EXECUTIVE DEPARTMENT.

PROCLAMATION.

To the People of The City of New York:

Pursuant to the request of the Honorable the Board of Aldermen, as expressed in a resolution offered by the Hon. Reginald S. Doull, I hereby direct that none but patriotic airs be played by the bands of music in the public parks and on the public piers on July 4.

I further direct all heads of Departments of the City Government to display the national ensign on their respective buildings from sunrise to sunset of that day.

And I urge, as the most appropriate manner of celebrating the anniversary of the Declaration of Independence, that every citizen of New York display the national colors at his residence and his place of business.

To which I have set my hand and affixed my seal of office this 25th day of June, nineteen hundred and eight.

(Signed) GEO. B. McCLELLAN, Mayor.

BROOKLYN RAPID TRANSIT COMPANY,
85 CLINTON STREET,
BROOKLYN, N. Y., December 14, 1907. }

Hon. WILLIAM MCCARROLL, Commissioner, Public Service Commission, 154 Nassau Street, New York City:

DEAR SIR—In response to your request for more specific answers to certain questions asked at the last hearing before Mr. Ivins in reference to the number of cars available for service, I will state that in November, 1906, there were approximately 1403 surface cars available for winter service, and in the corresponding month of this year there were 1604 cars, an increase of 201 cars, 100 of which we have just completed and put in service, and the other 101 being large convertible cars, with an increased capacity over the ordinary longitudinal seat car of 33 1-3%. While there has been an increase of 201 cars, there has been an increase of 33 1-3% in the seating capacity of 101 of these cars, which would make the increase in cars 14.3% and in cars reduced to the seating capacity 16.8%.

We have available for service 827 elevated cars. There has been no increase in the number of cars, although we are now receiving 100 new cars, which we hope will be available for service at the rate of one per day beginning January 1st next.

In reference to the operation of the above cars, based on the month of November, there has been an increase in the car mileage of over 8% and a decrease in the passengers carried of about 1%.

The other matter referred to at this hearing was the question of heat regulations, and this is covered in the copy of our orders handed to you personally the other day.

Yours truly,
(Signed) J. F. CALDERWOOD.

FINAL ORDER (No. 156).

On motion by Commissioner Bassett, duly seconded, a Final Order (No. 156) was adopted, ordering:

(2) That said Company construct an additional stairway from the gallery landing to the northerly side of Broadway at the Gates Avenue Station and widen the stairway now leading from the gallery to the station platform as much as the side stringers will allow; this work to be completed by or before April 10, 1908.

BROOKLYN LOOP LINES—CHANGE OF GRADE, CENTRE STREET LOOP.

Abel E. Blackmar, Counsel, and Henry B. Seaman, Chief Engineer, entered the meeting at this point, and a general discussion took place as to changes in the plans of the Brooklyn Loop Lines. Henry B. Seaman, Chief Engineer, made a statement as to certain changes which he considered should be made in the Centre Street Loop, as follows:

That grade be reduced so as not to exceed 3% (present plans show as high as 5.5%).

That the Leonard-Franklin Street and the Howard-Grand Street Stations be merged into one large station at Canal Street. The Canal Street Station will then have all four tracks on a level whereas the abandoned stations were designed as double-deck stations.

The four tracks of the Centre Street loop will be placed on a level instead of the loop being double-deck, the steep grades to connect the upper and lower track elevation.

A line to be projected from the Manhattan Bridge, through Canal Street to Desbrosses Street Ferry at the North River. This line to be constructed at such elevation as to run beneath all north and south bound lines whether now constructed or proposed for the future, and to have points of transfer at every intersection with these north and south bound lines.

The connection from the Williamsburgh Bridge through Delancey Street, at present designed for Grand Street, to be changed to Spring Street, the elevation of which is sufficiently high to permit a large portion of the construction to be made above water line, and transfer could be made with the present subway station at Spring Street.

Advantages.

All grades exceeding 3% being eliminated, will permit of more rapid and safe operation. The traffic capacity of the loop will thereby be largely increased. It is expected that a modification of the depth of the Centre Street line will permit of its completion in considerably less time than by the present plans.

On the Centre Street loop the four tracks of Canal Street station will be on a level, thereby giving more convenient access to the street surface.

The crosstown line through Canal Street to the North River permitting of transfers to all north and southbound lines, is a general outline of policy which considers that the East River Bridges are streets and should be extended to the North River. This should permit transfers to all north and south bound lines, enabling passengers from Brooklyn to reach any point in Manhattan and not be confined to the distribution of any particular loop line. It is considered advisable that a general scheme of transportation should be laid out with consideration for its general usefulness between all points of the city, rather than favoring any particular locality or individual corporation. It might be mentioned that the Centre Street station of this Canal Street cross-town line would connect with the Centre Street subway, the Lafayette Street subway and the proposed subway on Broadway.

The extension of the Manhattan Bridge across Manhattan would complete a continuous street from Prospect Park to the North River.

On motion, duly seconded, it was thereupon

Resolved, That the Counsel and the Chief Engineer be authorized to take up with the contractors of the Brooklyn Loop Lines the matter of changes and suggestions by the Chief Engineer, referred to the Commission.

Ayes—Commissioners McCarroll, Bassett, Eustis.

Nays—None.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done.
