#### Services (Other Than Human Services)

PRE-QUALIFIED LIST FOR BRIDGE DESIGN AND CONSTRUCTION SUPPORT SERVICES AND RESIDENT ENGINEERING INSPECTION SERVICES – The Department of Transportation invites engineering firms to be considered for inclusion on the agency's Pre-Qualified Lists for the following categories of service: (1) Bridge Design and Construction Support Services and/or (2) Bridge Resident Engineering Inspection (REI) Services. In order for a firm to be Pre-Qualified the firm must meet specific criteria requirements as stated on the Pre-Qualification Forms and SF330 Forms which can be obtained from the New York City Department of Transportation (NYCDOT). Information and applications to be included on such lists may be obtained from the NYCDOT Office of the Agency Chief Contracting Officer, and may be submitted at any time. Firms already on the Pre-Qualified Lists do not need to be re-certified for inclusion on the list(s) at this time

For the two categories described above, three (3) lists (Large, Medium and Small) are established according to project size. No firm may be placed on more than two of the three lists for the Bridge Design and Construction Support Services or the Bridge Resident Engineering Inspection Services category. Firms that are placed on these Pre-Qualified lists may be invited to receive RFPs (Request for Proposals) on selected Capital Bridge Projects without additional public notification. The Pre-qualification Lists are as follows:

SMALL BRIDGE DESIGN/REI: (for projects of less than \$3 million construction cost)MEDIUM BRIDGE DESIGN/REI: (for projects of \$3 to \$10 million construction cost) LARGE BRIDGE DESIGN/REI: (for projects in excess of \$10 million construction cost)

# **AGENCY RULES**

#### **RENT GUIDELINES BOARD**

NOTICE

2009 Apartment & Loft Order #41

June 23, 2009

Order Number 41 - Apartments and Lofts, rent levels for leases commencing October 1, 2009 through September 30, 2010.

NOTICE IS HEREBY GIVEN PURSUANT TO THE AUTHORITY VESTED IN THE NEW YORK CITY RENT GUIDELINES BOARD BY THE RENT STABILIZATION LAW OF 1969, as amended, and the Emergency Tenant Protection Act of 1974, as amended, implemented by Resolution No 276 of 1974 of the New York City Council and

#### THURSDAY, JULY 16, 2009

extended by Chapter 82 of the Laws of 2003, and in accordance with the requirements of Section 1043 of the New York City Charter, that the Rent Guidelines Board (RGB) hereby adopts the following levels of fair rent increases over lawful rents charged and paid on September 30, 2009. These rent adjustments will apply to rent stabilized apartments with leases commencing on or after October 1, 2009 and through September 30, 2010. Rent guidelines for loft units subject to Section 286 subdivision 7 of the Multiple Dwelling Law are also included in this order.

#### ADJUSTMENT FOR RENEWAL LEASES (APARTMENTS)

Together with such further adjustments as may be authorized by law, the annual adjustment for renewal leases for apartments shall be:

Where heat **is** provided or required to be provided to a dwelling unit by an owner from a central or individual system **at no charge** to the tenant, the adjustments are as follows:

For a **one**-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010: 3%

For a two-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010: 6%

Provided, however, that where the most recent vacancy lease was executed **six** years or more prior to the date of the renewal lease under this Order, the following shall instead apply:

For a one-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010: 3% or \$30 whichever is greater.

For a two-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010: 6% or \$60 whichever is greater.

Where heat is neither provided nor required to be provided to a dwelling unit by an owner from a central or individual system, the adjustments are as follows:

For a one-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010: 2.5%

For a two-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010: 5%

Provided, however, that where the most recent vacancy lease was executed **six** years or more prior to the date of the renewal lease under this Order, the following shall instead apply:

For a one-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010: 2.5% or \$25 whichever is greater.

For a **two**-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010: 5% or \$50 whichever is greater.

These adjustments shall also apply to dwelling units in a structure subject to the partial tax exemption program under Section 421a of the Real Property Tax Law, or in a structure subject to Section 423 of the Real Property Tax Law as a Redevelopment Project.

#### VACANCY ALLOWANCE FOR APARTMENTS

No vacancy allowance is permitted except as provided by sections 19 and 20 of the Rent Regulation Reform Act of 1997.

# ADDITIONAL ADJUSTMENT FOR RENT STABILIZED APARTMENTS SUBLET UNDER SECTION 2525.6 OF THE RENT STABILIZATION CODE

In the event of a sublease governed by subdivision (e) of section 2525.6 of the Rent Stabilization Code, the allowance authorized by such subdivision shall be 10%.

# ADJUSTMENTS FOR LOFTS (UNITS IN THE CATEGORY OF BUILDINGS COVERED BY ARTICLE 7-C OF THE MULTIPLE DWELLING LAW)

The Rent Guidelines Board **adopts** the following levels of rent increase above the "base rent", as defined in Section 286, subdivision 4, of the Multiple Dwelling Law, for units to which these guidelines are applicable in accordance with Article 7-C of the Multiple Dwelling Law:

For one-year increase periods commencing on or after October 1, 2009 and on or before September 30. 2010: 3%

For two-year increase periods commencing on or after October 1, 2009 and on or before September 30, 2010: 6%

owner elects or has elected in writing to delete such clause, effective no later than **October 1**, 2009 from the existing lease and all subsequent leases for such dwelling unit, the increased rental, if any, due under such escalator clause shall be offset against the amount of increase authorized under this Order.

#### SPECIAL ADJUSTMENTS UNDER PRIOR ORDERS

All rent adjustments lawfully implemented and maintained under previous apartment orders and included in the base rent in effect on **September 30, 2009** shall continue to be included in the base rent for the purpose of computing subsequent rents adjusted pursuant to this Order.

#### SPECIAL GUIDELINE

Under Section 26-513(b)(1) of the New York City Administrative Code, and Section 9(e) of the Emergency Tenant Protection Act of 1974, the Rent Guidelines Board is obligated to promulgate special guidelines to aid the State Division of Housing and Community Renewal in its determination of initial legal regulated rents for housing accommodations previously subject to the City Rent and Rehabilitation Law which are the subject of a tenant application for adjustment. The Rent Guidelines Board hereby **adopts** the following Special Guidelines:

For dwelling units subject to the Rent and Rehabilitation Law on **September 30, 2009**, which become vacant after September 30, 2009, the special guideline shall be:

- ${f 50\%}$  above the maximum base rent, or (1)
- The Fair Market Rent for existing housing as (2)established by the United States Department of Housing and Urban Development (HUD) for the New York City Primary Metropolitan Statistical Area pursuant to Section 8(c)(1) of the United States Housing Act of 1937 (42 U.S.C. section 1437f [c] [1] ) and 24 C.F.R. Part 888, with such Fair Market Rents to be adjusted based upon whether the tenant pays his or her own gas and/or electric charges as part of his or her rent as such gas and/or electric charges are accounted for by the New York City Housing Authority.

Such HUD-determined Fair Market Rents will be published in the Federal Register, to take effect on October 1, 2009.

#### DECONTROLLED UNITS

The permissible increase for decontrolled units as referenced in Order 3a which become decontrolled after **September 30**, 2009, shall be:

- (1)50% above the maximum base rent, or
- The Fair Market Rent for existing housing as (2)established by the United States Department of Housing and Urban Development (HUD) for the New York City Primary Metropolitan Statistical Area pursuant to Section 8(c)(1) of the United States Housing Act of 1937 (42 U.S.C. section 1437f [c] [1] ) and 24 C.F.R. Part 888, with such Fair Market Rents to be adjusted based upon whether the tenant pays his or her own gas and/or electric charges as part of his or her rent as such gas and/or electric charges are accounted for by the New York City Housing Authority.

Such HUD-determined Fair Market Rents will be published in the Federal Register, to take effect on October 1, 2009.

#### CREDITS

Rentals charged and paid in excess of the levels of rent increase established by this Order shall be fully credited against the next month's rent.

#### STATEMENT OF BASIS AND PURPOSE

The Rent Guidelines Board is authorized to promulgate rent guidelines governing apartment units subject to the Rent Stabilization Law of 1969, as amended, and the Emergency Tenant Protection Act of 1974, as amended. The purpose of these guidelines is to implement the public policy set forth in Findings and Declaration of Emergency of the Rent Stabilization Law of 1969 (§26-501 of the N.Y.C. Administrative Code) and in the Legislative Finding contained in the Code) and in the Legislative Finding contained in the Emergency Tenant Protection Act of 1974 (L.1974 c. 576, §4 [§2]).

The Rent Guidelines Board is also authorized to promulgate rent guidelines for loft units subject to Section 286 subdivision 7 of the Multiple Dwelling Law. The purpose of the loft guidelines is to implement the public policy set forth in the Legislative Findings of Article 7-C of the Multiple Dwelling Law (Section 280).

#### Dated: June 23, 2009

For a **two**-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010:

#### 6% or \$60, whichever is greater.

Where heat is neither provided nor required to be provided to a dwelling unit by an owner from a central or individual system, the adjustments are as follows:

For a **one**-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010: 2.5%

For a two-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010: 5%

Provided, however, that where the most recent vacancy lease was executed **six** years or more prior to the date of the renewal lease under this Order, the following shall instead apply:

For a one-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010:

#### 2.5% or \$25, whichever is greater.

For a **two**-year renewal lease commencing on or after October 1, 2009 and on or before

September 30, 2010: 5% or \$50, whichever is greater.

#### VACANCY ALLOWANCE

The vacancy allowance is now determined by a formula set forth in the State Rent Regulation Reform Act of 1997 and in Chapter 82 of the Laws of 2003, not by the Orders of the Rent Guidelines Board

#### SUBLET ALLOWANCE

The increase landlords are allowed to charge when a rent stabilized apartment is sublet by the primary tenant to another tenant on or after October 1, 2009 and on or before September 30, 2010 shall be 10%.

#### ADJUSTMENTS FOR LOFTS

For Loft units to which these guidelines are applicable in accordance with Article 7-C of the Multiple Dwelling Law, the Board established the following maximum rent increases for increase periods commencing on or after October 1, 2009 and on or before September 30, 2010. No vacancy allowance or low rent allowance is included for lofts.

# $\frac{1 \text{ Year}}{3\%} \quad \frac{2 \text{ Years}}{6\%}$

The guidelines do not apply to hotel, rooming house, and single room occupancy units that are covered by separate Hotel Orders.

Any increase for a renewal lease may be collected no more than once during the guideline period governed by Order No. 41.

#### SPECIAL GUIDELINES

1.

Leases for units subject to rent control on September 30, 2009 that subsequently become vacant and then enter the stabilization system are not subject to the above adjustments. Such newly stabilized rents are subject to review by the State Division of Housing and Community Renewal (DHCR). In order to aid DHCR in this review the Rent Guidelines Board has set a special guideline of whichever is greater:

50% above the maximum base rent, or

(2)The Fair Market Rent for existing housing as established by the United States Department of Housing and Urban Development (HUD) for the New York City Primary Metropolitan Statistical Area pursuant to Section 8(c)(1) of the United States Housing Act of 1937 (42 U.S.C. section 1437f [c] [1]) and 24 C.F.R. Part 888, with such Fair Market Rents to be adjusted based upon whether the tenant pays his or her own gas and/or electric charges as part of his or her rent as such gas and/or electric charges are accounted for by the New York City Housing Authority.

Such HUD-determined Fair Market Rents will be published in the Federal Register, to take effect on October 1, 2009.

All rent adjustments lawfully implemented and maintained under previous apartment Orders and included in the base rent in effect on September 30, 2009 shall continue to be included in the base rent for the purpose of computing nt rents adjusted purs

### THE CITY RECORD

#### VACANT LOFT UNITS

No Vacancy Allowance is permitted under this Order. Therefore, except as otherwise provided in Section 286, subdivision 6, of the Multiple Dwelling Law, the rent charged to any tenant for a vacancy tenancy commencing on or after October 1, 2009 and on or before September 30, 2010 may not exceed the "base rent" referenced above plus the level of adjustment permitted above for increase periods.

#### FRACTIONAL TERMS

For the purposes of these guidelines any lease or tenancy for a period up to and including one year shall be deemed a one year lease or tenancy, and any lease or tenancy for a period of over one year and up to and including two years shall be deemed a two-year lease or tenancy.

#### ESCALATOR CLAUSES

Where a lease for a dwelling unit in effect on May 31, 1968 or where a lease in effect on June 30, 1974 for a dwelling unit which became subject to the Rent Stabilization Law of 1969, by virtue of the Emergency Tenant Protection Act of 1974 and Resolution Number 276 of the New York City Council, contained an escalator clause for the increased costs of operation and such clause is still in effect, the lawful rent on September 30, 2009 over which the fair rent under this Order is computed shall include the increased rental, if any, due under such clause except those charges which accrued within one year of the commencement of the renewal lease. Moreover, where a lease contained an escalator clause that the owner may validly renew under the Code, unless the

Marvin Markus Chair New York City Rent Guidelines Board

**EXPLANATORY STATEMENT - APARTMENT ORDER #41** Explanatory Statement and Findings of the Rent Guidelines Board In Relation to 2009-10 Lease Increase Allowances for Apartments and Lofts under the Jurisdiction of the Rent Stabilization Law<sup>1</sup>

Summary of Order No. 41

The Rent Guidelines Board (RGB) by Order No. 41 has set the following maximum rent increases for leases subject to renewal on or after October 1, 2009 and on or before September 30, 2010 for apartments under its jurisdiction:

Where heat **is** provided or required to be provided to a dwelling unit by an owner from a central or individual system **at no charge** to the tenant, the adjustments are as follows:

For a  $\mathbf{one}\xspace$  year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010:

For a two-year renewal lease commencing on or after October 1, 2009 and on or before September 30, 2010: 6%

Provided, however, that where the most recent vacancy lease was executed **six** years or more prior to the date of the renewal lease under this Order, the following shall instead apply:

1 This Explanatory Statement explains the actions taken by the Board members on individual points and reflects the general views of those voting in the majority. It is not meant to summarize all the viewpoints

# THE FOLLOWING OUTLINES EXAMPLES OF HOW THE GUIDELINE ADJUSTMENTS WOULD BE CALCULATED UNDER DIFFERENT LENGTHS OF **TENANCIES:**

Example 1: A tenant signed a vacancy lease on October 1, 2002. As of September 30, 2009, he is paying \$650 per month. He decides to sign a one-year lease renewal commencing on October 1, 2009. The adjustment in his rent is 3.0% or \$30, whichever is greater. (Since he has lived in the apartment for seven years, his lease renewal is subject to the \$30 minimum increase for tenants in place for six or more years.) A 3.0% increase in rent of \$650 is \$19.50, which is less than \$30. Therefore, his rent increases the full \$30, to \$680.

