pavement should be laid and the surface railroad tracks moved to the westerly side of the street.

"Traffic obstruction at Fulton street and Myrtle avenue. The chief benefits to be secured here will result from a resumption of strict police traffic regulations at this point and the elimination of the crossovers and switches from the Myrtle avenue line. These cars should be carried to and from the bridge and ferry via Adams street or Jay street.

"Traffic obstruction at Boerum place and Fulton street. The conditions at this intersection during the evening rush hours cannot, I believe, be duplicated elsewhere. It is probable that considerably more than one-half of all the trolley cars operated in this Borough at one time are obliged to cross and avoid each other over the crowded meshwork of tracks which exists at this point. These crossings are at such oblique angles that a car in crossing occupies several times the space it would if the crossings were rectangular. The plan recommended herein contemplates doing away with two of the existing three crossovers, and provides for the remaining crossing to be at right angles with the Fulton street tracks. This plan necessitates extending Boerum place through to Willoughby street, or running the cars now using Boerum place through Smith street. But while the latter would be a more direct line to the bridge and ferries than that recommended herein, it is believed the convenience of having these lines run closer to the group of municipal and county buildings is sufficiently desirable to warrant the expense of extending Boerum place to Willoughby street and the detour in the proposed line of tracks.

"The plan includes running the Greenpoint and Crosstown lines over the last mentioned line via Livingston street so as to permit removing the crossover from Joralemon street to Willoughby street, and the removal of tracks in Adams street, between Fulton street and Myrtle avenue. A single track loop should be provided around the Borough Hall, with switches to the Fulton street tracks to permit operating cars for the business and dry goods district.

"The suggestion has been made by Mr. Judson G. Wall and others that a track be laid in Tillary street connecting the Fulton street and Washington street tracks so that the Court and Union street cars may proceed to New York in a more rational manner than circuitous route now employed. Such a connection is desirable and will be necessary for use by the Livingston street lines when operated. Such a connection is needed at once, and should there be delay or objection to placing tracks in Tillary street, an equally good connection could unquestionably be secured at once about 100 feet north of Tillary street, partly on property of the Brooklyn Rapid Transit Company and partly on property of the City of New York. This line is shown on the plan as alternate line.

It will be noted that the plan provides for the operation of cars to 'City Hall only,' viz.:

"Fulton street lines by single tracks loop around Borough Hall;

"Livingston street and Court street lines by crossover switch on Court street, near Montague street;

"Smith and Ninth street lines by crossover switch on Smith street, near Fulton street, and for all the

"Boerum place lines by loop through Willoughby street, Jay street, Myrtle avenue and Pearl street.

"These can be operated without serious obstruction to through service and with great convenience to the business and dry goods districts.

"To put the above plan into execution there will be required authority to lay tracks on the Plaza, Liberty street, Livingston street, Pearl street, Tillary street, High street and Concord street, and for laying additional tracks on Jay street, in lieu of agreement with the Coney Island and Brooklyn Railroad to operate the cars of other lines over their tracks. In addition thereto it will be necessary to extend Boerum place (Court square) to Willoughby street and to provide for laying rails on the portion extended. If the proposed High street and Concord street tracks are to cross Washington street at grade authority must be obtained for lowering the grade of Washington street, between Sands and Tillary streets, and appropriation secured for repaving and otherwise putting the change into effect.

"It would also be desirable to close Sands street between the north and south roadways of the bridge, remove the tracks therefrom and include the portion thus closed as a portion of the footway approach to the bridge.

"I believe it proper to refer at this time to plans which the Bridge Department has under consideration for increasing the traffic capacity of the Brooklyn Bridge. These include running through "L" trains over the bridge during rush hours and for double tracking the bridge roadways for surface car traffic during rush hours.

"The latter plan would render necessary excluding vehicles from the bridge at such periods, but it may be properly contended that the legitimate use of the bridge under existing conditions is to enable wage earners to travel between their homes and offices within a reasonable time, and that until conditions are changed as they will be upon the opening of the Manhattan Bridge and the Rapid Transit tunnels, other uses should be considered as subordinate.

