Office of the Chief Engineer, New York, July 29, 1910.

Hon. CALVIN TOMKINS, Commissioner of Docks:

Sir—I have the honor to submit the following report of work done under my charge and supervision for the quarter ending March 31, 1910.

North River.

Battery Landing, North River—The Department force has constructed a platform outside of the Battery wall, easterly of the existing easterly landing platform, 110 feet long by 35 feet wide. This work was begun on the 7th of January, 1910, and finished on the 8th of February, 1910. The Department force has also joined the two existing platforms by constructing a platform from one to the other. Begun March 11, 1910, and finished March 30, 1910.

Pier "A," North River—This pier, upon which are placed the executive offices of the Department, has been maintained and kept in repair from time to time as required during the quarter. The boat landing situated in the vicinity of the pier, with the float inside, has been maintained and kept in repair.

Cedar St. Section, North River—During the quarter the Department force has been engaged in repairing the planking on the marginal street at this section.

Liberty St. Section, North River—At this section of the waterfront the Central Railroad Co. of New Jersey has made extensive improvements, which included the construction of a ferry terminal building with the necessary ferry structures.

This work was done under an action of the Commissioner of Docks dated December 10, 1902, B. O. 919, and was completed on the 2d of September, 1909. The completion of the ferry structure did away with the necessity for the use of the outer end of Pier (new) 11 for ferry purposes. This pier was partially constructed prior to its use for the ferry and upon the removal of the ferry rack, work was resumed towards the completion of the outer end of the pier and is in progress. This pier was originally begun on the 23d of September, 1904, but the work was stopped while the construction of the ferry premises was in operation.

Pier 39, North River—The removal of the steamship company which had for some time occupied this pier to one of the new piers in the Chelsea section, and the subsequent lease of the pier to the Central Railroad Co. of New Jersey, necessitated extensive repairs to this pier, which were begun on the 25th of February, 1910, by the force of the Department and are still in progress.

Pier 42, North River—The vacation of this pier by the French Line steamers moving to one of the piers in the Chelsea section, enabled the Department to make extensive alterations and repairs to this pier, and a contract (No. 1199) has been awarded for removing and reconstructing the existing pier and extending the pier at the foot of Morton st. (North River), known as Pier 42. Work was begun by the contractor on March 18, 1910, and the work is still in progress.

Gansevoort Market Piers, North River—A new plan for the improvement of the waterfront in the vicinity of Gansevoort Market was adopted by the Commissioner of Docks on the 11th of June, 1909, and was approved by the Commissioners of the Sinking Fund on the 30th of June of the same year. This plan provides for the construction of three piers between Piers 52 and 53, North River, in the vicinity of the New West Washington Market; these piers to be known as Gansevoort Market Pier South, Gansevoort Market Pier Middle and Gansevoort Market Pier North. During the present quarter, namely, on the 14th of March, 1910, work was begun on the most northerly of these piers, the Gansevoort Market Pier North, by the force of the Department, and the work is still in progress.

Chelsea Section, North River—The principal work being done on the North River by the Department during the past quarter has been that at the section of the waterfront extending from Bloomfield st. northerly to W. 23d st. This section is known as Chelsea Section, and the work is being done under a resolution of the Board of Docks, dated December 28, 1900. Along this stretch of waterfront had previously been built nine piers, known as Piers 53, 54, 56, 57, 58, 59, 60, 61 and 62, North River, representing the highest type of pier construction, the piers being backed with the bulkhead wall for the entire length of the section. On these piers has been constructed large steamship terminal sheds, and the work on the sheds proper, with the exception of that upon Pier 53, has been completed as follows: Piers (new) 54 and 56, North River, completed December 14, 1909; Piers (new) 57, 58 and 59, North River, completed December 21, 1909; Piers (new) 60, 61 and 62, North River, completed December 29, 1909.

Pier 53—A contract (No. 1156) having been awarded during a previous quarter for preparing for and refendering Pier 53, North River, and preparing a foundation for street front of bulkhead building, and for preparing for and building freight shed on Pier 53, near the foot of Little W. 12th st., with lateral extension on the

adjacent bulkhead platform, the work on this contract has been in progress and is approaching completion. A contract (No. 1150) having been awarded during a previous quarter for fitting up the sheds on these piers with the necessary equipment for their use by the several steamship companies that have leased the piers, and in accordance with the agreements contained in the leases, work has been in progress under the contract. This contract includes all the mechanical and electrical equipment for the nine piers included in the section and will be completed within a given time after the completion of the freight shed on Pier 53 provided for in Contract 1156.

Pier at 39th St., North River—The work of repairing this pier by the force of the Department is still in progress. The work was originally begun on the 7th of September, 1909.