Example 2: A tenant signed a vacancy lease on August 1, 1998. As of July 31, 2010, she is paying \$1,250 per month. She decides to sign a one-year lease renewal commencing on August 1, 2010. The adjustment in her rent is 3.0% or \$30, whichever is greater. (Since she has lived in the apartment for twelve years, her lease renewal is subject to the \$30 minimum increase for tenants in place for six or more years.) However, a 3.0% increase in rent of \$1,250 is \$37.50, which is greater than \$30. Therefore, her rent increases \$37.50, to \$1,287.50.

Example 3: A tenant signed a vacancy lease on January 1, 2005. As of December 31, 2009, he is paying \$550 per month. He decides to sign a one-year lease renewal commencing on January 1, 2010. The adjustment in his rent is 3.0%. (Since

Example 4: A tenant signed a vacancy lease on March 1, 1996. On March 1, 2004, the tenant's son succeeded his mother in the apartment. As of February 28, 2010, he is paying \$775 per month. He decides to sign a two-year lease renewal commencing on March 1, 2010. The adjustment in his rent is 6% or \$60, whichever is greater. (Since a vacancy lease was last signed fourteen years earlier, the tenant is subject to the minimum \$60 increase.) A 6% increase in rent of \$775 is \$46.50, which is less than \$60. Therefore, his rent increases the full \$60, to \$835.

#### Background of Order No. 41

The Rent Guidelines Board is mandated by the Rent Stabilization Law of 1969 (Section 26-510(b) of the NYC Administrative Code) to establish annual guidelines for rent adjustments for housing accommodations subject to that law and to the Emergency Tenant Protection Act of 1974. In order to establish guidelines the Board must consider, among other things:

- (1)the economic condition of the residential real estate industry in the affected area including such factors as the prevailing and projected (i) real estate taxes and sewer and water rates, (ii) gross operating and maintenance costs (including insurance rates, governmental fees, cost of fuel and labor costs), (iii) costs and availability of financing (including effective rates of interest), (iv) overall supply of housing accommodations and overall vacancy rates;
- relevant data from the current and projected cost of (2)living indices for the affected area;
- (3)such other data as may be made available to it.

The Board gathered information on the above topics by means of public meetings and hearings, written submissions by the public, and written reports and memoranda prepared by the Board's staff. The Board calculates rent increase allowances on the basis of cost increases experienced in the past year, its forecasts of cost increases over the next year, its determination of the relevant operating and maintenance cost-to-rent ratio, and other relevant information concerning the state of the residential real estate industry.

#### Material Considered by the Board

Order No. 41 was issued by the Board following **two** public hearings, **seven** public meetings, its review of written submissions provided by the public, and a review of research and memoranda prepared by the Board's staff. A total of approximately **130** written submissions were received at the Board's offices from many individuals and organizations including public officials, owners and owner groups, and tenants and tenant groups. The Board members were provided with copies of public comments received by the June 17, 2009 deadline. All of the above listed documents were available for public inspection.

Open meetings of the Board were held following public notice on March 24, April 7, April 21, April 30, and June 4, 2009. On **May 5, 2009**, the Board adopted proposed rent guidelines for apartments, lofts, and hotels.

Public hearings were held on June 15, 2009 and June 17, **2009** pursuant to Section 1043 of the New York City Charter and Section 26-510(h) of the New York City Administrative Code. Testimony on the proposed rent adjustments for rent-stabilized apartments and lofts was heard from 4:00 p.m. to 8:30 p.m. on June 15, 2009 and from 10:00 a.m. to 8:30 p.m. on June 17, 2009. Testimony from members of the public speaking at these hearings was added to the public record. The Board heard testimony from **approximately 86** apartment tenants and tenant representatives, 48 apartment conners and conner representatives, and 6 public officials. In addition, 4 speakers read into the record written testimony from various public officials. On **June 23**, **2009** the guidelines set forth in Order No. 41 were adopted.

A written transcription and/or audio recording was made of all proceedings.

# PRESENTATIONS BY RGB STAFF AND HOUSING EXPERTS INVITED BY MEMBERS OF THE BOARD

Each year the staff of the New York City Rent Guidelines Board is asked to prepare numerous reports containing various facts and figures relating to conditions within the residential real estate industry. The Board's analysis is supplemented by testimony from industry and tenant representatives, housing experts, and by various articles and reports gathered from professional publications.

Listed below are the other experts invited and the dates of

SELECTED EXCERPTS FROM ORAL AND WRITTEN TESTIMONY FROM TENANTS AND TENANT GROUPS<sup>2</sup>

Comments from tenants and tenant groups included:

"This year, rent stabilized tenants deserve to have their rents frozen at the current levels as they struggle to get through these difficult economic times. The numbers are on our side: According to the "2009 Income and Expense Report" released by the RGB in April, 'revenues have outpaced expenses to the extent that average monthly net operating income was worth 17.2% more in 2007 than it was in 1990, after adjusting for inflation.' In 2007, the average net income per month for a landlord on a rent stabilized unit was over \$400. In a small building with 6 units, that's nearly \$30,000 in profit annually after operating expenses. Keep in mind that profit margin reflects a year when fuel costs hit an all time high. Fuel costs have since decreased 10%, meaning that profits on rent stabilized apartments are larger now than they were two years ago. Landlords are doing better than at any other time in recent history. I urge you to support a rent freeze.

"I just want you to know how badly the decision to increase rent stabilized buildings by 4.5% this year has hurt the people of this city myself included. I didn't get a pay increase this year (even if I had it certainly wouldn't have been 4.5%) and now I have to figure out a way to pay an extra \$63.00 per month starting in September. This large rent increase comes along with an increase in my health costs and my transit costs. The only thing that hasn't increased, like I said, is my pay. I realize that you thought raising the rents this high was fair due to costs in heating fuel but now those costs have gone down and yet I am still stuck paying a substantial increase."

"Landlords profits are rising while working class people are suffering job losses and pay cuts. Heating cost are down and landlords' profits rise higher and we know landlords are in the business of profit. That's fine but RGB needs to recognize after a high rent increase last year and costs down for landlords it is time to freeze rents for a period so the working class can recover. The city is strapped for cash and we, the middle/working class, will be paying more for everything, as I'm sure you've seen in the news. You must see the situation is dire for us and you can help...Freeze rents at the current level so that working and middle-class New Yorkers – the engines of our economy - can remain in the communities and homes.

While tenants struggle to find and maintain affordable housing and at the same time pay for other necessities, landlords continue to realize increased profits as rent income is exceeding costs by a great amount. Low-income tenants in rent stabilized apartments have had to shoulder the greatest burden of declining affordability in the New York City rental market, while the rental burden on moderate-income tenants is worsening. The Rent Guidelines Board must finally live up to its responsibility by not allowing the situation facing lowand moderate-income tenants to worsen by unnecessarily raising rents for rent stabilized apartments

'Most recently, in our neighborhoods, we have seen a new type of investment in rent stabilized and subsidized housing. Private equity firms are buying up rent stabilized buildings. They are promising their investors returns that are above what the present rent role can produce. They have classified people's homes as 'under-performing assets.' At begrudgingly agreed upon meetings with tenants, they have said that they will do what it takes to make a profit. Their prospectuses boast 20-30% per year turnover, substantially more than the normal turnover rate of 5-10% per year for rent stabilized units.

'New York City is already largely unaffordable for many public servants. Increasing rent on stabilized apartments will force even more out of their homes. Beyond the direct impact of increasing rent on those in stabilized apartments, I would ask you to consider the implications of a rent hike on the larger health and well-being of New York City. I, for one, wonder what this city will look and feel like, and how well it will function, if only those on the extreme ends of the financial spectrum remain.'

#### SELECTED EXCERPTS FROM ORAL AND WRITTEN TESTIMONY FROM OWNERS AND OWNER GROUPS<sup>3</sup>

Comments from owners and owner groups included:

"The Rent Stabilization Law states in section 26-501, in its declaration of emergency related to rental housing t purpose of this law is 'to prevent ... unwarranted and abnormal increase in rents.' Each year, the RGB issues an allowable increase factor in pursuit of this purpose. But the law only speaks about preventing unwarranted and abnormal increase. Since the board makes an annual determination of costs increases (the PIOC), and since these determinations are based on actual economic data, independently provided, it is therefore necessarily the case that the PIOC is not unwarranted or abnormal. In fact it is just the opposite: it is both expected because it reflects actual financial events which have already occurred, and normal since it is a reflection of data independently provided which demonstrates broadly applicable economic conditions." "Not since the last economic collapse in the 1970's and 80's have so many owners called the RSA in an act of desperation, at their wits end, seeking guidance or assistance which is simply unavailable. After years of inadequate guideline increases, owners simply can not make ends meet. Owners can't pay their water and sewer bills and are threatened with lien sales. Extraordinary increases in real estate taxes have far outstripped increase in building income. Owners enter the summer months owing thousands of dollars for the past winter's oil bills. And owners certainly don't have the reserves they need if the oil burner breaks down or some other major repair is required."

set of requirements. These changes may make the shortfalls even more pronounced. I urge the Rent Guidelines Board to authorize rent increases attuned to the costs of operating property in New York City today.<sup>3</sup>

"As a small building owner, I am burdened with massive increases on all fronts. The DEP brutally imposed a giant increase on water and sewer bills. NYC increased its property taxes. Insurance companies continue to raise premiums while demanding endless improvements. Oil prices are on the rise again. Workers compensation and health care continue to grow, driving up the cost of labor. And the cost of supplies is constantly increasing. Tenants need to understand that rents must increase so home-owners can provide affordable, quality housing...It is necessary to extend the supplement formula for rentals under \$1000 once more to help home-owners stay afloat under the endless barrage of increases facing us. At minimum, one-year lease renewals should be increased 7.5%with a \$65 supplement, and two-year lease terms should increase by 10% with a \$99 supplement.

"Low guidelines yield minimal increases on low rents—and low rents don't pay for the apartment's basic operating costs. Often, the occupants of low rent apartments aren't in need of the owner's subsidy. I know of many cases where tenants own second homes and earn more than the property owner, resulting in middle-class owners subsidizing rich tenants. In many more cases, middle-class tenants, who wouldn't qualify for any government program, are being subsidized by middleclass owners.

"This past year has seen double digit increases of water-sewer rates and real estate taxes. If the city is allowed to get such large increases why couldn't we, the owners, be allowed similar increases, after all it is us who support a significant portion of the city's budget while at the same time doing the ity's job and subsidize the housing in the city. This past year I had two of my properties fall into foreclosure, and if not for the lower fuel cost I would have lost two more. If we are not going to get an increase that will allow us to operate I am afraid that we will see more buildings falling into foreclosure and the tenants of such buildings suffer needlessly."

#### SELECTED EXCERPTS FROM ORAL AND WRITTEN **TESTIMONY FROM PUBLIC OFFICIALS**<sup>4</sup>

#### Comments from public officials included:

"There is ample evidence that tenants are finding it increasingly difficult to make ends meet while building owners' operating costs, and therefore their profits, have remained steady. To place a higher burden on tenants to the benefit of owners at this time would be completely unjustified and highly misguided. New York City, like the rest of the nation, is experiencing its worst economic crisis since the Great Depression. Unemployment in the City has reached record levels, many individuals have been downsized or had salary freezes, and the number of food stamp recipients is on the rise. Both low- and middle-income residents continue to pay a disproportionately large share of their income toward housing and struggle to absorb the rapidly increasing costs of utilities, transportation and other necessities

"I'd like to now take a moment to directly address the proposed supplemental rent increase, or the "poor tax" as it's more aptly known. This is a terrible idea. There are some that came before this Board at its most recent hearing two days ago and argued that the poor tax – which was shamefully levied last year at the last possible moment and without any semblance of a reasonable time period for analysis and consideration by Board members - should be once again implemented this year in order to catch those two year lease holders who were mid-cycle in their leases last year. Setting aside the legal questions surrounding the Board's introduction of the poor tax last year, it is clear to me that this punitive tax must not be allowed to pass again this vear.

"Year after year, the Rent Guidelines Board has determined in favor of landlords, granting them higher and higher rents on stabilized apartments. It seems that every year landlords are afforded increases to offset their rising costs, and every year, the ability of tenants to afford their homes and the robust and increasing profits of landlords are ignored. Tenants are facing serious hardships as our country endures the worst economic downturn since the Great Depression

"At a time when my constituents are losing their jobs, income is falling, the cost of food is exorbitant, and the rest of the economy is struggling, the Rent Guidelines Board must stop acting to guarantee substantial profits to the wealthy housing industry. By increasing rents, you are violating your public trust and contributing significantly to the loss of affordable housing—the very commodity you are supposed to help stabilize."