"The operation of through "L" trains during the rush hours is a measure to which every obstacle that can should give way, and if it be true as stated that the present local bridge half-fare traffic is the chief obstacle, this service should be either abolished or transferred to a system of loop trolleys as operated on the Williamsburgh Bridge.

Statistics show that during the rush period the bridge trains with four cars operating at sixty seconds interval carry seventy-four per cent. of those crossing the bridge, and if it be possible to operate through trains of six cars at the same interval the capacity would be increased to an amount equal to the present capacity of the trolley service.

"The operation of double trolley tracks on the bridge roadways during the heaviest traffic would permit the addition to the trolley service at this period of the local traffic now carried in the bridge trains.

"Attached hereto is map showing in more detail the several features of the plan submitted herein.

"Respectfully,

"(Signed) ANDREW J. PROVOST, Jr., Engineer."

"February 24, 1906.

"Hon. Desmond Dunne, Commissioner of Public Works:

"Dear Sir—A hearing is advertised before the Heights Local Board on February 28 to consider striking from the city map Sands street, between Washington street and the Bridge Plaza.

"The object of this improvement is to open up the approach and terminal roadways of the bridge by preventing the crossing of traffic at these points of congestion. Its effect would be to include the portion of the street thus closed as a part of the footway approach to the bridge.

"I believe the improvement should be considered only as a portion of the general plan to relieve traffic conditions at the Brooklyn terminus of the Brooklyn Bridge, upon which matter a hearing is to be held by the said Board on the same date. If favorable action is taken on the general plan, I believe the proposed closing of Sands street may properly be initiated.

"Respectfully,

"(Signed) A. J. PROVOST, Jr., Engineer."

"February 24, 1906.

Hon. Desmond Dunne, Commissioner of Public Works:

"Dear Sir—A hearing is advertised before the Heights Local Board on February 28, to consider a change in the grade of Washington street, between Sands street and Tillary street.

"The object of this improvement is to lower the grade between these points sufficiently to permit the operation of surface cars upon the roadways of High street, between the Plaza and Washington street, and of Concord street, between Liberty and Washington streets, there being at present insufficient head room under the elevated bridge structure for this purpose. While the effect of this change upon private property would be material, the class of property affected is generally poor. The property damaged would appear to be limited to buildings located, respectively, at the southeast corners of Washington street at Nassau and Concord streets. The sidewalks, with the exception of those around the bridge terminal, are bluestone capable of being relaid economically. The roadway of Washington street would be benefited if the pavement were relaid upon concrete foundation with tar and gravel joints. I understand the foundations of columns supporting the elevated approach to the bridge along the westerly line of Washington street are sufficiently deep to permit the lowering of the grade as proposed.

"I believe the plans should only be considered as a portion of the general plan to relieve traffic congestion at the Brooklyn terminus of the Brooklyn Bridge, upon which matter a hearing is to be held by the said Board on the same date. If favorable action is taken on the general plan to the extent of recommending the installation of the surface tracks upon the roadways of High street, between the Plaza and Washington street, and on Concord street, between Liberty and Washington streets, I believe the proposed change of grade may properly be initiated. A copy of plan showing the proposed change is transmitted herewith.

"Respectfully,

"(Signed) A. J. PROVOST, Jr., Engineer."

Dr. John J. Colgan and Thomas M. Farley, representing the Down Town Taxpayers' Association; Judson G. Wall and several other representatives of civic organization, offered suggestions with the same object in view. The President of the Borough stated that there was no desire to take immediate action, but rather to agree on specific plans with the idea of attaining the relief sought, and that the object of the meeting was merely to get into motion some general plan of relief. The President of the Borough ordered copies of the reports of the Engineer to be printed, as well as photographs of streets in the neighborhood of the bridge terminus to be furnished to the various civic organizations and other persons interested. The meeting was adjourned subject to the call of the Chair.

CHARLES FREDERICK ADAMS, Secretary.

