DEPARTMENT OF HEALTH.

Report for Week Ending April 19, 1913.

NOTABLE INTERNATIONAL CONGRESS ON SCHOOL HYGIENE, AT BUFFALO, AUGUST 25-30TH.

All the leading nations, every state in the Union, every college and university of note in this country, and various other leading educational, scientific, medical and hygienic institutions and organizations, as well as various women's organizations, will be represented at the Fourth International Congress on School Hygiene in Buffalo, August 25-30, according to a preliminary statement just issued by Dr. Thomas A. Storey, of the College of the City of New York, Secretary-General of the Congress.

Mr. Woodrow Wilson, as President of the United States, has accepted the honorary office of Patron of the Congress. The president of the Congress is Dr. Charles W. Eliot, ex-president of Harvard University. The vice-presidents are Dr. William H. Welch, of Johns Hopkins University, formerly president of the American Medical Association, and Dr. Henry P. Walcott, president of the recent International Congress on Hygiene and Demography, and chairman of the Massachusetts State Board of Health.

It is the aim of the organizing committee in charge to bring together at Buffalo a record number of men and women interested in improving the health and efficiency of school children, and to make this Congress—the first of its kind ever held in America—one of direct benefit to each individual community. A program of papers and discussion is now being arranged covering the entire field of school hygiene. There will be scientific exhibits representing the best that is being done in school hygiene, and also commercial exhibits of educational value.

Nor will the entertainment of delegates in any way be neglected. Buffalo has just subscribed \$40,000 toward covering the expenses of the Congress. The Buffalo citizens' committee has planned for a series of social events, including receptions and a grand ball, a pageant in the park, and excursion trips to the great industrial plants, and to the scenic wonders of Niagara Falls.

The Congress is open to all persons interested in school hygiene, who may join as regular active members upon the payment of a \$5 fee. Application for membership should be sent to Dr. Thomas A. Storey, College of the City of New York, New York City.

PROGRESS OF THE "CLEAN-UP" MOVEMENT.

At a meeting held on April 16, 1913, at the American Museum of Natural History, which was well attended by those interested in sanitary work, great satisfaction was expressed in regard to the recent action of the Board of Aldermen in appropriating \$37,000 for the purpose of prosecuting the "Clean Up" campaign inaugurated by Commissioner Lederle. The meeting which marked the opening of the Hall of Public Health of the Museum also inaugurated the second or active stage of the first official municipal clean up New York has ever had, a movement which has excited the greatest interest in many cities throughout the country. At this meeting Dr. Lederle made a strong plea for active co-operation on the part of all citizens. He called attention to the fact, so well known, that it is much easier to prevent disease than to cure it and, incidentally, more pleasant to the public. Of all sanitary problems, the most important is the removal of possible causes of disease, and accumulations of dirt are not only possible but extremely probable causes, which are, at least, fairly certain to furnish the medium through which disease is spread. It has also been proven by sanitary departments throughout the world that filth is one of the removable causes of disease and, being removable, it is the duty not only of public department but of the individual citizens to see that this removable cause is eliminated. Since the project of a municipal clean up has been suggested, it has been said on several occasions that it is the duty of the city departments to perform this work and not the affair of the citizens. The most efficient Health Department and Street Cleaning Department in the world, armed with a perfect set of laws, and backed by absolute authority, could not effectually clean New York City and keep it clean without the active support of its citizens. If we were to attempt to prevent violations of the Sanitary Code by sheer force of authority, it would be necessary to station a policeman or sanitary inspector on every street corner, causing endless confusion and resentment. It is for this reason that the Department of Health has requested civic organizations to aid in the work. It is hoped that three objects will be accomplished. In the first place, that the city will be actually cleaned; secondly, that the death rate will be decidedly reduced; and thirdly, that the public will be educated so that they will keep the city clean.

In the City of New York large quantities of refuse material have collected. Part of the refuse of the city is removed as a matter of routine by the Street Cleaning Department. It is the remaining collections of filth and refuse which the Department of Health purposes to attack in the clean up movement. There are air-shafts choked to the level of the first story windows with piles of rubbish, and there are basements filled with broken barrels, boxes and other ancient accumulations. Not only are such conditions a menace to health, but they also increase the danger of fire.

The Board of Aldermen has also voted \$66,000 to be used in draining the marshes where mosquitoes breed and in otherwise seeking to rid the city, especially the outlying districts, of the pests.