"Like many New Yorkers, I am deeply troubled by the decreasing stock of affordable housing for low- and middle income residents of our city. Over the past few years, the City has seen market rents skyrocket, particularly in Manhattan. Rent stabilized apartments are one of the few affordable housing options available to low- and middle-income New Yorkers. The rent increases on these apartments proposed by the RGB would be devastating to many New York City families, particularly in the midst of this economic crisis. Therefore, I am urging members of the Rent Guidelines Board to support a rent freeze for this year. Granted, this would be the first such vote by the RGB but the current reality calls for such a bold vote.'

"Rents should reasonably cover the cost of operating a unit, plus allow for a margin of profit for the owner of a rental property. In the case of cooperatives and condominiums owning rent regulated units, growing shortfalls between rent collected and actual costs impose a hardship on all the other resident owners in the building. In 2009 taxes are increasing again and so are water rates. The City has introduced new mandates for energy efficiency, an admirable but expensive

"Every week my office receives dozens of calls from tenants who are unable to find affordable housing, who cannot afford to live in the places they have called home for so long, and who are alarmed by the scarcity of affordable housing in this city. There is a clear connection between RGB increases and the loss of affordable housing, which is in turn playing havoc on the lives of our City's residents. And so, I join with tenants once again this year to urge the RGB to protect, not erode, the diminishing stock of affordable housing in New York City."

#### FINDINGS OF THE RENT GUIDELINES BOARD

#### **RENT GUIDELINES BOARD RESEARCH**

The Rent Guidelines Board based its determination on its consideration of the oral and written testimony noted above, as well as upon its consideration of statistical information prepared by the RGB staff set forth in these findings and the following reports:

2009 Mortgage Survey Report, March 2009, (An evaluation of recent underwriting practices, financial availability and terms, and lending criteria);

- (2) 2009 Income and Expense Study, April 2009, (Based on income and expense data provided by the Finance Department, the Income and Expense Study measures rents, operating costs and net operating income in rent stabilized buildings);
- (3) 2009 Income and Affordability Study, April 2009, (Includes employment trends, housing court actions, changes in eligibility requirements and public benefit levels in New York City);
- (4) 2009 Price Index of Operating Costs for Rent Stabilized Apartment Houses in New York City, April 2009, (Measures the price change for a market basket of goods and services which are used in the operation and maintenance of stabilized buildings);
- (5) 2009 Housing Supply Report, June 2009, (Includes new housing construction measured by certificates of occupancy in new buildings and units authorized by new building permits, tax abatement and exemption programs, and cooperative and condominium conversion and construction activities in New York City); and,
- (6) Changes to the Rent Stabilized Housing Stock in NYC in 2008, June 2009, (A report quantifying all the events that lead to additions to and subtractions from the rent stabilized housing stock).

The six reports listed above may be found in their entirety on the RGB's website, www.housingnyc.com, and are also available at the RGB offices, 51 Chambers St., Suite 202, New York, NY upon request.

#### 2009 PRICE INDEX OF OPERATING COSTS FOR RENT STABILIZED APARTMENT HOUSES IN NEW YORK CITY

The 2009 Price Index of Operating Costs For Rent Stabilized Apartment Houses in New York City found a 4.0% increase in costs for the period between April 2008 and April 2009.

This year, the PIOC for rent stabilized apartment buildings increased by 4.0%, nearly 4 percentage points less than the PIOC percentage change from the year before (7.8% in 2008). The PIOC was driven upward by significant increases in real estate taxes (11.7%) and utility (10.9%) costs. More moderate increases were seen in administrative costs (4.1%), labor (2.9%), contractor services (2.8%), parts and supplies (2.6%) and replacement costs (6.1%). These increases were offset by declines in the cost of fuel oil of 10.1% and insurance of 2.9%. The growth in the Consumer Price Index (CPI) of 3.5% was just half a percentage point lower than the PIOC. The "core" PIOC, which excludes erratic changes in fuel oil, natural gas and electricity costs, is useful for analyzing long-term inflationary trends. The core PIOC rose by 6.5% this year, higher than the overall PIOC due to the exclusion of declining fuel oil prices.

#### Question 3: Why did taxes decline by more than 31% in Brooklyn's Community District 16 (Ocean Hill/Brownsville)?

Taxes increase (or decrease) based a number of factors the tax rate, abatements and exemptions, and the assessed value of buildings. In Ocean Hill/Brownsville, the impact of lowered assessments alone between FY 2008 and FY 2009 caused taxes to decline by 12.8%, as opposed to a 4.75% increase for the City as a whole. The other large factor impacting taxes in this Community District is the disproportionally high number of buildings with exemptions. While Citywide, 18.6% of buildings received exemptions, in Ocean Hill/Brownsville 41.2% of buildings received exemptions. Buildings can also experience large decreases in tax bills in the year that they first receive an exemption. In Ocean Hill/Brownsville, there were twelve new exemptions in FY 2009 that reduced building's tax liability to zero, including one that reduced an owner's bill from what would have been more than \$400,000 to zero (the other bills ranged from \$8,854 to \$16,370 in FY 2008). In addition, this building's assessed value was more than halved between the two years - falling from \$7.7 million to \$3.5 million. Had this one building's assessed value remained constant between FY 2008 and FY 2009, and had it not received an exemption in FY 2009, taxes would have risen 6.9% in FY 2009 for the Community District as a whole. Using the building's new assessed value to calculate a hypothetical tax bill, had this building not received an exemption in FY 2009 (but the assessment remained at the lower value), taxes as a whole would have fallen 14.1% instead of 31.2%. Had none of these twelve buildings received exemptions in FY 2009, and using their current assessed values to calculate tax liability, taxes would have fallen 8.2%

In total, the impact of assessments in Ocean Hill/ Brownsville lowered tax liability by 12.8%, exemptions lowered tax liability by 24.2%, and "interactions" lowered tax liability by 2.1%. Increases in the tax rate raised taxes by 7.1% and a change in the number and value of abatements raised tax liability by 0.7% (for a total decrease of 31.2%). See Appendix 5 of the *Price Index of Operating Costs* for equivalent data for each borough of the City.

Note that in every neighborhood, in every year, buildings gain and lose exemptions, drastically altering individual tax bills. It is only when looking at a relatively small number of buildings (274 buildings in the total Community District sample) that a single building's impact can become magnified, as illustrated here.

Similarly, we can look for converse trends in a Community District that saw a disproportionately large increase in property taxes, such as Community District 1 in Manhattan (Civic Center, Wall St., Governors Isl., Liberty Isl., Ellis Isl., Tribeca), which rose 22.8%. In this Community District, despite a decrease in assessments that led to a decline in tax liability of 30.0%, the loss in the value of exemptions was so great that it lead to an increase in tax liability of 46.3%, which along with an increase in the tax rate far offset the decline in assessments. Had even four of the larger buildings in this Community District maintained the same value of exemptions between FY 2008 and FY 2009, taxes District-wide would have increased 8.6% instead of 22.8%.

# Question 4: Can you determine the fuel oil grades used by different sized buildings?

The RGB staff could not locate specific data regarding usage of #2, #4 and #6 fuel grades by building size. However we did confirm the following:

•

- The Department of Environmental Protection (DEP) Code does not allow use of #4 or #6 oil if the maximum burner-firing rate is less than 10 GPH (gallon per hour). This firing rate is used in buildings that have 20-25 units. Anything smaller would have to burn #2 oil or gas.
- If a building burns between 10-20 GPH it can burn #2, #4 or gas, but not #6 oil.
- Buildings that have interruptible gas, a heating system that can burn both gas and oil, are almost always matched with #2 heating oil.
- In general the larger the building the heavier the oil one is likely to find being used.

#### LOCAL LAW 63/ INCOME & EXPENSE REVIEW

The sample size for the Income and Expense (I&E) study includes over 13,200 properties containing over 620,700 units. This is the seventeenth year that staff has been able to obtain longitudinal data in addition to cross-sectional data. The RGB staff found the following average monthly (per unit) operating and maintenance (O&M) costs in 2008 Real Property Income and Expense (RPIE) statements for the year 2007:

All Items	Replacement Costs	Parts & Supplies	Insurance Costs	Costs	Administrative	Services	Contractor	Jtility Costs	Fuel Costs	Labor Costs	laxes	Item	2008-09 <i>Operating C</i>	
All Items	Replaceme		Insurance	Costs	Administr	Services	Contracto	Utility (	Fuel Cost	Labor Cos	Taxes	I	đo	

Source: 2009 Price Index of Operating Costs for Rent Stabilized Apartment Houses in New York City. Note: The  $\triangle$  symbol means change.

 $\frac{5}{5}$  Totals may not add due to weighting and rounding.

On April 28, 2009 the staff of the Rent Guidelines Board released a memo to Board members with additional information concerning the 2009 Price Index of Operating Costs. The text of that memo follows:

At the April 21 meeting of the board, staff presented the 2009 Price Index of Operating Costs (PIOC). Contained in this memo are follow-up questions regarding the PIOC and the answers to these inquiries.

Question 1: Can Appendix 6 also provide average building sizes and names of Community Districts?

<u>10141</u>	0,000	0.00%	
Total	5,836	9.86%	35.5
14 (The Rockaways, Broad Channel)	85	14.41%	66.7
Village, Glen Oaks)	44	11.60%	123.7

	# of Buildings	Tax Relative	Average Building Size
Staten Island			
1 (North Island)	106	6.05%	44.0
2 (Mid Island)	27	-2.93%	24.9
3 (South Island)	23	15.41%	66.4
Total	157	7.27%	44.4

	# of Buildings	Tax Relative	Average Building Size
Citywide	34,122	11.72%	31.1

# Question 2: Can you break out tax increases by building size?

Tax increases in Fiscal Year 2009 are presented below, grouped according to the size of the building – 10 units and under, 11-19 units, 20-49 units, and 50 or more units.

Building Size	Tax Increase, FY 2009
10 Units or Less	11.5%
11-19 Units	15.1%
20-49 Units	13.2%
50 or More Units	10.9%
Citywide	11.7%

#### Table 2

#### 2009 Income and Expense Study Average Monthly Operating and Maintenance Costs Per Unit

	Pre '47	Post '46	All Stabilized
Total	\$710	\$803	\$738

Source: 2009 Income and Expense Study, from 2008 Real Property Income and Expense filings for 2007, NYC Department of Finance.

In 1992, the Board benefited from the results of audits conducted on a stratified sample of 46 rent stabilized buildings by the Department of Finance. Audited income and expense (I&E) figures were compared to statements filed by owners. On average the audits showed an 8% over reporting of expenses. The categories, which accounted for nearly all of the expense over reporting, were maintenance, administration, and "miscellaneous." The largest overreporting was in miscellaneous expenses.

If we assume that an audit of this year's I&E data would yield similar findings to the 1992 audit, one would expect the average O&M cost for stabilized buildings to be \$678, rather than \$738. As a result, the following relationship between operating costs and residential rental income was suggested by the Local Law 63 data:

Table 3

that it does not consider the erosion of landlords'  $\leftarrow$  ome by inflation. By maintaining current dollar NOI at a constant level, adherence to the formula may cause profitability to decline over time. However, such degradation is not an inevitable consequence of using the "traditional" commensurate formula.<sup>9</sup>

All of these methods have their limitations. The "traditional" commensurate formula is artificial and does not consider the impact of lease terms or inflation on landlords' income. The "Net Revenue" formula does not attempt to adjust NOI based on changes in interest rates or deflation of landlord profits. The "CPI-Adjusted NOI" formula inflates the debt service portion of NOI, even though interest rates have been generally falling, rather than rising, over recent years. Including a consideration of the amount of income owners receive on vacancy assumes that turnover rates are constant across the City.

Finally, it is important to note that only the "traditional" commensurate formula uses the PIOC projection and that this projection is not used in conjunction with or as part of the "Net Revenue" and "CPI-Adjusted NOI" formulas. As stated previously, all three formulas attempt to compensate owners for the adjustment in their operating and maintenance costs measured each year in the PIOC. The "Net Revenue" and the "CPI-Adjusted NOI" formulas attempt to compensate owners for the adjustment in O&M costs by using only the known PIOC change in costs (4.0%). The traditional method differs from the other formulas in that it uses both the PIOC's actual change in costs as well as the projected change in costs (2.2%). If the change in projected costs, which may not be an accurate estimate of owner's costs, is added to the "Net Revenue" and "CPI-Adjusted NOI" formulas, the resulting guidelines will likely over- or undercompensate for the change in costs.

Each of these formulae may be best thought of as a starting point for deliberations. The other Rent Guidelines Board annual research reports (e.g. the *Mortgage Survey Report* and the *Income and Expense Study*) and testimony to the Board can be used to modify the various estimates depending on these other considerations.

Consideration of Other Factors

Before determining the guideline, the Board considered other factors affecting the rent stabilized housing stock and the economics of rental housing.