FOR THE RIGHT TO DUMP AND FILL IN BEHIND THE BULKHEAD WALL RECENTLY BUILT AT THE NORTHERLY END OF THE CHELSEA SECTION ON THE NORTH RIVER, BOROUGH OF MANHATTAN.

TERMS AND CONDITIONS OF SALE.
The work to be done is to fill in with suitable material, as hereinafter described, the area behind the new bulkhead wall extending from the northerly line of West Twenty-third street extended southerly a distance of about 160 to 190 feet to the existing bank of solid filling.

The filling shall also extend from the rear of the bulkhead wall or coping easterly a distance of about 150 feet to the old crib bulkhead.

The filling shall be brought to a grade level with the top of the coping of the bulkhead wall and shall extend inshore on a regular grade to the top of the ground at the adjacent or inshore bank.

It is estimated that the area outlining the above-described limits will create a basin to be filled in, under this agreement, whose cubical contents in net void space is equal to 12,000 cubic yards.

Bidders will state in writing a lump sum price, which they agree to pay for the privilege of filling in the area between West Twenty-second and West Twenty-third streets, as above more fully described, and being the basin calling for the filling of a void space estimated at about 12,000 cubic yards.

In the estimated amount given, the amount in cubic yards is arrived at without placing any allowance for shrinkage, settlement, swelling of the material or penetration into the mud.

The Department is not bound in any way by such estimate, and bidders must satisfy themselves of the actual quantity required to fill in the above-described area by examination of the premises or such other means as they may prefer, the whole of the said premises behind the bulkhead wall within the above-described limits, and no allowance will be made to the purchaser from the purchase price on account of any discrepancy which may be found between the above-estimated quantity and the actual amount of filling required. The purchaser will be required to place the filling in accordance with the following specifications:

All the filling shall, unless otherwise directed, be placed directly in the rear of the bulkhead wall and carried from the bulkhead wall toward the shore until the bank of same has been carried out at the finished grade for a distance of about 40 feet from the face of the bulkhead wall, at which time, if so directed by the Engineer, the filling shall be started at the bank and carried outshore toward the bulkhead wall.

All material must be dumped and filled in only in such manner, at such points and in such order of procedure and at such times and seasons as may, from time to time, be directed, and the work of filling in may be entirely suspended for such periods of time as may be directed by the Engineer. The purchaser shall have no claim for damage or for any allowance from the purchase money on account of such suspension of the work.

All directions shall be given by the Engineer, and wherever the word "Engineer" is used in these specifications it refers to and designates the Engineer-in-Chief of the Department of Docks and Ferries, or such officer or employee as may be designated by him.

Rip-rap stone coming directly on or against the bulkhead wall must be deposited carefully in such manner as will not injure the same.

All the filling, except as otherwise specified herein, shall be of ashes, cellar dirt, broken stone, etc., entirely free from garbage or any organic matter objectionable in the opinion of the Engineer.

At any section of the bulkhead wall the filling shall be brought up level with the under side of the backing log of the bulkhead wall at such section, and no higher, unless otherwise directed.

The filling shall be commenced within five days after the date of the receipt of a notification from the Engineer that the work, or any part of it, is ready to be begun, after which not less than 300 cubic yards per day shall be placed, and the whole amount of the filling called for to bring the above-described basin up to grade shall be completed within forty-five days from the date of the receipt of said notification. At the expiration of this time this agreement shall be considered closed unless a further extension of time shall be given by the Commissioner of Docks. If at any time during the progress of the work it shall be deemed necessary to order the suspension of the whole or any part of the filling, the time for completing said filling shall be extended as much as it may have been delayed by such suspension.

In case the purchaser at any time does not proceed with the work of filling in to the satisfaction of the Commissioner of Docks, the said Commissioner will at once terminate the privilege of filling in and proceed to have the remainder of the filling in done by other parties in such way and manner as he deems proper, and any loss which may result therefrom shall be charged against the principal and his surety.