We have had the cleanliness of Germany held up to us as an example too often not to know how thoroughly and efficiently the work of sanitation is carried on in German cities. The streets and parks are immaculate and the houses are wholesome

COMMISSIONER OF RECORDS.

County of New York.
April 24, 1913—One additional Laborer was appointed on April 16, 1913, at a salary of \$720 per annum.

because no rubbish is allowed to accumulate. A German city is not only made clean but stays clean. There can be no question that the way to perform this work most efficiently is to enlist the hearty and voluntary aid of the citizens. The whole subject is largely a matter of public sentiment. It is for this reason that the co-operation of civic organizations, such as women's clubs of all kinds, Boy Scouts, playground leagues and babies' welfare societies, so essential to the success of the plan, has been sought.

INCREASE IN "GERMAN MEASLES."

During the past three months, the city has experienced a marked increase in the number of cases of German measles reported, and the increase has been noticeable, not only in Manhattan but in the Boroughs of Brooklyn and The Bronx. During the first quarter of 1913, 965 cases were reported in Manhattan, 609 in Brooklyn, and 233 in The Bronx. During the entire year of 1912, 697 cases were reported in Manhattan, 633 in Brooklyn, and 182 in The Bronx. Previous to 1904, German measles was not a reportable disease, for the reason that, although contagious and frequently attended by a well-marked eruption, the disease never results in death, its constitutional symptoms never amount to more than slight malaise, and treatment is, generally speaking, unnecessary. The chief interest in the disease centers in the fact that it was formerly confounded with measles to which certain types present some resemblance. Differentiation, generally speaking, presents no difficulties, the bright rose color of the eruption, absence of catarrhal symptoms, slight constitutional disturbance, and enlargement of the post-cervical glands, usually sufficing to distinguish so-called German measles from measles. It must be admitted, however, that in some cases a rise of temperature, even to 101 F., may be present, as may also injection of the ocular conjunctiva, which when complicated by an intercurrent bronchitis may cause some difficulty in discriminating between the two diseases. For the sake of the public, it cannot be too strongly insisted that the term "German measles" is a misnomer. The disease is not measles and, except for the superficial resemblance of the eruption, has no connection whatever with that disease.

COCOA SHELLS.

Under date of April 19, the Commissioner has issued food circular No. 3, defining the attitude of the Department in regard to the use of cocoa shells for food purposes:

Our attention has been called to a circular letter to the confectionery trade, offering for sale "Powdered Cocoa Shells" in car lots or less, with the statement that this "product is guaranteed to be positively pure and gives excellent results in the manufacture of cheap candies and chocolates for which they are usually used." Confectioners are hereby notified that this Department considers the use of cocoa shells in confectionery or in any food or food product an adulteration, and that users thereof for such purpose will be prosecuted.

We are informed that some of our largest manufacturers of cocoa and chocolate burn their cocoa shells in the furnace. There is no objection to the sale of cocoa shells in packages, plainly marked, for the purpose of preparing a beverage therefrom.

DEATH RATE FOR THE WEEK.

There were 1,567 deaths reported during the week ended Saturday, April 19, 1913, with a death rate of 15.22 per 1,000 of the population as against 1,562 deaths and a rate of 15.75 for the corresponding week of 1912, an increase of five deaths and a decrease of 0.53 points. Considering the increase in population this decrease in the death rate is equivalent to a decrease of 55 deaths. The mortality from the infectious diseases, measles, scarlet fever, diphtheria and croup, diarrhoea, influenza and pulmonary tuberculosis was about the same as that of the corresponding week of last year. Typhoid fever and whooping cough showed a slight increase in the mortality, as did the organic heart diseases. The deaths from lobar pneumonia were considerably below the mortality from this cause for the corresponding week of 1912.

Viewed from the point of age grouping, there were 41 more deaths under one year of age; between one and five years of age the mortality was lower by two deaths; between five and sixty-five years it was lower by twenty-two deaths, and above sixty-five years of age lower by eleven deaths.

The death rate for the first sixteen weeks of 1913 was 15.64 as against 15.83 during the corresponding period of 1912, a decrease of .19 of a point.