- <sup>7</sup> The following assumptions were used in the computation of the commensurates: (1) the required change in landlord revenue is 67.9% of the 2009 PIOC increase of 4.0%, or 2.7%. The 67.9% figure is the most recent ratio of average operating costs to average income in stabilized buildings; (2) for the "CPI-Adjusted NOI" commensurate, the increase in revenue due to the impact of inflation on NOI is 32.1% times the latest 12-month increase in the CPI ending February 2009 (3.5%) or 1.1%; (3) these lease terms are only illustrative—other combinations of one- and two-year guidelines could produce the adjustment in revenue; (4) assumptions regarding lease renewals and turnover were derived from the 2008 Housing and Vacancy Survey; (5) for the commensurate formulae, including a vacancy sasumption, the 11.13% median increase in vacancy lease found in the rent stabilized apartments that reported a vacancy lease in the 2008 apartment registration file from the Division of Housing and Community Renewal was used; and (6) the collectability of these commensurate adjustments are assumed.
  <sup>8</sup> The collectability of legally authorized adjustments in assumed.
- <sup>8</sup> The collectability of legally authorized adjustments is assumed. Calculating the "traditional" commensurate rent adjustment requires an assumption about next year's PIOC. In this case, the 2.2% PIOC projection for 2010 is used.
- <sup>9</sup> Whether profits will actually decline depends on the level of inflation, the composition of NOI (i.e. how much is debt service and how much is profit), and changes in tax law and interest rates.

#### **EFFECTIVE RATES OF INTEREST**

The Board took into account current mortgage interest rates and the availability of financing and refinancing. It reviewed the staff's 2009 Mortgage Survey Report of lending institutions. Table 4 gives the reported rate and points for the past nine years as reported by the mortgage survey.

#### Table 4

Post'46					

Table 2(a)

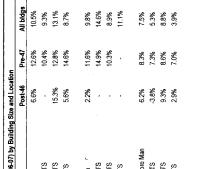

Source: 2009 Income and Expense Study, from 2008 Real Property Income and Expense filings for 2007, NYC Department of Finance.

<sup>6</sup> Overall O&M expenses were adjusted according to the findings of an income and expenses audit conducted by the Department of Finance in 1992. The unadjusted O&M to Rent ratios would be 0.758 (All), 0.768 (Pre-47), and 0.738 (Post-46), respectively. The unadjusted O&M to Income ratios would be 0.679 (All), 0.684 (Pre-47), and 0.669 (Post-46).

#### On April 28, 2009 the staff of the Rent Guidelines Board released a memo to Board members with additional *Income and Expense Study* information. The text of that memo follows:

This memo is in response to two questions posed by board members regarding the 2009 Income and Expense Study released on April 21, 2009. The first question dealt with whether the RPIE uses a cash or accrual basis for calculating owner income. The Department of Finance, which collects the data, told us that the information is reported on a cash basis.

The second question was a request for median Net Operating Income data, which is provided below:

	Price Index Proj	Projected Price Index
	2008-09	2009-10
Taxes	11.7%	15.2%
Labor Costs	2.9%	4.18
Fuel Costs	-10.18	-24.5%
Utility Costs	10.9%	0.8%
Contractor Services	2.8%	4.3%
Administrative Costs	4.1%	5.4%
Insurance Costs	-2.9%	6.1%
Parts & Supplies	2.6%	1.8%
Replacement Costs	6.1%	1.8%
Total (Weighted)	4.0%	2.2%

Source: 2009 Price Index of Operating Costs for Rent Stabilized Apartment Houses in New York City, which includes the 2010 PIOC Projection.

Overall, the PIOC is expected to grow by 2.2% from 2009 to 2010. Fuel, the most volatile PIOC component, is expected to decline 24.5%. Conversely, Taxes are projected to increase 15.2% due to an increase in billable assessments, levy share and the tax rate for Class Two properties. Insurance Costs and Utilities are projected to rise 6.1% and 0.8% respectively. Contractor Services are expected to rise 4.3%, Administrative Costs 5.4%, and Labor Costs are projected to increase by 4.1%. The table on this page shows predicted changes in PIOC components for 2010. The core PIOC is projected to rise 9.1%, a significantly higher rate than the overall PIOC.

#### COMMENSURATE RENT ADJUSTMENT

Throughout its history, the Rent Guidelines Board has used a formula, known as the commensurate rent adjustment, to help determine annual rent guidelines for rent stabilized apartments. In essence, the "commensurate" combines various data concerning operating costs, revenues, and inflation into a single measure indicating how much rents would have to change for net operating income (NOI) in stabilized buildings to remain constant. The different types of "commensurate" adjustments described below are primarily meant to provide a foundation for discussion concerning prospective guidelines.

In its simplest form, the commensurate rent adjustment is the amount of rent change needed to maintain landlords' current dollar NOI at a constant level. In other words, the formula provides a set of one- and two-year renewal rent increases or guidelines that will compensate owners for the change in prices measured by the PIOC and keep net operating income "whole."

The first commensurate method is called the "Net Revenue" approach. While this formula takes into consideration the types of leases actually signed by tenants, it does not adjust landlords' NOI for inflation. The "Net Revenue" formula is presented in two ways, first adjusting for the mix of lease terms and second, adding an assumption for stabilized apartment turnover and the impact of revenue from vacancy increases. Under the "Net Revenue" formula, a guideline that would preserve NOI in the face of this year's 4.0% increase in the PIOC is 3.5% for a one-year lease and 5.5% for a two-year lease. Guidelines using this formula and adding assumptions for the impact of vacancy increases on revenues when apartments experience turnover are 1.75% for one-year leases and 2.5% for two-year leases.

#### FORECASTS OF OPERATING AND MAINTENANCE PRICE INCREASES FOR 2009-10

In order to decide upon the allowable rent increases for twoyear leases, the RGB considers price changes for operating costs likely to occur over the next year. In making its forecasts the Board relies on expert assessments of likely price trends for the individual components, the history of changes in prices for the individual components and general economic trends. The Board's projections for 2009-10 are set forth in Table 3, which shows the Board's forecasts for price increases for the various categories of operating and maintenance costs. The second commensurate method considers the mix of lease terms while adjusting NOI upward to reflect general inflation, keeping both operating and maintenance (O&M) and NOI constant. This is commonly called the "CPI-Adjusted NOI" formula. A guideline that would preserve NOI in the face of the 3.5% increase in the Consumer Price Index and the 4.0% increase in the PIOC is 5.0% for a one-year lease and 8.0% for a two-year lease. Guidelines using this formula and adding the estimated impact of vacancy increases are 3.25% for one-year leases and 5.0% for two-year leases.<sup>7</sup>

The original formula that has been in use since the inception of the Rent Guidelines Board is called the "traditional" commensurate adjustment. The "traditional" commensurate yields 2.7% for a one-year lease and 3.5% for a two-year lease, given the increase in operating costs of 4.0% found in the 2009 PIOC and the projection of a 2.2% increase next year.<sup>8</sup>

As a means of compensating for cost changes, this "traditional" commensurate rent adjustment has two major flaws. First, although the formula is supposed to keep landlords' current dollar income constant, the formula does not consider the mix of one- and two-year lease renewals. Since only about three-fifths of leases are renewed in any given year, with a preponderance of leases having a two-year duration, the formula does not necessarily accurately estimate the amount of income needed to compensate landlords for O&M cost changes.

A second flaw of the "traditional" commensurate formula is

Source: 2001-2009 Annual Mortgage Surveys, RGB.

#### THURSDAY, JULY 16, 2009

10 Institutions were asked to provide information on their "typical" loan to rent stabilized buildings. Data for each variable in any particular year and from year to year may be based upon responses from a different number of institutions.

On April 2, 2009 the staff of the Rent Guidelines Board released a memo to Board members with additional *Mortgage Survey* information. The text of that memo follows:

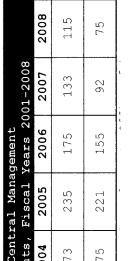

This memo is in response to questions posed by board members at the March 26 meeting concerning the 2009 Mortgage Survey Report.

- Ronald Languedoc asked about the total number of residential units contained in rent stabilized buildings sold. In 2007, there were 42,567 residential units in 1,474 building sold, while in 2008, there were 29,232 units in 1,021 buildings sold.
- Risa Levine inquired about the breakdown of buildings sold in each half of 2008. Of the 1,021 buildings sold in 2008, 674 (65.9%), at a median price of \$2,262,500 were sold in the first six months, while 349 (34.1%), at a median price of \$1,522,535 were sold in the second half of 2008. The price decline from the first to the second half was 32.7%, and the sales volume decline was 48.2%.
- 3. Marvin Markus suggested contacting large lenders and asking if they could speak to the board at a future meeting. Andrew is in the process of contacting them.
- 4. Steven Schleider asked whether the 86% of lenders who reported that their lending standards were the same for rent stabilized buildings as for nonstabilized multifamily properties included the lenders making the largest number of loans. Of the four lenders making the largest share of new loans (81.6% of the total) and one additional lender making the largest number of refinanced loans:
  - a. Three reported the same lending standards for all four categories (New financing rates; refinancing rates; LTV Ratio and debt service)
  - b. One lender reported the same standards for new and refinancing rates; a higher standard for LTV ratio and a lower standard for debt service.
  - c. One lender reported higher standards for new and refinancing rates as well as debt service coverage, but a lower standard for LTV Ratio.

#### CONDITION OF THE RENT STABILIZED HOUSING STOCK

The Board reviewed the number of buildings owned by the City following *in rem* actions and the number of units that are moving out of the rental market due to cooperative and condominium conversion.

#### On June 12, 2009 the staff of the Rent Guidelines Board released a memo to Board members with additional Housing Supply Data information. The text of that memo follows:

At the June 4 meeting, where the 2009 Housing Supply Report and Changes to the Rent Stabilized Housing Stock in NYC in 2008 were presented, five questions were asked of RBG staff for which answers were not immediately available. Detailed answers are provided in this memo.

#### Question 1: What is the breakdown of owner-occupied housing by borough? The table below breaks out, by borough, the number of

The table below breaks out, by borough, the number of "conventional" owner-occupied units, co-op units, and condo units found in the 2008 Housing and Vacancy Survey. The two right-most columns present the proportion of housing in each borough that is either "conventional" or co-op/condo.

	Owner	Owner	Owner	%	%
Borough	(Conventional)	(Co-op)	(Condo)	Conventional	Co-op/Condo
Bronx	63,691	35,737	7,271	59.7%	40.3%
Brooklyn	191,512	49,937	14,180	74.9%	25.1%
Manhattan	5,157	137,215	40,452	2.8%	97.2%
Queens	264,200	83,155	14,856	72.9%	27.1%
Staten Island	101,018	2,264	8,719	90.2%	9.8%
Citywide	625,579	308,308	85,478	61.4%	38.6%

#### income limits that apply to the "affordable" (5.)ponent of the program?

The most significant change to the 421-a program is an extension of the Geographic Exclusion area (previously approximately 14th to 96th Streets in Manhattan and Greenpoint/Williamsburg in Brooklyn) to include all of Manhattan (except Roosevelt Island), and multiple neighborhoods in every borough, including portions of Crotona Park in the Bronx, the entire Queens East River waterfront, most of northern Staten Island, and large portions of northern Brooklyn, including Downtown, Cobble Hill, and Park Slope. Any housing built in these neighborhoods that receive 421-a benefits must set aside 20% of units in these buildings for affordable housing.

The new legislation also reduces the length of the exemption period for many buildings. In addition, the legislation stipulates that affordable units within the GEA must be kept affordable for a minimum of 35 years, and residents of the Community Board where the development is located will be guaranteed 50% of the units. The minimum building size was also raised from three units to four units, and only the first \$65,000 of an apartment's value will now be exempt from taxes.

The income levels of apartments built with 421-a depends on whether the building receives "substantial government assistance" as well as the location of the building. Per requirements:

•

.

- If construction is carried out with substantial governmental assistance provided pursuant to a program for the development of affordable housing, at least 20% of the units in the multiple dwelling must meet one of the following requirements:
  - initial and subsequent rentals in multiple dwellings with 25 units or less must be affordable at or below 120% of Area Median Income (AMI) or;
  - initial and subsequent rentals in multiple dwellings with more than 25 units must be affordable at or below 120% of AMI and cannot exceed an average of 90% of AMI or;
  - homeownership units at initial sale must be affordable at or below 125% of AMI.
  - If no substantial governmental assistance is utilized, at least 20% of the units in the multiple dwelling must at initial rental or sale and at all subsequent rentals upon vacancy be affordable at or below 60% of AMI.

As an example of the type of income the above requirements would dictate, the table below illustrates selected Area Median Incomes in 2008 by household size.

Question 2: Can you explain in greater detail the changes to the 421-a program enacted last year and the

30 X	\$1	\$1	\$2	\$2	\$2	\$2	\$2	\$3
Family Size	1	2	3	4	5	6	7	8

Reported by the DHCR in their response to RGB question #5 on June 4, in 2008 the average rent stabilized rent in buildings due to 421-a tax abatement was \$2,654.92; the median rent was \$1,699.50.

For further information, "421-a Legislation Overview and FAQ," by the NYC Dept. of Housing Preservation and Development, is attached for further information.

# Question 3: Can you explain in greater detail the 420-c and 421-g programs?

The section 420-c program, enacted in 1993, provides a 100 percent exemption from real property taxes for qualifying low-income housing located in New York City. Under legislation enacted in 2004, and applicable to exemption applications approved on or after September 28, 2004, the exemption will generally apply to property owned by an entity wholly controlled by a charitable or social welfare organization recognized as exempt under the U. S. Internal Revenue Code, where the property provides housing accommodations to persons and families of low income, participates in or has participated in the federal low-income housing tax credit program, and is subject to a regulatory agreement with the City's Department of Housing Preservation and Development. The exemption terminates upon the expiration or termination of the regulatory agreement. Applications approved prior to September 28, 2004 were subject to different ownership and certain other requirements.