The purchaser shall, during the work of filling in, and at all times until the completion thereof, take all necessary precautions and place proper guards for the prevention of accidents, and put up and maintain at night sufficient lights, and he shall indemnify and save harmless The City of New York from all damages and costs to which it may be put by reason of injury to the person or property of another resulting from negligence or carelessness in the performance of the work or guarding the same, to which the surety is also bound.

No bid or estimate will be considered unless accompanied by a certified check drawn to the order of the Commissioner of Docks, or money to the amount of twenty-five per centum of the amount of the bid, which amount shall be applied in the case of the successful bidder to the first one-quarter of the amount of the filling to be deposited; twenty-five per centum to be paid when the first one-quarter of filling has been completed; twenty-five per centum additional when one-half the filling has been completed, and the balance, twenty-five per centum, when three-quarters of said filling has been completed.

A surety or guarantee company, duly authorized by law to act as surety, to be approved by the Commissioner of Docks, will be required to enter into a bond or obligation jointly and severally with the purchaser in the sum of double the amount of the purchase price as security for the satisfactory performance of said work, in accordance with the terms and conditions hereof.

The highest bidder will be required to pay the auctioneer's fee and 25 per cent. of the amount of the yearly rental at the time and place of sale; the amount so paid for one quarter's rent shall be forfeited if the successful bidder does not execute the lease when notified that it is ready for execution. PUBLIC NOTICE.

CITY OF NEW YORK—DEPARTMENT OF FINANCE,
COMPTROLLER'S OFFICE.

To Whom It May Concern:

On May 9, 1904, chapter 686 of the Laws of 1904, "An act to authorize the Comptroller and the Corporation Counsel of The City of New York, on behalf of said City, to compromise, settle with property owners interested, certain claims for taxes, assessments and sales for the same, and for or on account of evidences of indebtedness issued on account of local improvements in the territory formerly included within the boundaries of Long Island City," became a law.

The purpose of this act was to grant relief to the owners of property located within the territory of the former City of Long Island City, which property had become incumbered with liens approaching, in many cases, almost the assessed value of the property. Owing to the phenomenal increase in values of real estate in the Borough of Queens during the past year, the object for which said act was passed has ceased to exist.

Notice is therefore given that on and after May 15, 1906, the Comptroller of The City of New York will refuse to consider applications filed under chapter 686 of the Laws of 1904.

All applications filed after May 15, 1906, will be rejected.

Booth, President, and Henry Guttin, Engineer, copy of which is annexed hereto and made a part of this grant.

Sec. 2. The grant of this franchise, right and privilege is subject to the following conditions: First—The said franchise, right and privilege to lay one conduit line in each of the streets, avenues or highways, and between the limits as hereinbefore described, and the franchise, right and privilege to maintain and operate the same shall be held and enjoyed by the said Company, its lessee or successors, for a term of fifteen years from the date of the signing of this contract, with the privilege of renewal of said grant for a further period of ten years, upon a fair revaluation of said franchise, right and privilege.

If the Company shall determine to exercise its privilege of renewal, it shall make application to the Board of Estimate and Apportionment of The City of New York, or to any authority which shall be authorized by law to act for the City in place of the said Board. Such application shall be made at any time not earlier than two years and not later than one year before the expiration of the original term of this grant. The determination of the revaluation shall be sufficient, if agreed to in writing by the Company and by the Board of Estimate and Apportionment, or by such other authority in its place. If the Company and the Board, or such other authority in its place for the City, shall not reach such agreement on or before the day one year before the expiration of the original term of this grant, then the annual rate of compensation for such succeeding ten years shall be reasonable, and either the City (by the Board or by such other authority in its place)

or the Company shall be bound upon request of the other to enter into a written agreement with such other authority, fixing the rate of such compensation at such amount as shall be reasonable; and if the parties shall not forthwith agree upon what is reasonable, then the parties shall enter into a written agreement fixing such annual rate at such amount as shall be determined by three disinterested freeholders selected in the following manner:

One disinterested freeholder shall be chosen by the Board of Estimate and Apportionment, or its successors in authority; one disinterested freeholder shall be chosen by the Company; these two shall choose a third disinterested freeholder, and the three so chosen shall act as appraisers and shall make the revaluations aforesaid. Such appraisers shall be chosen at least six months prior to the expiration of the contract, and their report shall be filed with the Board of Estimate and Apportionment, or its successors in authority, within three months after they are chosen. They shall act as appraisers and not as arbitrators. They may base their judgment upon their own experience and upon such information as they may obtain by inquiries and investigations without the presence of either party. They shall have the right to examine the books of the Company and its officers under oath. The valuations so ascertained, fixed and determined shall be conclusive upon both parties, but shall not in any event be less than the minimum amount fixed as the sum to be paid annually for the last year of this original grant. If in any case the annual rate shall not be fixed prior to the termination of the original term of this grant then the Company shall pay the annual rate theretofore prevailing until the new rate shall be determined, and shall then make up to the City the amount of any excess of the annual rate then determined over the previous annual rate. The compensation and expenses of the said appraisers shall be borne jointly by the City and the Company, each paying one-half thereof.

Second—Upon the termination of this contract, or if the same be renewed, then at the termination of the said renewal term, or upon the termination of the rights hereby granted for any other cause, all conduit lines and appurtenances thereto, constructed pursuant to this contract, shall be and become the property of The City of New York, without compensation therefor, and the same may be used by the City for any purpose whatsoever. If, however, at the termination of this grant, as above, the City by the Board of Estimate and Apportionment, or its successors in authority, shall so order by resolution, the said Company shall remove, at its own expense, said conduit line and all appurtenances thereto, and shall restore the streets and pavements to their original condition.

Third—The Company, its successors or assigns, shall pay for this privilege to The City of New York the following sums of money, to wit:

1. Five thousand dollars (\$5,000) in cash within thirty (30) days after the signing of the contract.

2. During the first five years of this contract an annual sum which shall in no case be less than eight hundred and fifty dollars (\$850), and which shall be equal to 4 per cent. of the gross receipts of the Company, if such percentage shall exceed the sum of eight hundred and fifty dollars (\$850).

During the second five years of this contract an annual sum which shall be in no case less than eleven hundred dollars (\$1,100), and which shall be equal to 5 per cent. of the gross receipts of the Company, if such percentage shall exceed the sum of eleven hundred dollars (\$1,100).

During the third and remaining five years of this contract an annual sum which shall in no case be less than fourteen hundred dollars (\$1,400), and which shall be equal to 6 per cent. of the gross receipts of the Company, if such percentage shall exceed the sum of fourteen hundred dollars (\$1,400).

3. An annual payment of ten (10) cents for each linear foot of conduit line and two dollars (\$2) for each manhole constructed within the limits of any street, avenue or highway. The sums due shall be calculated from the day when the permit is obtained, to open the streets for any section of the work.

All sums herein provided for shall be paid into the Treasury of The City of New York on November 1 of each year, and shall be for the amount due to September 30 next preceding. Any and all payments made by the terms of this franchise to The City of New York by the Company shall not be considered in any manner in the nature of a tax, but such payments shall be in addition to any and all taxes of whatsoever kind or description, now or hereafter required to be paid by any ordinance of The City of New York or by any law of the State of New York.

Fourth—The annual charges or payments shall continue throughout the whole term of the privilege hereby granted, whether original or renewal, as hereinbefore provided, notwithstanding any clause in any statute or in the charter of any other company, providing for payments of refrigerating rights or franchises at a different rate, and no assignment, lease or sublease of the rights or privileges hereby granted, whether original or renewal, or of any part thereof, or of any of the routes mentioned herein, or of any part thereof, shall be valid or effectual for any purpose unless the said assignment, lease or sublease shall contain a covenant on the part of the assignee or lessee that the same is subject to all the conditions of this grant, and that the assignee or lessee assumes and will be bound by all of said conditions, and especially said condition as to payments, anything in any statute or in the charter of such assignee or lessee to the contrary notwithstanding, and that the said assignee or lessee waives any more favorable conditions created by such statute or its charter, and that it will not claim by reason thereof or otherwise, exemption from liability to perform each and all of the conditions of this grant. Nothing herein contained shall apply to any mortgage or mere lienor, but shall apply to any purchaser upon foreclosure or under or by virtue of any provision of a mortgage or lien.