2. The successful bidder on each lot will be allowed the privilege of subletting any portion or portions of the privileges included within the lot, subject, however, to consent thereto in writing being first obtained from the Commissioner of Docks. The subletting of any portion of the privileges without having first obtained the consent, in writing, of the Commissioner of Docks thereto, shall at once subject the successful bidder to forfeiture of the privileges held by him, at the election of the Commissioner of Docks, who, in the event of any such forfeiture, shall then have the power at any time during the term of the privileges, to revoke and cancel the permit for the exercise thereof and to resell such privileges; and the successful bidder so forfeiting privileges shall be liable to The City of New York for any deficiency resulting from such resale.

3. The successful bidder on each lot will be required to:

(c) Pay to the Department of Docks and Ferries, at the time of sale, 25 per cent. of the amount of the annual fee or compensation to be paid The City of New York for said lot, as security for carrying into effect the terms of the sale, which 25 per cent. will be applied to the payment of the quarterly installment of such fee or compensation first accruing under said agreement when executed, or will be forfeited to The City of New York as liquidated damages if the successful bidder neglects or refuses to execute the agreement, with good and sufficient bond or obligation of a surety company authorized by law to act as surety in the sum of the annual fee or compensation for the lot to be approved by the Commissioner of Docks for the faithful performance of the terms and conditions thereof, within five days after being notified that the agreement is prepared and ready for execution at the office of the Department of Docks and Ferries, Pier A, foot of Battery place, North River.

(d) Arrange with the Department of Water Supply, Gas and Electricity for the water required in connection with the privileges, and must pay to said Department the regular water charges for the water used. All gas installation will be by and at the expense of the successful bidder, subject to the rules and regulations of the Department of Water Supply, Gas and Electricity, and the gas must be paid for by the successful bidder. Any electricity required by the successful bidders other than the regular lighting of the terminals, must be paid for by the successful bidders. No installation of water, gas or electricity shall be attempted without consent being first obtained from the Department of Water Supply, Gas and Electricity and from the Commissioner of Docks.

4. The Commissioner of Docks expressly reserves the right to:

(a) Revoke, cancel and annul any permit issued to or agreement made with any successful bidder at this sale who shall fail or neglect to observe, keep and perform any of the terms, conditions or limitations of such permit or agreement.

No bid will be received from any person who is in arrears to the Department of Docks and Ferries, or to The City of New York upon debt or contract, or who is a defaulter of surety or otherwise upon any obligation to the Department of Docks and Ferries or to The City of New York.

NOTICE TO BIDDERS AT SALES OF OLD BUILDINGS, ETC.

TERMS AND CONDITIONS UNDER WHICH BUILDINGS, ETC., WILL BE SOLD FOR REMOVAL FROM CITY PROPERTY.

THE BUILDINGS AND APPURTENANCES thereto will be sold to the highest bidder, who must pay cash or certified check, drawn to the order of the Comptroller of The City of New York, and must also give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of \$50, the sum of \$50 shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but unfinished at the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the building or buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal, nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or any of these conditions shall forthwith void the sale and cause immediate forfeiture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing therein or permitting the occupancy of any such building by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

The sale will be as of the condition of the property on date of delivery thereof to the purchaser. The City of New York will not be responsible for any change or loss which may occur in the condition of the buildings, or their appurtenances between the time of the sale thereof and the time of delivering possession to all tenants. The sale and delivery to purchaser will be made as nearly together as the circumstance of vacating the structures of their tenants will permit.

All the material of the buildings, sheds, walks, structures and cellars of whatsoever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the exterior walls of the buildings and their foundations and the sidewalks and curb in front of said buildings, extending within the described area shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point. The exterior walls and their foundations shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building. Where there is no curb the elevation of the surrounding ground shall be considered curb level. All wells, cesspools, sinks, etc., existing on the property must be filled to the level of the surrounding ground with clean earth.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street, and the opening of the main sewer in street shall be properly closed in compliance with the directions of the Bureau of Sewers in the Borough in which the buildings are situated, and furnish the Bureau of Sewers with a certificate from the Department of Finance with a work has been properly performed.

The permit for all opening in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances, or any part thereof, within thirty days from the day of possession will work forfeiture of ownership of such buildings, appurtenances or portion as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidder's assent to the above conditions being understood to be implied by the act of bidding and The City of New York will, without notice to the purchaser, cause the same to be removed and the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and must be completed within thirty days from the day of possession, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Where party walls are found to exist between buildings purchased by different bidders, the materials of said party walls shall be understood to be equally divided between the separate purchasers.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furrings, plaster, chimneys, projecting brick, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beam-holes, etc., bricked up, and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs and adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the contractor.

The Comptroller of The City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids, and it is further