The 421-g program was created as part of the Commercial Revitalization Program, and provides a real property tax exemption on the increase in assessed value due to conversion of non-residential buildings to residential use. The program also provides for an abatement of existing property taxes. To qualify for tax benefits, the building must be in the statutorily defined Lower Manhattan Abatement Zone and a permit for conversion must be issued between July 1, 1995 and June 30, 2006. (The deadline was moved from June 30, 2007 to June 30, 2006 as a result of legislation enacted in 2005.) If, after conversion, more than 12 percent of the building's aggregate floor area consists of commercial, community facility and accessory use space, the exemption and abatement will be reduced by the difference between the percentage of space so used and 12 percent. If more than 25 percent of the aggregate floor space is used for commercial, community facility or accessory use, the exemption and abatement will be revoked. Notwithstanding any other provision of State or local law relating to rent stabilization, the rents of dwelling units in an eligible building are subject to control while the building is receiving a tax exemption and/or abatement. The program provides a tax exemption for 12 years, including the first eight years at 100 percent. In the remaining four years, the exemption percentage declines at a rate of 20 percentage points in each year. The tax abatement granted for the first ten years is equal to the property's taxes in its first year of participation in the program. In years 11 through 14 of the abatement period, the abatement percentage is reduced by 20 percentage points each year. If the property has been designated as a landmark prior to completion of conversion, the exemption and abatement periods are increased by extending the 100 percent exemption period to nine years and the full abatement period to 11 years.

#### Question 4: Can you provide a breakdown of J-51 abatements and exemptions by the type of work being performed?

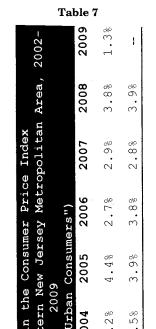

We currently have a request into the New York City Department of Housing Preservation and Development to provide this information. There is no timeline as to when this information will be received.

#### **Question 5: How many properties in New York City** currently have tax arrears?

We currently have a request into the Dept. of Finance to provide this information. We expect to have this information prior to June 23, but no definite timeline has been set. This information will be sent separately to Board members once it is received.

#### **CONSUMER PRICE INDEX**

The Board reviewed the Consumer Price Index. Table 7 shows the percentage change for the NY-Northeastern NJ Metropolitan area since 2002.

proportion of the rent roll which owners spend on operating and maintenance costs. This figure is used to ensure that the rent increases granted by the Board compensate owners for the increases in operating and maintenance expenses. This is commonly referred to as the O&M to rent ratio.

Over the first two decades of rent stabilization, the change in the O&M to rent ratio contained in Table 8 (hereinafter, referred to as "Table 14" - its past designation) was updated each year to reflect the changes in operating costs as measured by the PIOC and changes in rents as measured by staff calculations derived from guideline increases. Over the years, some Board members and other housing experts have challenged the price index methodology and the soundness of the assumptions used in calculating the O&M to rent ratio in "Table 14". Several weaknesses in the table have been acknowledged for some time.

The first problem with "Table 14" is that the calculation does not account for the changes in the housing stock and market factors, both of which have certainly affected the relationship between rents and operating costs to some degree. Next, for the purpose of measuring the relationship between legal regulated rents and operating cost changes, the usefulness of "Table 14" is also limited. The rent index contained in the table does not adjust for administrative rent increases (MCI's and Apartment Improvement increases) and rents charged below established guidelines (preferential).

The operating cost index contained in the table is more troublesome. The .55 base contained in the table reflects an estimate concerning nearly all post-war units. The vast majority of stabilized units (about 7 out of 10) are now in pre-war buildings, which had higher O&M ratios in 1970. The cost index was adjusted (departing from the PIOC) in the 1970's in an attempt to accommodate for this influx of pre-war buildings into the stabilized sector. This attempt was misguided. The rent index reflects changes in rents initially in the next was restor. so adjustments to the cost index to in the post-war sector - so adjustments to the cost index to reflect the influx of pre-war units' results in a one-sided distortion of the changing relationship between costs and

Staff's research suggests that the PIOC may have overstated actual cost increases from 1970 to 1982. Similarly, from 1990 to 2007, the I&E rose 107% and the adjusted PIOC rose 113%. What remains clear, however, is that "Table 14," in its current form, presents a highly misleading picture of the changing relationship of operating costs to rents over time.

- $^{16}$  The 8.00% increase in rent roll estimated for leases signed  $\Xi_{\rm e}$  ring the period 10/1/08-9/30/09 under Order 40 reflects the following: (1) Renewal guidelines are estimated to contribute a 2.51% and 4.44% increase in the rent roll with 31.6% of all units experiencing a one-year lease signing (4.5% or \$45, whichever is higher) and 58.5% of all units experiencing two-year lease signings (8.5% or \$85, whichever is higher). These figures are derived from the 2005 Housing and Vacancy Survey (HVS), Table 58, which gives reported lease terms. "Less than one year" was assumed to be a one-year lease and "More than one year" and "More than two years" were assumed to be a two-year lease. These figures for renewal leases (35% of stabilized households have a one-year lease and 65% have twoyear leases) were reduced by the turnover rate of 9.9%, derived from the average households who moved in the 2005  $\mathrm{HVS}$  (100,500 is the average number of stabilized households that moved annually 2002-2004) and taken as percentages of all stabilized lease signers (1,015,655); (2) the median vacancy increase of 10.69% found in the 2006 annual DHCR rent registration data for apartments is estimated to increase overall rent rolls by  $1.06\%\,$  when multiplied by the HVS turnover rate (9.9%), which estimates the percentage of rent stabilized units that will enter into vacancy leases under Order 40.
- $^{17}$  The  $\mathbf{5.82\%}$  increase in rent roll estimated for leases signed during the period 10/1/09-9/30/10 under Order 41 reflects the following: (1) Renewal guidelines are estimated to contribute a 1.75% and 2.76% increase in the rent roll with 34.8% of all units experiencing a one-year lease signing (3% or \$30, whichever is higher) and 52.5% of all units experiencing twoyear lease signings (6% or \$60, whichever is higher). These figures are derived from the 2008 Housing and Vacancy Survey (HVS). "Less than one year" was assumed to be a one-year lease and "More than one year" and "More than two years" were assumed to be a two-year lease. These figures for renewal leases (39.8% of stabilized households have a oneyear lease and 60.2% have two-year leases) were reduced by the turnover rate of 12.7%, derived from the average households who moved in the 2008 HVS (127.570 is the number of stabilized households that moved in 2007, the most recent full year for which HVS data is available) and taken as percentages of all stabilized lease signers (1,004,837); (2) the median vacancy increase of 11.13% found in the 2008 annual DHCR rent registration data for apartments is estimated to increase overall rent rolls by 1.32% when multiplied by the HVS turnover rate (12.7%), which estimates the percentage of rent stabilized units that will enter into vacancy leases under Order 41.

For years the staff has expressed serious reservations about the usefulness and accuracy of "Table 14". With current longitudinal income and expense data staff has constructed a new and far more reliable index, using 1989 as a base year. Except for the most recent year and the coming year, this new index measures changes in building income and operating expenses as reported in annual income and expense statements. The second to last year in the table will reflect actual PIOC increases and projected rent changes. The last year in the table - projecting into the future - will include staff projections for both expenses and rents. The proposed new index is in Table 9.

While we believe this to be a more reliable index, it is not without limitations. First, as noted, for the past and coming year the index will continue to rely upon the price index and staff rent and cost projections. Second, while the new table looks at the overall relationship between costs and income, it does not measure the specific impact of rent regulation on that relationship. This new table is listed as Table 9.

Source: RGB Income and Expense Studies, 1989-2009, Price Index of Operating Costs 1992 - 2009, RGB Rent Index for 1992 - 2010 (see Table 8).

 $^{18}\,$  Operating and expense data listed is based upon unaudited filings with the Department of Finance. Audits of 46 buildings conducted in 1992 suggest that expenses may be overstated by 8% on average. See Rent Stabilized Housing in New York City, A Summary of Rent Guidelines Board Research 1992, pages 40-44. Figures in parentheses are adjusted to reflect these findings.

 $^{19}$  Estimated expense figure includes 2007 expense estimate updated by the PIOC for the period from 4/1/07 through 3/31/08 (7.8%). Income includes the income estimate for 2007 updated by staff estimate based upon renewal guidelines and choice of lease terms for a period from 4/1/07 through 3/31/08 (4.04% - i.e., the 10/1/06 to 9/30/07 rent projection (4.38) times (.583), plus the 10/1/07 to 9/30/08 rent projection (3.57) times (.417))

 $^{20}\ensuremath{\operatorname{Estimated}}$  expense figure includes 2008 expense estimate updated by the

PIOC for the period from 4/1/08 through 3/31/09 (4.0%). Income includes the income estimate for 2008 updated by staff estimate based upon renewal guidelines and choice of lease terms for a period from 4/1/08 through 3/31/09 (5.41% - i.e., the 10/1/07 to 9/30/08 rent projection (3.57)times (.583), plus the 10/1/08 to 9/30/09 rent projection (8.00) times (.417)).

 $^{21}$  Estimated expense figure includes 2009 expense estimate updated by the staff PIOC projection for the period from 4/1/09 through 3/31/10 (2.2%). Income includes the income estimate for 2009 updated by staff estimate based upon renewal guidelines and choice of lease terms for a period from 4/1/09 through 3/31/10 (7.09% - i.e., the 10/1/08 to 9/30/09 rent projection (8.00) times (.583), plus the 10/1/09 to 9/30/10 rent projection (**5.82**) times (.417)).

#### CHANGES IN HOUSING AFFORDABILITY

For the first time in five years, New York City's economy did not generally improve as compared with the preceding year, with mixed economic indicators, including rising unemployment rates and stagnant Gross City Product, but rising employment levels and declining homeless levels. Citywide unemployment rates (on an annual basis) increased to 5.5% during 2008, after falling for the previous four years. And while the City's Gross City Product increased for the fifth consecutive year, the rate of growth annually fell to almost zero, and fell in the last three quarters of 2008. In addition, although cash assistance levels dropped, applications rose for the third consecutive year, increasing by more than 8%. The number of food stamp recipients is also on the rise, with rates increasing each month since March, as compared to the previous month. And for the third straight year, the number of evictions grew, by 1.3% despite less housing court filings.

However, there were indicators tracked in the I&A Study that showed a positive trend during 2008. Homeless levels were down on average in 2008, with the total number of individuals decreasing by 2.2%, and families by 3.5%. Real wages (which have a long lag time in reporting) increased significantly between 2006 and 2007, rising 6.3%. Preliminary findings from the 2008 Housing and Vacancy Survey show that in real terms, the income of rent stabilized tenants increased 1.4% between 2004 and 2007, after dropping 8.6% between 2001 and 2004. In addition, cash assistance cases fell for the fourth year in a row, dropping more than 5% between 2007 and 2008. Average employment levels also rose during 2008, by 1.2%. In addition, housing court filings fell for the third consecutive year, falling by more than 2%

#### On June 4, 2009 the staff of the Rent Guidelines Board released a memo to Board members with additional information concerning the 2009 Income and Affordability Study. The text of that memo follows:

Per discussions at the April 7, 2009 Income and Affordability Study presentation, Board members requested the most recently available Income and Affordability data before the final vote. Selected statistics are presented below.

As of the publication of this memo, homeless data has not been updated past December 2008.

# BUILDINGS WITH DIFFERENT FUEL AND UTILITY ARRANGEMENTS

The Board was also informed of the circumstances of buildings with different fuel and utility arrangements including buildings that are master-metered for electricity and that are heated with gas versus oil (see Table 10). Under some of the Board's Orders in the past, separate adjustments have been established for buildings in certain of these categories where there were indications of drastically different changes in costs in comparison to the generally prevailing fuel and utility arrangements. This year the Board made no distinction between guidelines for buildings with different fuel and utility arrangements under Order 41.

requests from Board members. For the purposes creeting annual rent guidelines, two of the most heavily utilized statistics from this survey are rent and income levels, and the resulting combination of the two – the rent-to-income ratio - is generally seen as a measure of affordability (which HUD guidelines define as paying no more than 30% of income towards rent and the SCRIE program defines as no more than 33.3% of income).

At the request of Chairman Markus, on June 19, 2008, staff released a memo detailing contract rents and contract rentto-income ratios for rent stabilized households. At that time, the most recent Housing and Vacancy Survey was three years old and of limited value due to its age. In an attempt to estimate present-day conditions, staff made a series of assumptions about rent levels and incomes in 2008. Those assumptions were outlined in detail in last year's memo. Added to these assumptions, we attempted to project rent levels and rent-to-income ratios based on a variety of proposed rent increases under Order #40. These proposals included two different sets of rent increases combined with minimum guideline increases for tenants in occupancy at least six, eight, or ten years. The main aim of that memo was to determine if long-term tenants could afford a minimum increase.

As a follow-up to last year's memo on the impact of minimum rent increases, staff used recently published 2008 Housing and Vacancy Survey (HVS) data to analyze reported 2008 rent levels and rent-to-income ratios, as well as estimated rent levels and rent-to-income ratios in the following year given guideline increases authorized in Order #40. Unlike last year's memo which projected 2008 rents from the 2005Housing and Vacancy Survey using a set of assumptions about rent and income increases, this memo relies more strictly on published HVS data and includes very few assumptions.

Among the major findings:

•

.

•

.