Fifth—The rights and privileges granted hereby shall not be assigned either in whole or in part, or leased or sublet in any manner, nor shall title thereto or right, interest or property therein pass to or vest in any other person or corporation whatsoever, either by the act of the Company, its successor or assigns, or by operation of law, whether under the provisions of the statutes relating to the consolidation or merger of corporations or otherwise, without the consent of The City of New York, acting by the Board of Estimate and Apportionment, or its successor in authority, evidenced by an instrument under seal, anything herein contained to the contrary thereof in anywise notwithstanding, and the granting, giving or waiving of any one or more of such consents shall not render unnecessary any subsequent consent or consents. This provision, however, shall not apply to the making of a mortgage, but shall apply to a sale under foreclosure.

Sixth—The grant of this privilege is subject to whatever right, title or interest the owners of abutting property or others may have in and to the streets, avenues and highways on the route heretofore described.

Seventh—If a conduit line as herein described shall not be constructed and in actual operation

in all the streets and avenues, and upon all the routes hereby described, on May 1, 1911, all rights hereby given shall be thereupon forthwith and immediately forfeited without judicial or other proceedings, unless at least 50 per cent. of the conduit line shall then be constructed and in operation, when, in such case, the forfeiture shall affect only the Company's rights, privileges and franchises on the remaining portion of the conduit line hereby granted.

Eighth—All construction which shall be made under this grant shall be done in a manner solely upon the terms and conditions hereafter to be imposed by the President of the Borough of Brooklyn and the Commissioner of Water Supply, Gas and Electricity, or their respective successors in authority. The said Company shall submit a working plan of construction to the said President and to the said Commissioner, which shall include and show in detail the method of construction of said conduit line, connections, manholes and other appurtenances, and the mode of protection of all subsurface construction under the streets, avenues and highways described in the routes.

Ninth—The said Company shall bear the expense of keeping in repair for one year after it has been replaced, all pavement which may at any time be removed by said Company, either for the purpose of construction or for the repairing of the conduit line and its appurtenances.

Tenth—The said Company shall bear the expense of inspection, which may be required by the President of the Borough of Brooklyn and the Commissioner of Water Supply, Gas and Electricity, of all the work of construction required, or removal of the said conduit line, which shall be done under this grant.

Eleventh—The Company shall cause a test to be made of the pipes laid under this grant before said pipes shall be used for the conveyance of gas or fluid under pressure for refrigerating purposes. The pipes so tested shall be submitted to a pressure of 450 pounds per square inch, and such test shall be made under the supervision of the Commissioner of Water Supply, Gas and Electricity. A certificate showing that such a test has been made, without injury to the pipes, shall be executed by an officer of the Company, indorsed by the Commissioner of Water Supply, Gas and Electricity, and filed with the Board of Estimate and Apportionment.

Twelfth—The Company, its successors or assigns, shall not charge consumers more than three dollars and fifty cents (\$3.50) for the same amount of refrigeration which is produced by one ton of ice. During the term of this contract the Board of Estimate and Apportionment shall have absolute power to regulate the maximum and minimum rates, provided that such rates shall be reasonable and fair. All refrigeration which may be required by The City of New York at any point along the routes herein described, shall be furnished by the Company without cost to the City.

The Company, upon the application for refrigeration of any person or corporation located along the routes herein authorized, shall extend its conduit to such premises and furnish to said applicant refrigeration at the prices which are hereinafter fixed, or at which such prices may be hereafter fixed, in properly insulated compartments, under contracts containing fair and reasonable regulations for such service; otherwise this contract shall cease and determine at the option of the Board of Estimate and Apportionment.