•

- The 2008 HVS median contract rent-to-income ratio for rent stabilized tenants not receiving SCRIE was 28.4%. With increases authorized under Order #40, we estimate that those signing a one-year lease would see their rent-to-income ratio rise to 29.7% and under a two-year lease to 31.0%.
- The 2008 HVS median contract rent-to-income ratio for rent stabilized tenants who were subject to minimum rent increases under Order #40 was 27.5%. With increases authorized under Order #40, we estimate that those signing a one-year lease would see their rent-to-income ratio rise to 29.0% and under a two-year lease to 30.8%.
- The 2008 HVS median contract rent for rent stabilized tenants not receiving SCRIE was \$930. With increases authorized under Order #40, we estimate that those signing a one-year lease would see their rent rise to \$975 and under a two-year lease to \$1,014.
- The 2008 HVS median contract rent for rent stabilized tenants who were subject to minimum rent increases under Order #40 was \$713. With increases authorized under Order #40, we estimate that those signing a one-year lease would see their rent rise to \$758 and under a two-year lease to \$798.

In general, staff overestimated the amount that rent rose between 2005 and 2008, but also overestimated income increases, especially for those households that are eligible to receive the minimum increases. (See Summary below for more details) The net result was an estimated rent-to-

- income ratio for all households that was just 0.1 percentage point higher than actual levels, but a median rent-to-income ratio underestimated by 1.5 percentage points for households eligible for the minimum increases.
- For all rent stabilized households, rents were underestimated by 2.9% (\$28) and were underestimated by 5.4% (\$41) for households eligible for minimum increases.

Approximately 695,000 renewal leases will be

signed under Order #40. If minimum increases are passed in the upcoming guideline year, approximately 143,000 households will have been subject to minimum increases in two consecutive years by virtue of living in their apartment six years or more, having rents less than \$1,000, and having signed a one-year lease under both Orders #40 and #41.

The methodology used is outlined below. Also included is a summary of our findings and tables that contain the data used in our analysis.

\*Percent change from previous month refers to the percentage change from the immediately preceding month.

Percent change from the previous year refers to the percentage change from the same month in the prior

year. Due to a methodology change, data from January 2008 cannot be compared to prior years.

On June 4, 2009 the staff of the Rent Guidelines Board released a memo to Board members regarding an analysis of rent guideline adjustments. The text of this memo follows:

#### Analysis of Rent Guideline Adjustments:

#### Introduction

One of the tools that the Rent Guidelines Board has at its disposal is the Housing and Vacancy Survey (HVS). This survey, conducted every three years, asks households in New York Čity hundreds of questions, ranging from their rent and income levels, to the number and age of persons in the household. Staff details some of the most relevant statistics from this survey in their Income and Affordability and Housing Supply Reports, as well as in specific research

#### Methodology

Baseline 2008 contract rent-to-income ratios are as reported in the 2008 HVS for rent stabilized tenants who do not receive SCRIE (as SCRIE tenants are exempt from rent increases). Rent-to-income ratios are reported in two ways first for all rent stabilized tenants who do not receive SCRIE, and then for just those tenants who would be eligible for minimum rent increases (i.e. tenants in place six years or more whose rents are less than \$1,000). To estimate 2009 rent-to-income ratios, estimated 2009 rent levels (as described in the following paragraph) were divided by estimated monthly income levels. As income reported in the 2008 HVS is for calendar year 2007, to calculate 2008 income levels staff needed to estimate the level of income increases between 2007 and 2008. Wage data, as reported by the NYS Dept. of Labor, is only available through the first three quarters of 2008, during which period wages remained flat, rising only 0.1% as compared to the first three quarters of 2007. However, Social Security income during 2008 increased by 5.8%. According to the 2008 HVS, 132,140 rent stabilized households (who do not receive SCRIE) have Social Security income. For these households, the Social Security portion of their income was increased by 5.8% to estimate 2008 income, while for all other households income was left unchanged from 2007. Note that for those households who elect to take a two-year lease, their rent will not rise in 2010, so barring any downward changes in income levels between 2008 and 2010, rent-to-income ratios in 2010 will be lower than those reported here.

Baseline 2008 rent levels are as reported in the 2008 HVS for rent stabilized tenants who do not receive SCRIE. As with rent-to-income ratios, rents are presented both for all rent stabilized tenants and then only for those eligible for

minimum increases. Guideline increases for one- and twoyear leases were added to reported 2008 rents to estimate 2009 rent levels. Tenants were given either a rent increase of 4.5% or \$45 on one-year leases, and 8.5% or \$85 on two-year

Staten Island is not a part of the borough analysis of this memo because of the small sample size of the rent stabilized population there. However, Staten Island households are included in the citywide numbers. Also note that this analysis excludes those households who claimed to be receiving SCRIE as they would presumably not be impacted by any increase in rent. Per the 2008 HVS, 23,831 households receive SCRIE. Per City budget data, 45,500 households receive SCRIE, an underestimation in the HVS of 48%.

#### Summarv

#### **Contract Rent-to-Income Ratios**

Section 1 focuses on contract rent-to-income ratios. Page 4 details reported 2008 HVS contract rent-to-income ratios, as well as estimated 2009 contract rent-to-income ratios (see Methodology section). Also included, for reference purposes only, are the 2008 estimates for each of these categories that the RGB made last year. As can be seen in the first of these tables, for all rent stabilized tenants not receiving SCRIE, the 2008 median contract rent-to-income ratio, Citywide, is 28.3%, and is estimated to rise to 29.7% for those tenants signing a one-year lease under Order #40, and 31.0% for those signing a two-year lease. The second table on Page 4 details rent-to-income ratios for just those tenants who are slightly for minimum cent is more a faith or 445 or 455 eligible for minimum rent increases of either \$45 or \$85 under the current order. Citywide, their median rent-toincome ratio is 27.5% and is projected to rise to 29.0% for those signing one-year leases and 30.8% for those signing two-year leases

These tables also include estimates made last year about 2008 rent-to-income ratios. Citywide, the RGB estimated last year that the median contract rent-to-income ratio in 2008 year that the median contract rent-to-income ratio in 2008 would be 28.4%, but it was actually 28.3%. As can be seen in the borough breakdowns, the RGB overestimated the ratios in all but the Bronx, where the RGB underestimated by almost two percentage points. Contract rent-to-income ratios include two components – rents and incomes. As can be seen in the tables on Page 5, the RGB overestimated the amount of rent increase between 2005 and 2008, which should have lowered rent-to-income ratios. However, we also overestimated the amount of income increase between 2005 and 2008. While the RGB predicted that median income levels would go up 13.9%, they actually went up 11.0%. Average income was predicted to rise 14.5% and actually rose 12.0%. 13.0%. The combination of the overestimation of both rents and income resulted in an estimate of the 2008 contract rent to-income ratio that was virtually identical to the actual ratio. However, in the second table on Page 4, we see that the estimates of the contract rent-to-income ratio for those tenants subject to the minimums (those in place for six years and more and paying less than \$1,000 in rent) were underestimated by 1.5 percentage points Citywide, and were only overestimated in Manhattan. As the second table on Days 5 illustration while more superstimated for this Page 5 illustrates, while rents were overestimated for this group by \$41 a month, median incomes for this group, which were projected to rise 15.0%, actually only rose 3.7% (average income levels actually rose more than estimated, by 15.2%, as opposed to a projected 14.2%).

#### Contract Rents

Section 2 focuses on contract rents. Page 5 details 2008 contract rents for all rent stabilized tenants not receiving SCRIE, as well as estimated 2009 rents (see Methodology section above). Also included, for reference purposes only, are the 2008 estimates for each of these categories that the RGB made last year. As seen in the first of these tables, the median contract rent was \$930 in 2008, and is projected to rise to \$975 for those signing a one-year lease and \$1,014 for those signing a two-year lease under Order #40. The second table details contract rents for just those tenants who are eligible for minimum rent increases of either \$45 or \$85. Citywide, their median contract rent in 2008 was \$713, and is projected to rise to \$758 for those signing a one-year lease and \$798 for those signing a two-year lease.

These tables also include estimates made last year about 2008 contract rents. In all cases the RGB overestimated rent increases between 2005 and 2008. For all rent stabilized tenants not receiving SCRIE, rents were projected to be \$958 in 2008 and were actually \$930. Estimates were less precise for those tenants eligible to receive minimum rent increases. The median contract rent for this group was projected to be \$754 in 2008 and was actually \$713.

*Miscellaneous Notes* It is important to note that not everyone signs a lease every year, and 2009 estimates presented in this memo include tenants who are not going to receive a rent increase in 2009 because they are entering the second year of a two-year lease signed in 2008. Approximately 70.2% of tenants sign a lease in any given year, with approximately 40.5% of tenants signing a one-year lease, 29.8% signing a two-year lease, and 29.8% not signing a lease at all. Based on these percentages, approximately 695,000 renewal leases will be signed under Order #40. Of these, approximately 400,000 will be one-year eases, and 150,000 of these one-year leases will be subject to the minimum increases passed in Order #40. For the upcoming guideline year, were minimum increases to be passed again, 143,000 households would be subject to minimum increases in two consecutive years (7,000 households who received minimum increases under Order #40 will now have rents that exceed \$1,000 for the first time). tenancy of six years or more and paying a minimum of \$45 for a one-year lease or \$85 for a two year lease)

Median Contract Rent-to-Income Ratios for All Tenants Not Receiving SCRIE, with minimum rent increases for tenants in place six years or more (whose rents are less than 1,000) and either 4.5%/8.5% for all other tenants.

Those who are not signing leases under Order #40 were not affected by guidelines passed last year, although they are included in this memo as though they had. Likewise, those signing a two-year renewal under Order #40 will not see a rent increase until October 1, 2010 at the earliest, so it can be assumed that barring income decreases, their rent-to-income ratios for most of 2010 will be lower than that presented here. For practical purposes, this memo must analyze the data as if every tenant signed a lease under Order #40, and all either signed a one-year lease or all signed a two-year lease. To get a better representation of the amount of households affected, discount the figures in the tables by approximately 29.8% (the approximate number of households who do not sign a lease in a given year) and then assume that the true figures lie somewhere in between the one- and twoyear figures provided.

#### Section 1: Median Contract Rent-to-Income Ratios, Tenants Not Receiving SCRIE

Contract rent-to-income ratios are presented using 2008 data and then adjusted for 2009 based on actual guideline increases approved for leases beginning October 2008-September 2009. 2007 incomes (as reported in the HVS) are adjusted upwards only for those receiving Social Security (see Methodology on Page 2). We look first at rent-to-income ratios for all rent stabilized households not receiving SCRIE and then at only those households who will be subject to minimum increases (i.e. only those households with a

\* Missing refers to households whose contract rent-to-income ratio could not be calculated.

#### Section 2: Median Contract Rent Levels, Tenants Not **Receiving SCRIE**

Contract rents are presented using 2008 data and then adjusted for 2009 based on actual guidelines increases approved for leases beginning October 2008-September 2009. We look first at rents for all rent stabilized households not receiving SCRIE and then at only those households who will be subject to minimum increases (i.e. only those households with a tenancy of six years or more and paying a minimum of \$45 for a one-year lease or \$85 for a two year lease). \*Missing refers to households whose contract rents could not be calculated.

#### On June 17, 2009 the staff of the Rent Guidelines Board released a memo to Board members with information concerning tax arrears data for Class 2 properties. The text of that memo follows:

At the June 4 meeting, staff was instructed to request current tax arrears data from the Department of Finance. Attached is fiscal year (July-June)<sup>i</sup> data for Class 2 properties

from FY 2001 through April 30, 2009. This data includes the number of parcels in arrears, the dollar amount delinquent and the delinquency rate (the amount delinquent as percent of the levy at the end of each fiscal year). This data for class 2 properties is broken out into five categories of buildings: walkups, elevator, coops, condominiums and residential multi use. Please note that this data represents all of the Class 2 properties, not just those that contain rent stabilized units. Although some rent stabilized units would be located in condominiums or coops, the large majority would be in the remaining three categories.

Tax delinquencies are defined as follows: Property tax delinquencies reflect the amount of property tax that is due but not yet collected. Delinquencies may be attributable to tax amounts owed for the current fiscal year or prior fiscal years, and reflect the status of payments at a given point in time.22

In FY 2009 (thru 4/30/09), 25,715 class 2 parcels were in tax arrears, 11,000 more than in the previous fiscal year and the highest total since FY 2003. In FY 2009 these parcels owed a total of \$150,600,000 in back taxes compared to \$84,900,000in FY 2008. The percentage of the total levy for each category of Class 2 housing, which is the rate of delinquency, in FY 2009 ranged from 0.7% for cooperatives to 5.2% for residential multi use buildings. In FY 2008 delinquency rates ranged from 0.6% to 3.5%.

#### On June 18, 2009 the staff of the Rent Guidelines Board released a memo to Board members with additional information concerning tax arrears data for Class 2 properties. The text of that memo follows:

At the June 17 public hearing staff released a memo regarding tax arrears data for Class 2 properties, data that was received from the Department of Finance on June 16. Members requested that we present this data with just the three categories of property in which the large majority of rent stabilized units are located: walkups, elevator and residential multiple-use buildings. Coop and condominium units are predominately owner occupied while the other three categories of Class 2 properties contain units occupied by renters. Please note that the data in this memo represents all of the Class 2 walkups, elevator and residential multipleuse parcels that are in tax arrears, not just those that contain rent stabilized units. A request to Finance has been made to separate this data by borough and Community District for just those buildings containing rent stabilized buildings.

Tax delinquencies are defined as follows:

Property tax delinquencies reflect the amount of property tax that is due but not yet collected. Delinquencies may be attributable to tax amounts owed for the current fiscal year or prior fiscal years, and reflect the status of payments at a given point in time.<sup>23</sup>

In FY 2009 (thru 4/30/09), 11,565 Class 2 walkup, elevator, and residential multi-use parcels were in tax arrears, 70% more than in FY 2008 (6,768) and the highest total since FY 2003. In FY 2009 these parcels owed a total of 104,600,000in back taxes compared to \$57,800,000 in FY 2008 and the largest amount in the last nine years. The percentage of the total levy (which is the rate of delinquency) for each category of Class 2 housing in FY 2009 ranged from 1.8% for elevator buildings to 5.2% for residential multi-use buildings. In FY 2008 delinquency rates ranged from 1.2% to 3.5%. See the tables on the following page for Class 2 tax arrears data from FY 2001 going forward.

In 1986, Abt Associates Inc. conducted an expend - re study of loft owners to construct weights for the Loft Board's index of operating costs and to determine year-to-year price changes. In subsequent years, data from the PIOC for stabilized apartments was used to compute changes in costs and to update the loft expenditure weights. This is the procedure used this year.

The increase in the Loft Index this year was 2.8%, 1.2 percentage points lower than the increase for apartments. This difference is explained by the fact that Attorney fees, which rose 1.7%, and Insurance Costs, which declined 2.9%, carry much more weight for lofts than for apartments. More weight put on these components placed more downward pressure on the Loft Index.

This year's guidelines for lofts are: 3% for a one-year lease and 6% for a two-year lease.

SPECIAL GUIDELINES FOR VACANCY DECONTROLLED UNITS

ENTERING THE STABILIZED STOCK

Pursuant to Section 26-513(b) of the New York City Administrative Code, as amended, the Rent Guidelines Board establishes a special guideline in order to aid the State Division of Housing and Community Renewal in determining fair market rents for housing accommodations that enter the stabilization system. This year, the Board set the guidelines at the greater of the following:

(1)50% above the Maximum Base Rent, or The Fair Market Rent for existing housing as (2)established by the United States Department of Housing and Urban Development (HUD) for the New York City Primary Metropolitan Statistical Area pursuant to Section 8(c) (1) of the United States Housing Act of 1937 (42 U.S.C. section 1437f [c] [1]) and 24 C.F.R. Part 888, with such Fair Market Rents to be adjusted based upon whether the tenant pays his or her own gas and/or electric charges as part of his or her rent as such gas and/or electric charges are accounted for by the New York City Housing Authority.

The Board concluded that for units formerly subject to rent control, either an increase to rent levels reflecting the Fair Market Rent guidelines established by the U.S. Department of Housing and Urban Development (HUD), or 50% above the maximum base rent was a desirable minimum increase. Notably, the HUD guidelines differentiate minimum rents on the basis of bedroom count.

INCREASE FOR UNITS RECEIVING PARTIAL TAX EXEMPTION PURSUANT TO SECTION 421 AND 423 OF THE REAL PROPERTY TAX LAW

The guideline percentages for 421-A and 423 buildings were set at the same levels as for leases in other categories of stabilized apartments.

This Order does not prohibit the inclusion of the lease provision for an annual or other periodic rent increase over the initial rent at an average rate of not more than 2.2 per cent per annum where the dwelling unit is receiving partial tax exemption pursuant to Section 421-A of the Real Property Tax Law. The cumulative but not compound charge of up to 2.2 per cent per annum as provided by Section 421-A or the rate provided by Section 423 is in addition to the amount permitted by this Order.

#### VACANCY ALLOWANCE

As of June 15, 1997, Vacancy Allowances are now determined by a formula set forth in the State Rent Regulation Reform

Sources: Property Tax Annual Report, FY01-08. http://www.nyc.gov/html/dof/html/pub/pub\_reports\_property.shtml Totals may not equal sums due to rounding.

#### ADJUSTMENTS FOR UNITS IN THE CATEGORY OF BUILDINGS COVERED BY ARTICLE 7-C OF THE MULTIPLE DWELLING LAW (LOFTS)

Section 286 sub-division 7 of the Multiple Dwelling Law states that the Rent Guidelines Board "shall annually establish guidelines for rent adjustments for the category of buildings covered by this article." In addition, the law specifically requires that the Board, "consider the necessity of a separate category for such buildings, and a separately determined guideline for rent adjustments for those units in which heat is not required to be provided by the owner, and may establish such separate category and guideline."

Act of 1997 and in Chapter 82 of the Laws of 2003

#### SUBLET ALLOWANCE

The increase landlords are allowed to charge under Order 41 when a rent stabilized apartment is sublet by the primary tenant to another tenant on or after October 1, 2009 and on or before September 30, 2010 shall be 10%.

#### **VOTES**

The votes of the Board on the adopted motion pertaining to the provisions of Order #41 were as follows:

> No Abstentions Yes

Guidelines for Apartment Order #41 5

#### NEW YORK CITY RENT GUIDELINES BOARD

#### 2009 Hotel Order #39

#### June 23, 2009

Order Number 39 - Hotels, Rooming Houses, Single Room Occupancy Buildings and Lodging Houses. Rent levels to be effective for leases commencing October 1, 2009 through September 30, 2010.

NOTICE IS HEREBY GIVEN PURSUANT TO THE AUTHORITY VESTED IN THE NEW YORK CITY RENT GUIDELINES BOARD BY THE RENT STABILIZATION LAW OF 1969, as amended, and the Emergency Tenant Protection Act of 1974, as amended, implemented by Resolution No. 276 of 1974 of the New York City Council and extended by Chapter 82 of the Laws of 2003, and in accordance with the requirements of Section 1043 of the New York City Charter, that the Rent Guidelines Board hereby **adopts** the following levels of fair rent increases over lawful rents charged and paid on **September 30, 2009**.

#### APPLICABILITY

This order shall apply to units in buildings subject to the Hotel Section of the Rent Stabilization Law (Sections 26-504(c) and 26-506 of the N.Y.C. Administrative Code), as amended, or the Emergency Tenant Protection Act of 1974 (L.1974, c. 576 §4[§5(a)(7)]). With respect to any tenant who has no lease or rental agreement, the level of rent increase established herein shall be effective as of one year from the date of the tenant's commencing occupancy, or as of one year from the date of the last rent adjustment charged to the tenant, or as of October 1, 2009, whichever is later. This anniversary date will also serve as the effective date for all subsequent Rent Guidelines Board Hotel Orders, unless the Board shall specifically provide otherwise in the Order. Where a lease or rental agreement is in effect, this Order shall govern the rent increase applicable on or after October 1, 2009 upon expiration of such lease or rental agreement, but in no event prior to one year from the commencement date of the expiring lease, unless the parties have contracted to be bound by the effective date of this Order.

#### RENT GUIDELINES FOR HOTELS, ROOMING HOUSES, SINGLE ROOM OCCUPANCY BUILDINGS AND LODGING HOUSES

Pursuant to its mandate to promulgate rent adjustments for hotel units subject to the Rent Stabilization Law of 1969, as amended, (§26-510(e) of the N.Y.C Administrative Code) the Rent Guidelines Board hereby **adopts** the following rent adjustments:

#### STATEMENT OF BASIS AND PURPOSE

The Rent Guidelines Board is authorized to promulgate rent guidelines governing hotel units subject to the Rent Stabilization Law of 1969, as amended, and the Emergency Tenant Protection Act of 1974, as amended. The purpose of these guidelines is to implement the public policy set forth in Findings and Declaration of Emergency of the Rent Stabilization Law of 1969 (§26-501 of the N.Y.C. Administrative Code) and in the Legislative Finding contained in the Emergency Tenant Protection Act of 1974 (L.1974 c. 576, §4 [§2]).

Dated: June 23, 2009 \_\_\_\_

Marvin Markus

Chair New York City Rent Guidelines Board

EXPLANATORY STATEMENT - HOTEL ORDER #39 Explanatory Statement and Findings of the Rent Guidelines Board In Relation to 2009-10 Lease Increase Allowances for Hotels Under the Jurisdiction of the Rent Stabilization Law

Explanatory Statement and Findings of the Rent Guidelines Board Concerning Increase Allowances for Hotel Units Under the Jurisdiction of the Rent Stabilization Law, Pursuant to Hotel Order Number 39, Effective October 1, 2009 through and including September 30, 2010.<sup>24</sup>

Pursuant to the authority vested in it by the Rent Stabilization Law of 1969 and the Emergency Tenant Protection Act of 1974, implemented by Resolution Number 276 of 1974 of the New York City Council, and extended Chapter 82 of the Laws of 2003, it is the responsibility of the Rent Guidelines Board to establish guidelines for hotel increases. Hotel Order Number 39, adopted on June 23, 2009, applies to stabilized hotel units occupied by non-transient tenants.

Hotel Order Number 39 provides for an allowable increase of 0% over the lawful rent actually charged and paid on September 30, 2009 for rooming houses, lodging houses, Class B hotels, single room occupancy buildings, and Class A residential hotels. The Order does not limit rental levels for commercial space, non-rent stabilized residential units, or transient units in hotel stabilized buildings during the guideline period. The Order also provides that for any dwelling unit in a hotel stabilized building which is voluntarily vacated by the tenant thereof, the level of rent increase governing a new tenancy shall be the same as the guideline for rent increases set forth above.

<sup>24</sup> This Explanatory Statement explains the actions taken by the Board on individual points and reflects the general views of those voting in the majority. It is not meant to summarize all viewpoints expressed. SPECIAL NOTE

In the past the Board has adopted rent increases to the rent stabilized hotel universe. In recent years, when increases were granted, the Board adopted provisos that were designed to deny owners from taking these increases under certain conditions. Since the Board voted a 0% increase for all classifications of rent stabilized hotels, this proviso is not included in Hotel Order 39. In event that increases are considered for subsequent Hotel Orders, at such time the current members of the Rent Guidelines Board urge future Boards to adopt and reinstate this proviso. This proviso and explanatory language are as follows:

Rooming house, lodging house, Class B hotel, single room occupancy building, and Class A residential hotel owners shall not be entitled to any of the above rent adjustments, and shall receive a **0% percent adjustment** if permanent rent stabilized or rent controlled tenants paying no more than the legal regulated rent, at the time that any rent increase in this Order would otherwise be authorized, constitute fewer than **85%** of all units in a building that are used or occupied, or intended, arranged or designed to be used or occupied in whole or in part as the home, residence or sleeping place of one or more human beings.

The following outlines the Rent Guidelines Board's intent of the above proviso:

The Board's intention for the meaning of this proviso is that ALL dwelling units in the hotel, whether occupied, vacant, rented to tourists, transients, contract clients, students or other non-permanent tenants, or to permanent rent stabilized tenants, be counted in the denominator of the calculation. The only type of units in the hotel that may be excluded from the denominator are units that are used as stores or for similar business purposes such as doctor's offices. The numerator of the calculation is the number of units occupied by permanent rent stabilized or rent controlled tenants.

- Residential hotels are "apartment hotels" which are designated as Class A multiple dwellings on the Certificate of Occupancy.
- Rooming houses are Class B multiple dwellings having fewer than thirty sleeping rooms as defined in Section 4(13) of the multiple dwelling law.
- A single room occupancy building is a Class A multiple dwelling which is either used in whole or in part for single room occupancy or as a furnished room house, pursuant to Section 248 of the multiple dwelling law.
- A Class B hotel is a hotel, which carries a Class B Certificate of Occupancy and contains units subject to rent stabilization.
- Lodging houses are those buildings designated as lodging houses on the Certificate of Occupancy.

#### BACKGROUND

•

•

•

Public meetings of the Board were held on March 24, April 7, 21 and 30, and June 4, 2009 following public notices. On May 5, the Board adopted proposed rent guidelines for hotels, apartments, and lofts.

Two public hearings were held on June 15 and June 17, 2009 to hear comments on the proposed rent adjustments for rent stabilized hotels and apartments. The hearings were held from 4:00 P.M. to 8:30 P.M. on June 15 and from 10:00 A.M. to 8:30 P.M. on June 17. The Board heard testimony from approximately 18 hotel tenants and tenant representatives, no hotel owners, one public official and two representatives of public officials. In addition, the Board's office received approximately seven written statements from owners and owner groups, tenants and tenant groups, and public officials. On June 23, 2009, the guidelines set forth in Hotel Order Number 39 were adopted.

Selected Oral and Written Testimony from Tenants and Tenant Groups:

- "SROs play a critical role in homeless prevention. They provide affordable housing to those who would otherwise be homeless. You have the power to vote for a 0% increase for those suffering most from the crisis, for those who are one step away from homelessness."

- "These owners continue to reap profits from this housing stock by deriving the bulk of their income from transient guests - **they** <u>do</u> **not rely on permanent tenants for their financial profit or survival**. SRO owners continue to make new and very lucrative use of their properties while housing an ever-shrinking number of permanent tenants."

- We respectfully request that the Board decline to approve a rent increase for 2009-2010. SRO tenants quite simply cannot afford an increase. SRO owners, for their part, cannot establish any justification for a rent hike."

- "New York's SRO landlords continue to fully exploit the unique characteristics of their properties to realize reasonable profits from their buildings. Except in rare cases, SRO owners do not derive their incomes from the regulated rents they collect from permanent tenants. SRO landlords cover their costs, and make their profits, by lawfully, and unlawfully, renting out their rooms to transients, tourists, and institutional lessees at rates that significantly exceed stabilized rents."

 "Illegal hotels – this practice continues not only in nearly ever S.R.O. and Class A Residential Hotel but has now extended to <u>280</u> buildings city-wide and is reaping <u>major</u> <u>profits</u> unreported by landlords."

- "SRO's and Class A Hotels – approximately 10,000 or less tenants remain in this category, they suffer duress and live with deplorable conditions. Such a disgrace. The Proviso should remain intact or a definite <u>no increase</u> in <u>rent</u>."