It is mutually understood and agreed by and between the parties hereto that in the event of any dispute arising between the company and any consumer or user of its refrigeration, as to the fairness and reasonableness of the regulations contained in said contracts, the Board of Estimate and Apportionment on the application of either said consumer user or Seaboard Refrigeration Company shall have the power to pass upon and decide as to the fairness and reasonableness of such regulations, and said Seaboard Refrigeration Company hereby agrees to abide by such decision and conform such regulations thereto.

Thirteenth—A correct map shall be furnished to the Board of Estimate and Apportionment by the Company, showing the exact location of all the conduit lines and manholes laid with reference to the curb lines of the streets and the street surface, and the same shall be furnished on the first day of November of each year until all conduit lines which are authorized by this grant are constructed or until the right hereby authorized to construct conduit lines along the routes described have ceased by limitation, as herein provided.

Fourteenth—The grant of this privilege shall not affect in any way the right of The City of New York to grant a similar privilege upon the same or other terms and conditions to any other person or corporation.

Fifteenth—The Company shall assume all liability by reason of the construction and operation of the conduit line and the City shall assume no liability whatsoever to either persons or property by reason of its construction.

As a condition of this grant, the Company, its successor or assigns, hereby agrees to repay to the City any damages which the City shall be compelled to pay by reason of any acts or defaults of the Company, its successor or assigns. Due notice of any such demand shall be given to the Company.

Sixteenth—In case of any violation or breach or failure to comply with any of the provisions herein contained, this contract may be forfeited or avoided by The City of New York by a suit brought by the Corporation Counsel, on notice of ten days to the said Company.

Seventeenth—If the Company has in position a conduit or pipe line in streets or avenues other than those herein described, then the Company shall remove such conduit or pipe line at its own expense, within one year from the date of signing this contract. If the Company owns a conduit or pipe line in the streets or avenues herein described, such conduit or pipe line shall be deemed to be a conduit line herein authorized, but no right is hereby given to lay or construct a conduit line in addition to that which the Company already has in such streets or avenues.

Eighteenth—The conduit line hereby authorized shall be used only by the Company and for no other purpose than for supplying refrigeration by the ammonia process or such other process as may be consented to by the Board of Estimate and Apportionment.

Nineteenth—The Company hereby agrees not to issue stock or bonds other than have been heretofore issued, until a certificate of authority therefor has been issued by the Board of Estimate and Apportionment, or until such Board shall further certify in writing as to the amount of stock or bonds reasonably required for the purposes of the Company. The stock and bonds of the said Company shall not be issued in excess of the amount so certified.

The Company shall not increase its capital stock or its bonded indebtedness without the consent in writing of the Board of Estimate and Apportionment stating the amount of the authorized increase. For the purpose of making this determination as to the amount of stock and bonds to be issued, or the amount of the authorized increase of the capital stock and bonded indebtedness of the Company, the Board of Estimate and Apportionment may take and hear testimony under oath and examine the books and

papers of the Company, and require verified statements from the officers thereof, pertaining to the value of the property and of the franchise owned or operated by the Company. Such determination shall be made within sixty (60) days after the final submission of the papers or of final hearing on the application for the issue or increase of capital stock or bonds of indebtedness.

The Company shall submit a report to the Board of Estimate and Apportionment not later than November 1 of each year, for the year ending September 30 next preceding, which shall state:

1. The amount of stock issued; for cash; for property;
2. The amount paid in as by last report;
3. The total amount of capital stock paid in;
4. The funded debt by last report;
5. The total amount of funded debt;
6. The floating debt as by last report;
7. The amount of floating debt;
8. The total amount of funded and floating debt;
9. The average rate per annum of interest on funded debt;
10. Statement of dividends paid during the year;
11. Number of feet of conduit now laid;
12. The total amount expended for same;
13. Amount, kind and capacity of machinery now in use and required for operation;
14. The total amount expended for same;
15. Number of tons of refrigeration furnished during the year;
16. Total receipts from refrigeration and the average price per ton received during the year;
17. Amounts paid by Company for damage to persons or property on account of construction and operation;
18. Total expenses for operation; including salaries;
19. An inventory of all the property of the Company.