Selected Oral and Written Testimony from Owners and Owner Groups:

- "SROs in New York City provide a unique service to a segment of the population who needs these services whether it be temporarily or long-term. We must assist them....We cannot afford to have this part of the industry disappear...whether through attrition or other means."

The allowable level of rent adjustment over the lawful rent actually charged and paid on **September 30, 2009** shall be:

1) Residential Class A (apartment) hotels -	0%
2) Lodging houses -	0%
3) Rooming houses (Class B buildings	
containing less than 30 units) -	0%
4) Class B hotels -	0%
5) Single Room Occupancy buildings	
(MDL section 248 SRO's) -	0%

#### NEW TENANCIES

**No "vacancy allowance"** is permitted under this order. Therefore, the rents charged for tenancies commencing on or after **October 1, 2009** and on or before **September 30, 2010** may not exceed the levels over rentals charged on **September 30, 2009** permitted under the applicable rent adjustment provided above.

#### ADDITIONAL CHARGES

It is expressly understood that the rents collectible under the terms of this Order are intended to compensate in full for all services provided without extra charge on the statutory date for the particular hotel dwelling unit or at the commencement of the tenancy if subsequent thereto. No additional charges may be made to a tenant for such services, however such charges may be called or identified. Here are two examples. One: a hotel has 100 units and 2 stores. 32 units are rented to permanent rent stabilized tenants, 10 are vacant and 58 are rented to transients and tourists. The calculation is as follows, the denominator is 100 and the numerator is 32. This calculation results in an occupancy percentage of LESS than 85% under the formula (32%) and an increase CANNOT be taken for the permanent stabilized tenants.

Two: a hotel has 150 units, 2 of which are used by a dentist and a doctor for their businesses, 8 are rented to tourists, 5 are vacant and 135 are occupied by permanent rent stabilized tenants. The denominator would be 148 and the numerator would be 135. This calculation results in an occupancy percentage of GREATER than 85% under the formula (91%) and an increase CAN be taken for the permanent stabilized tenants.

#### DEFINITIONS

For the purpose of determining the appropriate classification of a hotel stabilized unit, the Board has set its definitions as follows: - "While it is helpful to the association members, we would like to ask that you consider lowering the "90%" (sic) clause required by last year's order. Even a small decrease would give them a chance to take the increase you may afford them."

– "IN ORDER TO ALLOW THESE BUILDINGS TO CONTINUE TO REACH PARITY WITH OTHER RENTALS, WE ASK YOU CONSIDER GIVING US A 3% INCREASE ACROSS THE BOARD."

Selected Oral and Written Testimony from Public Officials:

- "In Manhattan alone, over 200 buildings are currently operating as illegal hotels. The Boards must surely realize that these practices have illegally converted as many as 10,000 rent-stabilized units into hotel rooms for tourists and corporate interests that charge hundreds of dollars per night."

- "...The Board's responsibility in this matter is to take into full account the impact on our affordable housing stock of a loss of 10,000 units, and it must also account for the fact that these illegal conversions are being performed by landlords who also benefit from the Board's belief in their economic hardship."

- "Any SRO rent increase is unsupportable. As anyone who has witnessed the conditions of most SRO housing knows, it is housing of last resort. For a person with a low income, even a small increase could mean the difference between being on the street or being in a one's own room. The Board should not approve any SRO rent increase, in order to protect vulnerable housing for those who need it most, and who can least afford to pay more."

- "Landlords are stealing needed units from the housing market by renting them out as illegal hotel rooms. They are able to make more money than they could be renting them as rent-regulated apartments, and their tenants suffer from having a building loaded with strangers coming in and out at all hours of the day and night. Yet the landlords are rewarded with rent increases."

- "...Impose a freeze on rents for all rent regulated apartments as well as for lofts, hotels, rooming houses, single room occupancy (SRO) buildings and lodging houses. Given all the facts, the only acceptable outcome of this Board's vote is no rent increases."

#### MATERIAL CONSIDERED BY THE BOARD

In addition to oral and written testimony presented at its public hearing, the Board's decision is based upon material gathered from the 2009 Price Index of Operating Costs for Hotel Stabilized Units in New York City, prepared by the staff of the Rent Guidelines Board, reports and testimony submitted by owner and tenant groups relating to the hotel sector, and reports submitted by public agencies. The Board heard and received written testimony from invited guest speakers on April 30, 2009. Guest speakers representing hotel tenants included Susanna Blankley from the Goddard-Riverside Community Center's West Side SRO Law Project, Jonathan Burke from the East Side SRO Law Project of MFY Legal Services, and Larry Wood from the Goddard Riverside Community Center. There were no guest speakers representing hotel landlords at this meeting but Helen Maurizio, Executive Director of the Associated Hotels and Motels of Greater New York, submitted written testimony.

#### FINDINGS OF THE RENT GUIDELINES BOARD

#### RENT GUIDELINES BOARD RESEARCH

The Rent Guidelines Board based its determination on its consideration of the oral and written testimony noted above, as well as upon its consideration of statistical information prepared by the RGB staff set forth in these findings and the following reports:

- (1) 2009 Mortgage Survey Report, March 2009, (An evaluation of recent underwriting practices, financial availability and terms, and lending criteria);
- (2) 2009 Income and Affordability Study, April 2009, (Includes employment trends, housing court actions, changes in eligibility requirements and public benefit levels in New York City);
- (3) 2009 Price Index of Operating Costs for Rent Stabilized Hotels in New York City, April 2009, (Measures the price change for a market basket of goods and services which are used in the operation and maintenance of stabilized hotels);
- (4) 2009 Housing Supply Report, June 2009, (Includes information on the conversion of Hotels to luxury apartments and transient use, new housing construction measured by certificates of occupancy in new buildings and units authorized by new building permits, tax abatement and exemption programs, and cooperative and condominium conversion and construction activities in New York City); and,
- (5) Changes to the Rent Stabilized Housing Stock in NYC in 2008, June 2009, (A report quantifying all the events that lead to additions to and subtractions from the rent stabilized housing stock).

The five reports listed above may be found in their entirety on the RGB's website, www.housingnyc.com, and are also

for Hotels versus the 11.7% increase for apartments. These disparities resulted in a Hotel Index that was lower than that for apartments.

Prices and costs in all other components in the Hotel Index had similar changes in rates to the same components in the Apartment Index.

Among the different categories of Hotels, the index for "traditional" hotels increased 5.2%, which was significantly higher than increases for both Rooming Houses (1.2%) and SROS (1.6%). The differences between these indices are primarily due to the increased weight placed on the Tax component for "traditional" hotels. Furthermore, there were disparities among the three hotel types in Fuel and Utilities, with Rooming Houses showing a decrease in the cost for both of these components.

Percent Change in the Components of the Price Index of Operating Costs April 2008 to April 2009, By Hotel Type and All Hotels

Spec #	Item Description	Hotel	RH	SRO	All Hotels

#### CHANGES IN HOUSING AFFORDABILITY

For the first time in five years, New York City's economy did not generally improve as compared with the preceding year, with mixed economic indicators, including rising unemployment rates and stagnant Gross City Product, but rising employment levels and declining homeless levels. Citywide unemployment rates (on an annual basis) increased to 5.5% during 2008, after falling for the previous four years. And while the City's Gross City Product increased for the fifth consecutive year, the rate of growth annually fell to almost zero, and fell in the last three quarters of 2008. In addition, although cash assistance levels dropped, applications rose for the third consecutive year, increasing by more than 8%. The number of food stamp recipients is also on the rise, with rates increasing each month since March, as compared to the previous month. And for the third straight year, the number of evictions grew, by 1.3% despite less housing court filings.

EFFECTIVE RATES OF INTEREST

The Board took into account current mortgage interest rates and the availability of financing and refinancing. It reviewed the staff's 2009 Mortgage Survey Report of lending institutions. The table below gives the reported rate and points for the past nine years as reported by the mortgage

available at the RGB offices, 51 Chambers St., Suite 202, New York, NY upon request.

# PRICE INDEX OF OPERATING COSTS FOR RENT STABILIZED HOTEL UNITS

The Hotel Price Index includes separate indices for each of three categories of rent stabilized hotels (due to their dissimilar operating cost profiles) and a general index for all stabilized Hotels. The three categories of hotels are: 1) "traditional" hotels — a multiple dwelling which has amenities such as front desk, maid or linen service; 2) Rooming Houses — a multiple dwelling other than a hotel with thirty or fewer sleeping rooms; and 3) single room occupancy hotels (SROs) — a multiple dwelling in which one or two persons occupy a single room residing separately and independently of other occupants.

The Price Index for all stabilized Hotels increased 3.5% this year, less than half of the 7.4% increase witnessed the year before. The Price Index for Hotels was just 0.5 percentage points lower overall than the increase in costs measured in the Apartment Price Index. Significant disparities between the Hotel Index and the Apartment Index were seen in the Utilities and Tax components. The increase in Utilities for all types of Hotels was 2.0% versus 10.9% in apartment buildings. This difference was due to a double digit increase in water and sewer costs having more weight in the Apartment Index, and declining electricity costs having more weight in the Hotel Index. In addition, Taxes increased 14.1% However, there were indicators tracked in the I&A Study that showed a positive trend during 2008. Homeless levels were down on average in 2008, with the total number of individuals decreasing by 2.2%, and families by 3.5%. Real wages (which have a long lag time in reporting) increased significantly between 2006 and 2007, rising 6.3%. Preliminary findings from the 2008 Housing and Vacancy Survey show that in real terms, the income of rent stabilized tenants increased 1.4% between 2004 and 2007, after dropping 8.6% between 2001 and 2004. In addition, cash assistance cases fell for the fourth year in a row, dropping more than 5% between 2007 and 2008. Average employment levels also rose during 2008, by 1.2%. In addition, housing court filings fell for the third consecutive year, falling by more than 2%.

But while on an annual basis, there were many positive indicators in 2008, some of these took a negative turn as the year progressed. For instance, homeless levels declined at a slower pace during the fourth quarter of 2008 (but nevertheless declined), and employment levels dropped during the same time period. And real wages during the second quarter of 2008 (the latest available figures), declined by 3.9%.

#### CONSUMER PRICE INDEX

The Board reviewed the Consumer Price Index. Table that follows shows the percentage change for the NY-Northeastern NJ Metropolitan area since 2001.

#### HOTEL CONVERSION

Conversion of single room occupancy (SRO) buildings also continued over the past year. SRO owners may convert SRO housing to other uses after obtaining a "Certificate of No Harassment" from HPD. Certificates are down for the fourth consecutive year, falling to 127 in 2008, down from 182 in 2007 and more than 200 in each year from 2004-2006.

#### OTHER RELEVANT INFORMATION

On June 4, 2009, staff released a memo to the Board analyzing hotel data contained in the NYS Division of Housing and Community Renewal's 2008 apartment and building registration databases. Below is the memo in its entirety

This memo is an update to a staff memo released June 4, 2007, which analyzed hotel registration data filed with DHCR in 2005. Staff members recently analyzed the 2008 DHCR registration database for data related to hotels, SROs, or rooming houses (hereafter referred to only as "hotels"). In 2008, 472 buildings that were self-identified as hotels registered units with the DHCR. These 472 buildings contained a total of 22,827 units, of which 17,758 are registered with DHCR as rent stabilized, and 10,577 are non-exempt rent stabilized units.  $^{\rm 27}$ 

Building owners/managers were asked to identify which of their units were temporarily or permanently exempt from rent stabilization laws. In 2008, 371 units were reported as being permanently exempt (1.6% of the total number of hotel units), while 5,300 units were reported as temporarily exempt (23.2% of the total number of hotel units). Units in hotels are most commonly reported as being temporarily exempt because of "Hotel/SRO (Transient)," as was the reason given for 3,754 (70.8%) units. Less common was "Not Prime Residence" (542 units, or 10.2%) and "Owner Occupancy/Employee" (242 units, or 4.6%). For permanently exempt units, 259 (69.8%) were reported as being deregulated due to High Rent/Vacancy Decontrol, while just a few were reported as being deregulated due to substantial rehabilitation or other reasons. In general, units that are temporarily exempt are either rented at what the market will bear, for as little as one night, or rented to government agencies or universities as temporary housing. In addition, 1,510 units were registered with DHCR as "Vacant."

Each building registered with DHCR was also analyzed by the ratio of exempt units to total units. Of the 472 buildings registered in 2008, the average percentage of units in each building that are exempt is 28.6%. The median is 38.0%.

The most recent proviso stipulates that at least 85% of a hotel must be used for permanent residences in order for guideline increases to be taken. In 2008, 5,140 rent stabilized units, housing permanent tenants, were reported to be in buildings that are at least 85% rent stabilized. Of these units, located in 144 buildings, the median reported legal rent (the most a tenant is allowed to be legally charged) was \$977 and the average was \$1,158. Actual rents on these apartments (the amount actually being charged a tenant, which may be lower than legally allowed, or the legal rent, if actual rent paid was not specified in the registration data) were reported as \$705 (median) and \$723 (average).

<sup>26</sup> Institutions were asked to provide information on their "typical" loan to rent stabilized buildings. Data for each variable in any particular year and from year to year may be based upon responses from a different number of institutions.

<sup>27</sup> All data in this memo, except for the total number of units in each building (derived from Dept of Finance and HPD data) is based on owner-reported information as reported to DHCR in their 2008 registration database

B

Number of Units & Median Rent Paid, Median Building Size in Hotel Buildings with 85% or more rent stabilized units, All Hotel Types, 2008

		# of Stabilized	Median # of	Median Stabilize
		Buildings U	Units per Bldg	Rent Paid
Bronx		16	25	\$612
Brooklyn		70	11	\$800