—and such other information in regard to the business of the Company as may be required by the Board. For each failure to comply with the foregoing, the Company shall pay a penalty of one hundred dollars (\$100), which may be collected by the Comptroller without notice.

Twentieth—The Company shall at all times keep accurate books of accounts of the gross earnings from the privileges granted under this contract. The Company shall, on or before November 1 in each year, make a verified report to the Comptroller of The City of New York, of the business done by the Company for the year ending September 30 next preceding, as he may prescribe. Such report shall contain the number of feet of conduit laid and the number of manholes constructed during the year, and also a statement of the gross receipts from all business of furnishing refrigeration to consumers, together with such other information and in such detail as the Comptroller may require. The Comptroller shall have access to all books of the Company for the purpose of ascertaining the correctness of its report and may examine its officers under oath.

Twenty-first—If the said Company, its successors or assigns, shall fail to give efficient public service at the rates herein fixed, or fails to maintain its structures in good condition throughout the full term of its occupancy of such streets, the Board of Estimate and Apportionment of The City of New York may give written notice to the said Company specifying any default on the part of said Company, and requiring said Company to remedy the same within a reasonable time, and upon the failure of the Company to remedy said default within a reasonable time, said Company shall for each day thereafter during which the default or defect remains, pay to The City of New York a sum of fifty dollars (\$50) as fixed or liquidated damages, or the said City, in case such structures which may affect the surface of the streets, shall not be put in good condition within a reasonable time after notice by the Board as aforesaid, shall have the right to make all needed repairs at the expense of the Company, in which case the said Company shall pay to the City the amount of the cost of such repairs with legal interest thereon, all of which sums may be deducted from the fund hereinafter provided.

Twenty-second—This grant is upon the express condition that the Company, within thirty days after the execution of this contract and before anything is done in exercise of the rights conferred thereby, shall deposit with the Comptroller of The City of New York the sum of five thousand dollars (\$5,000), either in money or in securities to be approved by him, which fund shall be security for the performance by the Company of the terms and conditions of this grant, especially those which relate to the payment of the annual charge for the privilege and the penalties herein provided, and in case of default in the performance by said Company of such terms and conditions The City of New York shall have the right, after due notice, to collect the same from the said fund without legal proceedings, or after default in the payment of the annual charges shall collect the same, with interest, from said fund after ten days notice in writing to the said Company. In case of any drafts so made upon this security fund the said Company shall, upon thirty days notice in writing, pay to the Comptroller of The City of New York a sum of money sufficient to restore the said fund to the original amount of five thousand dollars (\$5,000), and in default thereof the grant hereby made may be canceled and annulled at the option of the Comptroller of The City of New York, acting on behalf of said City. No action or proceeding shall affect other legal rights, remedies or causes of action belonging to The City of New York.

Twenty-third—The Company promises, covenants and agrees on its part and behalf to conform to and abide by and perform all the terms, conditions and requirements in this contract fixed and contained.

Twenty-fourth—The Company agrees to assume and comply with any of the existing provisions or future amendments of Article V. of the Transportation Corporations Law relating to pipe lines, imposing conditions, restrictions or penalties should the Board of Estimate and Apportionment from time to time so require, in the same manner and to the same extent as if the Company had been incorporated under the said Transportation Corporations Law.

In witness whereof the party of the first part, by its Mayor, thereunto duly authorized by the Board of Estimate and Apportionment of said City, has caused the corporate name of said City to be hereunto signed, and the corporate seal of said City to be hereunto affixed, and the party of the second part, by its officers, thereunto duly authorized, has caused its corporate name to be hereunto signed, and its corporate seal to be hereunto affixed, this day and year first above written.

PROPOSALS FOR BIDS AND ESTIMATES FOR THE CITY OF NEW YORK.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York, is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
